Andrus, an anti-abortion Democrat, said Monday he has not received the bill and gave no indication whether he would sign it.

The proposed Idaho law would prohibit abortion as a means of birth control. In effect, it would ban abortion except in cases of rape or incest, with some restrictions, and severe fetal deformity or threat to the life or health of the mother.

''When I found that out, I immediately thought, 'I'm not eating any more Idaho potatoes,'' said Dempsey, who describes herself as the ''Republican, conservative, pro-choice'' candidate in the 8th District Michigan Senate

race.

Dempsey said she sent a mailgram to Andrus Friday morning ''letting him know that if he did not veto this legisaltion that I'm sure there would be a boycott of Idaho potatoes throught the country.''

She said she has an appointment with Mike Mitchell, the governor's chief of staff, who she said is ''as close as I can get to the governor.'' To make her point, she said she will carry a half-empty 5-pound bag of Idaho potatoes.

#90085u1886 03/26/1990 ~United Press International

NEW YORK (MARCH 26) UPI - As the city mourned the loss of 87 people in a Bronx social club fire, garment workers Monday commemorated the deaths of 145 workers in a shirt factory blaze that sparked massive reforms in conditions at sweatshops.

The pall of Sunday's tragedy at the Happy Land social club in the Bronx hung over the solemn ceremony marking the Triangle Shirtwaist factory fire in lower Manhattan.

Sunday's Bronx fire - the city's deadliest since the Triangle blaze - happened exactly 79 years to the day after the garment factory fire.

''I came here today prepared to talk about an event that happened 79 years ago yesterday,'' Mayor David Dinkins said, but with vicious irony yesterday on the 79th anniversary of the Triangle Shirtwaist fire, history repeated itself.''

Authorities said the Bronx social club arson fire will likely fuel a reform crusade against illegal social clubs reminiscent of the one spurred by the Triangle blaze, which prompted major reforms in workplace safety at sweatshops.

Officials said Sunday's blaze at the Happy Land social club will force the city finally to confront the existence of the more than 700 illegal social clubs operating in the five boroughs.

Dinkins said the fire in an illegal Bronx social club ''was apparently set deliberately and maliciously.''

''Within minutes the Happy Land Social Club - a name that will become synonymous like the Triangle Shirtwaist fire with catastrophe - has become synonymous with unspeakable horrors,'' he said.

Speaking from a flatbed trailer, Dinkins recalled the horrifying scene he witnessed in the Bronx Sunday of ''bodies lined along the wall like so many wax figures.''

Dinkins called it ''ironic'' that many of those who died in the Triangle Shirtwaist factory blaze, were like those who died in the the social club fire ''recent immigrants to our land.''

''They came to America in search of a better life. Early yesterday morning their American Dream became a fatal nightmare.''

#90085u1896 03/26/1990 ~United Press International

(MARCH 26) UPI - An anti-Communist party launched only 18 months ago appears to be the winner in Hungary's first free multi-party elections in more than four decades. Returns today show the Hungarian Democratic Forum capturing about one fourth of the ballots cast in yesterday's first-round parliamentary elections. Voters rejected the nation's old-line Communist Party, giving them only three percent of the vote.

Reports of violence in South African abound today... with word of two people killed by police gunfire in a black township south of Johannesburg. More than 350 people reportedly were injured when police in Sebokeng opened fire on a crowd of marchers. Eight people were in critical condition. Police used tear gas to disperse crowds in nearby Sharpeville. Two buildings were reported damaged last night in a grenade attack in Soweto.

The White House is keeping pressure on Moscow for moderation in resolving the crisis in Lithuania. Spokesman Marlin Fitzwater today repeated the almost daily U-S call for ''a peaceful dialogue'' between the Kremlin and the secession-minded Baltic republic. Fitzwater also warned that Moscow's escalating war of nerves in Lithuania- quote- ''could have adverse international repercussions and could be counterproductive for U-S-Soviet relations.''

British Prime Minister Thatcher says a united Germany will alter the European balance of power. But in an interview published today in a West German magazine, Thatcher says she doesN'T fear the prospect of a reunified Germany ''any more than other Europeans.'' The British leader also said a united Germany must remain within NATO, but that some Soviet troops could remain in what is now East Germany. Thatcher meets with West German Chancellor Helmut Kohl later this week in Britain.

#90085u1912 03/26/1990 ~United Press International

(MARCH 26) UPI - The U-S Supreme Court will hear arguments in the fall in a case pitting women's rights against job safety. The high court today agreed to decide if employers can ban women of child-bearing age from performing certain jobs because of the possibility the work could lead to birth defects. A group of Wisconsin women are seeking the review of an appeals court ruling upholding such a ban.

In other action, the justices refused to hear a discrimination claim in which a man was turned down for a credit card because he was NOT a U-S citizen. An accountant who was a native of India, but a permanent resident of the United States, charges a Louisiana bank discriminated against him when it refused to issue a credit card. At issue is a law which grants all residents the rights to- quote- ''make and enforce contracts... enjoyed by white citizens.''

-30- 1019

#90085u1920 03/26/1990 ~United Press International

WASHINGTON (MARCH 26) UPI - Persons found guilty of murdering white people are more likely to receive the death sentence that those who commit murder against blacks, a government report said Monday.

The report, prepared by the General Accounting Office, the congressional investigative arm of Congress, was drawn from existing research on capital punishment cases.

It indicates that in ''82 percent of the studies, those who murdered

whites were found to be more likely to be sentenced to death than those who murdered blacks.''

The report also shows that in three-fourths of the studies that examined race, black defendants were more likely to receive the death penalty in murder cases than white defendants. However, the report cautions that the studies are not representative of all sentencing results.

Still, the report strongly suggests that prosecutors and juries discriminate against blacks in leveling charges and meting out sentences, despite an 18-year-old Supreme Court ruling barring the arbitrary imposition of death sentences.

''Our synthesis of the studies shows a pattern of evidence indicating racial disparities in the charging, sentencing and imposition of the death penalty,'' the report said.

The report was prepared by the GAO to comply with a 1988 anti-drug abuse law and made available Monday.

But its conclusions do not reflect sentencing patterns following passage of the law because the reviewed material predates 1988.

Two years ago the Supreme Court upheld a Georgia murder conviction in which the felon, who is black, used statistical sentencing figures to show that he was unfairly sentenced to death. The court held that numerical challenges to sentences were inappropriate and unfounded.

In a more to overturn the decision, Sen. Edward Kennedy, D-Mass., has introduced a bill that would allow defendants to introduce statistical evidence to contest sentences. The Senate is expected to act on the bill this year.

A flurry of bills have been introduced in Congress to streamline the cumbersome death sentencing appeals process that has resulted in clogged prisons and frustrated state officials in carrying out death sentences.

The GAO report suggests that racial disparites may contribute to the disproportionate number of blacks on death row.

''The analyses show that after controlling statistically for legally relevant variables, differences remain in the likelihood of receiving the death penalty based on race of victim,'' the report says.

#90085u1925 03/26/1990 ~United Press International

NEW YORK (MARCH 26) UPI - American Telephone & Telegraph Co. announced

agreements Monday under which the communications giant will enter the general credit card business.

The company said subsidiary AT&T Universal Card Services Corp., which will be based in Jacksonville, Fla., had signed five-year agreements with Synovus Financial Corp., a Columbus, Ga., financial services company, and its card processor unit, Total Systems Services, Inc., for the new AT&T Universal Card.

Rather than being offered as a separate card, the new card will be offered with either Visa or MasterCard affiliation. AT&T said the card will be issued by Universal Bank, another wholly owned subsidiary of Synovus.

Paul Kahn, a former First Chicago Bank senior vice president who was hired last May to be president of the AT&T subsidiary, indicated at a news conference that the new card would be aimed at replacing "single-purpose" cards, such as those issued by oil companies and department stores.

Kahn said extensive AT&T research had shown "more and more people don't want their wallets bulging with cards. They want to carry fewer cards and they want these cards to do more for them."

He said, "The consumers are keeping the general-service charge cards, which are now good at most gas stations and department stores, and eliminating or not using the single-purpose cards."

The new universal card, Kahn said, "is an all-in-one card to meet the lifestyle of American consumers. It's a card that combines a telephone calling card and a general-purpose credit card." "We clearly think AT&T is going to be a major player (in the credit card industry)," Kahn said.

The AT&T card is the second to be launched by a communications company in the last two months. Competitor US Sprint in late January launched a general credit card with Visa using direct mail advertising.

It is a general purpose credit card combining all the features of the Visa gold card with those of the US Sprint gold card, said Ron Greene, managing director of Devon Direct Marketing and Advertising, a Malvern, Pa., firm that launched the Sprint Visa card in a direct-mail campaign. In a telephone interview, Greene said, "The response has been even greater than anticipated." He declined to give any specific numbers.

Despite repeated questions, Kahn declined, for what he called competitive reasons, to disclose either specific terms of the AT&T agreements or how much was being invested in the new effort and its promotion.

He said card applications were being mailed out Monday to that portion of AT&T's 70 million customers who passed a creditworthiness screening. The

executive declined to say what the portion was.

As an inducement, AT&T said it will eliminate the payment of any annual fee for life to those customers signing up in 1990. Those using the new card also will be given a ten percent discount on all AT&T long-distance calls, both domestically and internationally, Kahn said.

Those choosing the new card with Visa and MasterCard would be able to obtain cash at nearly 300,000 banks and 200,0000 automated machines worldwide, the executive said.

For those who defer payment of their monthly bills, AT&T will charge 18.9 percent interest, which is less than the rate charged to 90 percent of the estimated 78 million credit card customers by the top 25 credit card companies, Kahn said.

Under the agreements, AT&T will have the right to purchase up to 1.5 million newly issued shares of Total Systems Services common stock, based on the number of the new cards processed as well as other factors. Total Systems Services currently has 15,887,272 shares of common stock outstanding.

Kahn said that half of the 168 management employees of AT&T Universal Card Services Corp. had been recruited from the credit card industry outside of AT&T.

BY VERNON SCOTT

HOLLYWOOD (MARCH 26) UPI - If ever there were a candidate for child actor's syndrome, the tragedy of post-pubescent burnout, it was Diane Lane.

Lane, at 13, was the pouty star of ''A Little Romance.'' Actually she began her acting career much earlier. At 6 she appeared in the Greek classic ''Medea'' in New York. Thereafter, she spent six years touring the world in such plays as ''Electra,'' ''The Trojan Women'' and ''As You Like it.''

Her classical training continued in ''The Cherry Orchard'' with Joseph Papp's Lincoln Center productions.

The precocious youngster suffered through her parent's divorce, but continued to work in movies, starring in ''Touched by Love,'' ''Cattle Annie and Little Britches'' and with Burt Lancaster and Rod Steiger in ''Streets of Fire'' and in ''The Big Town.''

Currently she is starring in 20th Century Fox's ''Vital Signs,'' playing a medical student.

While she has grown up in the public eye, Lane kept a low profile. A New York native, she established homes in Georgia and New Mexico with

husband-actor Christopher Lambert.

She has managed to avoid scandal, drugs and public emotional problems.

Her performances in ''The Outsiders,'' ''Rumblefish'' and ''The Cotton Club'' drew excellent reviews. She more than held her own in the recent TV series ''Lonesome Dove.''

Today at 25, Lane is poised, mature and anticipating a long career.

Relaxing in a suite at a Sunset Strip hotel, the young actress said she was aware of the pitfalls of childhood stardom. After 18 films, she thinks any hidden perils would have surfaced by now.

''By the time I was 15, I'd already been exposed to a lot of work-for-work's sake in the theater,'' she said. ''I didn't know anything else. It was my raison d'etre.

''It was my ego food, what every kid needs to grow up feeling like they mean something in this world. My parents split up and I needed my own identity.

''I don't take the full credit. I probably could have been a wacko by now. I had a great father and great mother.

''I feel blessed, even though sometimes I may have been very bored or feeling on the outside of things in having missed the glamorous part of being a movie actress.

''I never reached a point where I thought I had it made. You wake up with yourself after you've reached a certain point in a career and feel you've been fooled by your own desires.

''This business requires a kind of child-like innocence, plugging away at your dream.

''But also you've got to be tough as nails and a little bit cynical to be able to stick around long enough to get your dream. Otherwise, you'll die. They'll kill you in a sense. Even if you get your dream - an Academy Award in your first performance or become a major star - you become a bullseye to be shot down.

''When you gain notoriety you become an institution that needs to be destroyed, unless you're an underdog. I have this underdog theory about myself. You just can't give up or be discouraged. You hang in there.''

Asked exactly what her dream is, Lane shook her head and smiled.

''I don't know. I suppose it's to receive recognition for my potentials. I don't want to be the flavor of the month. I had a taste of that aspect of Hollywood, but I didn't know what was happening. You have to get through it and come out the other side to understand how you can be a fad.

''When that happens, you must realize it is the first domino in a long career - if you're smart.

''I look back and realize I'm still up and coming after making movies for a dozen years. Before that it was eight years of theater. And I find it hard to believe there are still a lot of people who don't know what I can do.

''They pat me on the back and make me feel like a happy puppy and I wag my tail and tell myself, 'I did good and somebody loves me.' But another part of me gets upset when I audition for young hotshots, my peers, and they ask me, 'OK, so what have you done?'

''I realize this will be happening to me all the way through my career. If I'm still kicking the can around here when I'm 50, people will still ask me what I've done. And I'll just hand 'em my resume and tell them to call.

''My focus in life now is concentrated on work. I'm a perfectionist and believe you can never care too much about the work - attaining a character without any doubts. I haven't achieved that yet and when I do maybe that will be when I get the recognition that we all seek.''

#90085u1956 03/26/1990 ~United Press International

LOS ANGELES (MARCH 26) UPI - A former live-in lover of Liberace testified Monday that shortly before four people were slain in 1981 he heard the man on trial for the murders vow to bring to ''their knees'' people who robbed him of drugs, money and jewelry.

Scott Thorson said he heard Eddie Nash, a former nightclub owner and convicted drug dealer, make the threat a bodyguard left Nash's home for the house in Laurel Canyon where the four people were savagely beaten to

death.

''He said he would have them all on their knees and teach them a lesson, ... that they would never steal from anyone else again,'' said Thorson, a key prosecution witness in the trial of Nash, 60, and the former bodyguard Gregory Diles, 41.

Nash's attorney attacked Thorson's testimony, calling it a ''web of lies.''

Prosecutors contend the four people were murdered on July 1, 1981, at the behest of Nash, who allegedly blamed some of them for robbing him of $1 million in drugs, jewelry and cash at his Studio City home.

Thorson testified he was a frequent visitor to Nash's home, where he and Nash would spend up to several days at a time ''free-basing'' cocaine.

He testified last week that he heard Nash and Diles beating the late porn star John Holmes in Nash's bedroom. He said he also heard Nash threaten to kill Holmes' family if Holmes refused to help find the people who had robbed him.

When Diles and Holmes left Nash's home, Thorson said Nash told him, ''John (Holmes) had set up the robbery and he ordered Mr. Diles to take (Holmes) up the street'' to the house on Wonderland Avenue in Laurel Canyon.

Four people were bludgeoned to death at the house. Those murdered were William Deverell, 42; Joy Miller, 46; Barbara Richardson, 22; and Ronald Lanius. Lanius' wife, Susan, 25, survived a beating, but sustained brain damage and was unable to testify. Deverell and Lanius had allegedly robbed Nash.

While Nash normally generally did not talk of the slayings, Thorson said, there times where Nash ''would be up four or five nights free-basing and he would run a little bit with his mouth.''

At one such time, Thorson said Nash told him, ''Things had gotten out of hand. ... It had turned into a bloody mess.'' But Nash never expressed remorse, Thorson said.

He said Nash told him the robbers took five pounds of cocaine, two pounds of heroin, $165,000 in cash and a ''couple hundred thousand dollars'' in jewelry.

The defense claims Thorson came forward as a witness in 1988 in return for leniency for a robbery conviction.

Holmes, a star in the pornographic film industry, was tried and acquitted of the murders in 1982. He died of AIDS in March 1988 at age 43.

Thorson filed a palimony suit against Liberace in 1982, claiming that in return for serving as the performer's chauffeur, travel secretary, animal trainer and live-in lover, the performer promised him $70,000 a year for life. The suit was settled out of court in 1984.

Nash and Diles have pleaded innocent. If convicted of the four counts of murder and one charge of attempted murder, both men men could be sentenced to death.

#90085u1965 03/26/1990 ~United Press International

NEW YORK (MARCH 26) UPI - A Cuban immigrant who turned a packed illegal Bronx social club into a smoky tomb for 87 late night revelers knew he was condemning the building's occupants to death when he torched it, authorities charged Monday.

Julio Gonzalez, 36, accused of the worst mass slaying in U.S. history for touching off the Sunday morning fire, was familiar with the cramped layout of the Happy Land social club and realized the building was a firetrap,

Bronx District Attorney Robert Johnson said at a news conference.

Gonzalez, described as a jilted lover bent on revenge, allegedly set afire a dollar's worth of gasoline in the social club's entrance, sending thick black smoke up to the second floor. Unable to escape, 87 of the club's patrons were asphyxiated or burned to death.

The fire scene shocked even veteran rescue workers and firefighters, who described blindly stumbling over bodies heaped on top of each other when they first entered the building in the East Tremont section at 3:41 a.m. Sunday morning.

Gonzalez was picked up Sunday afternoon at his 5-by-10-foot rooming house apartment by a police lieutenant and two detectives who roused him from his sleep. He made a confession and then wept, said Lt. Raymond O'Donnell, a police spokesman.

''Basically, he's saying he did it,'' O'Donnell said. ''He is remorseful. He has been crying.''

Gonzalez was charged with 87 counts of second-degree murder for showing ''depraved indifference to human life''; 87 counts of felony murder; one count of attempted murder; and two counts of arson.

''Gonzalez forced the occupants of the club to choose between remaining inside or breaching a wall of flame at the doorways,'' Johnson said.

Gonzalez was being held without bail under a suicide watch in the city jail on Rikers Island. Authorities said he had no police record since coming to the United States in 1980.

Gonzalez's neighbors in the run-down section of the Bronx described him as a quiet man who kept to himself.

The city Monday began a massive crackdown on illegal social clubs, hoping to prevent a repeat of the ''gruesome circumstances'' of the Happy Land blaze, the deadliest in New York since flames roared through the Triangle Shirt Waist factory exactly 79 years earlier, killing 145 people.

Twenty special teams composed of a 100 police officers, firefighters and building inspectors swooped down overnight on 237 illegal social clubs known to authorities, said John Mulligan, an assistant fire commissioner.

Of the clubs inspected, most were vacant, probably because those types of establishments usually are closed on weeknights, and some were apparently no longer social clubs, he said. Fifteen were operating as nightspots and were ordered closed.

Mayor David Dinkins, who had been visibly shaken after touring the smoldering ruins of the Happy Land while firefighters pulled out bodies and laid them on the sidewalk beneath pale blue sheets, vowed Monday to close all the city's illegal social clubs.

''Today as the city grieves over this tragedy, we are haunted by the realization that it is a nightmare that could have been prevented,'' Dinkins said at a news conference with other top city officials.

Johnson said Gonzalez told police he drank two beers at the club's bar, and then started an argument with Lydia Feliciano, a ticket-taker at the club whom police described as Gonzalez's ex-girlfriend.

Gonzalez and Feliciano apparently argued over renewing the couple's relationship, Johnson said. A club bouncer then ejected Gonzalez from the building.

''It was made clear to him that he was not welcomed there,'' Johnson said. Gonzalez went to a nearby gas station where he persuaded an attendant to fill up a small container with a dollar's worth of gasoline.

Johnson said it was unclear whether the unidentified gas station attendant had committed an illegal act by filling the container, but he told reporters the attendant was being treated as witness, not an accomplice.

Gonzalez returned to the club, but hesitated outside when he saw a potential witness. He pretended to make a phone call until the person left Johnson said.

He then tossed the gasoline into the entrance of the club, igniting it and watching it burn from the outside. ''He did watch for some period of time '' Johnson said.

He said an employee of the club told police Gonzalez had threatened to ''shut this place down'' just before he left the club to buy the gasoline.

Gonzalez was one of the 125,000 immigrants who came to the United States in the Mariel boatlift from Cuba. He arrived on May 31, 1980, landing at Key West, Fla., said Verne Jervis, a spokesman for the Immigration and Naturalization Service in Washington.

Though some of the Mariel refugees were criminals released from Castro's prisons, Gonzalez apparently was not in jail at the time he left Cuba, Jervis said. But he added that Gonzalez had told authorities he spent three years in a Cuban prison from 1971 to 1974 for being AWOL from the army.

Gonzalez was sent to processing camps in Wisconsin and Arkansas before

being released on Feb. 21, 1981. INS has had no contact with him since that time, Jervis said, even though Gonzalez has been eligible to apply for permanent residency since he was released in 1981.

Jervis classified Gonzalez's status as a ''parolee,'' which he called ''a limbo'' state. He said Gonzalez was eligible to work in the United States and could remain in the country as long as he wanted.

In addition to Gonzalez, police believe only four other people - including Feliciano, the club's disc jockey, the owner's wife and a club bouncer - survived the blaze.

The club was ordered closed in November 1988 by the Buildings Department. But it continued to operate, without a liquor or cabaret license, catering mostly to Hondurans and other Central American immigrants.

Less than 20 minutes after the blaze began, horrified firefighters discovered nearly 20 bodies on the club's ground floor and found the rest upstairs, where many still had glasses in their hands and some had their legs entwined in bar stools, authorities said.

Firefighters, who found flames leaping out the entrance when they arrived, said at least one couple was holding hands and some were still seated in chairs.

Some were crushed in a stampede to get out, but Fire Commissioner Carlos Rivera said most victims died on the second floor from smoke inhalation. The club's rear windows were bricked up and the front window was barred.

''The smoke was so heavy you couldn't see anything,'' said Frank Curtin, one of the first firefighters to arrive at the scene. ''We were actually stepping on bodies downstairs before we realized we had people in there.''

The bodies of 61 men and 26 women, more than half of them under the age of 25, were pulled from the club. Many of the victims were related.

The 87 dead made the arson fire the worst mass slaying in U.S. history, greatly surpassing the 45 people killed, including 38 elementary school students, on May 18, 1927, by dynamite explosions at the Bath (Mich.) Consolidated School.

By Monday afternoon, Red Cross workers had identified all but one of the bodies, said Ellen Borakove, a spokeswoman for the medical examiner's office.

Authorities took instant photographs of the bodies and showed them to family members at a nearby school for identification.

#90085u2020 03/26/1990 ~United Press International

CAIRO, EGYPT (MARCH 26) UPI - Foreign Minister Esmat Abdel-Meguid said Monday he has been reassured that the U.S. position on the status of Jerusalem remains unchanged following a Senate vote declaring the city the Israeli capital.

''We have received assurances from the U.S. ambassador that the position of the U.S. administration on Jerusalem remains unchanged,'' Abdel-Meguid said.

The Arab League, Iraq and the Islamic Conference joined Kuwait and the Palestine Liberation Organization Monday in condemning the Senate vote last week that declared a unified Jerusalem as the capital of Israel.

Israeli troops took Arab East Jerusalem from Jordanian forces in 1967. Israel affirmed the entire city of Jerusalem as its capital in July 1980. But no member of the U.N. Security Council, including the United States, has recognized the annexation.

The Egyptian foreign minister said the U.S. Senate vote ''only reflects the views of members of the U.S. Senate.''

A spokesman for the Iraqi Foreign Ministry described the Senate vote as ''null and void,'' adding that the vote was an attempt to deprive Palestinians of their rights and to increase their suffering.

''This is a challenge to the feelings of all Moslems, a violation of

international law and flagrant violation of the U.N. Security Council and U.N. General Assembly (positions) on the status of Jerusalem,'' Egypt's semi-official Middle East News Agency quoted the spokesman as saying.

The Arab League also condemned the ''irresponsible position'' taken by the Senate last Friday.

''It is necessary to proclaim once more that the Arab claim to Jerusalem is not open to question and that the Arab states will never give up their claim,'' Chedli Klibi, the secretary-general of the Arab League said in a statement issued in the Tunisian capital of Tunis.

''The position adopted by the legislature of a great power is of an exceptional gravity because it is a blow to international law,'' Klibi added.

In Jeddah, Saudi Arabia, the 46-member Islamic Conference organization said the vote vote ignored historic rights of the Palestinian people.

''The resolution constitutes an ignorance of the historical right of the Palestinian people in their homeland and an attempt to legalize the occupation of land belonging to others through force,'' Islamic Conference Secretary-General Hamid Ghabid said.

''The U.S. Senate resolution is a deliberate attempt to support stubborn Israeli attitudes and its opposition to ongoing efforts for Mideast peace based on legitimacy,'' Ghabid added.

In Cairo, a spokesman for the mainstream Fatah group of the PLO, Zohdy El Kodra, said the Senate vote constituted a new attempt to place obstacles in the way of Middle East peace.

''Although the U.S. Senate vote is not binding on the U.S. administration, which does not recognize Jerusalem as the capital of Israel, it is blackmail, ... a crude attempt to force the Bush administration to change its position, and encourage radical Jews,'' El Kodra said.

El Kodra called on President Bush not to succumb to such blackmail, which he said violated international law, the will of the international community, and the requirements of peace in the area.

NEWARK, NJ (MARCH 26) UPI - A federal judge entered a default judgment Monday against the founder of the defunct "Crazy Eddie" discount electronics chain, saying this was the only possible penalty for Eddie Antar's continued flouting of court orders in a securities fraud case.

"Antar is a fugitive," U.S. District Judge Nicholas Politan said. "Antar has been in contact with his lawyers and has been advised of the possible consequences of his failure to appear. Only the extreme sanction of striking Antar's defenses and entering a default judgment would be appropriate."

The Securities and Exchange Commission charges that Antar made $54 million in illegal profits on Crazy Eddie Inc. stock and is seeking triple damages as well for a total of $216 million.

But Politan's ruling, while making clear that Antar is legally responsible for the fraud, does not mean Antar's assets are automatically forfeit, SEC lawyer Richard Simpson said.

The next step is a proceeding to determine how much he gained illegally, Simpson said. Antar's brother Mitchell, a cousin, Sam E. Antar, and a third former Crazy Eddie executive still face trial in the SEC case.

Antar resigned as chairman of Crazy Eddie in late 1986 and sold most of his stock. But the SEC argues that before and after his resignation he masterminded a scheme to fake inventory, inflating profits and the price of the stock. The company, headquartered in Edison, N.J., declared bankruptcy last year and was liquidated after a turnaround attempt failed.

During a brief hearing, Politan said that Antar appears to have some defense against the SEC claims. But the judge said that Antar's repeated refusal to appear in court, his failure to obey orders to return $52 million he allegedly transferred to Israel or to give a deposition in the case and the obvious wilfullness of his conduct made the "extreme sanction" appropriate.

Antar has already been found in civil and criminal contempt. He surrendered to U.S. marshals last month but was released on his own recognizance after a brief court appearance held while Politan was on vacation.

The SEC is not the only agency seeking Antar's assets. Federal authorities in New Jersey have warned him that he is the target of a grand jury investigation, and Crazy Eddie shareholders have filed a federal class-action suit in Brooklyn. A hearing is scheduled Tuesday on who should control $8 million now in custodial accounts for Antar's children.

Antar built Crazy Eddie from one store in New York's Coney Island neighborhood to a chain with 43 stores in New York, New Jersey, Pennsylvania, and Connecticut. The chain became a household name because of its noisy commercials, which featured a deranged-looking actor trumpeting, "Crazy Eddie - his prices are insane."

But Antar's lawyers describe him as a shy man who has lost faith in the legal system. His present whereabouts are unknown, and the only address the SEC has for him is his former apartment in Manhattan.

VILNIUS, USSR (MARCH 26) UPI - A military helicopter hovering near the Lithuanian parliament dropped hundreds of leaflets Monday urging Lithuanians to take to the streets in protest against their government's declaration of independence.

The leaflets urged the people of Vilnius to demonstrate Tuesday against the parliament's March 11 declaration of independence, which has sparked a showdown between Moscow and the tiny Baltic republic.

Soviet military officers came to the parliament Monday evening for a meeting with Lithuanian President Vytautas Landsbergis and other officials of Sajudis, the Lithuanian ruling party that unseated the communists in February elections.

In Moscow, visiting U.S. Sen. Edward Kennedy, D-Mass., discussed the Lithuanian crisis with Soviet President Mikhail Gorbachev. Landsbergis said he hoped Kennedy would act as an intermediary and said Lithuanian representatives would meet with him within several days.

Gorbachev has refused to negotiate with Sajudis ever since the Lithuanian parliament unilaterally declared independence on March 11 despite entreaties by the Soviet president to mark time and be patient until new laws on secession were passed by the union.

Gen. Valentin Varennikov, commander of Soviet ground forces, was in Vilnius to deal with the festering crisis.

#90085u2075 03/26/1990 ~United Press International
ATLANTIC CITY, NJ (MARCH 26) UPI - The skirmish between Donald Trump and an analyst fired after questioning the viability of the developer's new casino escalated Monday with the analyst threatening legal action and Trump calling the industry observer a "man of little talent."

Marvin Roffman, 50, was fired Friday from Janney Montgomery Scott Inc. of Philadelphia after refusing to retract his opinion that Trump's new casino-resort, the Taj Mahal, might encounter difficulty attracting enough gamblers to pay its bills through the resort's slow winter months.

Roffman, who worked for Janney Montgomery for 16 years and specialized in the gaming industry since it arrived in New Jersey in 1978, was terminated after an irate Trump called his superiors to complain about Roffman's negative comments, published last week in a New York newspaper.

"What happened to him is so extraordinary," said James Schwartzman, a Philadelphia attorney representing Roffman. "What Mr. Trump did is so extraordinary and unbelievable. More than likely there will be legal action."

Schwartzman did not specify who might be named in a lawsuit or when it would be filed but said "there certainly seems to be a number of potential defendants." Possible legal action might include a wrongful termination suit, interference with a contractual agreement, and possible Securities

and Exchange Commission violations, Schwartzman said. An SEC spokeswoman in Washington declined to comment on the Trump controversy.

Roffman said Monday he has been inundated at his home with calls from supporters nationwide concerning his stand against Trump. "It makes me feel real good that people support an analyst's freedom to be able to express his opinion, whether it be negative or positive," Roffman said.

"Sometimes the negative opinions can be worth more than the positive opinions," Roffman added. "We are talking about the preservation of capital and that's very important."

Roffman's troubles began last Tuesday when he was quoted in a newspaper article saying that the Taj may not be able to earn the $1.3 million a day it needs to pay its annual debt service of $94.5 million.

An angered Trump called Janney Montgomery Chairman Edgar Scott and, according to Roffman, called for his immediate dismissal and threatened the brokerage firm with a lawsuit.

"Perhaps I did," Trump said Monday when asked if he did threaten Janney Montgomery with legal action. "In a nutshell, the firm obviously thought he (Roffman) was biting off more than he could chew," Trump added. "Most analysts think it (the Taj) is going to be a great success.

"Marv Roffman is a man of little talent who disagrees with other people. I called up and said 'Where do you find people like this?' They agreed with me. I didn't fire him. They fired him."

Norman T. Wilde Jr., president of Janney Montgomery, Monday issued a statement saying Roffman had violated company policy by making "major recommendations" to the news media without having his comments first reviewed by his superior.

Wilde also said the company's securities analysts were prohibited from making such recommendations before they were first disseminated to Janney Montgomery's own clients.

"Mr. Roffman was well aware of these policies and had been admonished in the past on more than one occasion to follow those policies," Wilde said. Wilde said Roffman's termination was not the result of his original comments to the media, but rather because he disregarded a company order concerning a letter he sent to Trump.

Roffman claimed that in order to keep his job, he was ordered to write a letter of apology to Trump. However, Roffman said the letter he authored did not satisfy his employers, who instead wrote for him a more profuse apology that included praise for the Taj.

Roffman, indicating he was concerned about his job, signed that letter but subsequently wrote Trump a second letter retracting its contents of the first as inaccurate and asking that Trump not use it for any purpose. Wilde said Roffman had been issued a written memorandum directing him not to send the second letter.

#90085u2090 03/26/1990 ~United Press International

BUDAPEST, HUNGARY (MARCH 26) UPI - The Hungarian Democratic Forum, an anti-communist party launched by dissident intellectuals, won the largest block of votes in the nation's first free multi-party elections in more than four decades, returns showed Monday.

Voters in the first round of parliamentary elections Sunday crushed the old-line Communist Party, which received little more than 3 percent of the vote. The communists appeared likely to be ousted from the new Parliament yet to be formed.

The Hungarian Socialist Party, consisting of the bulk of the former Communist Party and renamed and reoriented last fall on a pro-democracy line, did only a little better with about 11 percent, or fourth place.

With 80 percent of the votes counted, the center-right Democratic Forum received 24.5 percent of the vote. The group appealed to nationalistic sentiments during the political campaign and generally favors pro-Western policies.

The liberal Alliance of Free Democrats, a pro-Western group, received the second-largest block of votes with 21 percent. The party's program included a rapid creation of a West European-style society.

Third place went to the Independent Smallholders Party with 12 percent, a party that advocates returning nationalized land to farmers, while the new Socialist Party was fourth with 10.6 percent. The Young Democrats, the independent ally of the Free Democrats, got 8.7 percent.

The Hungarian Socialist Workers Party - the Marxist-styles communists - received 3.6 percent of the vote. The party may lose its parliamentary representation because a minimum of 4 percent of the vote was needed to be seated.

Balloting was marred by a computer failure, which forced the National Election Commission to suspend counting the votes until Tuesday morning.

The election results will not determine the complete makeup of Parliament because in many districts no candidate won a majority. A runoff will be held April 8.

Election officials said about 60 percent of Hungary's 7.85 million eligible voters turned out under overcast skies for the election, the first free multi-party balloting since the communist takeover in 1948.

Prime Minister Miklos Nemeth, a popular Socialist Party member who ran as an independent, won a seat to Parliament.

The Democratic Forum, with 25,000 members and 430 local branches, emerged on Sept. 27, 1987, in the village of Lakitelek in southern Hungary, where 170 writers and thinkers met to discuss the worsening political and economic situation.

Imre Pozsgay, the reform communist who also showed up at Lakitelek and later led the drive to bury the Marxist one-party state system, came in at a disappointing third place in his own district. He will participate in a runoff and still has a chance of entering Parliament on a national list.

''The point was to overthrow the state party and revise (our explanation of) the events of 1956,'' Pozsgay told a news conference.

Pozsgay was the first Hungarian leader who stated public that the revolution, crushed by Soviet troops, was a popular uprising. ''If I were not so active, I could even retire,'' he said. ''What I've done is enough for one man in a lifetime.''

Under a system of voting that former Vice President Walter Mondale, who led an international observer team, described as ''the most complex I have ever seen,'' voters directly elected representatives in 176 constituences to the 386-member Parliament.

Another 152 were to be allocated by proportional representation in Hungary's 19 counties. The remaining 58 will give token compensation to parties too small to win seats otherwise.

The Free Democrats' acting president, Janos Kis, said the first round of elections produced two good things: the elimination of the old Communist

Party from Parliament and the possibility of a ''stable coalition'' in Parliament.

''There is an adequate amount of social responsibility, so neither party will lead the country in an ungovernable state,'' Kis said.

But political analysts questioned whether the top two vote-getters could work together, especially in the crucial post-communist period.

''It's very difficult to imagine a coalition between the two biggest political parties, given their intentions,'' polling expert Endre Hann said.

Forum President Jozsef Antall said his party did ''not exclude the possibility of cooperation with other parties,'' including the rival Free Democrats. ''We find it extraordinarily important that people voted overwhelmingly for opposition parties,'' he said.

Asked if those parties had the experience to govern, Antall said: ''If we look at the results the party in power has achieved, we don't have to have an inferiority complex.''

BNEI BRAK, ISRAEL (MARCH 26) UPI - Rabbi Eliezer Schach, a dimunitive 92-year-old scholar who does not fit the image of a political kingmaker, holds the power to mold Israel's next coalition and chart the course for a government he rejects.

Schach's world is among the rabbinic scholars of the ages, his battleground the Talmudic arguments of the yeshiva. He believes his ultra-Orthodox followers must remain insulated and separate from the sullying atmosphere of the secular Jew.

Yet his role as the spiritual mentor of Degel Hatorah and Shas - two ultra-Orthodox parties with the votes to create or wreck Israel's next coalition government - has drawn him deeper into the politics of a secular state.

A faction within Shas aided Labor Party leader Shimon Peres in bringing down Prime Minister Yitzhak Shamir's government March 15. The move set the stage for Peres to receive a presidential mandate to form the next coaliton.

But on Monday night during a rare public speech, Schach condemned secular Zionism - a foundation of the Labor Party - and urged his adherents to be strong and faithful to their religious tenets.

Ultra-Orthodox politicians said the two parties Schach guides favored Likud to lead a broad coalition. One reason why Schach favors Likud is the belief that Labor and the left-wing parties have moved away from traditional Judaism.

The preference, if it remains, appears to diminish Peres' chance to form the next government.

How the 92-year-old rabbinic sage - with more than 50 years as a leader and teacher in Israel's ultra-Orthodox community - came to hold such political sway has been closely examined during the past days in Israel.

''(Schach) sent his parties to politics only to take their share in the cake. He doesn't want to control the whole cake. It's a nightmare for him '' said Amnon Levi, a reporter for the daily newspaper Hadashot, who is considered an expert on the ultra-Orthodox community.

Schach, who speaks a heavily Yiddish-accented Hebrew from his native Lithuania, opposes a secular state in Israel, but has given his blessing to government participation beneficial to the ultra-Orthodox community to gain financial aid for their institutions and strengthen religious laws.

He dreads more involvement in the system, especially moves toppling Israeli governments, according to close associates and longtime observers of the ultra-Orthodox.

Secular politicians seeking support from the parties he guides make the trek to his home in Bnei Brak during coalition building periods and don the traditional yarmulke. Since the collapse of the government, there has been a flurry of activity by politicians seeking Schach's blessing.

Schach, a man roughtly 5 feet tall with a wispy gray beard, is described with awe by his students as a modest, wise leader and berated by secular Jews as having too much power. His preference at this juncture in Israel's political crisis for the right-wing Likud is a bit puzzling.

Schach is dovish in his views, for example believing Jerusalem and the occupied territories could be controlled by Arabs because spiritual, not

actual, control is the issue. He also lashed out at Likud last month after internal fighting ended with the Cabinet resignation of Likud's hard-liner Ariel Sharon.

''Every one of them is sure that he is the one that holds the whole truth '' Schach said. ''But the truth is that they don't know anything.''

The bottom line for Schach, head of the highly regarded Ponevez Yeshiva in Bnei Brak, is based on his fervant religious views on the need to strengthen Judaism and block any possible civil war between Jews.

''Every Jew must be strong. We must be stronger than America, than Russia. The Jews must be stronger,'' Schach told his followers Monday during a rare public speech.

#90085u2115 03/26/1990 ~United Press International

(MARCH 26) UPI - The White House is congratulating Hungary for having been at the forefront of democratic change in Eastern Europe. The praise comes as results from yesterday's Hungarian parliamentary elections show an anti-communist opposition party is apparently the big winner. White House spokesman Marlin Fitzwater says Washington is encouraged by the elections, which are- ''an indication of further movement along the path of democratic development.''

Official reports now say five people were killed and more than 350 injured this morning when South African police opened fire on thousands of demonstrators in the black township of Sebokeng. A police spokesman says there's trouble getting reports on exactly what happened this morning. But officials of the anti-apartheid United Democratic Front charge officers- quote- ''just fired without warning.''

20 special investigative teams today converged on 179 illegal social clubs known to exist in New York City. The massive crackdown follows yesterday's early morning arson blaze at a crowded UNlicensed nightspot that killed 87 people. A police spokesman says more than 100 police officers, firefighters and building inspectors ordered 14 clubs closed and issued 15 summonses and 33 notices of violations today.

A potential problem has cropped up on the space shuttle Discovery and it could delay the shuttle's long-awaited April 12th launch of the Hubble Space Telescope. NASA officials are reviewing the problem, which involves the housing around the axle on the shuttle's nose landing gear. Fixing the problem would require rolling Discovery back to an assembly building and removing the ship from its external fuel tank. That would delay the flight at least a week and probably longer.

#90085u2126 03/26/1990 ~United Press International
(MARCH 26) UPI - Federal regulators report record losses last year for the nation's ailing savings and loan industry. The Office of Thrift Supervision says the two-thousand-878 thrifts across the country lost a total of 19-point-two BILLION dollars in 1989. The O-T-S blames most of the loses on bad loans, including holdings of high-risk junk bonds by failed institutions. It says s-and-l's in the regions surrounding New York Dallas and San Francisco racked up the biggest losses, with bad real estate loans responsible for most of the problems in New York and Dallas.

Colombian Interior Minister Carlos Lemos Simmonds has resigned because he thinks the Bogota government has gone soft on the nation's deadly drug cartels. In a letter published today, Lemos says the change was gradual, but charges the government NO longer has the same decisive attitude as it did last year. Horacio Serpa Uribe was swiftly sworn-in yesterday to replace Lemos.

#90085u2128 03/26/1990 ~United Press International
NEW YORK (MARCH 26) UPI - The dollar climbed smartly against the Japanese yen Monday in New York as traders capitalized on perceived discord in bilateral monetary policy, but it plummeted against the British pound as sterling was the beneficiary of a huge Mideast gold bullion sale.

Gold took an exceptionally steep fall on world markets amid rumors an unknown Mideast player dumped one million ounces or more, triggering stop-loss selling for an eventual six percent drop in New York prices.

Currency traders aggressively sold the yen following the fruitless meeting of Treasury Secretary Nicholas Brady and Japanese Finance Minister Ryutaro Hashimoto late last week. Brady brushed off a Japanese request for a monetary policy shift by Washington to relieve the yen.

Shearson Lehman Hutton currency analyst Lisa Finstrom said the response to official failure to announce a yen-rescue plan "underlines the degree to which the market is negative on the yen," which could fall further.

At the end of the New York session the dollar was quoted at 1.7075 West German marks, down from 1.7125 late Friday. Against the Japanese currency the dollar was changing hands at 156.70 yen, up 2.45 yen from 154.25.

Currency traders and analysts said the mark made its own upward move against the yen, strengthening against the dollar in the process.

Analysts said the pound's rally appeared to be directly related to the

heavy gold selling, proceeds of which were believed to have been moved into pounds sterling for a major investment in British bonds.

"The gold story is somewhat related to sterling," said Audrey McNiff, a vice president for corporate trading with the Hongkong & Shanghai Banking Corp. She said a weekend speech by Chancellor of the Exchequer John Major may have made British government bonds seem more attractive.

Other dollar rates: 1.5210 Swiss francs, up from 1.5180; 5.7470 French francs, off from 5.77; and 1,255.75 Italian lire, off from 1,260. The British pound moved up nearly two cents to $1.6185 from $1.60.

In Europe the dollar closed mostly higher against the main currencies, but in Frankfurt it fell to 1.7135 marks against 1.7145 Friday. In Zurich it moved up to 1.5235 Swiss francs against 1.5075.

The U.S. currency strengthened in Paris, Brussels and Milan to 5.7680 French francs compared with 5.7540, 35.45 Belgian francs against 35.37 and 1,259 lire from 1,256.75 at the end of last week. In London the pound climbed to $1.6135 from 1.6030.

In Tokyo earlier, the yen plunged on disappointment over the Brady-Hashimoto meeting, sinking to 156.40 yen against 155.07 Friday. Dealers said it was the lowest close in that market since January 1987.

Republic National Bank in New York closed cash gold at $366 an ounce, off $23.25 from Friday's closing price of $389.25. The New York Commodity Exchange settled gold at $365.80 an ounce, off $23.10 from 388.90.

Gold-watchers cited rumors of a major Mideast selloff of gold holdings, but could not identify the seller or reasons for the sale. They estimated sales of one million to four million ounces, worth $400 million to $1.5 billion.

Metal analyst Bette Raptopoulos of Prudential-Bache Securities said it was believed the proceeds of the gold selloff, which took place in Asian, European, and American markets, went into pounds sterling.

In Zurich, dealers said gold plunged $27 to $366.50 an ounce from $393.50, and in London gold dropped by $21.50 to finish at $366.50 compared with $389.25 late last week.

Republic closed cash silver at $5.07 an ounce, off from $5.11. Comex spot silver declined to $5.043 an ounce from $5.084. Zurich silver fell to $4.95 an ounce from $5.08. London silver dropped to $4.96 from $5.07.

#90085u2150 03/26/1990 ~United Press International

NEW YORK (MARCH 26) UPI - The stock market closed with slight gains Monday on the second-lightest trading day of the year as profit taking and technical factors combined to all but erase the market's gains in late trading.

The Dow Jones industrial average, which rose 8.56 Friday, added 3.38 to close at 2707.66 after being up more than 20 points in early trading.

Among broader market gauges, the New York Stock Exchange composite index rose 0.15 to 185.60 and Standard & Poor's 500-stock index rose 0.41 to 337.63. The price of an average share gained four cents.

Advances led declines 834-648 among the 1,970 issues crossing the NYSE tape. dig Board volume was 116,110,000 shares, compared with 132,070,000 shares traded Friday. Turnover was the lightest since March 12, when 114,790,000 shares changed hands.

Jitters over the outlook for first-quarter corporate earnings were said to keep many investors on the sidelines. Those who were in the market were unnerved by a plunge in gold prices.

Analysts said the tumble in gold prices, said to be due to a large sale by a Middle Eastern interest, sparked broad-based selling in that group and gave rise to profit taking. April gold futures closed down $23.20 an ounce to $366.20 in New York.

Some analysts, though, said there were other reasons that investors took profits. "I think the weakness in IBM softened enthusiasm and brought in some additional profit taking," said Alan Ackerman, senior vice president at Gruntal & Co., who added that IBM stock has been a market leader of late, especially for the technology sector.

Still others, such as Rodd Anderson, vice president in equity trading at Shearson Lehman Hutton Inc., said they thought the late retreat was sparked by technical factors.

"Even when we were up, I can't say I was too impressed by the rally," he said. "We couldn't rise past a resistance level (on stock market charts), so we went down. But at least we didn't fall below 2700 (in the Dow industrials)."

The overnight surge in Tokyo stocks and a stronger dollar against the Japanese yen gave the market its early boost. Investors shrugged off another steep decline of the yen against the dollar Monday, sending the Tokyo market's Nikkei index to its second-largest daily gain. The blue-chip index, which plummeted last week to a 15-month low, skyrocketed 1,468.33 points to 31,840.49.

Disappointment over a lack of results from a weekend meeting in Los Angeles between U.S. Treasury Secretary Nicholas Brady and Japanese Finance Minister Ryutaro Hashimoto sent the dollar soaring against the yen in Tokyo and then in New York. In late trading in New York, the dollar had rebounded from a slight afternoon pullback and was quoted at 156.65 yen, up more than two yen from 154.25 late Friday.

On the trading floor, Southeast Banking was the most active issue, down 1/2

to 14 1/8. Homestake Mining followed, down 1 5/8 to 17 1/2 as gold stocks took a beating. AT&T was third, up 5/8 to 41 3/4 after announcing its entry into the credit-card business.

General Motors was fourth, up 1 1/8 to 47 1/2. Many analysts were said to be turning bullish on auto issues. Placer Dome, another gold issue, was fifth, tumbling one to 16 7/8.

Among other blue chips, IBM fell 7/8 to 104 1/8, losing early gains, Eastman Kodak was up 1/2 to 38 7/8, and Coca-Cola gained 1/4 to 74 3/8.

Elsewhere in the precious metals sector, Newmont Gold tumbled 2 7/8 to 46 3/8, Newmont Mining lost 2 3/4 to 45 7/8, Hecla Mining fell 5/8 to 13 1/2 and Battle Mountain Gold lost 7/8 to 13 5/8.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 143,137,190 shares, compared with 158,543,720 shares traded in the previous session.

Prices closed mixed in moderate trading on the American Stock Exchange. The Amex Market Value index fell 0.30 to close at 361.31. Advances led declines 293-244 among the 771 issues traded. The price of an average share added one cent. Composite volume totaled 15,022,860 shares, compared with 17,217,160 shares traded Friday. Texas Air led the Amex issues, up 3/4 to 9 1/8.

The National Association of Securities Dealers composite index rose 1.59 to 438.84.

#90085u2154 03/26/1990 ~United Press International

WASHINGTON (MARCH 26) UPI - Wind erosion has damaged nearly 5 million acres in the Great Plains since last November, including a record 1.6 million acres in North Dakota, the government said Monday.

''We're seeing the continued effects of several years of drought,'' Manly Wilder, associate chief of the Soil Conservation Service, said in a statement. ''There's not enough vegetative cover and this year, there's also not been much snow cover in a lot of places.''

Of the 10 states in the Great Plains, Oklahoma reported the smallest amount of damage, 68,250 acres.

The Soil Conservation Service said the damage so far this wind erosion season was the second largest since recordkeeping began in the 1950s. The season runs from November through May.

Nearly 90 percent of the land damaged by wind erosion was cropland. The remainder mostly was rangeland.

Farmers have used emergency tillage to prevent damage on 716,500 acres, compared to 1 million acres that were treated at this point one year ago. Texas accounted for 80 percent of the treatment with 570,000 acres.

Land reported in condition to blow totaled 20.2 million acres, about 2.4 million less than one year ago but still the third-highest total on record. North Dakota reported nearly 6 million acres, a record for the second year in a row, and Texas reported 3.7 million acres.

Here is a list of land damaged by wind erosion in the Great Plains:

First figure is damage from last Nov. 1, second is damage at same point one year ago:

Montana, 888,595 acres, 1.39 million acres.
Nebraska, 87,550 acres, 81,180 acres.
North Dakota, 1.6 million acres, 474,200 acres.
South Dakota, 234,190 acres, 407,980 acres.
Wyoming, 379,113 acres, 474,863 acres.
Colorado, 263,890 acres, 154,550 acres.
Kansas, 161,840 acres, 520,905 acres.
New Mexico, 88,290 acres, 54,600 acres.
Oklahoma, 68,250 acres, 85,565 acres.
Texas, 1.15 million acres, 1.05 million acres.
Total, 4.92 million acres, 4.69 million acres.

#90085u2164 03/26/1990 ~United Press International

WASHINGTON (MARCH 26) UPI - The Federal Reserve Board said Monday it approved the acquisition of First Illini Bancorp Inc., of Galesburg, Ill., by First Interstate Corp. of Wisconsin and Norwest Corp. of Minneapolis.

First Illini is the 68th largest bank in Illinois with $254 million in deposits.

First Interstate is the fifth largest bank in Wisconsin with $1.2 billion in deposits and Norwest Corp. is the second largest in Minnesota with deposits of $8 billion, the Fed said.

''The laws of Illinois allow acquisitions of Illinois banks and bank holding companies within a region that includes Wisconsin but does not include Minnesota,'' the Fed said.

For this reason, First Illini was first purchased by First Interstate,

which was then taken over by Norwest, which operates subsidiaries in Minnesota, Wisconsin, Arizona, Iowa, Montana, Nebraska, North Dakota and South Dakota.

#90085u2204 03/26/1990 ~United Press International

WASHINGTON (MARCH 26) UPI - A top aide to John Poindexter testified in the retired rear admiral's Iran-Contra trial Monday that Oliver North was a ''very strong, very aggressive'' National Security Council aide who overinflated his own importance.

The testimony came from defense witness Rodney McDaniel, a longtime Poindexter friend who served in the Navy for 28 years and eventually became the National Security Council's executive secretary.

McDaniel was essentially the paper and communications ''traffic cop'' within the NSC. Poindexter's lawyers used his testimony in an attempt to discredit potentially damaging statements by North earlier in the trial.

The defense appeared to be attempting to shift the blame for much of the Iran-Contra scandal from Poindexter to North, who reported to Poindexter and has already been convicted of three Iran-Contra felonies.

North was ''not your normal lieutenant colonel,'' McDaniel testified. He was ''very strong, very aggressive, very articulate, very hard-charging, very can-do.''

One of Poindexter's lawyers, Frederick Robinson, asked McDaniel about North's reputation for truthfulness and honesty. McDaniel said he had a ''complex'' opinion on that subject.

''Well, I felt he embellished his own personal role in things,'' McDaniel testified, and enhanced his role in any event he discussed.

Others on the National Security Council shared the view that North exaggerated to make himself appear more important, McDaniel testified.

McDaniel sometimes accompanied Poindexter to meetings with President Ronald Reagan. He was present in October 1986, he testified, when Poindexter briefed the president after the Nicaraguans shot down a plane from North's secret Contra operation.

An American, Eugene Hasenfus, was captured, sparking press speculation - later proven correct - about U.S. government involvement in Central America during the congressional ban.

Poindexter told Reagan there appeared to be no U.S. government involvement

McDaniel testified, but cautioned Reagan not to be too categorical in his statements to the press.

Poindexter's lawyers previously filed a motion asking U.S. District Judge Harold Greene for permission to tell the jury that prosecutors have repeatedly called North a liar.

Although Greene has not yet ruled on the motion, it is clear that Poindexter's lawyers have attached a high priority to discrediting North's testimony.

Poindexter's lawyers attached to their motion a statement from North's own Iran-Contra trial, during which prosecutor John Keker told the jury: ''By mid-1985, ladies and gentlemen, lying had become a habit for Oliver North.''

Poindexter, 53, is accused of five felonies including conspiracy of obstruction of the congressional Iran-Contra investigation, lying to Congress and the destruction of documents.

The Iran-Contra scandal involves secret U.S. arms sales to Iran and the diversion of some of the profits to assist the rebel Nicaraguan Contras when Congress had banned such aid.

During cross-examination, McDaniel said Poindexter did not tell Reagan that Hasenfus was connected to North's covert operation. North has testified that he informed Poindexter about every aspect of his activities and always had Poindexter's approval.

McDaniel also conceded that Poindexter told him not to get involved in matters dealing with the Contras or Iran, dealing exclusively with North in those areas.

McDaniel was the only witness of the day. The afternoon was set aside for legal arguments. Greene ruled in favor of prosecutors and prevented testimony from former hostage David Jacobsen. He was kidnapped in Beirut in May 1985 and released on Nov. 2, 1986, as a result of the first secret Reagan administration arms shipments to Iran.

The judge said Jacobsen's testimony was ''completely irrelevant'' and he ''would inflame the jury - the man spent 17 months in captivity.''

The judge also denied an effort by Poindexter's lawyers to secure testimony from a former Democratic congressional aide who wrote a memorandum that sparked a request for an official inquiry into North's activities. The memo contained overtly political statements but Greene ruled that the motives of individual members of Congress also are irrelevant.

The judge ruled in favor of Poindexter in ordering the testimony of Ken Kodama, a National Security Agency employee. Poindexter's lawyers said Kodama would testify that congressional aides ''had learned ... that there was an arms shipment in November 1985 that was not reported in the press.''

Such testimony could aid Poindexter if he can show Congress had information about which he is accused of making false statements. The reference is to the first secret shipment of arms to Iran in November 1985.

Greene did allow Poindexter to call a series of character witnesses, including his neighbor and a Navy admiral.

#90085u2207 03/26/1990 ~United Press International

(MARCH 26) UPI - With many traders absent from the pits to attend a refiners' convention, oil prices ended mixed Monday in light, tecnhical trading between price support and resistance levels.

The benchmark West Texas Intermediate crude for May delivery gained 7 cents to end the day on the New York Mercantile Exchange at $20.46 a barrel after trading as high as $20.64 and as low as $20.32 a barrel.

Trading volume was an estimated 56,113 contracts, well below the 82,000 Merc daily average.

On the U.S. Gulf Coast spot market, where crude is bought and sold for cash, WTI was quoted at $20.45 a barrel, a gain of 5 cents.

''It was kind of a quiet day with crude failing to break up through the $20.65 resistance level. It went to $20.64 a barrel and quit,'' said Bill Hinton of Stotler & Co., New York.

There was no news that would affect the oil markets other than OPEC secretary general Subroto reportedly saying that there was too much crude on the market and that prices could be expected to fall in the second quarter.

The statement was similar to one reported more than a week ago by the secretariat of the 13-nation Organization of Petroleum Exporting Countries and did not appear to affect oil prices Monday.

''It was trading on technical phenomena - trading between technical support and resistance levels. ... There also was selling of heating oil and buying of crude,'' Hinton said.

With many traders attending a National Petroleum Refiners Association

conference in San Antonio, trading was light, he said.

The heating oil cash market was tight, but the weather has not been cold enough to sop up the amount of product recently supplied, the analyst said.

Heating oil for April delivery slipped 0.78 cent on the Merc to 55.46 cents a gallon and lost 1 cent to 56.95 cents a gallon on the New York Harbor cash market.

Hinton said only recently the cash market had been trading nearly 4 cents a gallon over the Merc heating oil price.

Unleaded gasoline for April delivery edged up 0.04 cent on the Merc to 57.70 cents a gallon and rose 0.40 cent to 56.70 cents a gallon on the New York Harbor cash market.

On the European spot market, Britain's widely traded North Sea Brent crude climbed 25 cents to $18.30 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - gained 3 cents to $15.63 a barrel.

ANCHORAGE, AK (MARCH 26) UPI - Alaska's top environmental official said Monday he wants to pick the brain of Exxon Valdez Capt. Joseph Hazelwood to see if he has any good ideas about improving tanker safety and preventing future oil spills.

Dennis Kelso, the commissioner of the Department of Environmental Conservation, said he had a brief chat with Hazelwood after a jury convicted the skipper of negligent discharge of oil while clearing him of three more serious charges arising out of the March 24, 1989, spill.

''It was very unusual,'' Kelso said of his meeting Hazelwood. ''This was one of the unique things in a very unusual year.''

This was the first face-to-face encounter between the notorious captain of the tanker that caused the worst oil spill in U.S. history and the Alaska official who oversees the Exxon cleanup and has become the most vocal state critic of Exxon while testifying coast-to-coast about oil industry spill response weaknesses.

Kelso said it occurred to him, after his little talk with Hazelwood, that the skipper might have some good ideas that Alaska could use in its ongoing efforts at improving tanker safety to prevent another spill.

Hazelwood, 43, has returned home to Huntington, N.Y., to sit out an appeal of his conviction for negligent discharge of oil, a misdemeanor that earned the maximum sentence of 90 days in jail and a $1,000 fine - suspended on the condition that he spend 1,000 hours helping clean up the oily mess caused when his tanker hit Bligh Reef and gushed nearly 11 million gallons of oil into Prince William Sound.

After a two-month trial, a jury found Hazelwood innocent of reckless endangerment and operating the tanker while intoxicated, both misdemeanors and a felony, criminal mischief.

Kelso said state Superior Court Judge Karl Johnstone's beach-cleaning sentence fit the crime. But Kelso said Alaska should seek more from Hazelwood than ''rubbing his nose in it to get retribution.''

''We should use the skills that someone has to make things better for the future and presumably he has some skills and insights,'' Kelso said, suggesting that Hazelwood help ''figure out what the state has to do to make sure the state has safer tanker operations. The point is, he knows how these things work.''

Hazelwood spent 20 years on Exxon tankers and a decade ago became Exxon's youngest tanker captain.

Whether Hazelwood goes out to beaches to scrub oil or extends a hand to the state to devise safer tanker operations, Kelso pledged, ''We'll find a way to work with him positively. If he wants to work with us, we'd be happy to work with him.''

Although Hazelwood is unlikely give advice to Alaska while he appeals and because he is named in many of the 150 civil suits against Exxon, Kelso said he planned to pursue the idea with Hazelwood's lawyers.

Kelso met Hazelwood Friday, one day after the verdict and just before sentencing. In the corridor of the Captain Cook Hotel, where Hazelwood and his lawyers were staying and where Kelso was taking a break from a conference on reconciling environmental and development concerns, one of Hazelwood's lawyers overheard Kelso confide to someone that he would like to meet Hazelwood.

The lawyer brought Hazelwood over. He greeted Kelso by first name and they shook hands.

'''The people of Alaska care very much about this oil spill,''' Kelso said he told Hazelwood, who replied, '''Yeah, I know.'''

'''But they also care very much about justice,''' Kelso said, congratulating Hazelwood on a verdict that was essentially a victory for

the defense.

Kelso recalled Hazelwood saying, '''It's been a hell of a year - I guess for you too.'''

The brief conversation, on matters public and personal, was not as awkward as it might seem, Kelso said, noting Hazelwood appeared relieved that it went well.

''There wasn't a lot of tension,'' Kelso said. ''When you make direct contact at a human level, it's just like talking to anybody. ... We have different roles, but there's no reason we can't reach out and bridge that gap for a few minutes.''

WASHINGTON (MARCH 26) UPI - The United States will donate 45,000 metric tons of sorghum for use in an anti-hunger program in Mexico run by a private organization, the Agriculture Department said Monday.

The sorghum is worth about $3.8 million. Plans call for it to be sold. A private voluntary organization called World SHARE will use the proceeds to provide food assistance to the needy, to support program management and for developmental activities.

''This program will reach as many as 156,000 participants in food-for-work and maternal-child health projects,'' the department said in an announcement.

The sorghum will be provided during the current fiscal year. It will be donated through Section 416, a part of a 1949 law that allows the government to donate surplus farm products to assist needy people in other nations.

Mexico is one of the major agricultural trade partners of the United States

NEW YORK (MARCH 26) UPI - Drexel Burnham Lambert Inc. has reduced its stake in First Executive Corp. by selling 2 million shares of two series of preferred stock issued by the Los Angeles-based holding company, a Drexel spokesman said Monday.

The sale reduced Drexel's holdings in First Executive to less than 5 percent, the spokesman said. Drexel had held a 6.3 percent stake, according to a filing last month with the Securities and Exchange

Commission.

On Mar. 16, Drexel sold 1 million shares of First Executive Series G cumulative preferred stock for $3.9375 a share and 1 million shares of depositary preference shares for $2.9375 each, according to a recent SEC filing.

First Executive, which owns and operates life insurance companies, was a heavy investor in high-yield bonds, a Drexel executive said.

CHICAGO (MARCH 26) UPI - Hilliary Mitchell gave up a kidney to save his mother's life. Seven years later, the woman is showing her gratitude in what doctors say may be the first time an organ recipient has returned the favor to the donor.

Ernestine Mitchell, 57, of Chicago, will donate bone marrow to her dying 37-year-old son on Monday in hopes of curing his leukemia.

''I wouldn't be here today if he hadn't donated his kidney,'' Ernestine Mitchell said Monday.

Dr. Robert Geller, a University of Chicago bone cancer specialist, said the operation may mark the first time an organ recipient has become a donor for the original donor.

Geller, who will perform the operation, said the mother-son match is not identical but the operation promises a 25 to 40 percent chance of success. If the marrow transplant from Ernestine Mitchell fails, doctors will consider a transplant from Hilliary Mitchell's sister, Tawanna, 39, who lives in California.

''We have a backup if need be but we haven't even discussed that,'' Ernestine Mitchell said. ''We're confident this will work.''

Hilliary Mitchell, an unemployed truck driver from Harwood Heights, developed leukemia two years ago, U of C Hospitals spokesman John Easton said.

Easton said about a quart of marrow will be extracted from Ernestine Mitchell. The red sponge-like substance will then be processed in a lab before being transplanted into Hilliary Mitchell.

Gov. James R. Thompson ordered the state's Medicaid program to pick up the $150,000 tab for the operation next Monday.

#90085u2351 03/26/1990 ~United Press International

SACRAMENTO (MARCH 27) UPI - British Petroleum's boss in the United States said Monday that a $1 billion maritime oil spill cleanup fund proposed by Congress is sufficient, and questioned whether California needs a separate fund of its own.

''The federal government is working on a fund of $1 billion or more to be available in any oil spill incident. Does the state actually need a fund over and above that?'' said James Ross, president of British Petroleum America Inc.

Ross's remark came as state Legislature committees prepared to hear two major oil cleanup bills responding to the Exxon Valdez spill in Alaska last year and the Huntington Beach accident in February, which involved British Petroleum cargo.

One bill, by Sen. Barry Keene, D-Benicia, gets its first hearing before the Senate Natural Resources Committee Tuesday. The other, by Assemblyman Ted Lempert, D-San Mateo, already has been approved by the Assembly Natural Resources Committee. On Wednesday it goes before the Assembly Ways and Means Committee, its last stop before the Assembly floor.

Both the Keene and Lempert bills propose cleanup funds to be financed by taxes on oil landed at California ports. The federal legislation would tax oil at all American harbors where oil is landed.

The Lempert bill calls for a $500 million fund. Keene's measure calls for $150 million, with provisions for borrowing in emergencies.

''We don't oppose it. It's up to the Legislature,'' the British Petroleum expert said. ''We're simply questioning it. You would be locking up a lot of money that could be used for other things.''

Ross also questioned the need for requiring double hulling of tankers unloading oil at California ports and elsewhere in the United States.

''Double hulls have a very obvious public appeal,'' Ross said. ''It's a lot more complicated than it looks.''

He added that a double-hulled ship is far more prone to capsizing if the outer hull is ruptured. ''The Exxon Valdez spilled one-quarter of its cargo. If it had capsized, it could have spilled all of it,'' Ross said.

He also questioned whether double hulling laws could be enforced against foreign oil carriers, and said the whole issue needs an impartial technical study.

Ross said that reports of rust in sections of the Alaska oil pipeline came as no surprise to him because the pipeline that distributes petroleum from the North Sea into Britain also has been attacked by rust problems.

''Much of (the British) line will have to be replaced,'' he said, implying that would also have to be done with parts of the line that moves crude oil from northern Alaska to the port of Valdez for transfer to the main markets in the United States.

He said British Petroleum is the largest single stockholder in the Alaska pipeline, but ''not the controlling partner.''

Ross said that, oil spills or no, the United States faces a growing dependence on imported oil. He said oil consumption is growing at a rate of 3 percent a year worldwide, and 1 percent a year in the United States.

The British oil executive said it would be a long-term mistake to call off marine petroleum exploration off the United States because of the recent oil spills.

He said there are few new sources of supply in sight, ''outside of three or four Arab countries, and I'd like to hear your forecasts about their political stability.''

#90085u2367 03/26/1990 ~United Press International

(MARCH 26) UPI - South African police today killed at least five people and injured more than 350 others when they opened fire on anti-government demonstrators in the black township of Sebokeng, outside Johannesburg. Officials say the protesters set fire to municipal offices. Police used teargas to disperse as many as 20-thousand marchers in the nearby township of Sharpeville.

New York authorities are fanning out across the city to investigate and close down at least 179 illegal social clubs that could turn into fire disasters like the Happy Land fire that killed 87 people yesterday. The Cuban immigrant who admits starting the fire is being held without bail today.

The Supreme Court today agreed to decide whether employers can bar all women of child bearing age from certain jobs that can lead to birth defects if the women become pregnant. Women's groups say the rules are discriminatory. But employers say they can be sued if the women give birth to children with birth defects.

A federal judge in Guam today suspended enforcement of the most restrictive abortion law in the United States or its territories. The judge in Agana said the statute is ''obviously UNconstitutional.'' The law... which took effect last Monday... bans abortions for any reason except when a woman's life is endangered.

Federal agents today arrested reputed mob boss Raymond ''Junior'' Patriarca and associates near Providence, Rhode Island. The suspects were charged with murder, extortion, kidnapping, drug running and gambling. A federal prosecutor called it ''the most significant organized crime case in the history of New England.''

#90085u2385 03/26/1990 ~United Press International

WASHINGTON (MARCH 26) UPI - Opponents of the Seabrook, N.H., nuclear plant plan to press ahead Tuesday on two separate fronts to keep the plant from operating, despite a Nuclear Regulatory Commission decision granting a full-power operating license.

The opponents, lead by Massachusetts Attorney General James Shannon and two environmental groups, will ask the U.S. Court of Appeals for the District of Columbia to reconsider its Mar. 14 order denying a stay of the NRC's licensing decision, said John Traficonte, assistant Massachusetts attorney general.

Without comment, a three-judge panel denied the stay and the NRC formally granted a license Mar. 15.

Traficonte said the motion for reconsideration will be filed with the same three-judge panel but with a suggestion that the entire court ''take another look'' as soon as possible. Seabrook is beginning a ''power ascension'' program now and commercial operation could begin by late spring, utility officials said.

The opponents also plan to testify Tuesday before the NRC's appeal board, arguing that the agency's licensing board - in a decision leading up to the final NRC decision - incorrectly refused to reopen the record and include alleged plant maintenance problems.

''We plan to ask for an immediate suspension of the license and ask for another hearing before the licensing board,'' Traficonte said.

However, Traficonte conceded that the licensing board's previous decisions have been partial to the nuclear plant.

#90085u2412 03/26/1990 ~United Press International

PLYMOUTH, MI (MARCH 26) UPI - Two boys were found hanged in their Canton Township homes during the weekend in what police said Monday were apparently separate and unrelated incidents.

Canton Township Police Lt. Alex Wilson said an 8-year-old was found about 9:30 p.m. Saturday in the basement of his home, and a 16-year-old was discovered at 12:30 a.m. Sunday in his bedroom.

Wilson said the boys lived about 2 miles apart in suburban Detroit and did not know each other.

''They were two separate deaths,'' Wilson said. ''In both cases, the cause of death was death by hanging.

''The information we have gathered leads us to believe the deaths were neither related or connected. We have no reason to believe either was a homicide and have not drawn any conclusions.''

-30- 977

#90085u2439 03/26/1990 ~United Press International

OTTAWA (MARCH 27) UPI - Canada's central bank Monday warned that Canadians face even higher interest rates unless there is a slowdown in consumer demand.

John Crow, governor of the Bank of Canada, told reporters he was hopeful inflationary pressures would ease over the next nine months. However, he admitted that so far there is no sign that consumer spending is letting up.

''We are doing our best to bring these (inflationary) pressures down. To date,we have not succeeded in doing so,'' Crow said.

In the Bank of Canada's annual report released Monday, Crow said that economic activity remained high in 1989 and that inflationary pressures intensified. Canadian consumer prices rose more rapidly during the year than they did in any of the previous five years.

In December, the consumer price index was more than 5 percent above its level at the end of 1988. The January year-over-year increase in the overall index jumped to 5.5 percent.

One of the largest contributors to inflation in 1989 was the 5.25 percent increase in base wage rates, compared to under 4.5 percent the previous year.

According to the Bank of Canada, demand for credit remained strong last year despite rising interest rates.

Credit growth in the private sector in last year's fourth quarter reached 12.25 percent from a year earlier. Mortgage borrowing rose by 15 percent last year, while personal loans, used mainly for buying consumer goods, posted an increase of 11.25 percent.

Interest rates, which had risen anout 2.25 percentage points in 1988, rose by 1.25 points in the first quarter of 1989, then remained stable the rest of the year. The differential over corresponding U.S. rates widened by about 2 percentage points following a decline in U.S. rates that began nearly a year ago.

In his report, Crow defended at length the central bank's attempts to combat inflation through higher interest rates.

Crow said the only alternative to higher interest rates was printing more money and ''financing whatever rate of inflation comes up.'' But, he said, such a policy would unleash inflation and serve no useful purpose.

Crow warned the Canadian government's plan to implement a 7 percent goods and services tax next January would drive up prices by an estimated 1.25 percent. If there is a corresponding pressure on wages, Crow said, it would worsen the inflationary spiral and force the central bank to raise interest rates even higher.

The trend-setting central bank rate was set at 13.38 percent last Thursday. The bank prime-lending rate at the end of 1989 was 13.5 percent and residential mortgage rates continue to hover at about 13 percent.

#90085u2500 03/26/1990 ~United Press International

INDIANAPOLIS (MARCH 26) UPI - Haulers poised at Indiana's borders with trash they hope to dump in the Hoosier state have longer to wait, because a federal judge Monday declined to immediately block Indiana's virtual ban on such garbage.

Two Pennsylvania companies challenged a newly enacted law covering out-of-state haulers in a court. About 70 ''trash watchers'' and their children from Center Point, Ind., who have monitored a western Indiana landfill for nearly a year, attended Monday's hearing.

''This deserves careful and elaborate thought,'' U.S. District Judge John Tinder said.

He will decide in a few days whether to issue a temporary restraining order and set a trial date of April 30 if there is no earlier disposition.

Jack Castenova Inc. and Government Suppliers Consolidating Services Inc. sued the state Friday, alleging the law unfairly requires only out-of-state haulers to show certifications that they carry no hazardous or infectious waste. They said Indiana is interfering with interstate commerce in violation of the U.S. Constitution.

The companies' lawyers asked Tinder to let them immediately resume hauling and dumping, but Indiana's lawyers countered that the state's interests outweigh the effect on interstate commerce.

#90085u2531 03/26/1990 ~United Press International

WASHINGTON (MARCH 26) UPI - Giant Food Inc., the Washington-based

food-drug chain, reported Monday net income was $38.8 million, or 64 cents a share, in the 16 weeks ended Feb. 24, up from the $35.7 million, or 60 cents, earned in the same period a year earlier.

Sales were $1.06 billion in the latest quarter, up from $966.6 million in the fiscal 1989 period.

For the full year, Giant Food's net income was $108.4 million, or $1.80 a share, up from $98 million, or $1.63 a share, in fiscal 1989. Sales were $3.25 billion, up from $2.99 billion.

Net earnings as a percentage of sales rose during fiscal 1990 from the prior year despite a substantial increase in operating costs which resulted from a September labor contract, the company said.

Giant Food also said it will open four new stores in Virginia during fiscal 1991.

(MARCH 27) UPI - SPORTS DIGEST

AUTO RACING

Stock racing's Dale Earnhardt, Indy car driver Bobby Rahal and road racer Martin Brundle were added to the field of 12 for the three-race International Race of Champions, which begins May 5 at Talladega, Ala. The IROC series matches drivers in identically prepared Dodge Daytonas. Also competing will be defending champion Terry Labonte, Rusty Wallace, Darrell Waltrip, Al Unser Jr., Danny Sullivan, Mark Martin and Geoff Brabham.

BASEBALL

A federal judge refused to order baseball's umpires to halt their job action and return to spring training fields. U.S. District Judge Norma Shapiro rejected a request by the NL and AL for a temporary restraining order that would have ordered the umpires back to work. Shapiro will hear a request for a preliminary injuction Tuesday. The request was filed in Philadelphia, where the umpires' union is headquartered.

BASKETBALL

David Robinson of the San Antonio Spurs, who averaged 31.5 points, 13.3 rebounds and 6 block shots per game while leading his team to a 4-0 record last week, was named Edge NBA Player of the Week for the period ending March 25.

BOXING

Olympic medalists Andrew Maynard, Michael Carbajal and Robert Wangila will fight on a day-night boxing double-header April 1 at Caesars Tahoe in Stateline, Nev. Carbajal, a light flyweight silver medalist, will open the morning session in a 10-rounder against Raoul Acosta in a bout Carbajal hopes will lead to a world title shot this year. Maynard, a light heavyweight Olympic champion from Landover, Md., headlines the evening session with a 12-rounder against Mike Sedillo. Wangila, the welterweight gold medalist from Uganda, fights Ramon Felix in an 8-round welterweight bout in the night session.

... Olympic bronze medalist Raymond Downey of Halifax, Nova Scotia headlines the Canadian boxing team that will meet the United States in a dual meet March 31 in Grand Forks, N.D. The squad features 10 of Canada's 1990 national champs.

COLLEGE

Texas-El Paso Coach Don Haskins is one of the leading candidates for the vacant coaching job at Lamar University. Haskins, who led the then-Texas Western College to an NCAA championship in 1966, acknowledged he has been contacted by Lamar. Other officials at UTEP have declined comment. ... Stacy Henson, a University of Kansas linebacker from 1985-87, was killed Sunday night when his car was hit at a stoplight by a car driven by a hit-and-run driver. The unidentified driver eventually ran off Interstate 435 and crashed into a fence.

HOCKEY

Minnesota North Stars right wing Brian Bellows, who scored nine points in three games, was named the Dodge Performer of the Week. Bellows recorded five goals and four assists for the week ending March 25. He raised his goal total to 52 for the season, the first 50-goal season of his NHL career.

HONORS

A.J. English of Virginia Union was named Division II Player of the Year and Matt Hancock of Colby College Division III Player of the Year by the National Association of Basketball Coaches. English and Hancock are guards who led their respective divisions in scoring. ... The NABC Scholar-Athlete awards went to Georgia forward-center Alec Kessler in Division I, David Lipscomb forward Phillip Hutcheson in Division II and Clark forward Jason Qua in Division III.

HORSE RACING

Mister Frisky was voted the favorite to win the Triple Crown by media covering thoroughbred racing. Mister Frisky received 33 of 39 first-place votes to hold a large lead over No. 2 Unbridled in the poll conducted by Thoroughbred Racing Communications, Inc.

LEGAL

Two men were arrested for breaking into the house of East German ice skating star Katarina Witt northeast of Berlin earlier this month. About $59,000 worth of stolen jewelry remains missing.

SOCCER

Dale Mulholland of the United States signed with leading Moscow team Lokomotiv, TASS reported. Mulholland, who has played professional soccer for teams in the United States, West Germany, South Korea and Hong Kong, was expected to join Lokomotiv immediately, TASS said. ... Franz Beckenbauer, coach of the West German national soccer team, said he was convinced that there would be an all-German team for the 1994 World Cup in the United States. ... Cleveland forward Zoran Karic, who scored four goals and two assists in three games last week, was named the MISL Offensive Player of the Week. Baltimore goalkeeper Scott Manning was named the Defensive Player of the Week.

TENNIS

The New Jersey Stars of the nine-team TEAMTENNIS Professional League will play their 1990 season home matches at Florham Park, N.J.

#90085u2584 03/26/1990 ~United Press International

PROVIDENCE, RI (MARCH 26) UPI - For more than five years, Raymond ''Junior'' Patriarca has been the reputed king of organized crime in New England, keeping a low profile as he directed the shadowy syndicate he inherited from his father.

Now that a federal grand jury has charged him with overseeing a mob operation that engaged in murder, drug trafficking and extortion, Patriarca faces his toughest challenge ever with the law while he reportedly battles cancer.

Moreover, the organization built by his father, Raymond L.S. Patriarca, already weakened by arrests, convictions and growing mistrust among its members, faces possible extinction, federal authorities say.

''It's the most significant organized crime case in the history of New England,'' U.S. Attorney Lincoln C. Almond declared. ''It virtually

indicts the entire Patriarca family.''

According to an affidavit filed by FBI agent James A. Ring, former head of the organized crime division in Boston, Patriarca, 45, ascended to the throne in 1984 following the death of his father, who ruled the New England mob for 40 years.

Before allegedly taking over the family business, prosecutors say ''Junior'' Patriarca had a few scrapes with the law but was never convicted of a crime.

State Police raided his Scituate home in 1971 and allegedly found 20 bundles of insulation. Patriarca was charged with receiving stolen property, but the charge was dismissed when two witnesses declined to testify.

In June 1972, mobster-turned-informant Vincent C. Teresa told a U.S. Senate subcommittee that Patriarca visited his father regularly at an Atlanta prison and returned to Rhode Island with orders for the elder Patriarca's top lieutenants.

In 1976, a man who helped rob $3 million in gold, cash, silver and jewelry from the Bonded Vault Co. in Rhode Island said ''Junior'' Patriarca assisted in planning the heist and received a share of the loot. Patriarca was never charged, however.

As the elder Patriarca's health began to fail, his son ''more or less took care of the business,'' and the father reportedly began touting him as a capable heir to the throne, Ring said.

Patriarca has reportedly been suffering from some type of cancer for several years, apparently testifying at a private hearing that he had been ''in and out of the hospital every three months'' with the disease.

#90085u2603 03/26/1990 ~United Press International

DETROIT (MARCH 27) UPI - Officials of both Chrysler Corp. and Italian carmaker Fiat SpA denied reports Monday that Fiat is directly involved in Chrysler's program to build a new small car domestically.

In its latest newsletter, Ward's Automotive Reports cited sources as saying Chrysler and Fiat were discussing a small-car program that could focus on Fiat's Tipo subcompact.

Gualberto Ranieri, a spokesman for Fiat's U.S. office in New York, called reports about Fiat building such a vehicle for Chrysler speculative, noting that engineers from both companies speak on a regular basis.

Chrysler spokeswoman Karen Stewart also said that the companies are always discussing projects and that Fiat's Teksid unit in Dickson, Tenn., supplies the No. 3 carmaker with engine cylinder heads.

But she declined to be more specific, noting that any talks are ''considered to be part of private business discussions.''

Earlier this year, however, top Chrysler executives said they have been talking with a number of other automakers about Chrysler's program to offer an all-new subcompact that would most probably be built domestically to help it meet corporate average fuel economy standards.

Chrysler ended production last month of the Omni and Horizon subcompacts, both of which debuted for 1978.

Both Chrysler and Fiat also denied overseas rumors that Fiat, which has virtually no automotive presence in the U.S. market, could be interested in acquiring a stake in the No. 3 automaker.

''That is pure, pure fantasy,'' Ranieri said.

Separately, another trade publication said Monday Chrysler is quietly assembling a fifth operating group that would be responsible for its small-car engineering.

The new group, which may get formal management approval later this month, would be responsible for the engineering of Chrysler's all-new ''P-L'' vehicle base, which would most likely appear in early 1994, said the Automotive Electronics Journal.

The vehicle base, known as a platform, would be a hybrid of Chrysler's Plymouth Sundance and Dodge Shadow compacts and the smaller Omni/Horizon cars, the publication said.

#90085u2622 03/26/1990 ~United Press International

SAN FRANCISCO (MARCH 26) UPI - Insurance companies in California are exempt from thousands of dollars in state taxes on their non-insurance businesses, the state Supreme Court ruled Monday.

The court upheld a constitutional provision that exempts insurers from all levies except real estate and motor vehicle taxes on their non-insurance businesses.

In a 4-3 decision, the high court rejected an attempt by the city of Los Angeles to collect taxes from the Mutual Life Insurance Co. of New York

for profits derived from the rental of an office building and parking lot.

Under the California constitution, the state levies a tax on gross premiums of insurance companies but gives them a broad exemption from nearly all other local taxes.

The tax provision, first enacted in 1910, was designed to make up for the added tax burden resulting from taxing gross, rather than net, premiums.

Courts have long ruled that insurers' so-called ''passive investments,'' such as stocks, bonds and motgages, were exempt from taxation, but lower courts have differed on ''active businesses,'' such as hotels and rental properties.

But the Supreme Court ruled that there was no justification under the original constitutional provision for taxing one type of business but not another.

The court dismissed the possibility that insurers could use the ruling to invest heavily in various active businesses, such as department stores, fast-food chains and donut shops.

''The state Legislature, in the exercise of its authority to regulate insurers' investments, could, if it wished, eliminate any perceived abuse of insurers' tax status simply by amending the laws governing their permissible investment,'' wrote Judge Edward Panelli in the majority opinion.

The three dissenting judges argued that the ruling created a tax loophole ''so sweeping so obvious, and so burdensome, that it manifestly violates the intent of the voters'' in adopting the constitutional provision.

''In order to take advantage of this enormously lucrative loophole, existing insurance companies would be well advised to invest in profitable businesses of all types,'' Justice Stanley Mosk wrote in his dissent.

Despite the tax exemption, which has been on the books for years, insurance companies have stuck largely to conservative, passive investments, said Douglas Smith, the attorney who represented Mutual Life in the case.

''It's all a bunch of smoke and mirrors by city councils scratching to increase their tax base in urban areas like Los Angeles,'' Smith said.

Ronald Tuller, assistant city attorney in Los Angeles, said he saw no grounds to appeal the decision to the U.S. Supreme Court.

#90085u2670 03/26/1990 ~United Press International
(MARCH 26) UPI - South Africa police open fire on black protesters... Anti-communists win Hungary's first parliamentary elections... Soviet leader Gorbachev says he woN'T use force in Lithuania unless lives are threatened... U-P-I has these top stories and more, next.

South African police opened fire on 30-thousand protesters in the black township of Sebokeng south of Johannesburg today... killing at least eight people and wounding more than 350.

Witnesses say police were NOT provoked before they fired bursts of shotgun fire and teargas canisters into a crowd that had set fire to municipal offices in a protest against poor living conditions.

Police also used tear gas to break up as many as 20-thousand marchers in Sharpville when demonstrators stoned a police station. And an unidentifed gunman damaged the township council headquarters in Soweto with rocket-propelled grenades last night. NO one was injured.

A police statement said- ''The situation is still volatile with police doing everything possible to stabilize the situation and restore law and order.''

Responding to a surge in white and black vigilante attacks in recent weeks... South African Law and Order Minister Adriaan Vlok is warning South Africans against taking the law into their own hands. He says it's better left with police.

Yesterday, black vigilantes halted a mini-bus loaded with blacks on the outskirts of Welkom... stabbed six people to death and set the van on fire.

Last week... an unidentified black wearing an A-N-C T-shirt was allegedly beaten to death by six whites... five of whom were later arrested.

-30- 1790
#90085u2691 03/26/1990 ~United Press International
(MARCH 26) UPI - Hungarians have kicked the Communists out of office... but there may NOT be any party strong enough to replace them.

With slightly more than half the votes counted from yesterday's free parliamentary elections, only three percent of Hungarians voted for the traditional Communist Party.

Former communists renamed as the Socialist Party managed to get 10 percent of the vote.

The big winners are the Hungarian Democratic Forum, with one-quarter of ballots cast, and its chief rival, the liberal Alliance of Free Democrats, with 21 percent.

But at least one political analyst says a coalition between those two groips would be fragile at best.

Endre Hann... an analyst for a Hungarian polling group... said NO coalition will be strong enough to have real power. Many districts will need runoff elections April 8th.

The White House today congratulated Hungary for what it called ''further movement along the path of democratic development.''

Lithuania's president says Moscow is trying to split Lithuania's government in an effort to halt the republic's independence movement.

President Vytautas Landsbergis says Soviet President Gorbachev is trying to make the split right at the top of Lithuania's government.

Gorbachev has kept in close contact with former Lithuanian President Algirdas Brazauskas, whose Communist Party was soundly defeated at the polls by the Lithuanian independence movement, which Landsbergis heads.

When Landbergis took power... he kept Brazauskas on as a deputy prime minister. Observers believe Brazauskas is one of the few people who can negotiate Lithuania's independence with Gorbachev.

In Moscow today, Gorbachev assured Massachusetts Senator Edward Kennedy he will NOT use force against the Lithuanians unless lives are threatened. But a spokesman for President Bush says Gorbachev is using a ''general pattern of intimidation'' against Lithuania.

-30- 2109

#90085u2704 03/26/1990 ~United Press International

(MARCH 26) UPI - New York City police are closing down illegal nightclubs in an effort to prevent more catastrophies like the arson fire that killed 87 people at the Happy Land social club in the Bronx yesterday.

Police are holding a Cuban immigrant charged with 87 counts of murder for setting the fire. Police say 36-year-old Julio Gonzalez... who came to the United States during the Mariel boat lift in 1980... set the club on fire after an argument with his ex-girlfriend who worked at the club.

Authorities say Gonzalez is remorseful. They've placed him under a suicide watch.

20 special police teams have swooped down on 179 known illegal social clubs. 165 of the clubs have NOT been open since the sweep began... but police say that's probably because they doN'T operate on Sunday or Monday. Authorities estimate there are more than 230 illegal social clubs in the city.

Defense attorneys for John Poindexter appear to be trying to shift the blame for much of the Iran-Contra scandal to Oliver North.

The former executive secretary of the National Security Council... Rodney McDaniel... testified in Washington today that North had a reputation for blowing out of proportion his own part in events.

McDaniel is a long-time Poindexter friend who served in the Navy for 28 years. He was the communications ''traffic cop'' within the N-S-C.

Poindexter's lawyers have requested permission to tell the jury that prosecutors have repeatedly called North a liar. The defense is trying to discredit North's testimony.

McDaniel also said Poindexter did NOT tell former President Reagan in 1986 that shot-down American gun-runner Eugene Hasenfus was connected with North's operation to arm the Contra rebels.

Poindexter is accused of five felonies... including conspiracy to obstruct the congressional Iran-Contra investigation, lying to Congress and the destruction of documents.

#90085u2740 03/26/1990 ~United Press International

(MARCH 26) UPI - The vegetable that earned a presidential veto arrived at the White House today to a warm welcome from first lady Barbara Bush.

Mrs. Bush accepted three crates of broccoli from California growers by declaring her love for broccoli.

But she said her husband will NEVER eat the vegetable, and she will NEVER eat pork rinds... a favorite snack of the president's.

Broccoli became the vegetable that launched a thousand quips after Bush banned it from the menu aboard Air Force One and in the White House.

With today's shipment, the United Fresh Fruit and Vegetable Association threw in a list of recipes meant to lure President Bush ''into the wonderful world of broccoli.''

The association also delivered 10 tons of the high-fiber vegetable for use

by Washington-area soup kitchens.

At least one California produce manager says the free publicity means the broccoli business is sprouting.

#90085u2764 03/26/1990 ~United Press International

(MARCH 27) UPI - Fans treat all umpires the same, whether they come from the majors, the minors or Little League. The men in blue will always incur the wrath of the fans.

Monday it was minor league umps who received the majority of the razzing. Teams played the first exhibition games of the spring using minor league umpires while the major league umps started a job action.

The major league umpires, who say they will work the regular season, contend they are being short-changed on salaries and benefits because of the shortened training season resulting from the 32-day lockout that ended March 19. The union also objects to not being consulted on the three-day extension of the regular season.

A trio of Triple-A umpires worked the Cleveland Indians-San Francisco Giants game in Scottsdale, Ariz. They took some abuse from the fans, but nothing out of the ordinary. The Pacific Coast League crew of Dan Wickham, Tom Mellor and Hank Schwartz even called a balk and drew praise from both managers.

Giants Manager Roger Craig poked his head into their locker room and said nice game. Cleveland Manager John McNamara complemented the crew by saying he didn't really notice them.

''I thought they did really good,'' said Cleveland pitcher Tom Candiotti, who was called for the balk. ''You got to think it's tough if he hadn't seen the pitchers before, especially the knuckleball. He called a balk on me and I really balked.''

Three umpires from the Class A South Atlantic League worked the Pirates-Cardinals game attended by Commissioner Fay Vincent in Bradenton, Fla.

''I would prefer to have them here,'' Vincent said.

A federal judge in Philadelphia rejected a request by the National and American leagues for a temporary restraining order that would have ordered the umpires back to work.

In ruling against the ball clubs, U.S. District Judge Norma Shapiro said

the leagues had failed to show they would be irreparably harmed by the umpires' action.

In exhibition games:

At Haines City, Fla., rookie Mickey Pina smashed a home run in the eighth inning to lift Boston to a 2-1 triumph over Kansas City. Pina victimized 1989 NL Cy Young Award winner Mark Davis, who was making his Royals debut after signing a four-year, $13 million contract.

At Fort Lauderdale, Fla., Steve Balboni doubled home two runs during a four-run sixth inning to lift the New York Yankees to a 5-4 victory over Atlanta. Rookie Mike Blowers, who will start at third base for the Yankees ignited the sixth with a single. He also homered.

At Miami, Tim Wallach drove in four runs with a three-run double and a sacrifice fly to give Montreal a 5-3 victory over Baltimore. Expos starter Dennis Martinez teamed with Dennis ''Oil Can'' Boyd and rookie Darrin Winston to shut out the Orioles on six hits over the first seven innings.

At Kissimmee, Fla., Mike Marshall singled home two runs during a three-run eighth inning to help the New York Mets post a 7-2 victory over Houston.Marshall was making his Mets debut after coming in a major trade with the Dodgers.

At Orlando, Fla., Hubie Brooks and Eddie Murray each hit a solo homer during a seven-run eighth to carry Los Angeles to a 13-6 pounding of Minnesota. Five of the seven runs were unearned. Gary Gaetti homered twice for the Twins.

At Bradenton, Fla., Barry Bonds and Don Slaught homered to lead the Pittsburgh to a 5-3 victory over St. Louis. Bonds put the Pirates ahead 4-1 with a two-run homer in the fourth. Slaught, obtained from the Yankees in December, added a solo homer. Terry Pendleton homered and Geronimo Pena hit a two-run triple for St. Louis.

At Scottsdale, Ariz., Gary Carter's bloop double scored Jamie Cooper from first with two out in the ninth to give the Giants a 4-3 triumph over the Indians. Chris James had a two-run homer for Cleveland.

At Port Charlotte, Fla., Jeff Kunkel collected two hits, including a solo homer, and drove in two runs to lead Texas to a 9-4 victory over the White Sox. Jamie Moyer went four innings and struck out seven for the Rangers.

At Yuma, Ariz., Roberto Alomar had three hits, three RBI and stole two bases in San Diego's 9-2 victory over California. The Padres, aided by four Angel'serrors, scored five unearned runs off Mike Witt to break a 2-2 tie in the fourth.

At Phoenix, Steve Howard's two-run single with two out in the ninth gave world champion Oakland a 6-5 decision over the Chicago Cubs. The A's scored five runs in the last two innings. Chicago's Ryne Sandberg homered, doubled and had three RBI.

At Tempe, Ariz., Edgar Martinez drove in two runs and five Seattle pitchers limited Milwaukee to three hits as the Mariners defeated the Brewers 7-0. Ken Griffey Jr., doubled twice for the Mariners.

In night games, it was Toronto vs. Cincinnati, at Plant City, Fla.; the Chicago White Sox vs. Texas, at Port Charlotte, Fla.; and Philadelphia vs. Detroit, at Lakeland, Fla.

#90085u2792 03/26/1990 ~United Press International

AZUSA, Calif. (MARCH 27) UPI - Intraocular lens producer Optical Radiation Corp. said late Monday it will take an aftertax charge of $6 million to $8 million for the third quarter ending April 30 because of damages from a patent infringement case.

The company said a federal court in Los Angeles has found that Optical Radiation and two other companies - Johnson & Johnson and Pharmacia - are infringing on a patent held by Dr. Ronald P. Jensen in the manufacture of multi-piece intraocular lenses.

Optical Radiation, which had fiscal 1989 revenues of $109.6 million, said it intends to appeal the decision.

The charge is intended to cover the amount of that the court ruled should be paid for royalties on the lens sales over the past nine years and includes a provision for interest.

The lenses are used as part of cataract surgery to replace the eye's natural lens.

-30- 1076

#90085u2883 03/26/1990 ~United Press International

(MARCH 26) UPI - Hospital officials in South Africa say at least eight people were killed and 350 injured today when police opened fire on demonstrators protesting poor living conditions in the black township of Sebokeng , near Johannesburg.

A spokesman for Czechoslovakia's government says scientists are closing in on a way to make Semtex plastic explosives more detectable. The former communist government sold tons of Semtex to Libya... which passed it on to

terrorist groups.

The Soviet news agency Tass reports at least one person killed and four others injured as Armenians fired on a bus carrying Azerbaijanis today. Nine people were killed in weekend violence in the disputed enclave of Nagorno-Karabahk.

A Jerusalem newspaper reports the Israeli government has charged five Israeli employees of the U-S Embassy in Tel Aviv with forging passports and entry visas into the United States. The employees reportedly made hundreds of dollars per passport.

10-thousand ultra-Orthodox Jewish men gathered today in Tel Aviv to hear a 92-year-old rabbi who guides two political parties holding votes critical to the formation of Israel's next coalition government. The Degel Hatorah annual party convention is expected to reveal which side the party will back.

Federal regulators said in Washington today that high living by former CenTrust Bank Chairman David Paul could cost the government more than two-BILLION dollars. The Miami-based thrift failed after buying Paul personal items such as a seven-Million-dollar yacht.

Forecasters predict an Arctic air mass will cause extensive damage to trees and flowers tonight from New Jersey through Virginia. Many plants have bloomed early because of a warm March, but temperatures are expected to drop to the low 20's in the East.

A Trans World airliner aborted takeoff this morning from Boston when an engine apparently caught fire. Officials said seven people suffered minor injuries when the plane was evacuated using emergency slides.

#90085u3213 03/26/1990 ~United Press International

(MARCH 26) UPI - Moscow's war of nerves is escalating against the rebellious republic of Lithuania. A military helicopter dropped hundreds of leaflets today near Lithuania's parliament urging citizens to take to the streets in protest against their government's declaration of independence. The leaflets called for demonstrations in the capital of Vilnius tomorrow. The latest move comes as Massachusetts Senator Edward Kennedy discussed the crisis with Soviet President Gorbachev in Moscow.

Hospitals report South African police shot and killed at least eight people today. It's the worst violence in the country since racial reforms were announced last month. Witnesses say police fired shotguns and teargas withOUT provocation at a crowd of 30-thousand surrounding municipal offices in atownship south of Johannesburg. Police said the offices were

set on fire, and law officers were under constant attack by stone-throwers.

Senate Republican leader Robert Dole is accusing some senators of wanting the United States to- quote- ''turn our backs'' on the new governments of Nicaragua and Panama. Some senators say that part of the 800-Million dollars in aid requested for the two countries should be diverted to emerging democracies in Eastern Europe. Dole says Panama and Nicaragua are just as important as Eastern Europe.

Congressman Ron Wyden opened a hearing on the country's weight-loss industry today... saying the government has to begin regulating the 33-BILLION-dollar a year industry. The Oregon Democrat says the government's failure to properly police rapid weight-loss diets, new questionable products and programs run by untrained staff may be partially to blame for the large number of lawsuits against weight-loss products.

The leader of East Germany's Social Democrats resigned his party job and his parliamentary seat today after a West German magazine implicated him as a former member of the secret police. The magazine quotes anonymous sources as implicating the leaders of many of East Germany's new parties. Party leaders deny the charges.

In Tacoma, Washington, a man convicted of raping, choking and mutilating a seven-year-old boy was sentenced to 131-and-one-half years in prison today. The judge said he wanted to ensure Earl Shriner is NEVER freed. The mother of the victim said she and her son could only feel safe if Shriner were locked up for the rest of his life.

#90085u3489 03/26/1990 ~United Press International

(MARCH 26) UPI - Moscow has stepped up the propaganda war against Lithuania's independent-minded government. A military helicopter hovered near the Lithuanian parliament and dropped hundreds of leaflets urging Lithuanians to take to the streets tomorrow in protest against their government's declaration of independence. In another Moscow move, Soviet military officers entered the parliament for meetings with the government.

An anti-communist party begun by dissident intellectuals has won Hungary's first elections in four decades. With 80 percent of yesterday's vote counted, the Hungarian Democratic Forum has corralled one-quarter of the vote. The group appeals to nationalism and favors pro-Western policies. The Alliance of Free Democrats... a liberal pro-Western group... is runner-up with 21 percent of the vote. The count is suspended until tomorrow due to computer failure.

New York authorities said today a man charged with killing 87 people in a Bronx social club by starting a fire knew the victims would have NO way

out. Julio Gonzalez is a Cuban immigrant charged with the worst mass slaying in U-S history for yesterday's blaze. The Bronx D-A says Gonzalez knew the illegal club had NO rear exit or second floor windows. 20 teams of police officers, firefighters and building inspectors are combing New York City to shut down 237 illegal social clubs.

Garment workers in New York today commemmorated the deaths of 145 workers in a shirt factory blaze that burned 79 years ago. Mayor David Dinkins lamented what he called the ''vicious irony'' that 87 people died in a fire at a Bronx social club yesterday... the same date on which the factory fire occurred. Dinkins noted that many of those who died in the Triangle Shirtwaist factory blaze, like those who died in the club, were recent immigrants.

#90085u3794 03/26/1990 ~United Press International
(MARCH 26) UPI - Technicians at many nuclear power plants around the country stayed away from work today to demand a vote on unionization. The International Brotherhood of Electrical Workers and the National Regulatory Commission says the walkout has shut down some of the 38 power plants targeted. A spokesman for the N-R-C says he believes there's NO safety threat, but refueling a nuclear plant without the technicians would violate federal law.

Lawyers for Ivana Trump filed a lawsuit in New York state Supreme Court today, claiming half of her husband's estimated five-BILLION-dollar fortune. But they say Ivana won't seek a divorce... despite Donald's alleged extra-marital affairs. The lawyers say Ivana Trump is- quote- a ''Catholic woman devoted to the idea of the family and doesn't want a divorce.'' A pre-nuptial agreement updated in 1987 offers her only as much as 20-Million dollars.

A University of Alabama researcher says eating soybeans may reduce a woman's risk of developing breast cancer. Dr. Stephen Barnes says substances in soybeans called ''phyto-estrogens'' may explain why women in Asia who eat soybeans are eight times less likely to develop breast cancer than American women. He notes that Asian-American women who eat American diets are just as likely as other American women to get breast cancer.

The F-B-I today unveiled a new weapon in a 12-year-old manhunt. It's a bust of Leo Koury, who's been wanted longer than anyone else on the ''10 Most Wanted List.'' The one-time Richmond, Virginia, man is charged with two murders and three attempted contract slayings from 1975 to '77. The bust will be shown on Fox Television's ''America's Most Wanted'' this Sunday.

-30- 1880
#90085u3981 03/26/1990 ~United Press International
(MARCH 26) UPI - The latest news from around the world and across the nation... details and developments from the wires of United Press International.

A New York prosecutor says a former Cuban soldier used a calculated plan to send 87 people to their death by fire yesterday.

Bronx District Attorney Robert Johnson says 36-year-old Julio Gonzalez... who came to this country on the Mariel boatlift in 1980... lit the Happy Land social club on fire yesterday because he was a jilted lover bent on revenge.

Gonzalez told police he drank two beers at the club and started arguing

with his former girlfriend... who worked there as a ticket-taker.

Johnson said before Gonzalez was kicked out of the club by a bouncer... he told an employee he ''would shut this place down.''

Johnson said Gonzalez walked to a nearby gas station and persuaded an attendent to fill a small container with a dollar's worth of gasoline.

Johnson said Gonzalez returned to the club, poured gasoline between the street and an inside door, and lit it. After watching the fire burn for a while, Gonzalez returned home, where police found him a few hours later.

Johnson said Gonzelez knew he'd be forcing occupants of the club to choose between staying inside or breaching a wall of flames at the doorway. Gonzalez also knew there were NO windows on the second floor.

Johnson says he hopes to put Gonzales away for two-thousand years on 87 counts of murder.

#90085u3994 03/26/1990 ~United Press International

(MARCH 26) UPI - It looked like tensions were easing in Lithuania today... but then a military helicopter dropped hundreds of leaflets in front of the Lithuanian parliament urging a demonstration against the Lithuanian government tomorrow.

The leaflets ridiculed the Lithuanian government for its inability to be recognized by other governments around the world as an independent nation.

The leaflets ended with a call for an anti-independence rally tomorrow afternoon in front of the parliament building.

Lithuanian President Landsbergis... who leads the independence movement... called the leaflets very primitive and ''an insult to the working people.'' He said other governments were moving toward recognition of Lithuania.

Lithuania's deputy prime minister earlier said ''the mood has changed for the better'' in Lithuania following talks with Soviet military officials.

In Moscow, Soviet President Gorbachev told visiting U-S Senator Edward Kennedy today that he would NOT use force against Lithuania unless lives were threatened.

(MARCH 26) UPI - Given a choice for the first time in 43 years, Hungary's voters have rejected communism.

The old-line communists got little more than three percent of the vote in yesterday's election. It was the first free vote since the communists took over in the late 1940's.

The Hungarian Socialist Party... made up of former communists who renamed and reoriented last fall... got about 11 percent for fourth place.

The top finishers were the Hungarian Democratic Forum... with almost 25 percent of the vote... and the Alliance of Free Democrats, with 21 percent.

The Forum is an anti-communist party started by 170 writers and thinkers who gathered in 1987 to discuss the worsening political and economic situation.

The Forum wants closer ties to the West, as does the Alliance. But the common ground between the two parties apparently ends there. Analysts say any governing coalition will be shaky.

The vote counting wass suspended until tomorrow because of a computer breakdown.

An aide to former National Security Adviser John Poindexter testified today that that former White House aide Oliver North made more of his own role in events than was the case in reality.

Rodney McDaniel spoke in Washington at the Iran-Contra trial of his longtime friend Poindexter. McDaniel was executive secretary of the National Security Council. He said others at the council shared his opinion that North overestimated his own importance.

The testimony is apparently part of a defense move to discredit North's testimony. North has testified he had Poindexter's approval for every aspect of his activities.

McDaniel said North was- quote- ''NOT your normal lieutenant colonel...'' but was ''very aggressive... very can-do.''

Poindexter is accused of five felonies including conspiracy to obstruct the congressional Iran-Contra investigation.

U-S District Judge Harold Greene ruled in favor of prosecutors and prevented testimony from former hostage David Jacobsen. Greene said the testimony would be ''irrelevant'' and inflammatory.

#90085u4051 03/26/1990 ~United Press International
(MARCH 26) UPI - Hundreds of nuclear power plant technicians around the country failed to report for work today in an effort to obtain a vote on whether to unionize.

The International Brotherhood of Electrical Workers is engineering the work slowdown to force contractors to allow a union election.

Workers want increased pay and benefits. Nuclear power officials warn that a lengthy job action could cost the nuclear industry Millions of dollars.

The slowdown involves health physics technicians, who monitor radiation levels at reactors during fueling and other activities. The Nuclear Regulatory Commission says the worker's absence shut down some of the 38 power plants nationwide.

A spokesman for the N-R-C says he believes there is NO safety threat... but refueling without the technicians would be a violation of federal law.

The I-B-E-W says there are about three-thousand health physics technicians nationwide.

The union represents most of the permanent workers at many of the plants.

Yasser Arafat today reportedly warned there will be another war in the Middle East unless Palestinians get their own nation.

Kuwait's official news agency quotes the chairman of the Palestine Liberation Organization as saying there will be a ''devastating war'' without Palestinian independence.

Arafat also reportedly claimed Israel will use an influx of Soviet Jews as an excuse to claim surrounding lands from other countries. He predicted Israel will try to turn Jordan into a ''second Lebanon,'' and use it as a substitute homeland for Palestinians.

Arafat arrived today in India for a three-day visit. India recognizes Arafat as a head of state and gave him a 21-gun salute.

During his stay, Arafat will receive the 1988 Jawaharlal Nehru Award for International Understanding. He is also scheduled to fly to Calcutta to meet Nobel Peace Prize Laureate Mother Teresa.

#90085u4067 03/26/1990 ~United Press International
(MARCH 26) UPI - U-S Attorney General Thornburgh says the government has

driven a ''stake in the heart'' of the Patriarca crime family.

The F-B-I unsealed three indictments today against 21 organized crime figures headed by reputed New England mob boss Raymond ''Junior'' Patriarca.

Thornburgh says the F-B-I for the first time recorded a blood ceremony in which members of the crime family took oaths to stay loyal to the family. Patriarca allegedly presided over the ceremony in Medford, Massachusetts, in which blood was drawn from the fingers of soldiers inducted into the crime family.

Thornburgh says quote- ''It should lay to rest once and for all any doubts that La Cosa Nostra is a figment of law enforcement imagination.''

Thornburgh did NOT say whether any law enforcement agents actually joined the crime family.

Authorities arrested Patriarca... and at least 15 of the reputed mobsters in connection with 113 separate counts ranging from murder to extortion to kidnapping. Patriarca was arrested at his Lincoln, Rhode Island, home. He'll be arraigned in Boston.

Police in Clifton, New Jersey, are investigating the stabbing deaths of a deaf couple and a grandfather who decomposed in their apartment for a week while the couple's 17-month-old daughter managed to survive.

Authorities say the 17-month-old girl... who is hearing-impaired... was apparently able to survive by eating cereal and drinking water from the clean toilet bowl. Hospital officials say she's being treated for dehydration and diaper rash.

The landlord found the family yesterday after neighbors said they had NOT seen them in a week.

The husband... a Polish immigrant... was employed in a rubber factory. He was found lying naked next to his bed with multiple stab wounds. His Chinese-American wife was found fully clothed and sitting up in a chair by the bed with two stab wounds to the chest. Both husband and wife were deaf.

The husband's father was found in another bedroom... also stabbed to death.

#90085u4149 03/26/1990 ~United Press International

(MARCH 26) UPI - A hostage situation reported tonight at the Utah State Prison's maximum-security wing. Corrections officials at the facility 20 miles south of Salt Lake City say at least one inmate has taken a guard

hostage.

The Supreme Court agreed today to decide if employers can bar women of child bearing age from certain jobs because the work could lead to birth defects. At issue is whether Johnson Controls can bar potential child-bearing women from working with lead, which is believed to pose a serious threat to a fetus.

Homosexuals are being urged to count themselves. Political and gay activists say homosexual couples living together should check the ''unmarried partners'' category on their 1990 census forms to ensure the government knows gays are a sizable group in American society.

Native Americans also want to be accurately counted. A spokesman for the Lumbee Indians of North Carolina says the Census Bureau has made changes in the 1990 census to avoid the drastic undercount of American Indians that occurred in 1980.

It apparently pays to be a lawyer in private practice. A National Law Journal survey finds first-year lawyers at private firms earn as much as 83-thousand dollars a year. That's only 16-thousand dollars less than is earned by the U-S attorney general, the nation's top law-enforcement officer.

(MARCH 26) UPI - The country of Honduras is reacting with shock to the news of yesterday's fire at an illegal social club in New York City. A Honduran official in New York says at least 31 of the 87 victims of the fire have been identified as Honduran immigrants. Callers to Honduran radio shows as well as Hondurans in the United States say more Hondurans would have died were it NOT for a party held at the same time by Honduran soccer team members.

Soviet President Gorbachev assured U-S Senator Edward Kennedy in Moscow today that force will NOT be used to stop Lithuania from its independence campaign... unless lives are threatened. Lithuania's president hopes Kennedy can act as an intermediary with Moscow. In Vilnius, a military helicopter dropped leaflets near the Lithuanian parliament building today... calling for a rally against the Lithuanian government tomorrow.

NASA has reviewed two trouble spots on the landing gear of the space shuttle Discovery, and today declared all systems go. Officials are recommending the spacecraft take off on schedule April 12th from Cape Canaveral, Florida, to launch the Hubble Space Telescope into orbit. The housing around the axle of another shuttle had slipped and hit an axle, causing slight damage. But NASA says the Discovery is expected to make a

softer landing and have NO problems.

The governor of Idaho says he is taking seriously a threatened boycott of Idaho potatoes if he signs what would become the most restrictive state abortion law in the nation. The bill is due on the desk of Governor Cecil Andrus tomorrow. Andrus says he considers himself ''pro-life,'' but is reserving his decision on the bill. Abortion-rights activists have vowed a nationwide boycott of Idaho potatoes if Andrus fails to veto the bill.

#90086b0003 03/27/1990 ~Business Wire

LOUISVILLE, CO (MARCH 27) BUSINESS WIRE - Storage Technology Corp. (NYSE:STK) Tuesday announced that it has expanded its high-speed, nonimpact printer offerings with the addition of two new cut-sheet printers, the StorageTek 6024, a 24 page-per-minute printer, and the StorageTek 6060, a 60 page-per-minute printer.

''These cut-sheet printers complement our existing fanfold impact and nonimpact printers. We're pleased to expand our printer offerings and welcome cut-sheet capability into our family of printers,'' said Ryal Poppa, StorageTek chairman, president and chief executive officer.

''Now our customers have the additional performance, print quality, and configuration and location flexibility to meet all their printing needs.''

StorageTek's printer controller expertise allows it to be the first non-IBM vendor to offer high-speed Advanced Function Printing and Intelligent Printer Data Stream (AFP/IPDS) compatibility. By offering printers that conform to the AFP/IPDS standard, StorageTek preserves its customers' investments in printer technology and protects the integrity of their applications.

Both the StorageTek 6024 and the 6060 printers utilize current light emitting diode (LED) technology which provides improved print quality and product reliability.

Minimal floor space, low acoustic operating levels, one-phase power and a new level of operator friendliness ensure these devices may be installed not only in the raised-floor computer room environment but also in the standard office, laboratory and manufacturing areas as well. The multiple-environment design provides customers with the option of moving printer output closer to the user.

General availability for the 6024 is scheduled for second quarter 1990 with anticipated delivery of the 6060 at the end of 1990. List price for the 6024 is $33,375 (U.S.). Total cost of ownership for the 6060 is expected to be competitive with other advanced function printer products of similar speeds.

Storage Technology manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

#90086b0017 03/27/1990 ~Business Wire

NEW YORK (MARCH 27) BUSINESS WIRE - As AT&T Computer Systems unveiled its new RHAPSODY business orchestration solution Tuesday in New York, Microsoft Corp. announced that several of its products have been chosen by AT&T as key components of the system.

The Microsoft Windows graphical environment, Microsoft Excel for Windows, and Microsoft Word for Windows, as well as other Microsoft Windows applications, will be offered on the RHAPSODY desktop workstations, and StarGroup Software LAN Manager server will serve as the networking software. The RHAPSODY system will be sold to corporate accounts through

AT&T.

AT&T's choice of Microsoft as a key partner and its recognition of Microsoft products as emerging standards in the market is consistent with that company's policy of supporting industry and de facto standards.

''Our selection of Microsoft applications and the Windows graphical environment is based on customer demand. These products are used by a major portion of our targeted market and customers are requesting them,'' said Bill Nelson, marketing director, AT&T. ''In addition, we found Microsoft applications to have the highest degree of functionality because they conform to Windows and are most intuitive for end users to learn and use.''

''Microsoft applications for the Windows environment provide the best interoperability for personal computer users, on Windows as well as other platforms,'' said Mike Maples, vice president of Microsoft's applications software division. ''We are very pleased to see Microsoft Word and Microsoft Excel as the flagship applications in the RHAPSODY system.''

AT&T Selects Graphics for the DesktoMicrosoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems, languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

PHOENIX (MARCH 27) BUSINESS WIRE - Siemens AG, Berlin/Munich, and SGS-THOMSON Microelectronics, Paris/Milan, have decided to cooperate in the field of high performance microcontrollers.

The objective is to provide a comprehensive and integrated common solution for high-end 8-bit and 16-bit microcontroller applications.

Siemens has developed a proprietary family concept of 16-bit microcontrollers and is currently introducing the first family member (SAB 80C166) with a performance superior to any other 16-bit controller

currently announced or available. SGS-THOMSON has developed its versatile and highly modular ST9 family, a proprietary architecture with a large number of versions already available, featuring a variety of integrated peripherals as well as innovative EPROM and EEPROM options on chip.

Within this cooperation the two companies intend to second-source reciprocally the two chip families and to expand the product portfolios developing further derivatives.

The two companies will continue to support their current microcontrollers families, notably the 8051-compatible family by Siemens and ST6 and ST8 families by SGS-THOMSON.

The microcontroller world market is estimated to be $3.3 billion in 1989. The 8-bit microcontrollers are expected to have a two-thirds market share, but 16-bit controllers are to ramp up. Their market volume is today around $50 million. Due to their high computing power they are expected to be used in time-critical missions. Besides automotive, main applications are in computer peripherals, industrial applications, telecom and consumer electronics.

SGS-THOMSON Microelectronics designs and manufactures a wide range of semiconductor components including discretes: power transistors (LF and RF), SCRs/triacs, protection devices; MOS LSI: microprocessor, semicustom, graphic, and memory devices; standard logic; linear and dedicated analog/digital ICs for automotive, telecommunications, datacommunication, computer and military applications. The company is the world's No. 1 supplier of smart power devices.

#90086b0028 03/27/1990 ~Business Wire

SAN FRANCISCO (MARCH 27) BUSINESS WIRE - Bank of America announced Tuesday Purchase Security and Extended Protection on all personal checking accounts.

Effective immediately, almost any purchase made using a Bank of America personal checking account will be protected against loss, theft, damage or fire for 90 days after purchase -- at no cost to the customer. And, as of April 1, purchases made using BankAmericard credit cards will also be covered.

Bank of America is the first major California bank to offer this benefit

to checking and credit card customers.

With the new Purchase Security and Extended Protection Program, almost all purchases made with any BofA personal checking account or any BankAmericard Mastercard or BankAmericard Visa will be covered. Purchase Security protects most items, including gifts, for a full 90 days from the date of purchase. Extended Protection automatically doubles the manufacturer's U.S. warranty (up to one additional year) on things like home appliances, video equipment, computers, toys and sports equipment.

''With this service, our customers can save hundreds of dollars in costly repair or replacement bills,'' said Thomas E. Peterson, Vice Chairman, Consumer Banking.

''The program has been designed to make it as simple as possible for our customers,'' Peterson added. ''They do not have to sign up for the service, nor do they have to register their purchases. Coverage is automatic and provided by the bank at no cost to our customers.

''Purchase Security and Extended Protection is an important new benefit to simplify the lives of our customers,'' said Peterson. ''We believe the introduction of this service makes our checking accounts and credit cards even more valuable.''

SANTA CLARA, CA. (MARCH 27) BUSINESS WIRE - National Semiconductor Corp. Tuesday announced the formation of the office of the vice president for worldwide marketing and sales, and the creation of a North American business center within the marketing and sales organization.

These organizational changes are designed to enhance the company's ability to respond to customer requirements and to opportunities in the global marketplace.

Patrick J. Brockett has been appointed vice president, North American business center. He joins Donald P. Beadle in sharing the office of vice president, worldwide marketing and sales.

In naming Brockett to this position, Beadle said, ''The establishment of a North American business center within the worldwide marketing and sales organization allows National Semiconductor to focus our marketing and sales activity more directly and efficiently and is a natural extension of

our effort to become increasingly customer driven.

''We have already realized benefits from the organization of similar business centers in Europe, Southeast Asia and in our distribution unit. The ultimate results will be a more cohesive and effective sales and marketing effort worldwide.''

Under the new organization, Beadle will have primary responsibility for National Semiconductor's marketing and sales business centers in Europe, Southeast Asia and Japan. Beadle also oversees the management of strategic planning, strategic marketing development and worldwide marketing communications.

In managing the North American business center, Brockett will oversee a business center group dedicated to marketing volume products, as well as one assigned to systems products. He will also have responsibility for North American field sales, major accounts, distribution, and customer service.

Beadle joined National Semiconductor in 1960. He was named vice president worldwide marketing and sales, in 1988. Prior to that, he served as vice president, international marketing. He has held various marketing and sales positions during his 30 years with National Semiconductor, including vice president and managing director, Europe.

Brockett, who most recently served the company as vice president and managing director, Europe, joined National Semiconductor in 1979. He has held various marketing and management positions within the company's European business center.

PHOENIX (MARCH 27) BUSINESS WIRE - Dan Kapetanovic has been named to the position of sales-marketing manager for the Reliance MetalCenter of Phoenix, a division of Reliance Steel & Aluminum Co.

Kapetanovic's appointment was announced by Division Manager Jerold E. Trompke. He replaces Cliff Wilson, who was recently appointed special accounts manager.

Kapetanovic, a 23-year metals verteran, was formerly with Smith Pipe & Steel Co. of Phoenix serving as sales manager. Prior to joining Smith Pipe & Steel he was general manager for U.S. Steel Supply Division of Buffalo, N.Y.

A native of Hammond, Ind., Kapetanovic graduated in 1971 from Purdue University with a B.S. degree in industrial management.

Reliance Steel & Aluminum, founded in 1939, is one of the nation's largest independently owned full-line distributors and processors of metal. The 18 metal centers of the expanded network are in California, Oregon, Arizona, Utah, Texas and New Mexico.

#90086b0069 03/27/1990 ~Business Wire

SANTA CLARA, CA. (MARCH 27) BUSINESS WIRE - 3Com Corp. Tuesday announced pricing and availability of two new products that comply with the proposed IEEE 10BASE-T specification for point-to-point communication via Ethernet on dual twisted-pair wiring.

New from 3Com are a 10BASE-T network adapter for the IBM Micro Channel Architecture and a 10BASE-T twisted-pair module for 3Com's MultiConnect Multiport Repeater. 3Com also announced availability of a five-package set of its first 10BASE-T compliant product, an Ethernet adapter for IBM PCs and compatibles, which began shipping in single units in January.

10BASE-T Ethernet's point-to-point star topology, which gives each workstation a direct link into the wiring closet, is designed for easier network manageability. This configuration enables the network manager to isolate and troubleshoot a problem connection without affecting the rest of the network or disturbing other users.

All products in 3Com's 10BASE-T family come with 3Com's guarantee that it will provide product upgrades or replacements in the unlikely event the final IEEE specifications differ from those implemented in 3Com's existing 10BASE-T products.

In addition to complying with the latest IEEE draft standard for twisted-pair Ethernet networks, 3Com's 10BASE-T adapter products are backward compatible with prestandard concentrator hubs manufactured by SynOptics, Hewlett-Packard, AT&T and DAVID Systems.

3Com's EtherLink/MC TP (twisted pair) adapter for IBM's Micro Channel bus provides connectivity to PS/2 Models 50 through 80, architecture and 16-bit bus interface. It will be available in 30 days for US$495.

The MultiConnect TP Module, which plugs into any of 15 slots in 3Com's MultiConnect repeater, provides three hub connections to 10BASE-T

twisted-pair wiring segments. The system supports up to 45 direct connections to twisted-pair wiring in a single MultiConnect chasis, accommodating up to 1,024 connections through multiple repeaters as the network grows.

The three-port MultiConnect TP Module, available in May for US$595, will interoperate with other MultiConnect modules which support standard (thick) and thin coaxial cable, shielded and unshielded twisted-pair wiring, IBM Token Ring Cabling and 3270 cable, ARCnet and fiber-optic media.

3Com's EtherLink II TP adapter, which began shipping in January for US$445 connects IBM Personal Computers, Personal System/2 (PS/2) Models 25 and 30 and compatibles to 10BASE-T networks. A five-package set of the adapters sells for US$1,875, or US$375 per board.

All of 3Com's 10BASE-T products will be available from 3Com and its worldwide network of value-added resellers and distributors.

3Com Corp. is a computer networking company providing multivendor connectivity and information sharing for workgroups, departments and corporate environments worldwide. The company designs, manufactures, markets and supports a comprehensive range of networked client-server computing systems based on industry standards and open systems architecture.

SAN JOSE, CA (MARCH 27) BUSINESS WIRE - Digital Microwave Corp. (NASDAQ, NMS:DMIC) announced Tuesday the continued expansion of its base business in the United Kingdom.

Orders totaling $3.6 million were received by DMC Telecom UK, its wholly owned European subsidiary, for the supply of 8, 13 and 23 Gigahertz digital microwave radios from two major U.K. utilities: British Gas and SEEBOARD, a Southern England electric utility. Shipments are scheduled to begin immediately.

''DMC equipment has been chosen for the main trunk routes of SEEBOARD's corporate communications network. The Digital Microwave Links will replace a number of existing digital line circuits providing additional capacity for future growth at a reduced operating cost. The DMC offer met fully our requirements,'' commented David M. Lewis, information services manager with SEEBOARD.

''We are pleased with the expansion of our business in the U.K. utility market and the acceptance of our digital radios for this important application,'' commented William E. Gibson, president and chief executive officer of Digital Microwave Corp.

Headquartered in San Jose, Digital Microwave Corp. is a leading supplier of high performance short-haul transmission products to domestic and international markets.

#90086b0086 03/27/1990 ~Business Wire

DENVER (MARCH 27) BUSINESS WIRE - Public Service Co. of Colorado Tuesday said that as a result of a calculation error, the reduction in electric rates to customers will be $20 million less than originally announced.

PSCo's electric rates to customers have been reduced for the past two years. These reductions have totaled $68 million. The last phase of the reductions, agreed to by the Colorado Office of Consumer Counsel, and approved by the PUC, is set to expire Saturday, March 31. At that time, PSCo's electric rates are scheduled to return to authorized higher levels.

James H. Ranniger, vice president, Regulation and Distribution Operations, said that Public Service Co. has asked the PUC to continue the 4.29 percent reduction in electric rates through April 30 -- one month longer than originally planned. ''We will then know by the end of April what further rate adjustment action, if any, is needed in keeping with

authorized earnings,'' Ranniger said.

Public Service Co. has committed to the PUC to hold earnings in 1990 to the authorized rate of return and to return to customers any excess earned above that authorized level. PSCo further has pledged to file a rate case in late 1990 to review pricing of electricity and natural gas. ''As we previously stated,'' Ranniger said, ''this does not necessarily mean that energy rates will increase.''

Public Service Co. points out that there is no obligation on the company's part to continue any kind of rate reduction beyond March 31.

''Our commitment to the PUC and our customers is to have rates that allow us to earn the return we have been authorized. We thus announced March 16 that we thought a 2.81 reduction in electric rates for the balance of 1990 would achieve that goal.

''Unfortunately we miscalculated the reduction that would be necessary,'' Ranniger said.

''We know that continuing the 4.29 percent reduction for one more month will bring us closer to meeting our commitment,'' he said. Ranniger pointed out that with PUC authorization it will take whatever action -- reductions or refunds -- to ensure PUC-approved earnings levels for the company are not exceeded, while rates are kept at the lowest level possible.

BELLEVUE, WA (MARCH 27) BUSINESS WIRE - First Mutual Savings Bank (NASDAQ:FMSB), which recently reported record annual earnings of $1.5 million for 1989, said Tuesday it is urging shareholders to reject an attempt by Arthur W. Skotdal of Everett, Wash., to put his personal representatives on the bank's board of directors.

A small group assembled by Skotdal is seeking to replace three of the bank's 10 directors with his nominees at the annual meeting of shareholders scheduled for April 26. First Mutual's President and Chief Executive Officer Bruce Baker, Vice Chairman Scott Wallace, and Linda Nordstrom are standing for election this year.

''Mr. Skotdal says the only reason he is waging this expensive and disruptive proxy contest is to attempt to convince the board of directors to pursue the sale of the bank. Even if elected, Mr. Skotdal's personal representatives will have gained control of less than one-third of First Mutual's board seats and, therefore, Mr. Skotdal would still be unable to dictate his demands to the Board,''
said Chairman F. Kemper Freeman Jr.

''First Mutual's Board of Directors has publicly stated many times that it would consider all serious offers. Although we are not seeking offers and do not believe it is the right time to sell the Bank, you should know that we have never received an offer to purchase the Bank from Mr. Skotdal or anyone else,'' Freeman noted.

The following letter is being mailed to First Mutual's shareholders:

This solicitation is being made on behalf of
First Mutual's Board of Directors.

March 27, 1990

Dear First Mutual Shareholder:

Regrettably, Arthur W. Skotdal of Everett, Washington has once again formed a small group of First Mutual shareholders in an attempt to have his way with your Bank and its Board of Directors. Many of you remember the group Mr. Skotdal assembled in April 1988, which he dissolved last summer. Two years ago, his earlier group said they ''may seek to acquire a controlling interest'' in the Bank.

First Mutual's Board of Directors has publicly stated many times that it would consider all serious offers. Although we are not seeking offers and do not believe it is the right time to sell the Bank, you should know that we have never received an offer to purchase the Bank from Mr. Skotdal or anyone else.

This time, Mr. Skotdal has chosen to wage an expensive and disruptive

proxy contest against your Bank. He wants your vote to put his personal representatives on First Mutual's Board! Mr. Skotdal has selected his brother-in-law and two lawyers as his nominees. (One of the lawyers is a partner in the law firm being paid by Mr. Skotdal and his brother-in-law to conduct the proxy contest.) We are very concerned that Skotdal's men may only pursue Mr. Skotdal's personal interests, which may be quite different from those of the Bank or its other shareholders.

The Board of Directors is vigorously opposed to Mr. Skotdal's attempt to replace as directors First Mutual's president, vice chairman and a valued director.

None of Skotdal's men has indicated any experience as officers or directors of an FDIC-insured and federally-regulated financial institution. We are also concerned that Mr. Skotdal's three personal representatives may not be sufficiently experienced to perform the fiduciary duties and obligations that are required of a bank director.

Mr. Skotdal wants the Bank to achieve even higher returns.

We believe the goals Mr. Skotdal would like to set for First Mutual demonstrate a complete lack of understanding of the Bank and the enviroment in which it operates. If First Mutual were to attempt to achieve Mr. Skotdal's unrealistic short-term goals, the Bank would run the risk of making less than prudent business decisions that could seriously erode its present financial strength. Under the leadership of the present Board of Directors, First Mutual's capital equaled 8% of assets on December 31, 1989. This is well above the FDIC miminum requirement of 6%.

Mr. Skotdal wants the Bank to hire an investment banker.

First Mutual's Board has been counseled for several years by financial advisors specializing in financial institutions and has given serious consideration to various means of maximizing shareholder value. Mr. Skotdal has been informed of this, yet he still wants the Bank to incur the extraordinary cost of engaging another financial advisor in his pursuit of an immediate gain on his personal investment.

DO NOT SIGN THIS OUTSIDE GROUP'S BLUE PROXY CARD!

Look at First Mutual's achievements:

The Bank's 1989 net income increased 17% to an all time high of $1.5 million or $1.07 per share.

Shareholder's equity increased to $10.46 per share at year end.

The Bank has paid eight consecutive quarterly $ .05 per share cash

dividends.

The Bank has paid 20% and 15% stock dividends.

First Mutual's shareholders have enjoyed superior investment results:

An initial investment of $1,000 in First Mutual's stock in December 1985, when the Bank went public, was worth $2,923 on December 31, 1989 (including all cash and stock dividends and the increase in market value of the Bank's stock since that time). This is equivalent to a 30.8% compounded annual rate of return for the four-year period which is nearly double the 17.72% compounded annual rate of return of the Standard and Poor's 500 Index and almost triple the 11.84% compounded annual rate of return of the Shearson Lehman Long-Term Treasury Index.

The Management and Board of Directors of First Mutual Bank have earned your support and deserve your vote.

VOTE TODAY FOR PRESIDENT & CEO BRUCE BAKER, VICE CHAIRMAN SCOTT WALLACE, AND LINDA NORDSTROM.

PLEASE SIGN, DATE AND MAIL THE WHITE PROXY CARD IMMEDIATELY.

This solicitation is being made on behalf of First Mutual's Board of Directors. William E. Tremper, a member of the Board of Directors, purchased 120 shares on November 17, 1989 as a gift for a grandchild. In connection with this proxy contest, the Bank has engaged D. F. King & Co. and Allen Nelson & Co. to solicit proxies for your Board's nominees. Approximately $25,000 will be paid for solicitation services to each firm. D. F. King will use approximately 25 persons and Allen Nelson & Co. approximately 10 persons in the solcitation. The Bank also has agreed to indemnify both firms from any liabilities arising in connection with the solicitation.

Sincerely yours,
F. Kemper Freeman, Jr.
Chairman of the Board

First Mutual Savings Bank, headquartered in Bellevue, operates five full service branches in the Seattle metropolitan area known as the ''Greater Eastside.'' The FDIC-insured savings bank derives a significant portion of its income from mortgage banking operations and also originates small commercial property loans.

MILWAUKEE (MARCH 27) BUSINESS WIRE - John M. Barth, vice president of the Plastics Technology Group for Johnson Controls, has been appointed to the additional post of vice president of the company's Automotive Systems Group.

The announcement was made by James H. Keyes, president and chief executive officer, of the Milwaukee-based company.

Barth, 43, has served as head of the Plastics Technology Group since 1986. Since joining the company in 1969, he has held positions of increasing responsibility within the company's plastics business, including serving as vice president and general manager of the Plastics Machinery and Engineered Plastics Division.

The Automotive Systems Group and Plastics Technology Group combined accounted for 48 percent, or $1.8 billion of Johnson Controls total sales of $3.7 billion in 1989. The business groups are both headquartered in Michigan.

The Automotive Systems Group is based in Ann Arbor, Mich., and operates 44 manufacturing plants worldwide. It is the largest manufacturer of automotive seats for the U.S. market.

The Plastics Technology Group is headquartered in Manchester, Mich., and operates 32 manufacturing plants worldwide. It is the largest U.S. producer of plastic soft drink bottles and is a leading supplier of plastics blowmolding equipment and automotive plastic components.

In addition to its automotive and plastics operations, Johnson Controls is also a leader in facility management systems and services for the commercial buildings market and is the largest U.S. producer of automotive batteries.

SAN FRANCISCO (MARCH 27) BUSINESS WIRE - Janet E. Potter, 46, has been hired as vice president and group product manager for The Bank of California's Trust division.

She is responsible for marketing, product development and implementation for Institutional Trust Products. These include Employee Benefit Business Trust, Institutional Custody and Global Custody.

Potter joins The Bank of California after a nine-year career with Bank of America, most recently as vice president and manager in Marketing and Development. There she served in product development and marketing for institutional trust, global custody, corporate trust and stock transfer services.

Additionally, she managed the installation of national and international processing environments for the Los Angeles, San Francisco, New York and London offices.

She has a bachelors degree in political science from The University of California at Berkeley, and a master of science degree in international business from Saint Mary's College in Moraga, Calif. Currently, Potter is serving on the 1990 Planning Committee for the American Bankers Association's National Fiduciary and Securities Operations Conference.

She is also a member of the International Operations Association and the Securities Industry Association.

Potter's writing have been published in Global Investment Management, Trends and Institutional Investor's Capital Markets Yearbook.

The Bank of California, the sixth largest in the state, was the first incorporated banking institution in the West. The 125-year-old organization has $7.9 billion in assets and offices in three states -- California, Washington and Oregon.

MIDVALE, UT (MARCH 27) BUSINESS WIRE - Bonneville International Corp. (BIC) and Broadcast International Inc. (NASDAQ:BRIN) Tuesday announced the signing of an asset purchase agreement, whereby the assets and business of Bonneville Telecommunications Co., a subsidiary of BIC, will be acquired by Broadcast International.

Company representatives said they have targeted March 31, 1990, as the closing date, subject to the execution of a detailed purchase agreement.

According to BIC Vice President, Bruce Reese, negotiations have been under way for several months. ''Broadcast International approached us some time ago,'' Reese said. ''They felt the operations of BTC fit well with the point to multipoint data distribution system of Broadcast International.''

Dwight Egan, President of Broadcast International, said the new acquisition will operate as a separate subsidiary of the company, providing an important new dimension to services already offered by Broadcast International.

He said the two companies distribute, by satellite, vital time-sensitive business information to clients throughout the United States. ''Combining the two operations will provide an increased range of data services,'' he said.

Bonneville Telecommunications Co. distributes primarily financial market data. The company is best known for distributing trading news from the commodities market to brokers and other interested parties nationwide. The company was purchased by BIC in 1978.

Broadcast International is headquartered in Salt Lake City. It provides satellite delivered business information and network services (including background music, point-of-purchase advertising, and high-speed data transmission), satellite installation and maintenance services, and video conferencing.

Its customers include leading retailers and wholesalers. Broadcast International is a publicly held company whose stock is traded on NASDAQ under the symbol, BRIN.

Bonneville International Corp. is a major, privately held national and international firm engaged in the commercial broadcast and media communications business. BIC is headquartered in Salt Lake City and has operating divisions in Salt Lake City, Seattle, San Francisco, Los Angeles Dallas, Kansas City, Chicago, New York City and Washington D.C.

ANCHORAGE, AK (MARCH 27) BUSINESS WIRE - Continental Airlines on Tuesday announced it will establish operations in Anchorage on June 15 with two daily nonstops to Seattle.

The new air service provides convenient connections from Anchorage to cities throughout the nation including Los Angeles, Houston, Denver, Cleveland and New York.

''Inaugural service to Anchorage is part of our major national expansion first announced last week,'' said Mike McQuay, vice president of customer

service, Central division. ''With Seattle rapidly developing into our west coast Asian gateway, it makes good sense to bring Continental's national and global service to Anchorage.

''We believe that the convenience of connections in Seattle and our superior customer service will be welcomed by our customers in Anchorage and Alaska.''

Continental's tentative inaugural schedule calls for daily departures to Seattle at 1:55 a.m. and 7:00 a.m. Nonstop departures from Seattle to Anchorage will arrive in Anchorage at 12:30 a.m. and 3:15 p.m.

Last week Continental announced a nationwide expansion that will increase its seat capacity by nearly 5 percent -- adding seven cities to its route system, increasing overall flight activity and raising daily departures from 1,317 to 1,417.

Other cities joining the Continental system this spring are: Antigua, West Indies; Columbia, S.C.; Greensboro, N.C.; Louisville, Ky.; Panama City, Panama; and San Jose, Costa Rica.

Continental Express is inaugurating service to Farmington, N.M.; Fort Collins, Colo.; Gillette, Wyo.; Lubbock, Texas; and Sheridan, Wyo.

Continental in 1989 recorded improved operational reliability, placing third among major U.S. airlines in on-time performance. Customer satisfaction, gauged by the number of consumer complaints lodged at the U.S. Department of Transportation, has improved dramatically. The company earned $3.1 million in 1989.

With more than 30,000 employees and serving 83 U.S. destinations and 46 international cities, Continental is the fifth-largest U.S. carrier. Approximately one-third of Continental's traffic occurs on international routes. The airline has recently developed extensive route systems in the Caribbean and Central America, where it has a larger presence than any other U.S. airline.

BELMONT, CA (MARCH 27) BUSINESS WIRE - Oracle Corporation (NASDAQ:ORCL), developer and marketer of the ORACLE relational database management system today announced record revenues for the period ending February 28, 1990,

the third quarter of its 1990 fiscal year.

For the third quarter of fiscal 1990 ended February 28, 1990, revenues increased 54 percent to $236.4 million from $153.4 million in the same period last year. Operating income increased 12 percent to $41.0 million compared to $36.7 million and net income increased 1 percent to $24.2 million compared to $24.0 million in the third quarter of fiscal 1989. Earnings per share this quarter was unchanged from $0.18 in the third quarter of fiscal 1989.

Nine month revenues increased 73 percent to $636.4 million, compared to $367.7 million in the first nine months of fiscal 1989. Operating income increased 46 percent to $105.3 million compared to $71.9 million and net income increased 34 percent to $64.5 million compared to $48.2 million for nine months in the previous year. Nine months earnings per share were $0.47 compared to $0.36 in the first nine months of fiscal 1989 adjusted for the Company's two for one stock split in June of 1989.

''While we were disappointed with a $15 million shortfall on almost $240 million in revenues that went straight to our bottom line,'' said Lawrence Ellison, Oracle's President and CEO. ''We expect to make it up in the fourth quarter and get back on our annual plan.''

Oracle Corporation, headquartered in Belmont, CA, is the world's leading supplier of database management software and services. Additional information on the third-quarter results is in the attached schedules.

Oracle Systems Corporation is a publicly-held corporation whose shares are traded on NASDAQ/NMS with ticker symbol ORCL.

ORANGE, CA (MARCH 27) BUSINESS WIRE - Universal Savings Bank and its parent company, Unity Holdings Inc., Tuesday announced that an agreement in principle has been reached for the sale of the financial institution to J.S. Chang, an international businessman.

Chang, a Los Angeles resident, founded Tai Lung Plastic Industrial Co. Ltd., a major Taiwan manufacturing company. Terms of the sale were not disclosed.

The sale is subject to the approval of both federal and state regulators. Regulatory review may take six months before final approval is granted.

''We are very pleased that a businessman of Chang's stature has recogized the value of Universal as a financial institution,'' stated Lawrence Grill Universal's chairman, president and chief executive officer. ''I am especially pleased that, through proper organizational controls, we have been able to successfully steer Universal through industry-wide upheavals and improve both earnings and our capital base. As a result, we were able to effect the right sale transaction.''

Universal recently reported its second consecutive year of record earnings. As of Dec. 31, 1989, the institution had assets of $268 million and deposits of $240 million. The thrift also reported that it significantly exceeded federal regulatory capital standards. These standards are tests by which financial soundness can be measured.

Universal Savings maintains seven branches in Los Angeles and Orange County. The savings and loan has operated continuously since 1954.

SAN JOSE, CA (MARCH 28) BUSINESS WIRE - Zentec Corp. (NASDAQ:ZENT) Tuesday announced financial results for the fourth quarter ended Dec. 31.

Sales for the quarter were $3,029,000, net loss ($634,000) and net loss per share (20 cents), compared to the fourth quarter of 1988 sales of $2,656,000, net loss of ($3,241,000) and net loss per share of (94 cents).

For the twelve month period ended Dec. 31, sales were $12,021,000, net loss ($4,898,000) and net loss per share of ($1.48) compared to the like twelve month period of 1988 sales of $14,432,000, net loss of ($7,204,000) and net loss per share of ($2.14).

Sales for the fourth quarter and twelve months ended Dec. 31, decreased from the comparable periods in 1988 due principally to a decrease in demand for some of the company's products.

Zentec Corp., a leading manufacturer of customized intelligent terminals has headquarters at 160 Great Oaks Blvd., San Jose, Calif. 95119-1347.

#90086b0604 03/27/1990 ~Business Wire

FREMONT, CA (MARCH 27) BUSINESS WIRE- Interlink Computer Sciences Inc., announced Tuesday that it has purchased the leading TCP/IP to IBM MVS mainframe integration product on the market from Advanced Computer Communications (ACC) of Santa Barbara, Calif.

The purchase includes the marketing rights and the program code for the product and the contracts of the over 100 customers who have purchased the product. Interlink has also extended offers of employment to thirteen people who currently provide development and support for the product, and they are expected to join the company in similar capacities. Terms of the agreement were not released.

''This acquisition positions Interlink as a premier single-vendor provider of network integration solutions,'' said Lambert Onuma, president and chief executive officer of Interlink. ''It accelerates the implementation of our strategy to offer a common platform for integrating DECnet, TCP/IP, NFS and OSI networks into SNA.''

The product, formerly ACC's ACCES/MVS, will now be known as Interlink's SNS (Software Network Solution)TCPaccess. Interlink will market the product using its direct domestic and international sales force and its distributors. Interlink will also provide annual service agreements including twenty-four hour phone support on standard business days.

SNS/TCPaccess, coupled with an Interlink Network Controller, allows both IBM and TCP/IP users to login to remote systems, transfer files between the IBM mainframe and hosts in a TCP/IP network, transfer print files from TCP/IP hosts to the IBM mainframe for printing, and send and receive electronic mail.

It also allows SNA users to login to remote TCP/IP hosts, and users of the remote TCP/IP hosts to access SNA application programs located on any host in the SNA network. SNS/TCPaccess is compatible with popular external security systems such as RACF, ACF, and TOP SECRET.

SNS/TCPaccess uses the Systems Management Facility (SMF) to record network statistics, and provides interfaces for both Time Sharing Option (TSO), and Virtual Telecommunications Access Method (VTAM) users. Pricing for the product begins at under $60,000.

''Our customers asked for a TCP/IP solution that would run across the same platform as our SNS/SNA Gateway which integrates DECnet and SNA networks. SNS/TCPaccess is that solution,'' continued Lambert Onuma. ''It has many of the same features of our SNS/SNA Gateway.

It is a software solution that allows flexibility and easy upgrades, and like the SNS/SNA Gateway, it provides a link into the SNA network beyond the directly attached mainframe.''

Interlink will also offer an optional product to compliment SNS/TCPaccess. SNS/API will give users an application program interface which allows them to customize their own IBM-TCP/IP interfaces. The products are collectively known as the SNS Network Integration Family, and are immediately available.

Interlink Computer Sciences creates customer solutions based on industry standards that integrate computer networks, applications, data and peripherals. With headquarters in Fremont, Calif., Interlink has branch offices and distributors located throughout the United States, Europe, Latin America and Asia Pacific.

HARTFORD, CT (MARCH 27) BUSINESS WIRE - United Technologies Corp. and West Germany's Daimler-Benz AG announced Tuesday the signing of a memorandum of understanding that will lead to a far-reaching business collaboration between the two companies.

The companies said it is expected that Daimler-Benz would invest in United Technologies' Pratt & Whitney, and United Technologies would invest in Daimler's Motoren-und Turbinen-Union (MTU).

In addition, United Technologies and Daimler-Benz have agreed to continue discussions on the potential for other substantive business collaborations.

MTU is owned by Daimler-Benz' Deutsche Aerospace AG (DASA), Munich, which is responsible for all Daimler-Benz' aerospace and defense activities.

The agreement was announced jointly today by Robert F. Daniell, UTC chairman and chief executive officer, and Edzard Reuter, Daimler-Benz chairman and chief executive officer.

Under terms of the agreement, MTU and Pratt & Whitney will work together in an business alliance. MTU will be Pratt & Whitney's principal partner for Europe and the preferred partner worldwide.

The companies said that when new commercial engine programs of mutual interest are identified, joint teams will be formed to coordinate decisions and activities in research, development, manufacturing, scheduling and marketing. The joint teams will work to minimize duplication in product development and maximize efficiency by concentrating production of certain components for common products at one company or the other.

In addition, the agreement provides for the possibility of MTU leading a future joint engine development program and helps MTU's parent company, Deutsche Aerospace AG, to meet its strategic objective to increase its commercial engine business. The agreement does not affect any other existing agreements of either company.

United Technologies and Daimler-Benz have had a relationship in the

aerospace arena for many years, primarily through Pratt & Whitney and MTU. Most recently, Pratt & Whitney and MTU joined with other European and Asian partners to form International Aero Engines, a consortium which produces the V2500 commercial jet engine.

The Daimler-Benz group is divided into four corporate units: Mercedes-Benz in automotive engineering; AEG in electro-technology; Deutsche Aerospace, which includes MTU, in aerospace and defense technology; and Daimler-Benz InterServices in services and finance. Its 1989 sales were US $45 billion. It has 328,000 employees.

COLUMBUS, GA (MARCH 27) BUSINESS WIRE - Carmike Cinemas Inc. (CMIKA/NASDAQ) Tuesday announced that on March 23, 1990, the company completed its previously announced redemption of its outstanding 8 percent convertible subordinated debentures due 2007.

At Feb. 15, 1990, $25,590,000 aggregate principal amount of such debentures were outstanding.

Prior to such redemption, an aggregate of $25,579,000 of such debentures were converted into Class A Common Stock of Carmike at a conversion price of $10.875 per share. Pursuant to a standby underwriting agreement, 1,011 shares of Class A Common Stock were purchased by PaineWebber Inc. and Furman Selz Mager Dietz & Birney Inc., representing the shares of stock into which the debentures not tendered for conversion were convertible.

President and Chief Executive Officer, Michael W. Patrick commented, ''The completion of this transaction increases our equity by 74 percent and is a milestone in Carmike's history. The resulting stronger balance sheet enhances our ability to further expand the company.''

Carmike Cinemas is the sixth largest motion picture exhibitor in the United States, and is the leading exhibitor in the southern United States in terms of number of theatres and screens operated.

#90086b0624 03/27/1990 ~Business Wire
LONDON (MARCH 27) BUSINESS WIRE - Carlton Communications Plc (''Carlton'') announced Tuesday the conditional sale of Cosworth Holdings Ltd. (''Cosworth'') to Vickers PLC (''Vickers'') for a total consideration of $263.8 million (163.5 million pounds).

Cosworth was acquired by Carlton in July 1989 as part of the acquisition of UEI public limited company. Founded in 1958, Cosworth is a world leader in the development and production of high performance automobile engines and sub-assemblies.

In the year ended Jan. 31, 1990 Cosworth Engineering Ltd. (the only siginificant asset of Cosworth) recorded profit before taxation, management charges and exceptional items of $22.9 million (14.2 million pounds) (1989: $16.8 million (10.4 million pounds)) on turnover of $85 million (52.7 million pounds) (1989: $67.0 million (41.5 million pounds)). The consolidated net assets of Cosworth were approximately $42.8 million (26.5 million pounds) at Jan. 31, 1990.

Carlton is principally involved in the provision of services and products to the screen based entertainment industry. It is a world market leader in feature film processing and video tape duplication, a major manufacturer of professional video and sound equipment and Europe's

leading video post production company.

Whilst Cosworth is also a world leader in its principal fields, its business is not complementary with Carlton's core businesses. Consequently the directors of Carlton, who have been advised by Hambros Bank Ltd., believe that it is in the best interests of Carlton and Cosworth to sell the business to a group with similar business interests to Cosworth.

The consideration of $263.8 million (163.5 million pounds) for the disposal of Cosworth consists of a cash payment of $129.9 million (80.5 million pounds), payable at completion, and the issue at the same time by Vickers of two interest free unsecured loan notes to a total value of $133.9 million (83 million pounds), which may be discounted by Carlton at any time following their receipt. The first loan note for $104.9 million (65 million pounds) is due and payable on Jan. 2, 1991 and the second for $29 million (18 million pounds) on Jan. 2, 1992.

The consideration received will eliminate Carlton's short-term borrowings.

SAN FRANCISCO (MARCH 27) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) and Information Builders Inc., IBI, Tuesday announced the availability of FOCUS, Information Builders' fourth generation language applications development tools, for use with Tandem's NonStop SQL relational database management system (RDBMS) software.

The announcement was made at the DB/EXPO Conference held in San Francisco's Moscone Convention Center. Additionally, IBI announced the first production shipment of FOCUS for Tandem to the University of Alberta Hospitals, Edmonton, Alberta.

The FOCUS tools will enable Tandem users to develop database applications queries and reports using Tandem's NonStop SQL RDBMS, thus allowing access to up-to-the-minute information about the state of business for making flexible business decisions. Additionally, the FOCUS tools are available for use with Tandem's Enscribe data record manager.

FOCUS tools for Tandem systems include a window-based report writer, a forms design facility, a menu building facility for creating user interfaces and security facilities.

Information Builders Inc. is a privately held company incorporated in 1975 and is among the top independent software vendors in the world with 1989 revenues of $155 million. FOCUS, the company's flagship product, is the most widely installed 4GL with over 600,000 users worldwide.

Tandem Computers Inc. manufactures and markets computer systems and networks for the online transaction processing, large database and UNIX applications. Company headquarters are located at 19333 Vallco Parkway, Cupertino, CA 95014. The telephone number is 408/285-6000.

POUGHKEEPSIE, NY (MARCH 27) BUSINESS WIRE - Poughkeepsie Savings Bank, FSB (NASDAQ:PKPS) announced Tuesday that its board of directors has declared a regular quarterly cash dividend of $0.15 per common share. The dividend is payable May 1, 1990 to shareholders of record at the close of business on April 12, 1990.

Separately, the bank said that its Annual Meeting of Shareholders would be postponed to May 11, 1990, from April 27, 1990. The rescheduled Annual Meeting will be held at the Hellenic Community Center, 24 Park Avenue, Poughkeepsie, N.Y. at 10:00 a.m. The bank had previously stated that the Annual Meeting might be delayed in connection with an agreement with members of a shareholder group, which was announced last week.

Poughkeepsie Savings Bank is a community banking institution whose principal market is the Mid-Hudson Valley region of New York, where it operates 11 branch offices. Its Market Street Mortgage subsidiary has loan production offices in Florida, Georgia, Virginia, Pennsylvania and New York.

REDWOOD CITY, CA (MARCH 27) BUSINESS WIRE - L.B. Nelson Corp. Tuesday reported a profit for the year ended Dec. 31, 1989, of $3,791,000 or $1.01 per share, compared with a loss of $1,041,000 or 58 cents per share for 1988.

The 1989 profit included $1,682,000 or 45 cents per share in extraordinary earnings. Revenues for 1989 were $6,980,000 vs. $1,511,000 for the previous year.

For the fourth quarter of 1989 the company reported a profit of $2,884,000 or 77 cents per share, compared with a loss of $737,000 or 34 cents per share for the same quarter a year earlier. Fourth quarter revenues were $5,319,000 compared with $810,000 for the same period in 1988.

The company also expects to report an increase in profit for the first quarter of 1990 compared to a year earlier.

HAYWARD, CA (MARCH 27) BUSINESS WIRE - Scientific Technologies Inc. (NASDAQ:STIZ) announced Tuesday that it expects to report at least a 35 percent increase in net income for fiscal 1989 ended Dec. 31, 1989, to at least $1.5 million, or about 31 cents per share, on a revenue gain in excess of 20 percent to approximately $8.6 million.

For fiscal 1988, net income was $1,082,000, or 23 cents per share, on revenues of $7,005,000. The company said it expects to report its audited fiscal 1989 results soon.

Anthony R. Lazzara, chairman, said that the record performance anticipated for fiscal 1989 resulted from solid increases in Scientific Technologies' factory automation product lines, including industrial sensors, optical profilers and associated computer and data communication systems.

''We are pleased with the results of our expanded distribution network and the market's enthusiastic response to our new sensor products,'' Lazzara said.

Scientific Technologies Inc. manufactures and markets computer systems, industrial sensors, optical profilers, and data communication products for automation applications.

SAN RAMON, CA (MARCH 27) BUSINESS WIRE - BATUS Inc. announced Tuesday that it has entered into a definitive purchase agreement with Prism Capital Corporation of New York, New York for the sale of the furniture retailing business of the John Breuner Company.

BATUS will receive $92.5 million in cash for the business when the transaction is completed in about eight weeks.

Founded in 1856, California-based Breuners owns and operates 18 furniture retailing stores in Northern California, Arizona and Nevada and is a dominant furniture retailer on the West Coast. The John Breuner Company's 44 rental locations will be sold as a separate business in a separate transaction, expected to be announced in the near future.

Prism Capital is a merchant bank founded in 1989 by Dennis Wong and Steven Wong, who have backgrounds as principals in merchant banking, venture capital and real estate. The principals of Prism also own a controlling interest in Barker Bros. Company, the leading high-quality furniture chain in Southern California, with 11 stores. The combined net revenues of Breuners and Barker Bros. for the latest fiscal year exceeded $200 million. Prism Capital intends to operate the two companies autonomously.

The sale of Breuners' retail business is part of the restructuring plan of B.A.T Industries, announced in September 1989, which will focus the Company exclusively on its tobacco and financial services businesses.

This restructuring will include the divestiture of all of B.A.T's retail operations, including Saks Fifth Avenue, the nation's premier high-fashion retailer; Marshall Field's, the landmark Chicago retailer with 24 department stores in Illinois, Wisconsin, Texas and Ohio; Ivey's, with 23 specialty department stores located in the Carolinas and Florida; and Breuners rental business. The sales of all of the U.S. retail divisions are expected to be completed by mid-year.

Breuners was originally acquired by B.A.T in 1982, as part of B.A.T's acquisition of Marshall Field's.

SANTA BARBARA, CA (MARCH 27) BUSINESS WIRE - In a move to gain additional resources to apply to its growing business in bridges, routers and network

management, Advanced Computer Communications (ACC) Tuesday announced it has chosen to sell its TCP/IP product line for IBM mainframe systems to Interlink Computer Systems Inc.

''Interlink is a supplier of multivendor network integration solutions,'' said ACC President Roland F. Bryan. ''As such, it is in an optimum position to take over the product line. We owed it to our large installed base of customers and OEMs to find the right supplier. Interlink has the expertise, along with a terrific attitude toward customer satisfaction, to maintain quality customer support.''

Under a prior OEM agreement with ACC dating back to early 1989, Interlink has been a supplier of the TCP/IP product line along with its own line of hardware and software products. The product line Interlink has acquired from ACC provides IBM mainframe connection to TCP/IP networks.

According to Bryan, with the sale of the IBM networking product line, ACC is reinforcing its commitment to the LAN/WAN marketplace and channeling its energies to the Series 4000 line of bridge, router and network management products.

ACC's Series 4000 facilitates communication between remote Ethernets and token-ring LANs using industry-standard protocols such as 802.1 Spanning Tree bridging, TCP/IP and DECnet routing for complete LAN-to-WAN integration.

These multiprotocol bridges/routers are fully supported by the Simple Network Management Protocol (SNMP) to provide administrators with the tools needed to monitor, control and administer the network.

For the last 14 years, Advanced Computer Communications has been a driving force in the data communications industry. The hardware and software products ACC develops and manufactures provide complete solutions to customer needs. Worldwide, ACC products are connecting local and long-distance networks for government and commercial users.

Interlink Computer Sciences Inc. creates customer solutions based on industry standards that integrate computer networks, applications, data and peripherals. With headquarters in Fremont, Interlink has branch offices and distributors located throughout the United States, Europe, Latin American and Asia Pacific.

SAN DIEGO (MARCH 27) BUSINESS WIRE - AUDRE Recognition Systems Inc. (NASDAQ/NMS:ADREF) has completed a reseller agreement with Synercom Technology Inc. (NASDAQ/NMS:SYNR) of Houston.

Synercom provides integrated spatial systems solutions for major commercial and government organizations worldwide. The reseller agreement licenses Synercom to market AUDRE's Automated Digitizing and Recognition Systems as an integrated part of Synercom's data conversion solutions.

AUDRE's software and hardware permit map-resident geographic information to be converted efficiently into Synercom's spatial database solutions. Synercom's software products, support services and systems integration services increase the effectiveness and accuracy with which its customers record, track, analyze and manage geographically dispersed assets.

Robert W. Forsyth, president and chief executive officer of Synercom, said: ''The completion of this agreement with AUDRE opens the way for Synercom to offer to our customers a comprehensive solution linking data conversion to the other integrated spatial systems technologies we provide.''

AUDRE Recognition Systems Inc. is a leader in the field of automated data conversion. Synercom Technology Inc. is the leading integrator of spatial systems solutions.

ENCINO, CA (MARCH 27) BUSINESS WIRE - Robert E. Holbert, president of American National Equities Inc. is pleased to announce the opening of the books, on March 21, on our Nova Color Incorporated (NCLR) initial public offering.

Nova Color began business operations on July 27, 1979, and has been in business continuously since that date. Their patented, new metal colorization technology is a major breakthrough in the aluminum industry.

The Nova Color Process produces ''sapphire'' hard, abrasion-resistant, full micro detailed color images on aluminum, with applications to signage product labeling, trophies, industrial control panels, etc.

Innovation and technological breakthroughs are not an occurrence of thought, they are an evolution of thought. One event in history leads, through a series of collective connections, to others. The management of Nova Color have proven their abilities in their industry. They are

regarded as knowledgeable, innovative, substantial and competent businessmen with excellent reputations.

American National Equities is proud to be associated with individuals of this caliber and with Nova Color.

American National Equities, along with officers of Nova Color, will be conducting due diligence and product presentation meetings on various dates and at various locations across the country. Additional information regarding the schedule of these meetings can be obtained by calling Ava Roth, Syndicate Manager of American National Equities Inc.; 818/906-2744.

VALENCIA, CA (MARCH 27) BUSINESS WIRE - HR Textron Inc. Tuesday announced that McDonnell Douglas Corp. has awarded the company a contract valued in excess of $10 million for the development and manufacture of the F-15 Servocylinder Test Station (STS).

The contract calls for one prototype that will remain at HR's plant to be completed in 1990 and two deliverable test stations that will ship to the customer in 1992.

The company will also provide the Air Force with technical publications, provisioning data, training and technical service and support. These new automatic test systems will be installed at the Air Logistic Center, McClellan Air Force Base and used to check critical hydraulic flight-control servoactuators and sub-assemblies of the U.S. Air Force's F-15A, F-15B, F-15C, F-15D and their newest F-15E aircraft.

''The STS, designed for the F-15 aircraft, exemplifies HR's expertise in the integration of modern computer systems with 'state-of- the-art' hydraulic technology,'' said Mark Wiesel, HR Textron F-15 STS Program Manager. ''We are bringing new levels of accuracy, repeatability and productivity to the testing of today's most sophisticated hydraulic controls, for some of the most advanced aircraft currently in service.''

The F-15 STS is a logical, next-generation development from HR Textron's successful and proven F/A-18 STS, now in service worldwide with the U.S. Navy and a number of foreign militaries.

This new generation of STS will utilize an 80386-based, ruggedized ISA computer, running OS/2, with 4 Megabytes of Random Access Memory (RAM), a 40 Megabyte hard disk and a 1.44 Megabyte floppy disk drive.

Additionally the system will provide the operator with a keypad, a 14-inch EGA color display and a printer/plotter for ''fully annotated'' graphic, hard-copy test results.

HR Textron's automatic test systems expertise has evolved from their broad capability in the defense and aerospace industry for producing control and control actuation systems. Product depth includes systems for fixed-wing aircraft, helicopters and missiles and space vehicles. They also manufacture a variety of aerospace components, such as servovalves and fuel and pneumatic systems.

Their PTI Technologies Inc. subsidiary in Newbury Park is a recognized leader in the manufacture of filter products and filter modules for fluid systems in aircraft, chemical and industrial applications.

HR Textron is a subsidiary of Textron Inc., a multi-industry company with operations in three business sectors: aerospace technology, commercial products and financial services. With headquarters in Providence, R.I., Textron's 1989 revenues were over $7.4 billion.

#90086b0648 03/27/1990 ~Business Wire

SAN FRANCISCO (MARCH 27) BUSINESS WIRE - Lotus Development Corp. Tuesday announced the availability of two new data access products designed to provide users of its best-selling personal computer spreadsheet, 1-2-3, with direct access to data residing in OS/2 SQL Server databases.

The products are being exhibited in the Sybase booth at the Database Expo show here today.

The new Lotus DataLens Driver for SQL Server, and a new add-in product called Lotus SQL, are designed to connect 1-2-3 Releases 2.01, 2.2, 3, and 1-2-3/G to SQL Server databases.

Using familiar 1-2-3 commands, these products enable 1-2-3 users to perform a wide variety of database management and reporting tasks directly from within the spreadsheet, such as: querying a database; inserting, deleting or updating database records; and creating or deleting database tables.

''Availability of these two new products for SQL Server means that all 1-2-3 users can easily retrieve data from powerful SQL databases and bring it into their spreadsheets for analysis, graphing, and reporting,'' said

Alex Morrow, general manager for Lotus' Systems Technologies Group.

''By enabling 1-2-3 users to work with a shared pool of data we are providing much-needed, easy access tools for end users, regardless of whether they're using the advanced functionality of 1-2-3 Release 3 or 1-2-3/G, or the industry-standard spreadsheet capabilities of 1-2-3 Release 2.2.''

DataLens Driver for 1-2-3 Release 3 and 1-2-3/G

The DataLens Driver for SQL Server is designed for users of 1-2-3 Release 3 or 1-2-3/G, and uses Lotus' DataLens external data access technology. The user establishes access to SQL Server databases from 1-2-3 Release 3 or 1-2-3/G using either spreadsheet's ''/Data External'' command.

The combination of DataLens drivers, such as the SQL Server driver, along with enhanced data query capabilities built into 1-2-3 Release 3 and 1-2-3/G, allows users to perform a wide variety of database operations and reporting tasks. These operations include the ability to perform database joins across multiple local or remote database products, or between these products and on-sheet data.

Lotus' DataLens Technology

DataLens, a Lotus developed technology, is designed to provide a consistent and transparent means by which Lotus users can easily move data into their applications for analysis, manipulation, and storage. The development of this technology was driven by an overall customer need for better connectivity tools that help tie hardware and software systems together.

Both 1-2-3 Release 3 and 1-2-3/G include a driver for Ashton-Tate's dBASE III and III+ databases in the package. DataLens drivers are also under development for database products such as Paradox from Borland International, Model 204 from Computer Corp. of America, Extended Edition Database Manager from IBM, SQLBase from Gupta Technologies Inc., NetWare SQL from Novell Inc., Vanguard and R:Base from Microrim Inc., ORACLE from Oracle Corp. and DBC/1012 from Teradata Corp.

''The new database capabilities in 1-2-3 Release 3 and 1-2-3/G, coupled with DataLens technology, provides the most sophisticated spreadsheet-database functionality available today,'' Morrow said.

SQL for 1-2-3 Release 2.01 and 2.2

Lotus SQL, an add-in product designed to allow 1-2-3 Release 2.01 and 2.2 users access to SQL Server databases, links directly to SQL Server and provides similar database management and reporting functionality for 1-2-3

Release 2.01 and 2.2 users. These capabilities include the ability to insert, delete, or update records, perform database queries, and create or delete database tables.

Pricing and Availability

Lotus' data access products for SQL Server will be available on April 16, 1990, and are priced at $75 each. They will be available through Lotus Authorized Resellers and directly from Lotus. For more information, or to place an order, contact Lotus Customer Service at (800) 345-1043.

Lotus Development Corp. is the leading developer of applications software for personal computers and information services delivered on CD-ROM.

All prices and terms are for the U.S.A. only.

#90086b0649 03/27/1990 ~Business Wire

KANSAS CITY, MO (MARCH 27) BUSINESS WIRE - Stuart Hall Co. Inc., (NASDAQ:STUH) Tuesday announced results for the first quarter ended Feb. 28, 1990.

In making the announcement, the company noted that revenues were a record for any first quarter in its history and increased 17 percent over the prior first quarter.

Revenues for the three months ended Feb. 28, 1990 were $21,804,496 as compared to $18,619,301 for the previous year's first quarter. Net earnings for the latest first quarter were $540,343, or 14 cents per share.

This compares to the prior year's first quarter net earnings of $639,477, or 17 cents per share, as restated to reflect the four-for-three stock split paid on Dec. 18, 1989.

Commenting on the results, Charles G. Hanson, chairman and chief executive officer of Stuart Hall Co., stated, ''Several major factors should be noted regarding the first quarter. While net earnings during last year's first quarter were favorably impacted by a pre-tax inventory gain of more than $440,000, or 7 cents per share, due to increasing paper prices, there was no comparable gain in the latest first quarter.

''We were very pleased that our higher level of sales and improved profit margins resulted in only a modest reduction in net earnings. Actually, earnings for the quarter came in considerably higher than the $419,000, or

11 cents per share, that we had expected. Further fiscal 1990 first quarter sales were 2.4 percent higher than our forecast.

''During the latest first quarter, we increased our distribution base by more than 2,000 retail outlets, and we anticipate that this will have a very favorable effect on both second and third quarter results,'' Hanson concluded.

Stuart Hall Co. Inc.

FRAMINGHAM, MA (MARCH 27) BUSINESS WIRE - Liant Software Corp. Tuesday announced an agreement with Beaverton, Ore.-based Sequent Computer Systems Inc. to port its PL/I compiler and CodeWatch debugger to Sequent's Symmetry series of parallel computers on its DYNIX operating system.

DYNIX is Sequent's enhanced version of UNIX that supports 4.2bsd and System V applications simultaneously. LPI's PL/I is available now with prices ranging from $2,700 to $17,000 depending upon system configuration. CodeWatch will be available in April.

LPI's PL/I is a full implementation of the ANSI PL/I X3.74-1981 General Purpose Subset and contains DEC and IBM extensions for compatibility with existing applications. Along with the advantages of LPI's component architecture technology, LPI's PL/I features cross-language calling, detailed diagnostics, a full set of local and global optimizations, and a

range of listing options. It is fully supported by CodeWatch, LPI's symbolic interactive debugger, which contains features such as conditional breakpointing, stepping, tracing, and watchpoints.

Sequent Computer Systems Inc. is a leading provider of open systems computing solutions for the commercial online transaction processing market. The company, which employs more than 1,100 people, reported 1989 revenues of $145.6 million. Since the launch of its parallel processor family in 1984, Sequent has installed more than 2,000 systems worldwide.

Liant Software Corp., a privately held company headquartered in Framingham Mass., provides integrated programming systems for constructing and maintaining portable applications.

Liant Software Corp. is the parent company of three operating subsidiaries: Framingham, Mass.-based Language Processors, Inc. (LPI), specializing in scientific and engineering programming systems; Austin, Texas-based Ryan McFarland Corp. (RM), specializing in commercial programming systems; and Template Graphics Software, Inc. (TGS), based in San Diego, California, which specializes in program development systems for graphic applications.

Liant Software Ltd., based in London, England, is Liant's European sales headquarters, and an affiliate, Nippon LPI, is based in Tokyo, Japan.

#90086b0654 03/27/1990 ~Business Wire

SANTA CLARA, CA (MARCH 27) BUSINESS WIRE - 3Com Corp. (NASDAQ:COMS) and Wang Laboratories Inc. of Lowell, Mass., Tuesday announced an extension to their original equipment manufacturer agreement under which Wang will resell 3Com's family of 10BASE-T network adapters for connecting desktop computers to twisted pair wiring systems.

The extension, which builds on the companies' existing marketing partnership for a range of networking products, is part of Wang's Innovation on Standards product strategy. Wang's strategy calls for integration of its technologies with popular industry-standard products developed by third parties.

Wang already resells several of 3Com's Ethernet and token ring adapters, including EtherLink II, EtherLink Plus, EtherLink/MC and TokenLink.

Under the OEM extension, Wang will market two 3Com 10BASE-T adapters: the EtherLink II TP (twisted pair) for PC/AT-compatible and the EtherLink/MC TP for personal computers with Micro Channel architecture. The adapters will be available through Wang's direct sales force and authorized resellers.

A 10BASE-T network, which connects individual desktop computers to a wiring concentrator hub using unshielded twisted pair, resembles a star. The resulting configuration enables the network manager to isolate and troubleshoot a problem connection without affecting the rest of the network or disturbing other users on the system.

Because it can restrict faults to a single-user segment and reduce the need to shut down the entire system, network managers save time, users work without interruption and businesses maintain higher levels of overall productivity.

The 3Com EtherLink adapters for twisted pair networks exceed the minimum specifications of the proposed 10BASE-T standard, giving customers the flexibility to connect a wider range of media. By extending the connection distance and impedence levels, 3Com's EtherLink II TP and EtherLink/MC TP support both shielded twisted pair (including IBM's Type 1 cabling) and unshielded twisted pair wiring (common telephone wiring).

A 10BASE-T network usually costs less than other networking topologies because dual twisted pair wire often already exists in office buildings and because the ''star'' design reduces maintenance and management costs.

Further, the adapters are compatible with the same software as 3Com's industry leading EtherLink adapters, which are supported by all the major network operating system vendors. They will also operate with 3Com's MultiConnect modular multiport repeater, an Ethernet hub that allows interconnection of standard and thin coaxial cable, shielded and unshielded twisted pair wire and fiber optic cable.

The EtherLink II TP is available immediately from Wang for $445. The EtherLink/MC TP will be available within 60 days for $495.

Wang Laboratories Inc. is a leading worldwide supplier of computer-based information processing systems including data, text, image and voice processing, as well as telecommunications and networking products.

3Com Corp. is a computer networking company providing multivendor connectivity and information sharing for workgroups, departments and

corporate environments worldwide. The company designs, manufactures, markets and supports a comprehensive range of networked client-server computing systems based on industry standards and open systems architecture.

#90086b0659 03/27/1990 ~Business Wire

TEMPE, AZ (MARCH 27) BUSINESS WIRE - Circuit Research Labs Inc. (NASDAQ: CRLI) Tuesday announced audited results for the fourth quarter and year ended Dec. 31, 1989.

Revenues for the fourth quarter ended Dec. 31, 1989, increased approximately 52 percent to $765,060 from $503,917 in the prior year's fourth quarter. Net income for the quarter was $143,635, or $.03 per share compared to $371 in fiscal 1988.

For the year ended Dec. 31, 1989, revenues increased approximately 13 percent to $2,407,641 from $2,134,766 for the year ended Dec. 31, 1988. Net income for the year increased to $258,194, or $.05 per share, from $41,879, or $.01 per share, in the previous fiscal year.

The increase in revenues for the year is largely attributable to higher prices of the company's products and an increase in the number of units sold. The increase in net income was achieved as a result of management's cost reduction program, manufacturing cost reductions, proper product pricing and dealer discount restructuring as well as a decrease in interest expense as there were no borrowings on the bank credit line during 1989.

Circuit Research Labs Inc. manufactures and markets electronics audio processing and encoding equipment for the broadcast industry and noise reduction systems for the professional audio industry.

CORPUS CHRISTI, TX (MARCH 27) BUSINESS WIRE - Marine Holding Co. (NASDAQ:MDCO) Tuesday reported a net loss for the 1989 fourth quarter of $4.8 million on revenues of $11.3 million.

The net loss applicable to common stockholders was $6.2 million or 61 cents per share of common stock. For the full year, the company reported a net loss of $28.2 million on revenues of $34.9 million with the net loss applicable to common stockholders of $34.3 million or $4.07 per share.

The company's 1988 results included a fourth quarter loss of $9.8 million from revenues of $10.2 million with the loss applicable to common stockholders amounting to $11.4 million ($1.59 per common share) and a full year loss of $19.7 million on revenues of $43.9 million. The 1988 full year loss applicable to common stockholders was $25.6 million or $3.58 per share of common stock.

Dan O. Dennis, chief executive officer, commented that the 1989 fourth quarter reflected a significant improvement from earlier 1989 periods and a slight improvement over the fourth quarter of 1988. Dennis went further to say, ''The company's fourth quarter results were positively impacted by an improvement in jack-up rig utilization and pricing in the Gulf of

Mexico.''

Marine Holding Co. and its subsidiaries, Marine Drilling Co. and Keyes Offshore Inc., operate 23 jack-up drilling rigs in the Gulf of Mexico.

KNOXVILLE, TN (MARCH 27) BUSINESS WIRE - Proffitt's Inc. (NASDAQ:PRFT) Tuesday announced revenues and earnings for the fourth quarter and the year ended Feb. 3, 1990.

For the quarter ended Feb. 3, 1990, sales were $34,743,932 over $29,675,447 in the prior year, an increase of 17.1 percent. Net income for the quarter was $1,026,748, or 27 cents per share, compared to $1,260,217, or 33 cents per share, last year. Average shares outstanding was 3,786,088 vs. 3,793,593 in the prior year.

Sales for the year ended Feb. 3, 1990, totaled $94,818,351, a 22 percent increase over $77,688,977 last year. Net income for the year decreased to $820,255, or 22 cents per share, from $1,937,001, or 51 cents per share in the prior year. Average common shares outstanding totaled 3,789,041 vs. 3,790,336 at Jan. 28, 1989. On a comparative store basis, sales increased by 4.4 percent this year over last year.

Commenting on the fourth quarter and the year, Proffitt's Chairman and Chief Executive Officer, R. Brad Martin, said: ''Our fourth quarter performance was generally satisfactory given the difficult consumer environment in our markets and the turmoil within the department store industry. Our gross margins were negatively impacted by the softness in consumer demand and the wide-spread discounting in the department store business.

Proffitt's Inc. operates 11 specialty department stores in Tennessee, Georgia and North Carolina. Proffitt's is traded on the national over-the-counter market under the symbol PRFT.

BOCA RATON, FL (MARCH 27) BUSINESS WIRE - Dr. Kevin J. O'Leary has been appointed president and chief operating officer of ELTECH Systems Corp.,

according to Marlyn W. Milberg, chairman and chief executive officer.

The promotion is effective immediately.

Prior to his appointment, Dr. O'Leary, 57, was ELTECH's vice president of operations and technology. He joined ELTECH in 1984 after serving as vice president of technology for Olin Corp. Earlier, he was with Diamond Shamrock Corp. for many years rising to the position of director of technology.

In referring to his primary responsibilities, Milberg said that Dr. O'Leary will help guide ELTECH's programs ''to sustain our high growth through existing operations and further successes in research and development.''

Dr. O'Leary received his B.S. degree from Boston College and his M.S. and Ph.D. from Case Western Reserve University in Cleveland.

ELTECH Systems Corp., headquartered in Boca Raton, is a privately held technology-based company dedicated to the invention, commercialization,

SCHENECTADY, NY (MARCH 27) BUSINESS WIRE - GE Power Generation has signed a contract with Korea Heavy Industries & Construction Co. Ltd. (KHIC), a GE licencee, for the supply of two coal-fired 560-megawatt steam turbine-generators and four boilers feed pump turbines that will be installed at Korea Electric Power Corporation's (KEPCO) Samchonpo Thermal Power Plant in South Korea.

General Electric will jointly manufacture the two large steam turbine-generators with KHIC, the prime contractor for the equipment supply, and will supply KHIC with the four boiler feed pump turbines through GE's Fitchburg, Mass., manufacturing facilities.

GE's contract with KHIC is valued at more than $30 million.

The power generation equipment will be installed as Units 3 and 4 at the Samchonpo power plant. Unit 3 is scheduled to begin commercial operations in June 1993; Unit 4 is scheduled to come on line one year later.

This is the second order in the past 12 months for the supply of GE steam turbine equipment for KEPCO. In April of 1989, GE received an order from KEPCO for Units 3 and 4 at the utility's Poryong Power Station, which included two GE-designed 550-megawatt steam turbine-generators and four

boiler feed pump turbines.

In addition, in 1980 GE supplied KEPCO with two 560-megawatt steam turbine-generators and four boiler feed pump turbines for Samchonpo Units 1 and 2.

Unit 3 equipment is scheduled to be shipped to the plant in 1991; Unit 4 equipment in 1992.

SANTA BARBARA, CA (MARCH 27) BUSINESS WIRE - Michael G. Johnston has been named general director of Delco Electronics Corp.'s Delco Systems Operations, succeeding Robert J. McMillin, who will retire May 1 after 41 years of service with General Motors. Johnston has been general program director at Delco Systems Operations (DSO) since January 1989.

He joined Delco Electronics at its Goleta-based facility after 20 years with Hughes Aircraft. He was graduated from the University of Arizona in 1965 with a bachelor's degree in mechanical engineering and earned a master's degree in business administration there a year later. Johnston held a variety of assignments in program office environments with Hughes, with responsibilities for business development, operations and management and major production programs. Prior to transferring to DSO, Johnston was assigned to airborne missile programs at Hughes's Tucson, Ariz., facilities. McMillin was director of advanced technology at Delco Electronics' corporate headquarters in Kokomo, Ind., prior to his transfer to DSO in 1987.

He joined General Motors in 1949 with the AC Electronics Milwaukee Operations and was graduated from Marquette University with a BS degree in electrical engineering in 1955. McMillin's career in the test and manufacture of electronics has spanned military missile programs, space exploration and the explosion of their applications in the auto industry. Delco Electronics Corporation and Hughes Aircraft are subsidiaries of GM Hughes Electronics.

BETHESDA, MD (MARCH 27) BUSINESS WIRE - IBM has begun system testing of

the first major production hardware component of the Advanced Automation System (AAS) at the Federal Aviation Administration's (FAA) Technical Center.

Developed by IBM's AAS team, the device is an enhanced communications link for air traffic control systems that transmits larger amounts of radar and flight plan data at faster speeds and is more reliable than current equipment.

The device, IBM's Peripheral Adapter Module Replacement Item (PAMRI), provides more capacity than equipment now in use and gives FAA officials flexibility to add more radars and other remote systems to the air traffic control network.

IBM is testing the PAMRI at the FAA facility in Atlantic City, N.J., to make use of the agency's real-time air traffic control system environment. After integration and testing is done, IBM will deliver the device to the FAA in June as scheduled. Government testing and evaluation will be done through March 1991.

PAMRI will test new AAS technology

FAA officials will use the PAMRI to test components of AAS and related improvements in the nation's air traffic control system, all part of the FAA's National Airspace System plan.

The PAMRI will collect data from remote air traffic subsystems and distribute it to IBM 3083 host computers at the FAA's 20 En Route centers, for use by air traffic controllers. It replaces the older ''Peripheral Adapter Module,'' (PAM) which is at capacity. A single En Route center PAMRI, for example, can handle up to 25 radar subsystems compared to 15 by two PAMs currently.

Designed and manufactured by Formation, Inc., an IBM subcontractor, each PAMRI is made up of microprocessors and software mounted in racks. Three IBM Personal System/2 computers act as operator maintenance consoles. The device offers improved system reliability through multiple telecommunication channel paths. PAMRI moves data along its paths at eight times the speed of the older device.

IBM's Systems Integration Division began development of the device in November 1988. The entire $3.55 billion AAS program will be completed in stages through the 1990s. IBM completed an upgrade of the FAA's Host Computer System in 1988, resulting in greatly increased system reliability and capacity.

#90086b0687 03/27/1990 ~Business Wire

ASHEVILLE, NC (MARCH 27) BUSINESS WIRE - Champion International Corporation Tuesday announced the immediate implementation of its modernization project for the company's pulp and paper mill in Canton, N.C.

The project, now projected to cost $250 million, had been delayed pending the resolution of appeals of a wastewater discharge permit issued by the United States Environmental Protection Agency on September 25, 1989.

This project will take three years to complete and will make significant improvements to the environment in this region. When it is completed, the mill will meet or exceed the Tennessee water quality standards, including color, and reduce water usage at the mill by nearly 35 percent, thereby limiting the impact of the mill on the river. The project includes the addition of oxygen delignification to the bleaching process, which reduces the use of chlorine as a bleaching agent to an absolute minimum.

Champion had formerly planned to modernize its paper manufacturing operations as part of this project. This would have reduced to two from six the number of paper machines in operation. However, since actual production rates of pulp at the mill will be determined by the flow of water in the river, as required by the mill's permit, the company will wait until the pulp mill is completed and final operating rates are known before determining what additional changes will be made to the paper machine operations.

This means that while future employment will initially be lower than it is today, the impact on employment will be less than first announced in February, 1989.

Heist indicated that this modernization project accomplishes several objectives: it provides a mill that continues to operate in environmental compliance; it improves the quality of the Pigeon River; it results in fewer job losses; and it enables the mill to continue to serve its customers.

The mill's customer base and product line can now remain as is. Canton produces paperboard for liquid packaging, envelope paper (white and colored), copier paper, uncoated offset stock, poster paper, and tablet paper.

Champion is one of the America's leading manufacturers of paper for business communication, commercial printing, publications, and newspapers. Headquartered in Stamford, Connecticut, the company owns or controls 6.4

million acres of timberlands in the U.S. and is a major manufacturer of plywood and lumber.

LITTLE ROCK, AR (MARCH 27) BUSINESS WIRE - Ron Strother, chairman and chief executive officer of First Commercial Mortgage Co., a subsidiary of First Commercial Bank, N.A. (NASDAQ/NMS:FCLR), announced Tuesday that FCMC has signed a letter of intent to acquire $273 million of mortgage loan servicing rights from First Savings of Arkansas, F.A., successor to First Federal Savings and Loan Association.

In February FCMC completed the purchase of $54 million in servicing rights from First Savings.

The addition of this $273 million in servicing rights will increase FCMC's total mortgage servicing portfolio to $1.75 billion, and will extend FCMC's lead as the largest Arkansas-based mortgage banking company.

The acquisition from First Savings, subject to minor adjustments, consists of 11,200 conventional FHA and VA loans, of which 98 percent are associated with Arkansas borrowers. Transfer is expected to take place by June 30, with final settlement of the transaction expected to be completed within some 10 days following the transfer. The total consideration involved in the transaction was not disclosed.

COSTA MESA, CA (MARCH 27) BUSINESS WIRE - FileNet Corp. (NASDAQ:FILE), the marketshare leader in image processing systems, Tuesday announced Open WorkFlo Architecture, the basis for the next generation of the company's pioneering WorkFlo software.

WorkFlo process automation software manages the flow of document- images, data, and text within an organization.

The new Open WorkFlo Architecture comprises the industry's widest range of image processing services. With the new architecture, users can develop and implement WorkFlo applications on IBM PCs and compatibles, Sun and DEC workstations, as well as integrate popular third-party

application software.

Key to the open architecture is a new product also announced today. FileNet WorkFlo Queue Services is an object-oriented routing manager for prioritizing, scheduling and coordinating the destination of work across multiple computing platforms.

Open WorkFlo Architecture services include mainframe host-session management, image display specification, and database queries. These services may be mixed and matched to devise a customized solution for automating the process by which objects -- document-images, data, and text -- flow throughout a department or organization. Competitive software offerings provide only a small subset of these services.

FileNet Corp. is the worldwide leader in manufacturing and marketing image processing systems used in paper-intensive business applications. A pioneer in its field, FileNet today has more than 300 system installations in 27 countries. The image processing market is projected to generate U.S. sales of approximately $1.7 billion in 1993.

The company, which is headquartered in Costa Mesa, has sales offices in the U.S., Canada, France, and Germany. FileNet systems are sold in 23 other countries by Ing. C. Olivetti & C., S.p.A. and other distributors.

TORONTO, Ontario (MARCH 27) BUSINESS WIRE - Belmoral Mines Ltd. (''Belmoral'') after absorbing a $23,220,000 write-down of investments reports a loss of $34,581,000 (91 cents per share) in 1989 compared to a loss of $7,009,000 (18 cents per share) in 1988.

The 1988 loss included a $6,446,000 write-down of investments in resource properties and companies.

''1989 marked the end of our financial commitment to several exploration programs which the company had embarked upon in prior years in an effort to expand gold production levels and to provide exposure to several other significant gold mining camps,'' said K. S. Dalton, chairman and chief executive officer.

''Unfortunately, most of the projects did not live up to our expectations,

resulting in the significant writedown of asset values and we are now concentrating our resources on our core assets in Quebec,'' he added.

Belmoral's sales revenues declined in 1989 to $18,023,000 from $25,643,000 a year earlier. The average price of gold realized in 1989 was Cdn $459, down from Cdn $567 in 1988. Lower gold production also reduced sales revenues.

During the fourth quarter of 1989, Belmoral incurred a loss of $12,533,000 (31 cents per share) on sales revenue of $2,796,000. The loss includes a $7,558,000 write-down of investments. This compares to a 1988 fourth quarter loss of $8,999,000 (23 cents per share) on sales revenue of $5,342,000 and after a $6,446,000 write-down of investments.

WESTBORO, MA (MARCH 27) BUSINESS WIRE - Norsk Data, Norway's leading computer manufacturer, has signed a Value-Added Reseller (VAR) agreement with Data General Corp. valued at $6 million dollars during 1990.

Under the agreement, Norsk Data is reselling Data General's AViiON workstations as part of its UNILINE 88 product line, which Norsk markets throughout Scandinavia and West Germany.

Norsk Data's entire UNILINE 88 family of systems is based on Motorola's 88000 RISC-processor and is compliant with 88open's Binary Compatibility Standard.

''Norsk Data has already ported many of its primary applications to the AViiON workstations and more will soon be available,'' said Stephen P. Baxter, vice president of corporate marketing for Data General.

''The agreement with Norsk Data is one of Data General's most significant VAR relationships to date,'' said Baxter. ''Norsk Data is the first significant computer systems vendor to resell the AViiON line in Europe, thereby opening an important new segment of the reseller channel to sales of the AViiON line.''

Norsk Data, which is based in Oslo, Norway, had revenues of $350 million in 1989 and employs 2,600 people worldwide.

Data General is a worldwide supplier of computer and communications systems to business, industry, education and the government. The company reported revenues of $1.31 billion in fiscal 1989.

PROVIDENCE, RI (MARCH 27) BUSINESS WIRE - Providence Gas Co., a subsidiary of Providence Energy Corp. (AMEX:PVY), Tuesday announced an agreement in principle to purchase South County Gas Co., headquartered in Westerly, Rhode Island.

Terms of the proposed purchase, which is subject to approval by the R.I. Public Utilities Commission (PUC), were not announced.

''We're very excited to have this opportunity to serve the growing South County area,'' said Louis R. Hampton, Providence Gas Co. president and chief executive officer. ''This acquisition is a strong indication of our primary long-term business strategy - to grow and develop our natural gas distribution business in Rhode Island,'' he added.

Hampton noted that the purchase will allow ProvGas to take advantage of certain economies of scale to keep rates low and provide improved service to South County customers.

Once the purchase is finalized, some administrative functions may be centralized. However, no changes in gas rates, customer service, or personnel at South County Gas are planned for the foreseeable future.

Providence Gas Co. is Rhode Island's largest natural gas distribution company, serving more than 146,000 customers in 20 cities and towns. South County Gas Co. has 18 employees serving more than 3,600 customers in Westerly and Hopkinton, R.I. The company also has franchise rights in Charlestown, R.I.

PROVIDENCE, RI (MARCH 27) BUSINESS WIRE - Old Stone Corp. announced Tuesday that its board of directors declared a quarterly dividend of 39 cents per common share, payable on May 7, 1990 to shareholders of record as of April 16, 1990.

Old Stone Corp. also announced today that its principal subsidiary, Old Stone Bank, a Federal Savings Bank, (OSB), has received approval from the Office of Thrift Supervision (OTS) of its capital plan submitted in early January.

The approval provides that OSB, a $3.3 billion asset savings association headquartered in Providence, R.I., meet interim capital targets and certain growth and operating restrictions.

Management believes that it will meet the conditions imposed by the OTS and that these conditions are consistent with the corporation's strategic objectives and with OSB's capital plan as submitted to the OTS.

Old Stone Corp. is a $4.2 billion diversified financial services company headquartered in Providence, R.I. The corporation operates a subsidiary network of 186 office in 26 states.

NEW YORK (MARCH 27) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by Laurent Beaudoin, chairman of Bombardier.

Laurent Beaudoin, chairman of Quebec-based manufacturer Bombardier, said Tuesday he was optimistic that within five years, the company's sales will exceed $4 billion (Cdn.). Sales for the first nine months of 1989 were $1.25 billion and are expected to reach $2 billion this year.

He told the New York Soceity of Security Analysts advance orders for the company's regional jet total 126, valued at $1.8 billion. It is the first 50 seat jetliner offered to the worldwide aviation market and the only one currently under development capable of meeting the needs of regional airlines.

These together with contributions from recent acquisitions in Europe - aircraft manufacturer Short Brothers in Ireland, and rail transit manufactuers BN Constructions in Belgium and ANF Industrie in France - should enable the company to realize its target.

Short Brothers, which Bombardier acquired from the British government, has long-term contracts to manufacture aerostructures and is a major supplier of components to Boeing. It also makes engine components for Rolls Royce and others and it will manufacture all of the wings for the Fokker 100 aircraft.

BN, which has a backlog of $600 million in orders, recently was chosen to supply light rail vehicles to London's Docklands Light Railway. ANF supplies a full range of equipment to France's TGV high speed railway, and also has a backlog of $600 million.

Also in Europe, Bombardier, along with BN and ANF, were chosen as part of an international consortium to supply $650 million worth of shuttle train cars for the tunnel under the English Channel. The two European subsidiaries are also involved in building a TGV railway between Paris, Brussels and Cologne.

In the United States, Beaudoin said the TGV is eminently suitable for several locations, where 22 corridors have been idenified by Amtrak for high-speed train travel. Bombardier already has about 30 percent of the mass transit car market and in December was selected by the New York City Transit Authority to develop a long subway car for the year 2000. The

company has supplied the Authority with 825 subway cars currently in use.

''We are satisfied with the progress we have made in establishing ourselves in two important markets, North America and Europe. We have a substantial presence in four important and related industries and we are in a strong position to continue our growth,'' he said.

LAS VEGAS (MARCH 27) BUSINESS WIRE - Marking the start of the largest hotel, casino and theme park in the world, MGM Grand Inc. (NYSE:MGG) has brought on three of the country's top firms to design, plan and implement the building and construction of the MGM Grand Hotel & Theme Park on the Las Vegas Strip, it was announced Tuesday by Fred Benninger, chairman and CEO of MGM Grand.

On board with the project are the Duell Corp. to plan, design and implement concepts for Phase I of the construction of its Las Vegas Theme Park; Veldon Simpson, Architect, Inc. to spearhead the architectural design of the hotel; and Taylor International Corp. as construction manager for the 5,000 room hotel, casino & theme park.

According to Benninger, ''We selected these firms because of their top reputations and track records as planners, designers and contractors for some of the world's most successful hotels and amusement/entertainment parks.''

Additionally, it was announced that MGM Grand will be entering into discussions with other companies, including Landmark Entertainment Group, for the selection of a company to serve as a project manager and for the development and construction of individual attractions for the theme park.

According to Simpson, hired to spearhead the architectural design of the hotel: ''The opportunity to work on a project of this magnitude comes along once in a lifetime. We are thrilled to be working on such an exciting, challenging and ambitious undertaking.''

No stranger to the Las Vegas market, Simpson holds an award-winning track record, having won several architecture awards for design achievement. As project architect for MGM Grand, Simpson will oversee all aspects of the hotel from the inception of its design through the project's completion.

Some of Simpson's widely known projects include some of the nation's top

hotel and resort properties including the Riviera Hotel & Casino, Las Vegas; Frontier All Suite Hotel & Casino expansion, Las Vegas; Excalibur Hotel & Casino, Las Vegas; Circus Circus Skyrise Hotel Tower & Casino, Las Vegas; Circus Circus Expansion at Main Building, Las Vegas (Masonry Design Award); Inverted Pyramid Office Complex, Phoenix; Colorado Belle Hotel and Casino, Laughlin, NV (Outstanding Architecture in Metal Award); Executive Inn at Space Needle, Seattle and Dobson Ranch Resort, Mesa, AZ, among several others.

The Duell Corp.'s responsibilities with MGM Grand Hotel & Theme Park's Phase I will include the analysis of various concepts for the theme park and the creation of additional and new ideas towards that end.

In addition, Duell will create a Master Plan of the theme park to reflect all elements of the design including shows, service facilities, merchandising facilities, roads, parking structures and transportation circulation patterns, including those for the hotel.

Involved with more than 3000 projects in the past 31 years, Duell boasts the planning and design for such renowned locales as Universal Studios, Hollywood (Phase I), Six Flags Magic Mountain, Six Flags Over Georgia, Astroworld and Hersheypark among several others.

From Amusement Business Magazines's 1989 Top 40 Amusement/Theme Parks list published by the international news weekly for sports and mass entertainment, Duell had designed or had a significant role in the design, planning or architecture of 21 of the 40 parks listed.

Brought on as construction manager is Taylor International Corp., a 50-year-old contracting & engineering company, whose most notable projects have included the previous MGM Grand Hotel (now Bally's Grand), the Tropicana Hotel, the Riviera Hotel, Caesars Palace and the Las Vegas International Hotel.

In addition, Taylor International has been construction manager for such renowned properties as the Eden Roc Hotel, the Fontainbleau, the Americana Hotel, the Deauville and Saxony, Miami Beach, Fla.; the MGM Grand Hotel, Reno; Kings Castle, Lake Tahoe, Nev.; Casa Montego in Jamaica; San Juan Intercontinental, San Juan, Puerto Rico; the Aruba Caribbean Hotel, Aruba; and the Denver Hilton, Denver.

MGM Grand, Beverly Hills, Calif., recently announced the completion of its acquisition of the 113-acre Tropicana Golf Course, and of the Marina Hotel & Casino, which will become the site of the new MGM Grand Hotel & Theme Park. The new Hotel & Theme Park will employ over 7,000 people, and will be built at an estimated cost of $700 million. Its completion is set for 1992.

CAMBRIDGE, MA (MARCH 27) BUSINESS WIRE - The Stride Rite Corp. (NYSE:SRR) Tuesday reported record sales and earnings for the first quarter of its 1990 fiscal year.

Net income for the first quarter of 1990 increased by 19 percent to $13,764,000, or 51 cents per share as compared to $11,556,000, or 43 cents per share in the first quarter of 1989. Net sales for the first quarter of 1990 increased 9 percent to $124,447,000 from $114,102,000 in 1989.

Arnold Hiatt, Stride Rite's chairman, commented that the performance of the Keds Division, with sales up 18 percent in the quarter, favorably impacted the consolidated results. The Sperry Top-Sider Division also posted higher sales for the first quarter of 1990 as revenues were up 9 percent from 1989.

The sales of the Stride Rite Children's Group were 3 percent lower in the first quarter of 1990 primarily due to the closing of 20 retail stores and this year's later Easter.

The Stride Rite Corp. scheduled this year's annual meeting of stockholders for 10 a.m., Tuesday, May 1, 1990 at the First National Bank of Boston, 100 Federal Street, Boston. The record date for this meeting is April 6, 1990.

The Stride Rite Corp. markets the leading brand of high quality children's shoes in the United States. Other footwear products for children and adults are marketed by the company under its well-known brand names, including Sperry Top-Sider, Keds, and Grasshoppers.

A summary of sales and net income follows. Per share amounts for 1989 have been restated for the two-for-one stock split which was effected by means of a stock dividend in July 1989.

DALLAS (MARCH 27) BUSINESS WIRE - Current Technology is proud to announce a major distribution agreement with O-C Power.

O-C Power, headquartered in southern California, provides generators, transfer switches, engines and power source equipment to thousands of customers nationwide. Current Technology, an industry leader in power protection for almost 20 years, provides expertise and innovative patented products for comprehensive systems solutions. This agreement provides O-C Power with the opportunity to bring the best power protection equipment to their customers.

Today's sensitive high-speed computer technology requires high quality power. Wiring methods and grounding are concerns that are addressed and handled in every Current Technology Power Siftor (a).

Comprehensive protection, increased system performance and improved reliability are all benefits the Power Siftor delivers. Decreases in system software errors and hardware maintenance result when Power Siftors are installed.

As we enter the 1990's O-C and Current Technology recognize the importance of power protection in all industries that use solid state electronic devices. Combining our resources enables us to bring effective solutions to the marketplace today and in the future.

Current Technology designs and manufactures extremely high quality, brute force power protection devices. Our customers represent a myriad of businesses nationwide that depend on us to protect their investments and improve their systems performance. Current Technology provides ''The Power To Succeed.''

TAMPA, FL (MARCH 27) BUSINESS WIRE - Silk Greenhouse Inc. (NASDAQ: SGHI) announced Tuesday that John E. Stokely has joined the company as senior vice president of finance and administration and chief financial officer.

Stokely has been chief executive officer of Miller & Rhoades, a retail department store chain, since 1988 and was executive vice president of finance and administration from 1986 to 1988.

From 1983 to 1986 Stokely was vice president - controller of Maas Brothers a division of Allied Stores. From 1978 to 1983 he served as controller of Jack Eckerd Drug Co., a retail drug chain.

''John brings a vast amount of retailing and finance experience to Silk Greenhouse,'' said Jere L. Bradwell, chairman and president of Silk Greenhouse. ''He is key to our plan to expand and enhance management by adding experienced retailing executives to our senior management team.''

Stuart G. Lasher, the company's chief financial officer since December 1986 and a member of the board of directors since July 1987, will become senior vice president-special projects. Lasher will be responsible for the company's expansion efforts on an international basis. He will remain on the board of directors.

Silk Greenhouse Inc. owns and operates 90 warehouse-style stores that sell artificial trees, flowers and plants, paper and party products, Christmas trim-a-tree and floral and craft supplies in 22 states.

MECHANICSBURG, PA (MARCH 27) BUSINESS WIRE - Continental Medical Systems Inc. (NASDAQ: CONT)(''CMS'') and Desert Hospital Corp. of Palm Springs, Calif., recently signed a joint venture agreement to build a $17 million freestanding comprehensive medical rehabilitation hospital.

The 60-bed Desert Rehabilitation Hospital will be a two-story barrier-free structure encompassing 78,258 square feet. Patients from the region will receive comprehensive treatment in an inpatient and outpatient setting for traumatic brain injury, spinal cord injury, multiple trauma, strokes, orthopedic conditions, neuromuscular disorders or post surgical conditions which would benefit from rehabilitative care.

President and CEO of Desert Hospital David Seeley, says, ''The combined rapid changes in today's healthcare environment have increased the need to expand beyond the capacity of Desert Hospital's existing 27-bed rehabilitation unit.''

R.A. Ortenzio, chairman of the board and CEO for CMS, says, ''We recognize the need to make comprehensive medical rehabilitation services available to the people of Palm Springs and surrounding communities. Our programs, specializing in team treatment, are designed with the help of local physicians and specialists to offer the best services available to meet their needs.''

Following financial approval, construction is scheduled to begin in the winter of 1991, with a targeted completion date of winter 1992. When fully operational, the hospital will provide 200 jobs in the Coachella Valley with wages and salaries in excess of $6 million annually. It is anticipated that the hospital will purchase more than $1.7 million of supplies from area merchants and pay in excess of $1 million per year in state and federal taxes.

Continental Medical Systems Inc., one of the nation's leading providers of comprehensive medical rehabilitation, operates 11 rehabilitation hospitals and one specialty facility for a system total of 882 beds in Arkansas, California, Colorado, Florida, Kansas, Kentucky, Louisiana, Massachusetts and Texas. CMS has nine community-based rehabilitation hospitals with 589 beds under various stages of construction in Arkansas, California, Colorado and Texas.

In addition, CMS supplies physical, occupational and speech therapy services nationwide through its California Physical Therapy, Inc. in Southern California; VTA Management Services, Inc. of New York City; Pro Therapy of America in Birmingham, Mich.; and RehabWorks, Inc.

headquartered in Clearwater, Fla.

Desert Hospital is a private non-profit, 350-bed acute-care hospital serving an area that includes the Coachella Valley, the High Desert and western Riverside County. Established in 1951, it has grown from a 33-bed community hospital to become one of the most comprehensive healthcare facilities in Southern California.

Hospital services include: rehabilitation, cardiology, open heart surgery, oncology, mental health, pediatrics, obstetrics, opthamology, ICU/ICCU, hospice, home healthcare, urgent care and the area's only regional trauma center, as well as, a full range of diagnostic and therapeutic programs and services.

LOS ANGELES (MARCH 27) BUSINESS WIRE - Security Pacific Corp. (NYSE:SPC) announced Tuesday that Michael S. Heschel has been named chairman and chief executive officer of Security Pacific Automation Co., the corporation's information services and operations support subsidiary.

Heschel, 48, was formerly corporate vice president of Baxter International Inc., responsible for worldwide information services and computer operations. He replaces John P. Singleton, who was promoted to chief operating officer of Security Pacific Corp. in January 1990, and who continues to serve as vice chairman of the corporation.

In his previous position, Heschel was responsible for engineering the recently-announced formation of Spectrum Healthcare Solutions, a joint venture with IBM which offers hospitals and other health-care providers innovative software and services designed to improve efficiency and enhance the quality of patient care.

Heschel joined American Hospital Supply Corp. in 1976 as director of management science and information services at American McGaw Laboratories and was appointed to his most recent position following the merger of American and Baxter in 1985.

Heschel holds a bachelor's degree in industrial engineering, an M.B.A. and a master's of business administration degree in industrial engineering/operations research from Ohio State University. He earned a doctorate in industrial engineering from Arizona State University.

Security Pacific Automation Co. serves Security Pacific Corp. and external

clients through more than 30 locations in the United States and abroad. Security Pacific Corp. is the nation's fifth-largest bank holding company, with assets of $84 billion.

SEOUL (MARCH 27) BUSINESS WIRE - Daewoo Shipbuilding & Heavy Machinery Ltd., a member of the Daewoo Group, announced Tuesday that it has signed a US$400 million contract with Gotaas Larsen Shipping Corporation of the United Kingdom to build four very large crude oil carriers (VLCCs).

The 300,000 DWT vessels will be constructed at the company's Okpo shipyard on Koje island off the southern coast of Korea, and are scheduled to be delivered to the British company between late 1992 and mid-1993.

These tankers will have unique double-side hulls to lessen the risk of oil spills.

Each ship will measure 332 meters from bow to stern, with a beam of 58 meters, and will stand 31 meters tall. Maximum speed will be 15.5 knots per hour.

The contract for these carriers was signed yesterday in Seoul by Tae-Gou Kim, President of Daewoo Shipbuilding, and Alf Clausen, managing director of Gotaas Larsen.

Daewoo Shipbuilding's Okpo shipyard, one of the world's largest and most modern, received two other orders in March: a US$80 million VLCC from Kuwait Oil Tanker Company (S.A.K.) and a US$83 million VLCC from Argonaut AB of Sweden.

The Daewoo Group is engaged in trading through more than 70 overseas branch offices, domestic and international construction, a broad range of manufacturing activities, and financial services.

OSSINING, NY (MARCH 27) BUSINESS WIRE - Sidari Corp. is pleased to announce that agreement has been reached with Wakefern Food Corp. to distribute Sidari Pasta throughout its 183 ShopRite stores in the New York

metropolitan area.

Ten items have been accepted for the initial introduction: ziti, rigatoni, penne lisce, shells, elbows, spiral curls, angel hair, spaghettini, spaghetti and linguine; with five more items to be considered for the future.

This significant new customer for Sidari Corp. is expected to generate at least 150,000 to 200,000 cases of pasta per year. This additional business, plus that generated by its other large customers in the New York metro area, is expected to make Sidari Pasta the number one selling imported pasta in the metropolitan area by the end of 1990.

''At present, we are about to offer a market plan for two other major supermarket chains in the Metro market,'' said Company president, Joseph A. Sidari, ''and we are very excited about the prospects for the future.''

Sidari Corp. is engaged in the importation and distribution of pasta and other specialty food products in New York, New Jersey, Connecticut, Massachusetts, Rhode Island, Pennsylvania and California.

OSHKOSH, WI (MARCH 27) BUSINESS WIRE - R. Eugene Goodson has been elected Oshkosh Truck Corp.'s chairman of the board of directors.

He is replacing John P. Mosling, who has announced his retirement as chairman after being associated with the company for 53 years. Goodson will also assume the new position of chief executive officer. John P. Carroll continues as president and chief operating officer.

The company stated that the addition of Goodson will broaden the automotive experience of its management and foster its goal of growth and diversification, with emphasis on non-defense markets.

Goodson was formerly vice president and general manager of Johnson Control's $1.3 billion sales Automotive Systems Group. In addition to his automotive experience at Johnson Controls, he previously served as the U.S. Department of Transportation's chief scientist. He holds a Ph.D. in mechanical engineering from Purdue University, where he taught for several years, and an economics degree from Duke University.

CLIFTON, NJ (MARCH 27) BUSINESS WIRE - Valley National Bancorp (NASDAQ:VNBP) Tuesday announced that Gerald H. Lipkin has been named chairman of the board of the company and its wholly-owned subsidiary, Valley National Bank.

Lipkin will also continue to serve as chief executive officer.

In accordance with an established management succession plan, Samuel F. Riskin has retired as chairman and will serve as chairman emeritus. Peter Southway will remain as Valley's president and chief operating officer and George L. Bielitz, Jr., continues as vice chairman.

Separately, shareholders elected 20 directors to serve one year terms at the annual meeting of Shareholders of Valley National Bancorp, held on Tuesday, March 27, 1990.

Speaking at the annual meeting, Lipkin said, ''1989 was a year of many accomplishments at Valley National, during which we pursued strategies to enhance our services for banking customers and maintain our record of superior profitability for shareholders.'' He noted that Valley enjoyed its 63rd year of increased earnings, and continued to produce returns on average assets and equity (at 1.95percent and 20.47 percent, respectively) that are among the highest in the banking industry.

Lipkin, 49, has been vice chairman and chief executive officer of Valley National since March 1989. He joined the company in 1975 as senior vice president and was elected to the board of directors in 1986.

In 1987, Lipkin was promoted to executive vice president. A graduate of Rutgers University, Lipkin earned a master's of business administration in banking and finance from New York University. A native of New Jersey, Lipkin and his wife and two children reside in Montville.

Valley National Bancorp, a regional bank holding company, provides a wide range of traditional commercial banking services through its principal subsidiary, Valley National Bank. Established in 1927, Valley National Bank operates 27 full-service offices located throughout the northeastern New Jersey counties of Passaic, Bergen, Hudson, Essex and Morris.

Tokyo (MARCH 27) - The world industrial robot market is expected to continue to grow toward the year 2000, Japanese robot industry sources said Tuesday.

Two main reasons for the growing demand were shortages of manpower in developed countries and pressure on manufacturers to diversify product lines,

they said. The major buyers of industrial robots are carmakers and electronics manufacturers.

Warehouses and nuclear facilities are also expected to need such devices, officials of the Japan Industrial Robot Association say.

Production of industrial robots in Japan alone, which reached 450 billion yen (2.9 billion dollars) in value in 1988, is expected to rise to around 500 billion yen (3.4 billion dollars) in 1990.

Japanese-made industrial robots now account for about 70 percent of those in operation worldwide, far outnumbering those made in the United States and Europe.

TOKYO (MARCH 27) - Japan is planning to double its imports of Chinese raw silk this year under an agreement reached here, officials of the Agriculture, Foresty and Fisheries Ministry said Tuesday.

Japan will import 40,000 bales of raw silk in 1990, up from 20,000 bales in 1989, under the accord reached during the six-day government-level talks on Japanese silk imports that ended here Tuesday.

Japan also agreed to import 6,000 bales of silk yarn this year, compared to the 4,500 bales in 1989, the officials said.

It will also import 7.5 million square meters (nine million square yards) of silk fabric this year, up from 7.35 million square meters (8.82 million square yards).

During the talks, Chinese negotiators had asked Japan to increase imports of silk fabrics to 9.5 million square meters (11.4 million square yards), but Japan instead agreed to import an additional 2,220 bales of silk yarn, the officials said.

HONG KONG (MARCH 27) - Hong Kong airline Cathay Pacific Airways Ltd. said Tuesday its net profit in 1989 rose 17.6 percent from a year earlier to 3.32 billion Hong Kong dollars (426 million U.S.).

The locally-listed concern proposed a final dividend of 31.5 cents (four U.S. cents), bringing total dividend for the year to 42 cents (5.4 U.S. cents.)

Cathay carried 7.1 million passengers in 1989, with passenger revenue logging a 17 percent hike to 13.8 billion dollars (1.8 billion U.S.).

Cargo revenue also grew four percent to 2.7 billion dollars (346 million U.S.) during the year, a Cathay statement said.

By December, the firm's borrowings had contracted by 40 per cent from a year earlier to 2.75 billion dollars (353 million U.S.), thanks partly to favourable foreign exchange movements, "particularly the amount of commitments affected by the drop in the value of the yen," the statement read.

Cathay predicted another good year in passenger and cargo traffic.

The airline's current fleet of 36 planes is made up of 19 Boeing 747's and 17 Lockheed TriStars. On top of firm orders for four more Boeing planes in 1992, the carrier has also announced plans to dispose of its TriStar fleet by purchasing 10 Airbuses for delivery starting in 1995.

Cathay is half-owned by the Swire group, a British conglomerate. Its key minority shareholder is Beijing's state-owned China International Trust and Investment Corp. (CITIC), which holds 12.5 percent.

In January, Cathay and its parent, Swire, jointly bought a 35 percent stake in local fledgling competitor, Dragonair, for 343 million dollars (44 million U.S.)

Dragonair is also 38 percent held by CITIC.

Cathay's Chinese connection through CITIC would help ensure its status as the top local carrier after 1997, when the British colony reverts to Chinese sovereignty, aviation analysts have said.

LONDON (MARCH 27) - British engineering group Vickers, which makes Rolls-Royce cars, said Tuesday it was buying car engine maker Cosworth for 163.5 million pounds (272.5 million dollars).

Vickers said the agreement to acquire Cosworth from media group Carlton Communications was dependent on shareholders' approval of the deal and their rejection of a proposal by New Zealand group IEP Securities to acquire Rolls-Royce Motor Cars from Vickers.

Shareholders will be asked to vote on the two matters during an extraordinary general meeting immediately after the annual general meeting on April 26.

Cosworth, founded in 1958, is one of the world's leading high-performance racing car engine makers including Formula One.

But it has also diversified into making engines for passenger cars for U.S. auto giant Ford, its main customer, General Motors, and Mercedes-Benz of West Germany.

It made a taxable profit of 14.2 million pounds (23.6 million dollars) in the year ended January 31, on turnover of 52.7 million (87.8 million dollars) and its net assets are valued at some 26.5 million pounds (44.1 million dollars).

Vickers is a diversified group whose activities include producing defence equipment, armoured vehicles, parts for the aerospace industry, boats, medical equipment, and luxury cars Rolls-Royce and Bentley.

It said that the Cosworth acquisition would improve the range of its auto activities.

Vickers shares were down two pence at 211 in early morning trading in London on Tuesday.

MOSCOW (MARCH 27) - The French and Soviet authorities have reached partial agreement over problems of late payment of money owed to companies informed sources said here Tuesday.

After several hours of talks between French Economy, Finance and Budget Minister Pierre Beregovoy and Lev Voronin, a first deputy chairman of the council of ministers, the Soviet side agreed to honour more than half the loans to French companies contracted during te past three or four months.

The total amount of possible arrears raised during the talks was more than one billion francs (175.4 million dollars), but involved less than a dozen cases, informed sources said.

Problems which still have to be resolved include payments for equipment for a petrochemical plant at Tenguiz in Kazakhstan provided by the Lurgi-France group and an oil project in Astrakhan near the Caspian Sea involving the Technip group.

The partial agreement was reached during a meeting of the Franco-Soviet commission which opened here Monday.

Some 40 French and Soviet officials from the finance, foreign affairs and foreign trade ministries took part in the talks.

At the same time, Soviet economic officials and representatives of the French business leaders' association were holding separate talks.

France also said during the Franco-Soviet commission session that it would provide management training for some 6,000 Soviet white collar workers over the next three years, double the figure proposed when the project was first raised in Paris in January.

Francois Essig, director of the Paris Chamber of Commerce and Industry, who attended the talks, said the Soviet trainees would learn about company management and the mechanisms of a market economy.

Three training centres will be set up in Moscow and the trainees will also spend some time in French businesses and organisations.

#90086d0930 03/27/1990 ~French/German News Agency
SEOUL (MARCH 27) - European Commission Vice President Frans Andriessen pressed South Korea here Tuesday to adopt fair trade practices and join the West in giving aid to reforming East European countries.

He noted that there had been an important growth in trade between South Korea and the European Economic Community, but added "we believe that we could come to an even better and more balanced relationship."

Mr. Andriessen, who opened a permanent EEC mission to South Korea here Monday, specifically targeted South Korea's practice of copying European and U.S. goods and selling them very cheaply without paying royalties.

The issue, which falls under intellectual property protection, rankles European executives, particularly when it affects luxury goods.

"During my conversations with ministers I have raised some concrete difficulties European business is experiencing in operating in the Korean economic scenery," said Mr. Andriessen, who met Monday with President Roh Tae-Woo and earlier Tuesday with the new trade minister, Park Pil-Soo.

"Specifically the protection of intellectual property - in this field the situation is far from satisfactory," he told a press conference at the new mission before leaving Seoul.

"We have concluded that in the near future we will dicuss more in detail the problems I have indicated in a more general way during our conversations," he added.

Mr. Andriessen said other main points of concern to European business included the banking sector, foreign investments and roadblocks in the permanent establishment of enterprises.

He also said the EEC would like Seoul to join the Organization of Economic Cooperation and Development in giving aid to Hungary and Poland.

However, he added, "my impression is that for the moment the South Korean authorities have a certain preference for bilateral action, so I didn't raise the point formally."

#90086d0960 03/27/1990 ~French/German News Agency
KARACHI, March 27 (AFP) - Prime Minister Benazir Bhutto's government came under fire from business and opposition leaders Tuesday for its shock decision to raise the price of gasoline and other petroleum products by 15.8 percent.

The price increases, announced overnight, took the nation by surprise on the eve of Ramadan, the Islamic month of fasting. A liter of regular gasoline now costs 8.28 rupees (38 cents U.S.), up from the previous 7.15 rupees (33 cents).

The decision came after Ms. Bhutto chaired a meeting of her cabinet's economic committee Monday.

A government spokesman said the decision to increase prices of petrol, kerosene and fertiliser was taken with a "heavy heart" to meet budgetary gaps and to save the national economy from a difficult situation.

The country would have to "swallow the bitter pill" of the price increases and their likely inflationary impact in the larger national interest, he said.

Analysts here discounted the official explanation that the sudden rise in petrol prices was caused by higher prices of crude oil on world markets.

V.A. Jaffery, the prime minister's adviser on finance, told reporters that crude prices had increased from an average of 14.10 dollars a barrel last year to 17.80 dollars now, forcing the government to raise prices.

However, analysts rejected this explanation and said the sudden price hike was a result of conditions set by the International Monetary Fund (IMF) and other multilateral agencies for Pakistan to reduce its budget deficit to qualify for some 600 million dollars in cash aid.

The current gasoline price of 33 cents per liter was fixed several years ago when the world price of crude oil stood at around 27 dollars a barrel.

However, when the price dropped to seven dollars a barrel, the government did not drop prices in line with the cost of crude oil imports.

Business and opposition leaders said the latest price increases were unnecessary given the current crude oil price.

Mr. Jaffery told reporters the petrol price rise would have an overall inflationary effect, but said he hoped the rate of inflation could be kept within the target of eight percent as against last year's 12 percent.

#90086d1200 03/27/1990 ~French/German News Agency

ISLAMABAD (MARCH 27) - The government has decided to sell 10 percent of the shares of Pakistan International Airlines (PIA) to the public amid moves to privatize industry, Pakistani newspapers reported Tuesday.

The decision to privatize part of the national flag carrier was taken at the Economic Coordination Committee (ECC) chaired by Prime Minister Benazir Bhutto here on Monday, The Nation in Lahore said.

This will be the first time that shares of the usually profit-making airline will go to the private sector.

Informed sources said the shares would be floated on the open market some time in May.

Ms. Bhutto, apparently inspired by the British economic model, last year announced that her government would turn some major industries over to the private sector by July next year.

Shortly after assuming her post in December 1988, Ms. Bhutto said she had decided "to undertake privatization in favour of small share-holders."

Her policies are unlike those of her late father Zulfikar Ali Bhutto, who had major banks and industries nationalized in the mid 1970's.

Apparently taking a cue from British Prime Minister Margaret Thatcher's much-publicised "popular capitalism" policy, Ms. Bhutto said "instead of regulations and controls, we want competition and other market factors to check against rapacious tendencies."

Sources here said Ms. Bhutto, on the recommendations of the World Bank's International Finance Corporation (IFC) and the British firm N.M. Rothchild, was considering giving up state control of seven enterprises.

Besides the airline, the Rothchild-IFC report has proposed the

privatization of Pakistan State Oil, National Refinery, Habib Bank, Muslim Commercial Bank, and two concerns of the Sui Gas Company.

"Management of the privatized industries would certainly be changed and workforce of the industry would be given 30 percent first preference shares," Ms. Bhutto said.

#90086d1270 03/27/1990 ~French/German News Agency

TUNIS (MARCH 27) - Almost half of Tunisia's 316,000 jobless are under the age of 25, according to a study released here Tuesday by the national statistics institute.

The study sets the available working population at 2.36 million, giving an overall jobless rate of 13.3 percent. Some 494,300 of the available workforce, or almost 21 percent, are women.

Some 48.4 percent of the total jobless figure, or 153,200, are under 25, with a further 42.5 percent or 134,400 aged between 25 and 44, according to the study, which is to be used as a basic reference document by experts drawing up the country's next eight-year development plan from 1992 to 1996.

Almost 31 percent of the 316,000 unemployed have a secondary school or university education, and some 66,400 or 21 percent of the total, are women.

Some 21.6 percent of the jobless are in the southwest of the country, 18.7 percent in the northwest and 16 percent in the central west. The level is lower in the northern and eastern coastal regions, where agriculture, industry and tourism absorb much of the job-seeking population.

But urban areas saw the highest level of unemployment last year, with some 207,700 people out of work. Some 44,680 people flock to the cities each year seeking jobs, the study said.

Agriculture employs some 26 percent of the total workforce, industry 34 per cent and services 40 percent.

Tunisian President Zine El Abidine ben Ali has recently called for a meeting between all relevant ministers to draw up a plan to combat unemployment, following the creation at the beginning of this month of an employment and training ministry.

The president said last week that "many Tunisians are living in a difficult situation, and they have little purchasing power," calling for negotiations on wage policy and working conditions.

#90086d1500 03/27/1990 ~French/German News Agency
PARIS (MARCH 27) - Soviet Defense Minister Dmitri Yazov Tuesday underlined Moscow's wish to avoid force in settling tensions over Lithuania's self-proclaimed independence.

General Yazov, speaking to reporters after a meeting with French Prime Minister Michel Rocard, said he assumed ''that everything wil be taken care of by peaceful means''.

The minister appeared, however, to defend the Soviet Army's forced retrieval of local deserters from two Lithuanian hospitals, and said the military had a right to go after soldiers absent without leave.

''I want to say that there is no military action at all on Lithuanian territory,'' Yazov said. ''There are troops ... but the Soviet Army has not been deployed.''

He added that he was unaware of the latest events inside Lithuania, as he had left Moscow early Tuesday for his four-day visit to France.

Aside from secessionist tendencies in the Soviet Union's Baltic republics, major topics during Yazov's talks with Rocard and Defense Minister Jean-Pierre Chevenement are expected to include the establishment of a collective European security system.

The Soviet minister and his French hosts will also discuss nuclear and conventional disarmament and the future of the Eastern and Western military alliances, Paris officials said.

Yazov is the first Soviet defense minister to visit France since 1972.

#90086d1630 03/27/1990 ~French/German News Agency
PARIS (MARCH 27) - French auto maker Renault said Tuesday its consolidated net profit rose 5.2 percent last year over the 1988 level to 9.29 billion francs (1.62 billion dollars).

Turnover was up 8.1 percent at 174.5 billion francs (30.6 billion dollars), financial director Louis Schweitzer said.

The profit figure was below the 10 or 11 billion francs predicted by the market, but came after the deduction of costs of 1.28 billion francs for the closure of the Billancourt plant outside Paris and 1.87 billion francs for staff pensions.

It was also after the deduction of 464 million francs in profit-sharing to employees.

In addition, Renault, which in past years has not had to pay taxes because it was loss-making, has budgeted more than 909 million francs for 1989 taxes, after paying only 62 million the previous year.

The good 1989 performance had enabled Renault to reduce its debt from 23.8 billion francs to 17.6 billion, Mr. Schweitzer said, and debt servicing had fallen from 3.46 billion francs in 1988 to 2.17 billion last year.

Renault sold a total of two million cars, utility vehicles and industrial vehicles worldwide last year, an increase of 4.7 percent over 1988.

But the increased turnover was mainly in France, with exports accounting for 50.8 percent of the total, down from 51.8 percent the previous year, largely due to a poor performance by Renault's U.S. interest Mack Trucks, which made a loss of 185 million dollars.

Despite this, Renault remained the French company with the highest overseas turnover, at 88.64 billion francs, up from 83.55 billion in 1988.

TAIPEI (MARCH 27) - Taiwan's travel agencies will boycott Hong Kong unless the British colony makes "satisfactory moves" to end discrimination against visitors from here, the Taipei Association of Travel Agents said Tuesday.

Taiwan's Tourism Bureau is to send a letter to the Hong Kong Tourist Association Wednesday to protest allegations that airport immigration officials in the British colony barred stranded Taiwan visitors from entry last week, tourism officials said.

"Unless satisfactory measures are worked out by the Hong Kong authorities before April 5, we will launch a 'three-refusal' campaign," the Taipei association said in a statement.

The "three refusals" would include a call for local residents to stop visiting Hong Kong by excluding the port city from package tours, ending assistance for local people applying for visas and boycotting Hong Kong-made products, a spokesman for the association said.

The sanctions are designed to protest against alleged unfair treatment by Kai Tak airport officials who refused to allow some 1,200 Taiwan passengers to enter Hong Kong and stay at transit hotels overnight

Thursday, the official said.

Four Taipei-bound flights were delayed by poor visibility at Taiwan's Chiang Kai-shek International Airport.

The Hong Kong government is alleged to have discriminated against people from the Nationalist-held island under pressure from Beijing, and allows only those who are granted visas to pass through airport immigration, he said.

Visitors from most other countries do not need visas to visit Hong Kong.

Taiwan is a major source of tourist revenue for Hong Kong, with up to 1.1 million people travelling there last year, second only to Japan, according to a Hong Kong Tourist Association spokeswoman here. The number of visitors represented a 209 per cent increase over the previous year, she said.

Hong Kong has been a favourite gateway to China for Taiwan people since the Nationalist government partially lifted a ban on travelling to the mainland in November 1987.

KATHMANDU (MARCH 27) - Several hundred students Tuesday demonstrated on a major Kathmandu thoroughfare to call for a multi-party system, witnesses said.

The students, from four campuses of the Tribhuvan University network, obstructed traffic for more than an hour as riot police watched without intervening, the witnesses said.

Another group of about 500 students from a science college and a secondary school held a separate demonstration in which they carried black flags, the symbol of Nepal's democracy movement.

Three of these demonstrators were arrested, according to a spokesman of the Nepal Students' Union, which advocates democracy in Nepal, whose panchayat or local council system has been in place for 30 years.

Reports reaching here Tuesday said that several campuses in Chitwan, 90 kilometres (55 miles) south of here, observed a strike Tuesday.

At a public meeting, the strikers demanded the release of students, professors and others detained in connection with the ongoing political movement.

BERLIN (MARCH 27) - British Defence Minister Tom King met with West Berlin officials and chatted to East German border guards during a visit to West Berlin on Tuesday.

King asked the border guards about entry requirements for people wanting to visit East Berlin when he stopped at the Potsdamer Platz crossing point during a tour of the Berlin Wall.

King also conferred with West Berlin's governing mayor, Walter Momper, on the status of the former German capital after unification between the two Germanys.

A british spokesman said the defence minister told Momper that Britain fully supported the unity process as it had always done during its 40-year commitment to Berlin.

TOKYO (MARCH 27) - Japan's finance ministry Tuesday instructed all financial institutions in the country to curb loans on real estate deals in a bid to fight soaring land prices.

Finance Minister Ryutaro Hashimoto told a press conference that the ministry had instructed the nation's 1,245 banks, insurance firms and other financial institutions to keep the growth rate of property-related loans below that of all loans.

The overall annual growth of outstanding loans from the financial industry stood at 10.9 percent in 1989, according to official statistics.

The total of outstanding loans to real estate businesses rose 14.1 per cent to 46.9 trillion yen (310 billion dollars).

"The rapid rise in land prices in Tokyo has rippled across the nation, causing great strains to the people's livelihood," Mr. Hashimoto said. "In view of its adverse effects on the economy, we deem it necessary to take a drastic step."

The order, effective April 1, is the strongest measure taken to steady land prices in 17 years. It is expected to deprive speculative land investors of at least 1.5 trillion yen (10 billion dollars) in funds.

In 1973, a similar order was issued to deal with land price spirals during a land development boom sparked off by the then prime minister, Kakuei Tanaka, who stepped down a year later in the wake of a scandal over his

questionable private business deals.

TOKYO (MARCH 27) - Japan's Toyota Motor Corp. said Tuesday it planned to form a 150 million dollar venture with Turkish conglomerate Sabanci and Japanese trading firm Mitsui and Co. Ltd. to produce cars in Turkey.

The proposed venture aims to invest 250 million dollars in local facilities, with production growing from an initial 20,000 vehicles a year in 1993 to 100,000 vehicles at a later date, the company said in a statement.

Toyota said the new company was to be established in the middle of this year but no site had yet been chosen.

Forty percent of the company's equity would be held by Toyota, 10 percent by Mitsui and the remaining 50 percent by Haci Omer Sabanci Holding AS, the Sabanci group holding company, the statement said.

The three partners have jointly submitted an application to proceed with the project which the Turkish government is now considering, it added.

"The decision to go ahead with the application comes after two years of extensive feasability studies," the statement said. "The project will have a positive impact on the local economy, both in terms of job creation and stimulating further growth in Turkey's auto parts industry."

Toyota said the proposed venture planned to produce 1,600 c.c. passenger cars initially and commercial vehicles at a later date.

Haci Omer Sabanci, based in Istanbul, is capitalised at 55 million dollars and had total sales of 3.3 billion dollars in 1988. The group's 91 companies employ some 31,000 people in various industries ranging from textiles, cement and tyres to household appliances, insurance and banking.

Toyota officials confirmed in September that the company was considering a plan to produce cars in Turkey but refused to eleborate, saying they had not yet decided whether to proceed with the project.

DHAKA (MARCH 27) - At least 150 people were feared drowned when a ferry boat packed with holidaymakers capsized in southeastern Bangladesh on Tuesday, reports reaching here said.

Mohammad Hussain, chief constable of the area where the disaster occurred, said rescue workers had recovered 43 bodies from the Naaf river, about three kilometres from the town of Teknaf.

The official said more bodies were floating on the water. Six persons survived and were taken to hospital, he said.

The boat was bringing about 160 holidaymakers and their families home from the Burmese border town of Mondo when it was caught in a squall.

KABUL (MARCH 27) - A Soviet transport plane crashed and burst into flames while approaching Kabul airport Tuesday, killing eight to 10 people on board, aviation and diplomatic sources said.

The giant Ilyushin-76 rolled over in flight several times before crashing into the mountains some six kilometers (four miles) south of the airport, witnesses said.

Officials from the Soviet airline, Aeroflot, were carrying out a preliminary investigation to determine how many people were on board the plane, believed to have been carrying kerosine and flour to Kabul, the sources said.

No accurate estimate of the casualties was available, but reliable diplomatic sources said the IL-76 usually has a crew of eight to 10 people. The sources said the crash left no survivors.

Diplomatic sources here said that the ill-fated transporter could have been hit by a Stinger missile fired by mujahedeen resistance fighters who operate in the mountains surrounding Kabul.

The U.S.-built missile with a range of more than 3,000 meters has been responsible for bringing down several military planes in the past, but there was no immediate confirmation that it had caused Tuesday's crash.

The Afghan airforce was expected to order a detailed probe later to find out what caused the crash, the first involving a Soviet plane here since Soviet troops left Afghanistan last year.

Witnesses said the plane, with a load capacity of 40 tons, may have developed a technical fault that caused it to crash or the pilot may have been trying out an awkward manouver.

BEIJING (MARCH 27) - China is hoping to sell 100 buses to Mexico after signing a contract to export 90 buses to the Philippines, the Society of Chinese Bus and Coach Exporters said Tuesday.

The Philippine order for 40-seat buses is to be filled by the China Aeolus Automotive Import-Export Corp., said Zhang Keqin, secretary general of the industry association.

Negotiations are under way to export 100 buses to Mexico, he added.

Mr. Zhang was quoted by the official New China News Agency, which did not specifically identify the foreign bus-buyers.

Both deals pale against a 500-bus sale to Peru by Northern Industries Ltd. last year, when China contracted to export a total of 1,763 buses around the world, Mr. Zhang said.

China has a total bus production capacity of 80,000 units, he said.

Stuttgart (MARCH 27) - The electricals firm Standard Elektrik Lorenz (Sel) has become the first West German company to receive official permission from East Berlin to establish a joint venture in East Germany, it was announced here Tuesday.

Sel chairman Gerhard Zeidler and Juergen Apitz, managing director of the East German communications company Veb nachrichtenelektronik, made the announcement.

Under their 50-50 joint venture, the two companies plan to produce digital exchange equipment in order to modernise and build up East Germany's telephone network.

Production at Veb's two plants at Arnstadt and Rochlitz is to start up in 1992 under the limited-liability joint venture to be called ''Rft-Sel nachrichtenelektronik''.

Zeidler said the company's capitalisation would start at 30 million marks (17.5 million dollars), comprised of capital equipment provided by the East German side and hard currency investments on Sel's part.

#90086d2390 03/27/1990 ~French/German News Agency

PARIS (MARCH 27) - French company Spie Batignolles said Tuesday it was taking a 14.7 percent stake in British group Davy, the world's fourth largest industrial engineering concern.

Spie Batignolles, part of the Schneider group, said it would be acquiring the stake in exchange for ceding to Davy all its industrial engineering activities, grouped within the Clecim company and with an estimated value of 400 million francs (70 million dollars).

Clecim, which includes Comstock Engineering in the United States and Cosim in Spain, had a net profit of 70.2 million francs last year on turnover of 1.96 billion.

The company was not large enough to compete with giants on the world market such as Bechtel, Kellogg and Lumus, Schneider president Didier Pineau-Valencienne told a press conference.

Davy had a turnover of 968 million pounds (1.6 billion dollars last year), with 54 percent of its operations in Britain, 13 percent in the United States and seven percent in West Germany.

Spie Batignolles will be the single largest single shareholder in Davy following the deal. Only two shareholders currently hold a more than five per cent stake: the Abu Dhabi investment fund with 7.75 percent and British insurance group Prudential with 5.8 percent.

Spie Batignolles president Georges de Buffevent said that the two groups could set up joint ventures in Africa, the Middle East, Eastern Europe, and that the deal would give the French company access to the British, West German and Commonwealth markets where it currently has little activity.

Spie Batignolles is expecting a net consolidated profit of 250 million francs for 1989.

#90086d2460 03/27/1990 ~French/German News Agency

PARIS (MARCH 27) - French group Compagnie Generale d'Electricite (CGE) said Tuesday it would acquire a 12 percent stake in Framatome from construction group Dumez, giving it a majority stake in the world's largest nuclear generator maker.

CGE already held a 40 percent stake in Framatome, and the Dumez acquisition boosts its holding to 52 percent. The two private companies had been linked by a shareholders' agreement and generally stood together within Framatome.

In return, Dumez is to acquire CGE-Distribution, CGE's electrical equipment retailing operation.

The other shareholders in Framatome are the state-owned Commissariat a l'Energie Atomique (CEA) with 35 percent, state-owned Electricite de France (EdF) with 10 percent, and employees, who hold three percent.

Dumez has wanted for some time to pull out of Framatome, and Industry Minister Roger Fauroux saw this as a chance to change the balance of public and private holdings in the company.

He wanted to see state and private shareholdings with equal voting rights, but with CGE handling the industrial operation of Framatome.

Framatome management and staff strongly opposed the plan, saying it would threaten the company's independence.

Framatome officials on Tuesday said they were surprised at news of the Dumez-CGE deal, particularly as a report published earlier this month had recommended that CGE should pull out altogether.

CGE said that the acquisition of the Dumez stake did not change anything as the two companies had always voted together within Framatome.

LONDON (MARCH 27) - British Prime Minister Margaret Thatcher appealed Tuesday for restraint in the crisis over the breakaway Baltic republic of Lithuania, calling on Moscow and the leaders in Vilnius to continue dialogue.

"The situation there is very difficult indeed," Mrs. Thatcher said, adding that "it will not help to be provocative on either side."

Speaking in the House of Commons, she said "the people of Lithuania have made clear their wish to determine their own future" and noted that Britain had never recognized the forcible annexation of Lithuania, along with Estonia and Latvia, by Stalin in 1940.

"Force is not an appropriate way to settle this," she added.

Her remarks came after Soviet troops seized young Red Army deserters and occupied the Lithuanian Communist Party headquarters in the Lithuanian capital Vilnius in overnight raids denounced as "barbaric" by the republic's president.

Earlier Tuesday in Paris, Soviet Defence Minister Dmitri Yazov said the situation in Lithuania would be resolved "peacefully" but added that the army deserters must be taken back to their units.

NICOSIA (MARCH 27) - The dawn-to-dusk fasting month of Ramadan, a period devoted to piety and good deeds, started Tuesday for Moslems around the world.

Over the next four weeks faithful Moslems abstain from eating, drinking and smoking during the day, with exceptions made for travellers and the sick.

Saudi Arabia, guardian of the Moslem holy cities of Mecca and Medina, and most other Gulf states started the fast Tuesday after sighting the crescent of a new moon Monday night.

Ramadan also started for Sunni Moslems in Algeria, Jordan, Lebanon and Syria, while Lebanese Shiites were due to start fasting Wednesday, along with Afghanistan, Egypt, Iran, Libya, Oman, Pakistan, Sudan, Tunisia and Turkey.

For Iran, the start of Ramadan coincides with the 13 days of celebrations for the Iranian new year, which began March 21. The celebrations pre-date Islam and are frowned upon by Shiite religious conservatives.

Under Islam, Ramadan is a period of piety and good deeds to mark the month in the year 622 when the Archangel Gabriel revealed the Koran, or Moslem holy book, to the Prophet Mohammad.

There are an estimated one billion Moslems in the world.

GENEVA (MARCH 27) - The world mining industry is likely to see further job cuts due to new technologies and the replacement of metals by other substances in many sectors, the International Labor Organization (ILO) said Tuesday.

The mining sector has already been hit by structural adjustment due to reorientation of the markets and falling prices, and the rate of job cuts is likely to accelerate because of the replacement of metals by fibre optics, ceramics and superplastics.

There is also a trend towards moving out of traditional heavy metals to lighter and more resistant metals, according to the study of the mining industry outside coal prepared for a meeting on the issue due to open in Geneva Wednesday.

The increasing use of new technologies which are revolutionizing working methods could also affect jobs, the ILO said.

The meeting opening Wednesday is to review latest developments in the mining industry and make proposals to improve working conditions and legal protection in mines.

Because of technological developments, the percentage of scientific and technical staff in the industry has risen while that of workers directly involved in production has fallen, the ILO said.

This is why there is a need to work out policies to help non-qualified workers find other jobs.

The 1980's "do not seem to have been particularly good" when it comes to improving working conditions in mines, the report said.

In the industrialized countries, companies were more concerned in improving their position against their competitors by cutting production costs than improving working conditions.

The report also said that small mining operations in the Third World, often illegal or semi-legal, were subject to no checks and often led to "the worst excesses in working conditions, including sometimes the shameful exploitation of child labor."

The ILO called on governments to take action to check on small mines, set up a basic social infrastructure and introduce appropriate pricing mechanisms.

#90086d2840 03/27/1990 ~French/German News Agency

KAISERSLAUTERN, WEST GERMANY (MARCH 27) - West German company Pfaff, Europe's leading sewing machine maker, said Tuesday its consolidated sales rose 13 per cent last year over the 1988 level to 1.18 billion Deutsche marks (694 million dollars).

Profits were up "despite higher interest rates and costs of materials," Pfaff said in a statement without giving a figure. After-tax profit totalled 4.1 million Deutsche marks in 1988.

Sales of industrial machines were up 18 per cent at 866 millon Deutsche marks, while sales of sewing machines for home use were down one per cent at 318 million Deutsche marks.

Pfaff said 72 per cent of its 1989 sales were abroad, with increases particularly in the Soviet Union and several other member countries of the eastern bloc trading alliance Comecon.

#90086d2920 03/27/1990 ~French/German News Agency

SOFIA (MARCH 27) - Bulgaria has asked for international tenders for oil exploration in the east of the country and the North Sea shelf, the Communist Party daily Rabotnichesko Delo said Tuesday.

Experts from 14 U.S. and European countries had visited the country since the end of last year to look at the possibilities, the newspaper quoted

Simeon Simov, first vice-president of the Geology Commission, as saying. Tenders will be accepted until June 15 and contracts should be signed before the end of September, he added.

The companies will be able to look for oil for seven years. If they find a well, they will set up joint ventures with Bulgaria for a 30-year period. Bulgaria has hitherto found only small oil deposits. It will choose the company which offers the largest exploration, uses the most modern technology, employs the most Bulgarian staff and helps other sectors of Bulgarian industry through joint ventures, Simov said.

#90086d2930 03/27/1990 ~French/German News Agency

LONDON (MARCH 27) - The 18th century Italian composer Antonio Vivaldi has passed rock star Phil Collins and might even edge out David Bowie in an unusual development in the British Top-10 hit parade.

Vivaldi's classic "Four Seasons" has been rising steadily and hit number three this week, in a recording by 34-year-old British violinist Nigel Kennedy.

Though Mr. Kennedy is a noted soloist who was acclaimed as a child prodigy at his debut in 1977, virtuosity alone cannot explain his success.

Music industry sources said he has won over the under-30 crowd because of his reputation as a non-conformist and a fanatical soccer fan, especially for the Aston Villa team in Birmingham.

-30- 872

#90086d2970 03/27/1990 ~French/German News Agency

ISLAMABAD (MARCH 27) - Twenty seven people died Tuesday when a rocket blew apart a bus in the Afghan capital of Kabul, while another 22 were injured as three more rockets hit heavily populated areas, Radio Kabul reported.

The broadcast monitored in Islamabad said anti-government rebels fired several long-range rockets and at least four landed in the residential areas of the city, causing extensive damage.

Several people have been hospitalised, the radio said.

The state-run radio, quoting government officials, said the rocket barrage originated from the western Paghman hills where the guerrillas are said to be entrenched.

The attacks, after relative silence in Kabul since the abortive military

coup against the pro-Moscow regime of President Najibullah on March 6, coincided with the start of the Moslem fasting month of Ramadan.

They followed an unexplained crash of a giant Soviet transport plane, an IL-76, in Kabul at noon Tuesday. The plane was carrying cargo for Kabul and eight to 10 crew members were feared dead.

#90086d3060 03/27/1990 ~French/German News Agency

ADDIS ABABA (MARCH 27) - Ethiopia appears to be putting a major diplomatic offensive afloat to woo the west into its net on the strength of new policy reforms that mark a farewell to hardline Marxist practices.

Kassa Kebede, a man believed close to head of state Mengistu Haile Mariam and responsible for foreign affairs in the ruling Workers' Party central committee, left here Monday for Israel, the United States and Canada at the head of a delegation.

Another team led by alternate politburo member Fasika Sidelil, who is in charge of the economy in the party apparatus, left for Washington Friday in a bid to boost cooperation with the World Bank and the International Monetary Fund (IMF).

Both Mr. Kassa and Mr. Fasika told the Ethiopian News Agency before leaving that one aim of their mission was to explain to western leaders about sweeping reforms announced March 6 by the central committee introducing a mixed economy.

The measures in effect shut the door against the hardline Marxist policies pursued by the authorities over the past 15 revolutionary years.

They also came in the wake of diminishing aid flow from Ethiopia's allies, themselves swept by the wave of reforms across East Europe.

Observers thought it intriguing that Soviet foreign minister Eduard Sheverdnadze left Ethiopia out of his current nine-nation African tour, perhaps a sign that Moscow was no longer fully behind its once staunchest adherent in Africa.

With endemic famine and civil war sapping the country's economy -- the war alone claiming 50 per cent or about 750 million dollars in recurrent expenditures each year -- the writing on the wall clearly seems to read: "Go out in search of new friends".

Mr. Kassa, who described the restoration last November of diplomatic ties with Israel as "historic" for the peoples of the two countries, is expected to meet with senior Israeli officials and heads of various

organizations in Tel Aviv.

#90086d3170 03/27/1990 ~French/German News Agency
PARIS (MARCH 27) - A future European central bank could have a two-tier leadership based on a governing board and a management committee, French central bank governor Jacques de Larosiere said here Tuesday.

Mr. Larosiere said that the board would be responsible for monetary decisions and would be made up of central bank governors.

The management committee would implement the governing board's decisions and monitor monetary developments. It would be made up of people appointed by the Council of Europe.

Mr. Larosiere called for a "federal" rather than a centralised system, with more power being retained at national level than at European level.

The European bank would be "an autonomous community institution" with capital shared out according to precise criteria, possibly based on gross national product and the level of a country's reserves.

"Common monetary policy" would have to be the "central element" in the future European bank, but central banks in member countries would continue "to intervene and influence the liquidity of their own banking systems."

The central banks would preserve traditional prerogatives such as issuing bank notes, compiling statistics and some public service roles, he added.

Overseeing credit establishments in each country would also remain the job of individual central banks, even if the rules governing such establishments were aligned to ensure equality of competition.

"Monetary sovereignty of individual countries and of the European central authorities are not opposing interests, but complementary ones," Mr. Larosiere said.

ABIDJAN (MARCH 27) - Ivory Coast police on Tuesday blocked off a union building where nurses had planned to meet to discuss possible support for a doctors' strike, witnesses said.

The nurses union, SYNAPETSA, an affiliate of the single ruling party sponsored General Union of Workers (UGTCI), had agreed in principle to a work stoppage at a meeting March 20, but had not officially notified the government nor set a date, a union member told Agence France-Presse.

About 100 nurses arrived at the union meeting hall Tuesday to find 25 policemen blocking the entrance. None of the union leaders turned up, the meeting did not take place and the nurses left without incident.

Some 6,000 nurses and other health workers belong to the union, including 3,000 in Abidjan.

There are two university hospitals with a capacity of 1,500 beds for the two million people in the Ivory Coast economic capital.

Earlier Tuesday government doctors, protesting the arrest of colleagues during a demonstration against pay cuts, said they would refuse to handle emergency cases and were truning an initial 48-hour strike into an all-out unlimited stoppage.

Doctors were among 150 university teachers and research workers detained late Monday after demonstrating peacefully near the presidential palace against government austerity measures which include slashing senior civil servants' pay from eight to 17 percent.

#90086d4040 03/27/1990 ~French/German News Agency

BUCHAREST (MARCH 27) - Three to four hundred conscripts demonstrated here Tuesday in support of a shorter military service, as Romania's defence minister announced that service was being extended by two months.

The soldiers, unarmed but in uniform, rallied outside the headquarters of the government, demanding it honor a pledge to shorten military service.

The soldiers, who said they would not leave until their demands were satisfied, were also protesting what they said was the continuation of "forced labor" -- a practice under the old regime of Nicolae Ceausescu ousted in December.

Many said they were awaiting their discharge, but were notified Tuesday morning that they had to stay in uniform at least another two months.

They said this went against the government's promise last January to shorten military service from 16 months to a year.

Romanian Defence Minister Victor Stanculescu confirmed late Tuesday that military service was being extended for two months, due to the "situation prevailing in certain regions of the country".

Observers said General Stanculescu was referring to clashes in the central region of Transylvania last week between Romanians and members of the ethnic Hunagrian minority which left eight people dead and hundreds injured.

Gen. Stanculescu, speaking on Romanian radio, also called on soldiers "to intensify their military preparation, so as to be ready to ensure

conditions enabling the Romanian people to work in peace".

Addressing "dear soldiers of the army", he said the "situation in certain localities and zones of the country makes it necessary to take measures to maintain and strengthen the country's combative strength and defence capability".

In a separate rally Monday, several dozen students gathered in central Bucharest to commemorate the 1918 reattachment of Bessarabia -- now in Soviet Moldavia -- to Romania, and stress the "Romanian" character of Soviet Moldavia.

The pro-Bessarabian students charged that they had been prevented from crossing into neighboring Soviet Moldavia with 10,000 Romanian-language books for students and schoolchildren in Kishinev, the Moldavian capital.

GEORGETOWN (MARCH 27) - Sweden has agreed to reschedule the 561,000 dollars it is owed by Guyana, Guyanese Finance Minister Carl Greenidge said Tuesday.

The debt accord "keeps with the commitments made by Sweden in May last year, when a rescheduling agreement was signed with the Paris Club and other countries supporting Guyana's recovery programme, backed by the International Monetary Fund and the World Bank", he said.

Mr. Greenidge said he would present the nation's 1990 budget in parliament Wednesday.

The unveiling of last year's budget triggered a massive currency devaluation, with the Guyana dollar falling from 4.4 to the U.S. dollar to 33 per greenback.

MANAGUA (MARCH 27) - Nicaragua has given the U.N. peacekeeping force in Central America a blueprint for moving contra rebels into designated enclaves before they surrender their weapons and disband, Deputy Defense Minister Joaquin Cuadra said Tuesday.

After meeting with Spanish General Agustin Quezada, the commander of the "Blue Helmets" in Central America, General Cuadra told journalists the rebels would move to the zones once a cease-fire was implemented.

The U.S.-backed contras, Roman Catholic Cardinal Miguel Obando y Bravo and

representatives of conservative President-elect Violeta Chamorro signed an agreement last Friday in Toncontin, Honduras, calling for the rebels to demobilize by April 20, five days before the leftwing Sandinista National Liberation Front is to relinquish power.

Gen. Quezada, who after his meeting with Gen. Cuadra was expected to leave for Tegucigalpa to present the proposal to contra leaders, said rebel occupation of the security zones would mark a first step toward demobilization.

The number, location and size of the enclaves were not given. In a separate peace agreement signed March 1988 in Sapoa, Nicaragua, contra leaders and the Nicaraguan Government had established seven pockets for the rebels to occupy during demobilization.

PRETORIA (MARCH 27) - The broad-based M3 money supply grew in January by 23.63 percent on an annualised basis, the Reserve Bank announced Tuesday, well outside last year's target range of 14-18 percent.

The figure was left even further off the mark by Reserve Bank Governor Chris Stals's announcement Friday that the target range for M3 growth for the first three quarters of this year would be 11-15 percent.

January's figure was revised upwards from an original estimate of 21.9 per cent.

Preliminary figures for February showed a 21.96 percent growth over the same month last year, which came down to 19.2 percent taking seasonal adjustments into account.

Seasonally adjusted annualised M3 growth for January was 25.46 percent, compared to 19.12 percent in December.

Economists predicted the off-target figures would force the government to postpone plans to cut the prime interest rate, currently at 21 percent, which is 6.1 percent above inflation.

M3 comprises cash in circulation, and all deposits with banks, building societies and the post office.

MADRID (MARCH 27) - Traffic jams blocked Madrid's main roads Tuesday after underground rail workers called a 24-hour strike to coincide with a

12-day-old bus stoppage.

Most commuters resorted to private vehicles and taxis to get to work although metro authorities said there had been little support for the strike with most lines functioning normally during the early rush hour.

The pay strike was called by the National Workers' Confederation (CNT), the only union to have backed the all-out indefinite bus strike which began March 15.

Metro workers had pledged to maintain 65 per cent of the service during the peak morning rush and half during the afternoon rush hour.

About 1.5 million of the estimated 5 million inhabitants living in the capital and its suburbs use Madrid's metro and bus services daily.

The number of commuters using taxis has risen 30 to 40 per cent since the bus strike began choking the city's already congested streets.

GRAN CANARIA, SPAIN (MARCH 27) - Police in the Canary Islands Tuesday were investigating a suspected sabotage attack on a water supply station this weekend which left some 15,000 people with chlorine poisoning.

Saboteurs were believed to have broken into the water station north of the Gran Canaria Islands' capital, Las Palmas, and smashed the chlorine regulating valve, flooding tap water supplies with high levels of the toxic chemical.

Some 15,000 people were affected by diarrhoea, vomiting and skin rashes induced by the chlorine which also bleached the color out of clothes.

Engineers broke outlet pipes Sunday night to empty the 4,300 cubic meters of contaminated water from the reservoir.

BUENOS AIRES (MARCH 27) - Argentine film industry workers staged a noisy demonstration outside the venue of a Hollywood Oscar award ceremony in Buenos Aires to protest tax exemptions for foreign films.

Some 200 protesters handed out leaflets outside the Buenos Aires theatre Monday night slamming tax exemption for films imported to Argentina where thousands of people have been hit by government austerity measures aimed at salvaging the devastated economy.

"Today television shows a black-tie Argentina to the rest of the world and hides the devastating reality of the thousands of unemployed cinema artists and technicians," the leaflets read.

Argentine President Carlos Menem declined an invitation to the ceremony, attended by about 1,200 guests, many of them Argentine actors actresses and film directors.

American actor Charlton Heston and Argentine actress Norma leandro presented two of the Hollywood Film Arts and Sciences Academy awards in a ceremony broadcast live across the world.

Other awards were handed out at ceremonies in Los Angeles, London, Tokyo, Sidney and Moscow.

SAN JOSE (MARCH 27) - Lame-duck Costa Rican President Oscar Arias has said Nicaraguan Contra rebels should be allowed to settle in Miami after they end their U.S.-backed insurgency next month.

Arias' comments came as a sharp retort to his successor, president-elect Rafael Calderon, who said on a recent visit to the United States there would be no objection to demobilized Contras being allowed to live in Costa Rica if they wished to do so.

Leaders of the 12,000-strong rebel force based in Honduras signed an accord last week agreeing to begin disbanding by April 20, five days before Violeta Chamorro is set to take office as Nicaraguan president.

Arias said Monday, "Those who have the responsibility for determining where the Contras should go are the same ones who backed them and encouraged them," during their eight-year war against Nicaragua's leftist Sandinista government.

"That is not the case of Costa Rica," he said emphatically at a joint press conference with Honduran president Rafael Callejas who was on a visit to San Jose.

Arias won the 1987 Nobel Peace prize for drawing up the regional peace accord paving the way for last month's Nicaraguan elections in which the Sandinistas were voted out of office.

He said that now the first priority for his country should be "persuading" the more than 200,000 Nicaraguans who have sought refuge in Costa Rica from their country's civil war to go home.

"Costa Ricans have been called on to make many sacrifices. The task now is to achieve peace, democracy and stability in Nicaragua so that the refugees can return. To bring in 12,000 Contras at this point would be just madness," he said.

"I am sure that if you ask (the Contras) themselves, they would prefer to go to Miami rather than anywhere else," Arias said, but added that he did not know if the U.S. government shared his views.

Referring to reports that some hard-liner Contra commanders have threatened not to respect the accord, Arias said, "This is not the first time the demobilization of the Contras has been agreed and still there is distance between the word and the deed.

"But now is the time for the Contras to demobilize. Left to itself, Central America will be able to prosper in peace and democracy after so many years of stagnation.

"That has been caused not only by the foreign debt burden, but also by the violence, the lack of confidence and faith in the future that is produced when machine guns have been rattling constantly for over ten years," Arias said.

#90086e0028 03/27/1990 ~Latin America New Agency

MADRID (MARCH 27) - Thousands of beggars are expected to converge from around the country on the Spanish capital this week for three days of protests against the Socialist government, organizers said Tuesday.

Members of 50 small pressure groups which have called the demonstration beginning Friday are expecting up to 10,000 beggars and thousands of other poor people who feel their needs have been overlooked by the 8-year-old Socialist government.

The organizers of the Madrid protest -- dubbed "1992: 500 Years of Begging" -- describe the government's social policies as, "a resounding failure...a disaster which differs little from the performance of the former (Franco) dictatorship"

A recent survey released by a Spanish charity organization estimated that up to 10 million Spaniards are living in poverty.

#90086e0029 03/27/1990 ~Latin America New Agency

HUELVA, SPAIN (MARCH 27) - Unidentified arsonists were blamed for a fire

Tuesday at Spain's famous Cota Donana nature reserve, where plans to build a mammoth hotel complex have set residents at odds with environmental activists.

The pre-dawn blaze in a storage shed destroyed four vehicles used to fight forest fires and caused damage estimated at dlrs 450,000, but was extinguished before it could spread to the adjoining park area.

Covering 76,000 hectares in southwestern Spain, the Coto Donana is one of Europe's largest remaining nature reserves and home to many endangered wildlife species such as the lynx, and golden eagle.

The wetland area on the left bank of the Guadalquivir river is also stopover point for 80 per cent of Europe's migratory birds.

Alfonso Garrrido, the central government's representative in the southern region of Andalusia, said he feared the conflict over a 2.2 square km resort complex set to be built along Atlantic beachfront just outside the protected zone "has led someone to go off his head".

On March 18, police intervened to prevent a violent clash between residents of the nearby towns and some 8,000 demonstrators who assembled outside the park to protest the mammoth development scheme.

Spanish and international ecological groups have claimed that if the planned resort with a capacity for 32,000 people is constructed it will syphon water from the underground table that maintains the marshland occupying most of the park's extension.

British television personality David Bellamy is among the international figures who have strongly protested the hotel construction plan, threatening to urge Britons to boycott Spain as a holiday destination if it is allowed to continue.

Already, they claim, semi-legal draining to irrigate nearby farmland has inflicted irreparable damage.

The promoters, however, counter that the hotel and resort development would create thousands of jobs for local people without harming the parkland.

A spokesman for the developers' consortium Tuesday denied any links to the unidentified arsonists who set the fire, which he described as "an act of savagery".

#90086e0033 03/27/1990 ~Latin America New Agency

BUENOS AIRES (MARCH 27) EFE - Argentine primary school teachers have voted to strike for two days this week, joining a walkout by high school teachers and university lecturers to press for wage rises, union officials said.

The teachers' union voted Monday night to stage the stoppage Wednesday and Thursday to back their demands for a monthly salary of dlrs 150 and a dlrs 40 bonus promised by the government in February.

Teachers' salaries are currently about dlrs 100 a month.

On Monday, secondary school teachers began a three-day strike, while lecturers in 23 state universities walked out with the announcement that they will strike until April 7.

The educators began strike action a month ago.

Education Minister Antonio Salonia has expressed support for the teachers' demands and said he would meet with government officials to try to expedite payment of the overdue bonus.

Labor unions have challenged President Carlos Menem's tough economic austerity measures introduced to curb hyperinflation and reduce public spending.

In the past two weeks unions have held demonstrations against the austerity plan and judicial workers have also called walkouts.

#90086e0036 03/27/1990 ~Latin America New Agency

LIMA (MARCH 27) - Peruvian leftist guerrillas have called an "armed strike" in the capital for Wednesday while a fresh wave of bombing attacks before next month's elections has left at least three people dead and several others injured.

Maoist "Shining Path" guerrillas Tuesday announced the armed strike, under which anyone who ignores the order faces possible attack, as part of its campaign to disrupt the April 8 general elections.

Two 48-hour armed strikes in the Andean cities of Ayacucho and Huanta earlier this month were widely heeded.

In a related development, at least three people were killed and several others were injured Monday when Shining Path rebels lobbed dynamite and blacked out the city of Ayacucho, 575 km southeast of Lima.

In the capital, suspected rebels bombed five offices of the Democratic

Front party, led by novelist-turned-politician Mario Vargas Llosa, who is tipped to win the presidential poll.

Offices of the ruling APRA party, banks and a cinema were also bombed and shops were looted.

Last week, President Alan Garcia decreed a state of emergency in Lima and its port city of Callao, and security forces have pledged to provide personal protection from Wednesday to all 10,000 congressional and 960 senate candidates.

Four candidates have been killed in recent days.

Shining Path last weekend said it would kill anyone involved in electoral campaigning in the Andean departments of Ayacucho and Huancavelica.

Some 300 people were killed during last November's municipal elections and hundreds of candidates resigned following death threats from Shining Path.

More than 700 people have been killed in political violence this year and some 19,000 since Shining Path took up arms in 1980.

#90086e0040 03/27/1990 ~Latin America New Agency

HAVANA (MARCH 27) - Cuba Tuesday blocked debut transmissions to the island from the U.S.-funded Television Marti station, which Havana claims violates the country's sovereignty and may be part of a plan for future U.S. armed aggression.

Broadcasting from TV Marti began at 0645 GMT and was jammed within ten minutes, Cuba's National Information Agency (AIN) reported.

U.S. authorities said the transmissions were blocked after 38 minutes and that the station shut down at 1145 GMT. Broadcasts will resume Wednesday and will continue for a three-month trial period, they added.

Following an initial test-card showing, the broadcasts included music videos, soap operas and sports programs.

Cuban Deputy Foreign Minister Oscar Oramas described the jamming as a success and said every measure necessary would be taken to prevent the country's sovereignty being violated.

He said the TV Marti dispute could swiftly turn into a crisis with "incalculable consequences" and warned that Washington may be "looking for a pretext for military aggression" against Cuba.

The launching of the station is the latest episode in decades of bitter relations between the United States and the Cuban government which took power under Fidel Castro in a 1959 revolution.

Washington has funded a radio station of the same name, broadcasting news and entertain programs in Spanish to the island, since 1985.

TV Marti is transmitted from Washington via an aerostatic balloon floating 3,000 meters above Cudjoe Key, Florida, just 150 km north of Cuba.

A U.S. Air Force spokesman said last Thursday that the station might also be used for spying purposes.

Cuba has protested the action before the United Nations and the International Telecommunications Union.

Havana has also been particularly irritated by the fact that the both the television and radio stations are named after the father of Cuban independence, Jose Marti.

Many U.S. officials, however, fear the launching of the station may start an electronic war between the two countries, which given the powerful transmitters Cuba possesses, could seriously affect commercial radios in the southeast of the United States.

An example of the power of these transmitters was the fact that a speech last week by Castro could be picked up on six frequencies in Florida, they said.

#90086h0134 03/27/1990 ~Chinese News Agency
WASHINGTON (MARCH 27) XINHUA - THE UNITED STATES AND MEXICO HAVE AGREED TO NEGOTIATE A BILATERAL FREE-TRADE TREATY, SIMILAR TO THE ONE THAT HAS CREATED THE U.S.-CANADA FREE-TRADE ZONE.

SENIOR OFFICIALS OF THE TWO COUNTRIES REPORTEDLY REACHED THE AGREEMENT AT THE END OF FEBRUARY IN PRIVATE MEETINGS.

THE ANNOUNCEMENT OF THE AGREEMENT IS SCHEDULED TO BE MADE IN JUNE, WHEN MEXICAN PRESIDENT CARLOS SALINAS VISITS WASHINGTON.

THE MOVE TO A U.S.-MEXICO FREE-TRADE ZONE WILL HAVE ENORMOUS IMPLICATIONS FOR BOTH COUNTRIES AS WELL AS FOR THE WORLD TRADE, AS IT WILL ACTUALLY

CREATE A UNIFIED NORTH AMERICAN MARKET.

PRESIDENT GEORGE BUSH HAS ADVOCATED A FREE-TRADE ZONE EMBRACING THE UNITED STATES, CANADA AND MEXICO SINCE 1988, WHEN HE WAS CAMPAIGNING FOR THE PRESIDENCY.

THE PLANNED FREE-TRADE PACE IS SEEN AS BENEFICIAL TO BOTH SIDES. MEXICO NEEDS U.S. EXPERTISE AND INVESTMENT, WHILE THE UNITED STATES WOULD BENEFIT FROM BETTER ACCESS TO MEXICO'S POOL OF CHEAP AND INCREASINGLY SKILLED LABOR.

HOWEVER, NEGOTIATING A TREATY, WHICH INVOLVES LOTS OF TECHNICAL ISSUES, IS EXPECTED TO TAKE WELL OVER A YEAR.

MEXICO IS THE FOURTH MOST IMPORTANT TRADING PARTNER FOR THE UNITED STATES AFTER CANADA, THE EUROPEAN COMMUNITY AND JAPAN. IN 1989, U.S. EXPORTS TO MEXICO TOTALED 24.97 BILLION DOLLARS WHILE THE U.S. IMPORTS FROM MEXICO ROSE 17 PERCENT TO 27.19 BILLION DOLLARS.

THE UNITED STATES EXPORTS MANUFACTURED PRODUCTS, CAPITAL GOODS AND AGRICULTURAL PRODUCE TO MEXICO, WHICH IN TURN SELLS OIL, PETROLUEM PRODUCTS, TEXTILES AND VARIOUS MANUFACTURED AND HOUSEHOLD GOODS TO THE UNITED STATES.

#90086h0139 03/27/1990 ~Chinese News Agency

WINDHOEK (MARCH 27) XINHUA - NAMIBIA WILL GET MORE ECONOMIC AID FROM ABROAD UNDER THREE AGREEMENTS SIGNED RECENTLY WITH SWEDEN, THE UNITED NATIONS DEVELOPMENT PROGRAM (UNDP) AND THE BRITISH MULTI-NATIONAL LONHRO GROUP.

UNDER AN AGREEMENT SIGNED WITH SWEDEN HERE YESTERDAY, THE SWEDISH GOVERNMENT WILL PROVIDE 10 MILLION RAND (ABOUT FOUR MILLION U.S. DOLLARS) FOR NAMIBIA TO HELP FINANCE THE COUNTRY'S EDUCATION.

THE SWEDISH ASSISTANCE FOR NAMIBIA WILL BE EXPECTED TO REACH 40 MILLION RAND (ABOUT 15.4 MILLION DOLLARS) DURING THE FISCAL YEAR 1990-1991, LOCAL PRESS REPORTED TODAY.

EARLIER, THE NAMIBIAN GOVERNMENT AND THE UNDP SIGNED AN AGREEMENT, UNDER WHICH THE UNDP WILL ASSIST THE NEWLY-INDEPENDENT COUNTRY IN VARIOUS FIELDS.

UNDER ANOTHER AGREEMENT, LONHRO WILL GIVE NAMIBIA 150 MILLION DOLLARS IN AID TO HELP THE COUNTRY SET UP A SUGAR PLANTATION AND A REFINERY.

THE REFINERY WILL PRODUCE 60,000 TONS OF REFINED SUGAR ANNUALLY AT ITS INITIAL STAGE AFTER COMPLETION AND 100,000 TONS IN ABOUT FIVE YEARS.

THE EUROPEAN ECONOMIC COMMUNITY AND SEVERAL WESTERN COUNTRIES HAVE PROMISED ECONOMIC AID FOR NAMIBIA AFTER IT DECLARED INDE- PENDENCE FROM SOUTH AFRICA LAST WEEK.

-30- 1351

#90086k0021 03/27/1990 ~Japanese News Agency

TOKYO (MARCH 27) KYODO - THE MOST RECENT PACKAGE OF ECONOMIC INDICATORS SUGGESTS THAT JAPAN'S ECONOMY IS CONTINUING ON AN EXPANSIONARY TRACK DESPITE ANOTHER DROP BELOW THE 50 PERCENT MARK IN THE LEADING INDICATOR, THE ECONOMIC PLANNING AGENCY SAID TUESDAY.

ALTHOUGH THE AGENCY'S LEADING INDICATOR, WHICH STOOD AT 45.0 PERCENT FOR JANUARY, THE LATEST REPORTING MONTH, FELL BELOW THE ''BOOM-OR-BUST'' LINE OF 50.0 PERCENT, IT WAS A SLIGHT IMPROVEMENT FROM THE REVISED FIGURE OF 38.5 PERCENT RECORDED FOR BOTH NOVEMBER AND DECEMBER.

THE LEADING INDICATOR, CONSISTING OF 13 COMPONENTS, INCLUDING NEW MACHINERY ORDERS, MONEY SUPPLY AND HOUSING STARTS FORECASTS NEAR-TERM ECONOMIC TRENDS.

AN EPA OFFICIAL ATTRIBUTED THE POOR SHOWING IN JANUARY TO RISING INVENTORIES IN A NUMBER OF INDUSTRIES, PARTICULARLY IN THE ELECTRICAL, PAPER/PULP, AND TEXTILE INDUSTRIES.

''THERE'S A GOOD CHANCE THAT THE LEADING INDEX WILL TOP THE 50 PERCENT MARK ONCE DEMAND PICKS UP AND LOWERS THOSE INVENTORIES,'' HE SAID.

HOWEVER, HE SAID THE DROP BELOW THE 50 PERCENT LINE FOR THE THIRD STRAIGHT MONTH WAS AN INDICATION THAT IT WAS A VERY CRITICAL TIME, ADDING THAT HIGHER INTEREST RATES COULD DRAG THE ECONOMY DOWN.

''HIGHER INTEREST RATES COULD HAMSTRING INVESTMENT, THUS REDUCING THE NUMBER OF HOUSING STARTS AND OTHER FORMS OF INVESTMENT,'' HE SAID.

THE 11-ITEM COINCIDENT INDEX, WHICH REFLECTS THE CURRENT STATE OF THE ECONOMY, FELL TO 50.0 PERCENT FROM THE PREVIOUS MONTH'S 63.6 PERCENT, REMAINING AT OR ABOVE THE 50 PERCENT LINE FOR THE SECOND STRAIGHT MONTH.

THE EPA OFFICIAL SAID THAT THERE WAS NO NEED FOR CONCERN REGARDING THE THREE-MONTH DECLINE IN THE LEADING INDEX SINCE THE COINCIDENT INDEX, WHICH REFLECTS THE CURRENT STATE OF THE ECONOMY IS STRONG.

''SINCE THE LEADING INDICATOR MIRRORS ECONOMIC TRENDS ABOUT SIX MONTHS AHEAD, A THREE-MONTH DECLINE IN THE INDEX IS NO CAUSE FOR ALARM UNLESS IT IS FOLLOWED BY A DROP BELOW THE 50 PERCENT MARK IN THE COINCIDENT INDEX FOR THE UPCOMING MONTHS OF APRIL AND MAY,'' HE SAID.

THE COINCIDENT INDICATOR INCLUDES AN INDEX MEASURING THE RATE OF CAPACITY UTILIZATION, SALES AT DEPARTMENT STORES, AND MINING AND INDUSTRIAL PRODUCTION.

THE EIGHT-COMPONENT LAGGING INDEX WHICH MEASURES THE ECONOMIC TREND IN SEVERAL MONTHS IMMEDIATELY PAST, WAS DOWN TO 85.7 PERCENT, LITTLE CHANGED FROM 87.5 PERCENT IN DECEMBER, SURPASSING THE 50.0 MARK FOR THE FOURTH CONSECUTIVE MONTH.

BANGKOK (MARCH 27) KYODO - THAI FOREIGN MINISTER SIDDHI SAVETSILA WILL ''EXPLORE'' DURING HIS VISIT TO BEIJING, HE TOLD REPORTERS TUESDAY BEFORE LEAVING FOR AN EIGHT-DAY OFFICIAL VISIT TO CHINA.

SIDDHI SAID HE WILL MEET CHINESE PREMIER, LI PENG FOREIGN MINISTER QIAN QICHEN, AND CHINESE COMMUNIST PARTY GENERAL SECRETARY JIANG ZEMIN DURING HIS VISIT.

THE LATEST DEVELOPMENTS IN CAMBODIA WILL BE HIGH ON THE AGENDA, HE SAID. SIDDHI SAID HE WILL PROPOSE BANGKOK AS A VENUE FOR TALKS AMONG CHINA, VIETNAM, AND THAILAND, OR ALL SIX COUNTRIES OF THE ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN) AND THE RIVAL CAMBODIAN FACTIONS, IN A BID TO SOLVE THE 11-YEAR-OLD CAMBODIAN CONFLICT.

THE IDEA FOR A BANGKOK MEETING WAS FIRST PROPOSED TO THAILAND BY CAMBODIAN RESISTANCE LEADER PRINCE NORODOM SIHANOUK EARLY THIS MONTH.

SIHANOUK SAID THAILAND HOLDS THE KEY TO CAMBODIAN PEACE, SINCE IT CAN EXERT A CERTAIN AMOUNT OF INFLUENCE ON THE RIVAL CAMBODIAN FACTIONS.

VIETNAMESE FOEIGN MINISTER NGUYEN CO THACH REPEATED THE SAME PROPOSAL MONDAY THROUGH THAI ARMY COMMANDER GEN. CHAVALIT YONGCHAIYUTH WHO VISITED HANOI FOR A DAY.

THAI PRIME MINISTER CHATICHAI CHOONHAVAN, ASKED HIS OPINION ON THE PROPOSAL, SAID HE NEEDS TIME TO CONSIDER IT.

#90086k0028 03/27/1990 ~Japanese News Agency

TOKYO (MARCH 27) KYODO - THE DEFENSE AGENCY WILL REQUEST A 1 BILLION YEN BUDGET IN ORDER TO ALLOW THE MARITIME SELF-DEFENSE FORCE (MSDF) TO TAKE PART IN RIM OF PACIFIC (RIMPAC) NAVAL EXERCISE, AGENCY CHIEF YOZO ISHIKAWA SAID TUESDAY.

THE DEFENSE AGENCY REQUEST, TO BE INCLUDED IN A FISCAL 1990 PROVISIONAL GOVERNMENT BUDGET, IS EXPECTED TO BE APPROVED BY A CABINET MEETING WEDNESDAY.

ISHIKAWA ALSO SAID THE MSDF WILL SEND 10 DESTROYER-CLASS WARSHIPS AND EIGHT ANTISUBMARINE P3C AIRCRAFT TO JOIN THE BIENNUAL MULTILATERAL EXERCISE TO BE STAGED IN THE EASTERN PACIFIC BETWEEN APRIL 2 AND MAY 21.

THE UNITED STATES, CANADA, AUSTRALIA, JAPAN, AND SOUTH KOREA WILL TAKE PART IN RIMPAC 90, TO BE HELD IN THE PACIFIC WATERS EXTENDING FROM SOUTHERN CALIFORNIA TO HAWAII.

IT WILL BE THE FIRST TIME THE SOUTH KOREAN NAVY WILL JOIN RIMPAC EXERCISES WHICH STARTED IN 1972.

ISHIKAWA SAID THE MSDF'S PARTICIPATION WILL NOT VIOLATE JAPANESE CONSTITUTIONAL PROVISIONS AGAINST EXERCISING THE RIGHT OF COLLECTIVE SELF-DEFENSE BECAUSE THE MSDF WILL STAGE THE JOINT EXERCISE ONLY WITH THE U.S. NAVY.

#90086k0034 03/27/1990 ~Japanese News Agency

TOKYO (MARCH 27) KYODO - TOSHIBA CORP. SAID TUESDAY IT HAS BEGUN MARKETING THE WORLD'S FIRST FOUR-MEGABIT ERASABLE PROGRAMMABLE READ-ONLY MEMORY (EPROM) CHIPS THAT ARE COMPATIBLE WITH CONVENTIONAL FOUR-MEGABIT MASK READ-ONLY MEMORIES (ROMS).

THE COMPANY SAID IT WILL BEGIN SHIPPING THE CHIPS IN APRIL. THE NEW MEMORY DEVICE CAN STORE UP TO 16 PAGES OF STANDARD NEWSPAPER TEXT.

AN EPROM IS A NON-VOLATILE MEMORY DEVICE WITH WHICH USERS CAN READILY ERASE AND REWRITE INFORMATION. THE CONTENTS OF A MASK ROM CANNOT BE CHANGED. THE DEVICE IS USED IN COMPUTERS, WORD PROCESSORS, VIDEO GAMES AND PRINTERS TO STORE DATA OR PROGRAMS.

AN EPROM IS ALSO IDEAL FOR PRODUCTS UNDER DEVELOPMENT AND APPROACHING A MASS PRODUCTION STAGE SINCE THEY ENABLE REWRITING AND CORRECTING OF LOADED PROGRAMS OR DATA. AFTERWARD AN EPROM CAN BE REPLACED WITH A MORE COST-EFFECTIVE AND LARGE-MEMORY-CAPACITY MASK ROM.

UNTIL NOW, DEVELOPERS HAVE HAD TO USE FOUR ONE-MEGABIT EPROMS AT THE FIRST STAGE OF DEVELOPMENT AND THEN REDESIGN THE PRINTED CIRCUIT BOARDS TO REPLACE THEM WITH A FOUR-MEGABIT MASK ROM.

BUT TOSHIBA'S BREAKTHROUGH WILL ENABLE DEVELOPERS TO REPLACE EPROMS WITH THE FOUR-MEGABIT MASK ROMS WITHOUT CHANGING DESIGN, SHORTENING DEVELOPMENT TIME AND INCREASING EFFICIENCY, THE COMPANY SAID.

TOSHIBA SAID IT WILL INTRODUCE TWO VERSIONS OF THE CHIP. ONE WITH AN ACCESS TIME OF 120 NANOSECONDS WILL COST 140 DOLLARS, WHILE THE 150-NANOSECOND CHIP WILL BE PRICED AT 110 DOLLARS. A NANOSECOND IS ONE-BILLIONTH OF A SECOND.

TOSHIBA RESEARCHERS ACHIEVED THE FAST 120-NANOSECOND ACCESS SPEED BY DEVELOPING A NEW MEMORY CELL LAYOUT, THE COMPANY SAID.

TOSHIBA SAID IT PLANS TO INTRODUCE A FOUR-MEGABIT EPROM WITH AN ACCESS TIME OF 100 NANOSECONDS SOMETIME THIS SUMMER.

#90086k0071 03/27/1990 ~Japanese News Agency

TOKYO (MARCH 27) KYODO - THE POSTS AND TELECOMMUNICATIONS MINISTRY SAID TUESDAY VICE MINISTER MINORU SHIOYA WILL VISIT WASHINGTON FROM WEDNESDAY TO DISCUSS THE BILATERAL TRADE FRICTION OVER JAPAN'S TELECOMMUNICATIONS MARKET.

DURING A FIVE-DAY STAY IN WASHINGTON, SHIOYA WILL MEET OFFICIALS OF THE U.S. TRADE REPRESENTATIVE (USTR) AND THE COMMERCE DEPARTMENT. THE SCHEDULE HAS YET TO BE DETAILED.

THE HASTILY ARRANGED TRIP IS APPARENTLY AIMED AT BREAKING THE DEADLOCK IN WORKING-LEVEL TALKS ABOUT JAPAN'S TELECOMMUNICATIONS MARKET, WHICH BEGAN IN WASHINGTON MONDAY.

THE U.S. CALLS ON JAPAN TO ALLOW WIDER FOREIGN ACCESS TO JAPAN'S DIGITAL SERVICE UNIT (DSU) MARKET, WHICH IS NOW PRACTICALLY DOMINATED BY NIPPON TELEGRAPH AND TELEPHONE CORP. (NTT).

IF THE TALKS FALL, THERE IS A POSSIBILITY THAT THE U.S. ADMINISTRATION

WILL ADD TELECOMMUNICATIONS TO A LIST OF THREE TRADE AREAS -- SUPERCOMPUTER, WOOD PRODUCTS, AND SATELLITES UNDER THE SO-CALLED ''SUPER 301'' PROVISION OF THE 1988 TRADE ACT.

THE PROVISION REQUIRES JAPAN TO OPEN UP THE THREE MARKETS SATISFACTORILLY BY JUNE 16 OR FACE POSSIBLE PUNITIVE TARIFFS OF UP TO 100 PERCENT ON SOME OF ITS EXPORTS TO THE U.S.

#90086k0072 03/27/1990 ~Japanese News Agency

BANGKOK (MARCH 27) KYODO - THAI ARMY COMMANDER IN CHIEF GEN. CHAVALIT YONGCHAIYUTH SAID TUESDAY HE HAD SUBMITTED A RESIGNATION LETTER TO PRIME MINISTER CHATICHAI CHOONHAVAN, WHO IS ALSO DEFENSE MINISTER.

HIS ANNOUNCEMENT CAME AS NO SURPRISE TO THE PUBLIC SINCE HE HAD DECLARED LONG AGO AN INTENTION TO RETIRE FROM THE MILITARY SERVICE EARLIER THAN THE OFFICIAL RETIREMENT AGE OF 60 IN ORDER TO MAKE WAY FOR HIS YOUNGER SUBORDINATES TO MOVE UP THE POWERFUL MILITARY HIERARCHY IN THAILAND.

CHAVALIT, WHO WILL BE 58 IN MID-MAY, HAS BEEN THE ARMY CHIEF SINCE 1986. CHAVALIT SAID ON TUESDAY HIS RESIGNATION WILL NOT BE EFFECTIVE UNTIL THE DEFENSE MINISTER APPROVES IT.

BUT ARMY SOURCES CONFIRMED THAT A SCHEDULE FOR CHAVALIT TO TRANSFER HIS JOB TO HIS LIKELY SUCCESSOR, GEN. SUCHINDA KRAPRAYOON, HAS ALREADY BEEN FIXED FOR THURSDAY.

PRIME MINISTER CHATICHAI HAS BEEN OPENLY INVITING CHAVALIT TO JOIN HIS CABINET SINCE LAST YEAR. THE TWO WERE WIDELY REPORTED BY LOCAL MEDIA TO HAVE TALKED ABOUT THE ARRANGEMENT SEVERAL TIMES SINCE THE BEGINNING OF THE YEAR.

CHAVALIT IS HIGHLY CREDITED AS THE MASTERMIND BEHIND THAILAND'S SUCCESSFUL MEASURES TO WIPE OUT THE NATION'S COMMUNIST PARTY.

HE CONTINUES TO BE AN IMPORTANT PLAYER IN SHAPING THAILAND'S POLICY REGARDING THE CAMBODIAN CONFLICT.

IT IS LIKELY THAT CHAVALIT, AFTER A BRIEF PERIOD OF REST, WILL JOIN THE CHATICHAI GOVERNMENT AS DEPUTY PRIME MINISTER OR DEFENSE MINISTER, POLITICAL SOURCES SAID.

THE THAI CONSTITUTION PERMITS A NON-MEMBER OF PARLIAMENT TO TAKE UP CABINET POST.

HOWEVER, SOME STUDENT ACTIVISTS WANT TO BLOCK CHAVALIT'S ENTRY INTO POLITICS WITHOUT FIRST PASSING THROUGH THE ELECTORAL SYSTEM.

TOKYO (MARCH 27) KYODO - JAPAN AND THE UNITED STATES ON TUESDAY IMPLEMENTED AN AGREEMENT FOR THE LICENSED PRODUCTION IN JAPAN OF U.S.-DEVELOPED AIM-7M SPARROW MISSILE SYSTEMS, FOREIGN MINISTRY OFFICIALS SAID TUESDAY.

FOREIGN MINISTER TARO NAKAYAMA AND U.S. AMBASSADOR MICHAEL ARMACOST EXCHANGED DIPLOMATIC NOTES ON THE AGREEMENT AT THE FOREIGN MINISTRY EARLIER IN THE DAY.

THE MEDIUM-RANGE, ALL-WEATHER, AIR-TO-AIR SPARROW MISSILE, UTILIZED BY U.S. FORCES SINCE 1982, IS TO BE EQUIPPED ON JAPAN'S FLEET OF F-15 FIGHTERS, SUPPLANTING OR REPLACING THE OLDER AIM-7F MODEL, OFFICIALS SAID.

OFFICIALS SAID THE NUMBER OF MISSILES TO BE PRODUCED BY MITSUBISHI ELECTRIC CORP. UNDER LICENSE FROM THE U.S. CONTRACTOR, RAYTHEON CO., IS CONFIDENTIAL, BUT NOTED THAT JAPAN HAS BEEN LICENSED BY THE U.S. TO PRODUCE UP TO 187 F-15 FIGHTERS.

TOKYO (MARCH 27) KYODO - JAPAN WILL SETTLE ITS SATELLITE PROCUREMENT ISSUE WITH THE UNITED STATES WITHIN A FEW DAYS, FULLY ACCEPTING THE U.S. PROPOSAL, GOVERNMENT SOURCES SAID TUESDAY.

THE SOURCES SAID A TEAM OF THREE JAPANESE OFFICIALS, INCLUDING SADAYUKI HAYASHI, HEAD OF THE FOREIGN MINISTRY ECONOMIC AFFAIRS BUREAU, WOULD LEAVE WEDNESDAY FOR TALKS IN WASHINGTON WITH LYNN R. WILLIAMS, U.S. DEPUTY TRADE REPRESENTATIVE, TO PRESENT JAPAN'S FINAL COMPROMISE PROPOSAL.

THE JAPANESE PROPOSAL URGES THAT SATELLITES TO BE DEVELOPED BY THE JAPANESE GOVERNMENT BE LIMITED TO PURELY RESEARCH AND DEVELOPMENT TYPES, THEY SAID.

THE SOURCES SAID THE JAPANESE GOVERNMENT HAS GIVEN UP ITS PLAN TO DEVELOP THE NEXT-PHASE COMMUNICATIONS SATELLITE, CODE-NAMED CS4, WHICH IS CONSIDERED TO HAVE PRACTICAL APPLICATIONS.

THE CS4 PROJECT WILL BE INTEGRATED INTO AN EXPERIMENTAL DATA-RELAY AND TRACKING SATELLITE (EDRTS) PROJECT, THE SOURCES SAID. UNDER THE PLAN, THE EDRTS SATELLITE IS SCHEDULED FOR LAUNCHING IN FISCAL 1995.

TOKYO (MARCH 27) KYODO - JAPANESE AND UNITED STATES DISARMAMENT OFFICIALS ON TUESDAY SHARED THE VIEW THAT THE SECURITY SITUATION IN EUROPE BY NO MEANS CORRESPONDS TO THAT IN THE ASIA-PACIFIC REGION, JAPANESE FOREIGN MINISTRY OFFICIALS SAID.

THE OFFICIALS WERE BRIEFING REPORTERS ON THE OUTCOME OF A TWO-DAY BILATERAL MEETING IN TOKYO ON ARMS CONTROL AND DISARMAMENT, THE FOURTH OF ITS KIND.

THE U.S. DELEGATION WAS HEADED BY RONALD LEHMAN, DIRECTOR OF THE ARMS CONTROL AND DISARMAMENT AGENCY, WHILE HIS JAPANESE COUNTERPART WAS NOBUTOSHI AKAO, DIRECTOR GENERAL OF THE FOREIGN MINISTRY'S UNITED NATIONS BUREAU.

OFFICIALS SAID THE DISTINCTION BETWEEN SECURITY CONDITIONS IN THE ASIA-PACIFIC REGION AND EUROPE WAS EXPRESSED BY BOTH SIDES DURING THE TALKS AS WELL AS IN A MEETING AT THE DIET BETWEEN LEHMAN AND FOREIGN MINISTER TARO NAKAYAMA.

NAKAYAMA WAS QUOTED AS TELLING LEHMAN THAT BEFORE ARMS CONTROL AND DISARMAMENT NEGOTIATIONS SUCH AS THOSE IN EUROPE CAN OCCUR IN THE ASIA-PACIFIC REGION, THERE IS A NEED FOR ''POLITICAL SOLUTIONS'' TO CERTAIN OUTSTANDING PROBLEMS.

OFFICIALS SAID NAKAYAMA WAS REFERRING TO THE KOREAN PENINSULA AND THE CAMBODIAN CONFLICT, AS WELL AS TO THE JAPAN-SOVIET TERRITORIAL DISPUTE OVER FOUR ISLANDS SEIZED BY THE SOVIETS AT THE END OF WORLD WAR II.

LEHMAN REPORTEDLY AGREED WITH NAKAYAMA AND CONVEYED U.S. SUPPORT FOR JAPAN'S CLAIMS TO THE SO-CALLED ''NORTHERN TERRITORIES'' UNDER CONTINUED SOVIET OCCUPATION.

THE TWO SIDES RECONFIRMED THEIR ADAMANT OPPOSITION TO SOVIET PROPOSALS FOR NAVAL REDUCTIONS IN THE ASIA-PACIFIC REGION AND AGREED ON THE STRATEGIC IMPORTANCE OF MAINTAINING CURRENT DEPLOYMENTS.

LEHMAN INFORMED HIS JAPANESE DIALOGUE PARTNERS THAT THE U.S. AND THE SOVIET UNION ARE LIKELY TO INK A SERIES OF ARMS CONTROL AND DISARMAMENT ACCORDS BEFORE THE U.S.-SOVIET SUMMIT MEETING SCHEDULED FOR JUNE, OFFICIALS SAID.

BEIJING (MARCH 27) KYODO - CHINESE PREMIER LI PENG WILL SOON PAY AN OFFICIAL VISIT TO THE SOVIET UNION UPON INVITATION, THE OFFICIAL XINHUA NEWS AGENCY REPORTED TUESDAY.

LI MADE THE ANNOUNCEMENT HIMSELF DURING A MEETING WITH A SOVIET DELEGATION OF JOURNALISTS, XINHUA SAID.

''WITH MY VISIT, I HOPE TO FURTHER PROMOTE THE DEVELOPMENT OF SINO-SOVIET RELATIONS IN ALL FIELDS,'' LI WAS QUOTED AS SAYING.

LI TOLD THE SOVIET DELEGATION THAT HE HOPES TO ''EXCHANGE VIEWS WITH SOVIET LEADERS ON SINO-SOVIET RELATIONS AND INTERNATIONAL ISSUES OF COMMON CONCERN.''

XINHUA DID NOT GIVE AN EXACT DATE FOR LI'S VISIT TO THE SOVIET UNION.

NAGOYA (MARCH 27) KYODO - TOYOTA MOTOR CORP. ANNOUNCED TUESDAY IT PLANS ENTER AN AUTO PRODUCTION JOINT VENTURE IN TURKEY LATER THIS YEAR WITH JAPAN'S MITSUI CORP. AND HACI OMER SABANCI HOLDING A.S. OF TURKEY.

TOYOTA OFFICIALS SAID THE COMPANY HAS APPLIED TO THE TURKISH GOVERNMENT FOR APPROVAL OF THE PLANNED PARTNERSHIP.

THE NEW COMPANY, WHOSE NAME HAS YET TO BE DECIDED, IS EXPECTED TO TURN OUT 20,000 PASSENGER CARS WITH AN ENGINE SIZE AROUND 1,600 CC BEGINNING IN 1993. ANNUAL PRODUCTION IS EXPECTED TO BE INCREASED LATER TO AROUND 100,000 VEHICLES.

THE JOINT VENTURE, CAPITALIZED AT 150 MILLION DOLLARS, WILL BE OWNED 50 PERCENT BY THE TURKISH FIRM, A HOLDING COMPANY OF THE SABANCI GROUP. FORTH PERCENT WILL BE PUT UP BY TOYOTA AND THE REMAINING 10 PERCENT BY MITSUI.

AN INITIAL INVESTMENT BY THE JOINT FIRM IS EXPECTED TO TOTAL 250 MILLION DOLLARS, TOYOTA OFFICIALS SAID.

THE PROJECT CAME AT THE REQUEST OF THE TURKISH GOVERNMENT, WHICH BELIEVES THAT THE COUNTRY'S EVER-GROWING AUTO MARKET NECESSITATES NEW ENTRIES BY FOREIGN MAKERS.

ANNUAL AUTO SALES IN THE NATION ARE PROJECTED TO GROW TO AROUND 280,000 VEHICLES BY 1994 FROM THE CURRENT 150,000 VEHICLES.

TOYOTA HAS FOUND THE ADVANCE FAVORABLE IN VIEW OF THE HEFTY 30 PERCENT TARIFFS NOW BEING LEVIED ON IMPORTED CARS IN TURKEY.

OTHER JAPANESE COMPANIES LIKE MITSUBISHI MOTORS CORP. AND EUROPEAN MAKERS SUCH AS RENAULT OF FRANCE AND FIAT OF ITALY HAVE ALREADY BEGUN PRODUCTION

THERE.

TOKYO (MARCH 27) KYODO - SUMITOMO METAL INDUSTRIES LTD. SAID TUESDAY IT WILL FORM A JOINT VENTURE IN THAILAND EARLY NEXT MONTH WITH A LOCAL FIRM TO PROCESS AND MARKET ELECTROMAGNETIC STEEL PLATES THERE.

THE NEW COMPANY, CALLED THAI SUMILOX CO., WILL BE A SPINOFF OF THE ELECTROMAGNETIC STEEL PROCESSING DIVISION AT THAI STEEL SERVICE CENTER (TSSC), THE PARTNER OF THE TIE-UP.

THE 74 MILLION BAHT ALLIANCE WILL BE OWNED 40 PERCENT BY THE SAMUTPRAKARN-BASED COMPANY, 32 PERCENT BY SUMITOMO METAL. THE REMAINING 28 PERCENT STAKE WILL GO TO OTHER CONCERNS.

THE NEW COMPANY WILL BEGIN OPERATION IN DECEMBER, WITH MONTHLY PROCESSING VOLUME ESTIMATED AT 17 MILLION TONS. MOST PRODUCTS WILL BE SUPPLIED TO JAPANESE ELECTRIC MAKERS NOW OPERATING IN THAILAND.

TOKYO (MARCH 27) KYODO - JAPAN WELCOMES THE ESTABLISHMENT OF DIPLOMATIC TIES BETWEEN MONGOLIA AND SOUTH KOREA AS ANNOUNCED ON MONDAY, A JAPANESE FOREIGN MINISTRY SPOKESMAN SAID TUESDAY.

SPOKESMAN TAIZO WATANABE ISSUSED A STATEMENT AND SAID THIS WILL CONTRIBUTE TO THE PEACE AND STABILITY OF THE ASIA-PACIFIC REGION.

JAPAN HOPES FOR FURTHER PROGRESS IN INTER-STATE RELATIONSHIPS IN EAST ASIA HE SAID.

SOUTH KOREA AND MONGOLIA ON MONDAY ESTABLISHED AMBASSADOR-LEVEL DIPLOMATIC TIES IN A SIGNING CEREMONY IN MONGOLIA. MONGOLIA WAS THE FIRST ASIAN SOCIALIST STATE TO HAVE SUCH TIES WITH SOUTH KOREA.

MOSCOW (MARCH 27) KYODO - THE SOVIET GOVERNMENT URGED FOREIGNERS TUESDAY TO LEAVE LITHUANIA, WHICH HAS DECLARED ITS INDEPENDENCE.

''FOREIGN CITIZENS ARE ASKED TO LEAVE LITHUANIA AND TO TEMPORARILY REFRAIN FROM ENTERING IT,'' A SOVIET FOREIGN MINISTRY SPOKESMAN SAID IN A BRIEFING.

SPOKESMAN YURI GREMITSKIKH SAID, ''THIS ALSO REFERS TO FOREIGN DIPLOMATS,

COMMERCIAL REPRESENTATIVES, AND JOURNALISTS.''

MOSCOW-ACCREDITED FOREIGN CORRESPONDENTS NOW IN LITHUANIA SHOULD LEAVE LITHUANIA WHEN THEIR PERMISSION EXPIRES, GREMITSKIKH SAID, ADDING THAT THE MEASURE IS ''TEMPORARY.''

TOKYO (MARCH 27) KYODO - JAPAN ON TUESDAY COMMITTED 1 MILLION DOLLARS TO SET UP A SPECIAL FUND IN THE UNITED NATION INTERNATIONAL DEVELOPMENT ORGANIZATION (UNIDO) FOR TECHNOLOGICAL COOPERATION FOR POLAND AND HUNGARY, FOREIGN MINISTRY OFFICIALS SAID TUESDAY.

OFFICIALS SAID NOTES TO THAT EFFECT WERE EXCHANGED IN VIENNA ON TUESDAY BETWEEN REPRESENTATIVES OF THE JAPANESE GOVERNMENT AND UNIDO.

JAPAN'S CONTRIBUTION TO UNIDO COMES AS PART OF THE 25 MILLION DOLLARS IN TECHNOLOGICAL COOPERATION WHICH PRIME MINISTER TOSHIKI KAIFU PLEDGED TO THE TWO EAST EUROPEAN COUNTRIES IN HIS BERLIN SPEECH LAST JANUARY.

OFFICIALS SAID THE FUND WILL BE USED FOR SUCH PURPOSES AS THE DISPATCH OF SPECIALISTS IN QUALITY CONTROL AND OTHER AREAS OF TECHNICAL EXPERTISE WHICH ARE URGENTLY REQUIRED BY POLAND AND HUNGARY AS THEY REFORM THEIR ECONOMIES ALONG MARKET-ORIENTED LINES.

OTHER PORTIONS OF KAIFU'S 25 MILLION DOLLAR PACKAGE HAVE BEEN ALLOCATED TO THE DISPATCH OF PROJECT IDENTIFICATION TEAMS AND MANAGEMENT SPECIALISTS, AS WELL AS THE INVITATION OF HUNGARIAN AND POLISH GOVERNMENT AND BUSINESS OFFICIALS TO ATTEND SEMINARS IN JAPAN.

TOKYO (MARCH 27) KYODO - SHIGERU KOBAYASHI, PRESIDENT OF SHUWA CO., WHOSE MASSIVE PURCHASES OF MEDIUM-SIZE SUPERMARKET CHAIN'S STOCKS SENT RIPPLES THROUGH THE INDUSTRY LAST YEAR, HAS PROPOSED A MERGER BETWEEN TWO MEDIUM-SIZE SUPERMARKET CHAIN OPERATORS, CHUJITSUYA CO. AND MARUETSU INC., RELIABLE SOURCES SAID TUESDAY.

THE SOURCES SAID KOBAYASHI MADE THE PROPOSAL TO YOSHITOMO TAKAGI, PRESIDENT OF CHUJITSUYA, AT THEIR MEETING EARLIER THIS MONTH.

TAKAGI REPLIED HE WOULD STUDY THE PROPOSAL, THE SOURCES SAID. THEY SAID YATARO TAKAHASHI, PRESIDENT OF MARUETSU, A MEMBER OF THE GROUP OF DAIEI INC., THE NATION'S LARGEST SUPERMARKET CHAIN OPERATOR, IS CONSIDERED TO BE ACTIVELY SUPPORTING THE PROPOSAL.

SHUWA IS THE LARGEST SHAREHOLDER OF CHUJITSUYA, HOLDING A THIRD OF THE COMPANY'S ISSUED STOCK.

TOKYO (MARCH 27) KYODO - AN EXHIBITION FEATURING JAPAN WILL BE HELD IN BRITAIN FROM SEPTEMBER TO DECEMBER IN 1991, IT WAS ANNOUNCED SIMULTANEOUSLY IN TOKYO AND LONDON TUESDAY.

GOVERNMENT SOURCES SAID JAPANESE CROWN PRINCE NARUHITO AND BRITAIN'S PRINCE CHARLES ARE TO BE INSTALLED AS HONORARY PRESIDENTS OF THE JAPAN FESTIVAL 1991.

IT WILL BE THE FIRST TIME PRINCE NARUHITO WILL ASSUME SUCH A TITLE FOR AN EVENT TO BE HELD ABROAD.

THE PLAN TO HOLD THE FESTIVAL WAS PROPOSED BY BRITAIN TO CELEBRATE THE CENTENNIAL ANNIVERSARY OF THE JAPAN SOCIETY IN LONDON.

THE FESTIVAL, WHICH IS DESIGNED TO DEEPEN MUTUAL UNDERSTANDING BETWEEN THE TWO NATIONS, WILL CENTER ON AN EXHIBITON TO INTRODUCE MODERN JAPAN AT THE VICTORIA AND ALBERT MUSEUM IN LONDON.

ACCORDING TO JAPAN'S IMPERIAL HOUSEHOLD AGENCY, THE FESTIVAL ALSO WILL INCLUDE ABOUT 40 EVENTS TO BE HELD IN VARIOUS PARTS OF THE COUNTRY TO SHOW JAPANESE-STYLE GARDENS, TRADITIONAL PERFORMING ARTS OF KABUKI AND KYOGEN, MODERN DRAMAS, AND CLASICAL MUSIC CONCERTS.

SUMO WRESTLING, ONE OF JAPAN'S TRADITIONAL SPORTS, IS ALSO EXPECTED TO BE PERFORMED DURING THE EXHIBITION.

TOKYO (MARCH 27) KYODO - JAPAN'S TOP POLITICAL LEADERS WENT INTO HUDDLES TUESDAY TO PUT THE FINAL TOUCHES ON JAPAN'S RESPONSE TO U.S. DEMANDS FOR REMOVING STRUCTURAL IMPEDIMENTS TO TRADE AND INVESTMENT.

PRIME MINISTER TOSHIKI KAIFU CALLED IN FINANCE MINISTER RYUTARO HASHIMOTO LATE IN THE EVENING TO DISCUSS HOW TO RESPOND TO WASHINGTON'S CALL FOR A MAJOR BOOST IN JAPAN'S PUBLIC WORKS SPENDING, OFFICIALS SAID.

THE OUTCOME OF THE MEETING BETWEEN KAIFU AND HASHIMOTO HAS NOT BEEN DISCLOSED.

AN INCREASE IN PUBLIC WORKS SPENDING IS ONE OF WASHINGTON'S THREE MAJOR CONCERNS. THE OTHER TWO ARE A LIFTING OF RESTRICTIONS ON THE OPENING OF

LARGE RETAIL STORES AND A TIGHTENING OF PENALTIES UNDER THE ANTIMONOPOLY LAW.

CHIEF CABINET SECRETARY MISOJI SAKAMOTO, KAIFU'S CHIEF OF STAFF, WENT INTO SEPARATE TALKS WITH POWERFUL LEADERS OF THE RULING LIBERAL DEMOCRATIC PARTY TO PAVE THE WAY FOR THEIR COOPERATION IN WORKING OUT JAPAN'S RESPONSE.

SAKAMOTO PAID CALLS TO LDP SECRETARY GENERAL ICHIRO OZAWA, FORMER FOREIGN MINISTER SHINTARO ABE, FORMER FINANCE MINISTER MICHIO WATANABE, AND FORMER STATE MINISTER TOSHIO KOMOTO. ABE, WATANABE, AND KOMOTO ARE HEADS OF THEIR RESPECTIVE FACTIONS.

SAKAMOTO WILL MEET TWO MORE FACTION LEADERS, SHIN KANEMARU AND KIICHI MIYAZAWA, ON WEDNESDAY, OFFICIALS SAID.

INTERNATIONAL TRADE AND INDUSTRY MINISTER KABUN MUTO, WHO HAS JURISDICTION OVER THE IMPLEMENTATION OF THE LARGE-SCALE RETAIL STORES LAW, WILL MEET ABE ON WEDNESDAY TO DISCUSS THE MATTER.

KAIFU'S CABINET WILL MAKE A FINAL POLITICAL DECISION FRIDAY ABOUT JAPAN'S RESPONSE TO AMERICAN DEMANDS, OFFICIALS SAID.

CHIEF CABINET SECRETARY SAKAMOTO AND LDP SECRETARY GENERAL OZAWA AGREED ON THE SCHEDULE, THE OFFICIALS SAID.

ISLAMABAD (MARCH 27) KYODO - A SENIOR UNITED NATIONS OFFICIAL TUESDAY SAID VARIOUS U.N. RELIEF AGENCIES ARE NOW ABLE TO PROVIDE RELIEF TO THE AFGHAN REFUGEES IF THEY DECIDE TO RETURN TO '' ZONES OF TRANQUILITY'' IN THEIR HOMELAND, WHERE FIGHTING BETWEEN AFGHAN GOVERNMENT TROOPS AND RESISTANCE TROOPS HAS DIED DOWN.

PRINCE SADRUDDIN AGHA KHAN, THE U.N. COORDINATOR FOR AFGHANISTAN, WAS ADDRESSING A JOINT PRESS CONFERENCE WITH THREE OTHER OFFICIALS OF U.N. SISTER ORGANIZATIONS AFTER A THREE-DAY VISIT TO ISLAMABAD AND KABUL. THE VISIT WAS AIMED AT EVOLVING A COORDINATED APPROACH TO FACILITATE THE VOLUNTARY RETURN OF 5 MILLION AFGHAN REFUGEES IN PAKISTAN AND IRAN.

PRINCE SADRUDDIN SAID AFTER HIS TALKS WITH THE PAKISTAN-BASED AFGHAN RESISTANCE AND GOVERNMENT OFFICIALS OF PAKISTAN AND AFGHANISTAN THAT THE TIME HAS COME FOR THE VOLUNTARY RETURN OF REFUGEES.

THE SENIOR U.N. OFFICIAL SAID THE U.N. HAS SET UP WAREHOUSES IN AREAS LIKE NEAR THE SOVIET BORDER IN NORTHERN AFGHANISTAN, AND IN SOUTHERN AFGHANISTAN, WHERE U.N. FLAGS HAVE BEEN HOISTED.

SUPPLIES OF SEED, FERTILIZERS, FARM EQUIPMENT AND OTHER ESSENTIAL ITEMS ARE NOW AVAILABLE TO RETURNING REFUGEES.

HE TOLD REPORTERS THAT A TACIT UNDERSTANDING CAN BE REACHED BETWEEN KABUL AND THE AFGHAN RESISTANCE TO NOT ATTACK OR BOMB THOSE LIVING IN ''ZONES OF TRANQUILITY''.

SADRUDDIN REPLIED IN THE AFFIRMATIVE WHEN ASKED IF THE UNITED STATES WANTED AMERICAN RELIEF ASSISTANCE ONLY TO BE DISBURSED BY THE U.N. IN AREAS ADMINISTERED AND CONTROLLED BY THE MUJAHIDEEN.

HOWEVER HE SAID A NUMBER OF DONOR COUNTRIES HAVE AGREED THAT THE U.N. SHOULD STORE RELIEF AND GOODS PROVIDED BY THEM IN UN WAREHOUSES SET UP IN AREAS CONTROLLED BY KABUL REGIME. ;;MORE NNNN R169 R CA15 R :AFGHAN-AID 2 ISLAMABAD:

PRINCE SADRUDDIN SAID THAT THE PRESIDENT OF AFGHAN MUJAHIDEEN GOVERNMENT SIBGHAT ULLAH MUJADADI AND PRESIDENT NAJIBULLAH HAVE BOTH INDICATED THEIR READINESS TO CEASE HOSTILE ACTIVITIES IF THE OTHER SIDE COOPERATES.

''I THINK A TACIT UNDERSTANDING BETWEEN THE AFGHAN MUJAHIDEEN AND THE KABUL GOVERNMENT CAN BE WORKED OUT TO HONOR THE ''AREAS OF TRANQUILITY'' HE SAID.

WHEN ASKED IF HE WOULD ADVISE THE HOMESICK AFGHAN REFUGEES TO RETURN TO AREAS WHERE NO FIGHTING IS TAKING PLACE, THE U.N. OFFICIAL SAID IT WAS UP TO THE REFUGEES AND PEOPLE WHO FREQUENTLY CROSS THE PAKISTAN-AFGHAN BORDER TO DECIDE IF THE SITUATION IS CONDUCIVE FOR THEIR RETURN.

''IT IS THE JOINT RESPONSIBLITY OF THE UNITED NATIONS, THE GOVERNMENT OF PAKISTAN, AND ABOVE ALL, AFGHAN LEADERS TO COMMIT THEIR EFFORTS JOINTLY TO ENSURE THAT VOLUNTARY REPATRIATION CAN START IN 1990, PRINCE SADRUDDIN SAID IN A STATEMENT DISTRIBUTED AT THE PRESS CONFERENCE.

#90086k0095 03/27/1990 ~Japanese News Agency

WASHINGTON, MARCH 27 KYODO - U.S. AGRICULTURE SECRETARY CLAYTON YEUTTER CALLED ON JAPAN ON TUESDAY TO OPEN ITS RICE MARKET, CALLING ITS CURRENT RICE IMPORT BAN ''UNACCEPTABLE.''

HE SAID THE JAPANESE POLICY IS A ''CLASSIC EXAMPLE'' OF TRADE DISTORTION.

THE PRICE OF RICE IN JAPAN IS TWO TO THREE TIMES THE WORLD MARKET PRICE, YEUTTER SAID AT A MEETING OF THE FOOD EXECUTIVES INTERNATIONAL FOUNDATION. IT IS GETTING HARDER AND HARDER FOR THE JAPANESE TO DEFEND THEIR IMPORT RESTRICTION, HE ADDED.

REFERRING TO AN INCIDENT IN WHICH SAMPLES OF U.S. RICE WERE ORDERED TO BE REMOVED FROM A FOOD TRADE SHOW IN JAPAN, YEUTTER SAID, ''YOU HAVE TO WONDER ABOUT A COUNTRY'S COMMITMENT TO FREE TRADE IF YOU CAN'T SHOW A FOOD SAMPLE.''

''AS A MATTER OF PRINCIPLE JAPAN SHOULD OPEN ITS RICE MARKET AND SUBJECT ITSELF TO COMPETITION IN RICE JUST AS IT EXPECTS OTHER COUNTRIES TO OPEN THEMSELVES TO COMPETITION IN INDUSTRIAL GOODS.''

YEUTTER SAID THE U.S. WELCOMES JAPANESE PURCHASES OF FOREIGN RICE FOR USE IN FOOD AID PROGRAMS TO POOR COUNTRIES.

''BUT IF THAT IS TENDED TO BE AN ALTERNATIVE TO OPENING THE JAPANESE RICE MARKET, THAT WOULD BE UNACCEPTABLE,'' SAID YEUTTER, A FORMER TRADE REPRESENTATIVE.

''IT IS ESSENTIAL THAT JAPAN EVIDENCE SOME WILLINGNESS TO LIBERALIZE ITS RICE MARKET,'' HE SAID.

#90086k0114 03/27/1990 ~Japanese News Agency

FUKUOKA (MARCH 28) KYODO - A CHINESE REFUGEE FACING DEPORTATION TO CHINA HAS FILED A SUIT AGAINST JAPANESE IMMIGRATION AUTHORITIES FOR DENYING HER CLAIM TO POLITICAL ASYLUM, HER LAYWERS SAID WEDNESDAY.

THE PLAINTIFF, A 23-YEAR-OLD WOMAN FROM FUJIAN PROVINCE, ARRIVED IN NAHA LAST SEPTEMBER ABOARD A REFUGEE BOAT ALONG WITH 230 FELLOW CHINESE, ACCORDING TO THE SUIT FILED WITH THE FUKUOKA DISTRICT COURT.

SHE IS THE FIRST PERSON OF 2,800 CHINESE ''BOAT PEOPLE'' WHO MADE THEIR WAY TO JAPAN LAST YEAR TO CHALLENGE THE GOVERNMENT'S DEPORTATION ORDER.

THE GOVERNMENT HAS REFUSED TO ALLOW THE CHINESE TO SETTLE IN JAPAN ON GROUNDS THEY LEFT CHINA TO SEEK WORK IN JAPAN, NOT BECAUSE OF POLITICAL

PERSECUTION.

LAWYERS REPRESENTING THE PLAINTIFF SAID SHE TOOK PART IN PRO-DEMOCRACY ACTIVITIES IN FUJIAN PROVINCE AND FLED CHINA OUT OF FEAR THAT SHE MIGHT BE SUBJECT TO PERSECUTION BY AUTHORITIES FOR HER POLITICAL INVOLVEMENT.

THE LAWYERS SAID THEY TOOK UP HER CASE AFTER SHE CLAIMED IN A LOCAL TELEVISION SHOW LAST DECEMBER THAT SHE WAS A POLITICAL REFUGEE AND NOT A JOB-SEEKING MIGRANT.

HER LAWYERS REFUSED TO REVEAL THE PLAINTIFF'S NAME, SAYING THEY ARE CONCERNED THAT SHE MAY SUFFER RETALITATION BY CHINESE AUTHORITIES IF HER SUIT IS TURNED DOWN BY THE COURT.

THE LAWYERS SAID THE PLAINTIFF WAS NEVER TOLD OF HER RIGHT TO APPEAL WHEN IMMIGRATION AUTHORITIES NOTIFIED HER OF THE DEPORTATION ORDER.

THE FUKUOKA IMMIGRATION BUREAU HAS DENIED THE ALLEGATION, CONTENDING THAT SHE HAD ASKED FOR EARLY REPATRIATION TO CHINA IF SHE WAS NOT ALLOWED TO WORK IN JAPAN.

#90086k0120 03/27/1990 ~Japanese News Agency

BONN (MARCH 28) KYODO - NISSAN MOTOR CO. CHAIRMAN TAKASHI ISHIHARA SAYS THE SECOND-LARGEST JAPANESE AUTOMAKER HAS NO IMMEDIATE INTENTION OF DOING ACTIVE BUSINESS IN EASTERN EUROPE, WARNING THAT JAPANESE BUSINESSES' ADVANCE THERE MIGHT INVITE DISPUTES WITH EUROPEAN ENTERPRISES IN THE EASTERN EUROPEAN MARKET.

ISHIHARA, ALSO CHAIRMAN OF THE JAPAN ASSOCIATION OF CORPORATE EXECUTIVES (KEIZAI DOYUKAI), MADE THE STATEMENT IN AN INTERVIEW WITH A WEST GERMAN NEWSPAPER AFFILIATED WITH THE GREEN PARTY. KYODO NEWS SERVICE OBTAINED COPIES OF THE INTERVIEW FOR PUBLICATION IN THE PAPER ON WEDNESDAY.

THERE IS A STRONG HOPE AMONG EAST EUROPEAN COUNTRIES FOR JAPANESE INVESTMENT AND CZECHOSLOVAKIA AND POLAND ARE ASKING FOR JAPAN'S EARLY DISPATCHES OF ECONOMIC MISSIONS.

HOWEVER, ISHIHARA HELD A CAUTIOUS STANCE BY SAYING THAT EAST EUROPEAN COUNTRIES HAVE NOT YET SOLIDIFIED THEIR ECONOMIC STRATEGY AND MARKETS ENOUGH TO CONTINUE REGULAR TRADE WITH JAPAN.

ISHIHARA SAID JAPAN ALSO HAS NOT YET PROPERLY PREPARED A QUICK RESPONSE TO THE DRAMATIC CHANGES IN EASTERN EUROPE AND OTHER REGIONS, INSTEAD REMAINING PREOCCUPIED DURING THE PAST YEAR WITH ITS OWN DOMESTIC PROBLEMS, INCLUDING THE CONTROVERSIAL 3 PERCENT CONSUMPTION TAX.

TOKYO (MARCH 28) KYODO - THE FINANCE MINISTRY BOUGHT ABOUT 100 BILLION YEN WORTH OF 10-YEAR GOVERNMENT BONDS FROM BANKS AND BROKERAGES WEDNESDAY IN THE SEVENTH SUCH MOVE THIS YEAR, APPARENTLY AIMED AT SHORING UP THE SAGGING BOND MARKET.

THE BOND-PURCHASING OPERATION WAS CONDUCTED WITH FUNDS FROM THE NATIONAL DEBT CONSOLIDATION FUND SPECIAL ACCOUNT, A SINKING FUND MANAGED BY THE MINISTRY.

THE LATEST OPERATION WAS CARRIED OUT FOR THE NOS. 111, 119, AND 123 ISSUES.

-30- 643

#90086k0125 03/27/1990 ~Japanese News Agency

KUALA, LUMPUR (MARCH 28) KYODO - MALAYSIA'S ECONOMY IS BOOMING AND THE LABOR MARKET IS EXPANDING, BUT IRONICALLY THE UNEMPLOYMENT RATE AMONG MALAYSIAN UNIVERSITY GRADUATES HAS REACHED A RECORD HIGH OF 11 PERCENT AND IS STILL RISING.

IN CONTRAST, THE GENERAL JOBLESSNESS RATE DROPPED TO 7.1 PERCENT IN 1989 FROM 8.1 PERCENT THE YEAR BEFORE, THANKS TO THE ROBUSTNESS OF THE COUNTRY'S ECONOMY, WHICH GREW 8.5 PERCENT LAST YEAR AFTER A HIGH FOR THE DECADE OF 8.7 PERCENT IN 1988.

JOB OPENINGS FOR UNIVERSITY GRADUATES IN MALAYSIA ACTUALLY DOUBLED IN 1989 BUT ONLY 30 PERCENT OF THE VACANCIES WERE FILLED, ACCORDING TO A MANPOWER DEPARTMENT REPORT.

TO THE GOVERNMENT'S EMBARRASSMENT, MORE THAN 90 PERCENT OF AN ESTIMATED 50,000 JOBLESS UNIVERSITY DEGREE HOLDERS ARE MALAYS.

MALAYS ACCOUNT FOR 55 PERCENT OF THIS MULTIRACIAL COUNTRY'S POPULATION OF 17 MILLION, FOLLOWED BY ETHNIC CHINESE AT 35 PERCENT, AND INDIANS AND OTHER MINORITY GROUPS 10 PERCENT.

WITHOUT REFERRING TO ANY SPECIFIC ETHNIC GROUP, THE PERSONNEL DIRECTOR OF A LARGE MANUFACTURING COMPANY NEAR THE CAPITAL, KUALA LUMPUR, SAID THAT NOT ONLY ARE MANY OF THE UNEMPLOYED GRADUATES TOO CHOOSY, TURNING UP THEIR NOSES AT SOME JOBS, BUT MOST OF THEM ARE DOWNRIGHT UNEMPLOYABLE.

OFFICIALS AT OTHER PRIVATE ENTERPRISES AGREE WITH HIM AND CITE HIGH EXPECTATIONS REGARDING PAY, POOR ACADEMIC RESULTS, AND A LACK OF PROFICIENCY IN ENGLISH AS MAJOR REASONS WHY SO MANY UNIVERSITY GRADUATES ARE OUT OF WORK.

A SURVEY SHOWS THAT THE AVERAGE MONTHLY STARTING SALARY FOR UNIVERSITY GRADUATES RANGES FROM 700 TO 1,200 RINGGIT (260 TO 445 DOLLARS).

TRADITIONALLY ABSORBED INTO THE PUBLIC SECTOR, MALAY UNIVERSITY GRADUATES WERE SERIOUSLY AFFECTED WHEN THE GOVERNMENT FROZE THE CIVIL SERVICE INTAKE IN 1986 DUE TO A RECESSION.

BECAUSE THE BULK OF JOBLESS GRADUATES ARE MALAYS, IT HAS BECOME A POLITICALLY SENSITIVE ISSUE FOR THE GOVERNMENT OF PRIME MINISTER MAHATHIR MOHAMAD, WHICH IS DOMINATED BY MALAYS.

A REPORT BY THE MALAYSIAN INSTITUTE OF ECONOMIC RESEARCH REVEALED THAT MOST OF THE JOBLESS COME FROM THE NORTHERN STATES OF KELANTAN, TERENGGANU, AND KEDAH, WHERE ALMOST 90 PERCENT OF THE POPULATION ARE MALAYS.

THE STATES ARE ALSO STRONGHOLDS OF THE MOSLEM FUNDAMENTALIST OPPOSITION PAN ISLAMIC PARTY (PAS) AND SEMANGAT 46, A SPLINTER FROM MAHATHIR'S UNITED MALAYS NATIONAL ORGANIZATION (UMNO), WHICH IS THE COUNTRY'S LARGEST POLITICAL PARTY AND THE CORE OF THE RULING COALITION OF THREE MAJOR ETHNIC GROUPS.

MAHATHIR FACES A SERIOUS THREAT FROM THESE PARTIES, WHICH HAVE FORMED AN OPPOSITION CAMP VOWING TO REDUCE THE COALITION'S STRENGTH IN ELECTIONS EXPECTED SOON.

IN WHAT APPEARS TO BE AN ATTEMPT TO ATTRACT VOTERS IN THE STATES, THE GOVERNMENT RECENTLY ANNOUNCED A 17 MILLION RINGGIT SCHEME TO GIVE TEMPORARY JOBS TO UNEMPLOYED UNIVERSITY GRADUATES, WHILE THE STATE GOVERNMENTS HAVE A VARIETY OF SCHEMES TO PUT THEM ON THE PAYROLL.

THESE PEOPLE HAVE THE CAPACITY TO DO A LOT OF DAMAGE IF THEY ARE NOT LOOKED AFTER, MAHATHIR SAID WHEN ASKED WHY SPECIAL ATTENTION IS BEING GIVEN ONLY TO MALAY GRADUATES.

BELIEVING THAT THE ROOT OF THE UNEMPLOYMENT PROBLEM AMONG GRADUATES CAN BE PARTIALLY TRACED BACK TO FALLING STANDARDS IN THE UNIVERSITIES, EDUCATION MINISTER ANWAR IBRAHIM, A MALAY HIMSELF, BACKED THE CONTROVERSIAL APPOINTMENT OF SEVEN NON-MALAYS TO HEAD FACULTIES AND DEPARTMENTS IN THE UNIVERSITY OF MALAYS, THE COUNTRY'S MOST PRESTIGIOUS HIGHER EDUCATIONAL INSTITUTION.

SPEAKING TO ANGRY MALAY LAWMAKERS, ANWAR TOLD A RECENT PARLIAMENT SESSION THAT ANYONE, REGARDLESS OF ETHNIC DESCENT AND PROVIDED THEY ARE SUFFICIENTLY QUALIFIED, CAN BE APPOINTED TO SENIOR POSITIONS IN UNIVERSITIES.

EDUCATIONISTS WELCOMED THE STATEMENT, SAYING THE POLICY TO EXPAND THE POOL OF EDUCATED MALAYS HAS RESULTED IN THE APPOINTMENT OF MANY MALAYS TO

SENIOR TEACHING POSITIONS IN HIGHER EDUCATIONAL INSTITUTIONS EVEN THOUGH THEIR QUALIFICATIONS ARE SOMETIMES INFERIOR TO THOSE OF NON-MALAY SCHOLARS.

MANY MEDIOCRE MALAY STUDENTS, PUSHED UP BY THE POLICY IN WHICH A LOWER ACADEMIC ACHIEVEMENT WAS DEMANDED OF THEM, WENT ON TO DO POSTGRADUATE COURSES AND CAME BACK AS LECTURERS WHO IN TURN PRODUCED AN EVEN MORE MEDIOCRE BATCH OF STUDENTS, SAID A FORMER MALAY HEAD OF DEPARTMENT AT THE NATIONAL UNIVERSITY OF MALAYSIA.

''IT TOOK SERIOUS UNEMPLOYMENT AMONG OUR MALAY GRADUATES TO GET THE GOVERNMENT TO DO SOMETHING,'' HE SAID.

#90086k0128 03/27/1990 ~Japanese News Agency

WASHINGTON (MARCH 27) KYODO - THE UNITED STATES WANTS JAPAN TO ALLOCATE AT LEAST 10 PERCENT OF ITS GROSS NATIONAL PRODUCT (GNP) TO PUBLIC WORKS PROJECTS, A SENIOR U.S. ADMINISTRATION OFFICIAL SAID ON TUESDAY.

THE OFFICIAL ALSO SAID IN AN INTERVIEW WITH KYODO NEWS SERVICE THAT THE U.S. ALSO WANTS JAPAN'S LARGE-SCALE RETAIL STORES LAW ABOLISHED DESPITE TOKYO'S STRONG RELUCTANCE TO DO SO AS PART OF THE STRUCTURAL IMPEDIMENTS INITIATIVE (SII).

HE SAID THE U.S. HAD CARRIED OUT A ''VERY HARD ANALYSIS'' OF PAST COMMITMENTS BY THE JAPANESE GOVERNMENT TO MAJOR PUBLIC WORKS PROJECTS OVER THE YEARS.

THESE COMMITMENTS INCLUDE PLEDGES IN THE MID-1970S TO HAVE THE NATION COMPLETELY SEWERED BY THE MID-1980S AND PROMISES OF CONSTRUCTION OR EXPANSION OF NEW AND OLD ROADS, THE OFFICIAL SAID, SPEAKING ON CONDITION OF ANONYMITY.

''NONE OF THOSE HAVE HAPPENED... 20-YEAR-OLD PROMISES TO THE JAPANESE PEOPLE,'' THE OFFICIAL SAID.

''JUST REACHING THOSE GOALS WHICH ARE EVEN MORE OUT OF DATE TODAY THAN 20 YEARS AGO WOULD BE ROUGHLY 10 PERCENT OF GNP OVER THREE TO FIVE YEARS.

''SO IT'S A MEDIUM-TERM COMMITMENT TO GET THE LEVEL OF SPENDING UP TO THAT WITHOUT RAISING TAXES, SO THAT GOVERNMENT EXCESS SAVINGS IS REDUCED,'' THE OFFICIAL MAINTAINED.

''WE WOULD PREFER TO SOLVE THE SAVINGS INVESTMENT BALANCE IN JAPAN WITH HIGHER PUBLIC INVESTMENT RATHER THAN WITH LOWER PRIVATE SAVINGS.''

THE SENIOR OFFICIAL ACKNOWLEDGED THAT THERE HAS BEEN NO TANGIBLE PROGRESS IN TALKS ON JAPAN'S PUBLIC WORKS SPENDING BECAUSE THE JAPANESE ''HAVE NOT AGREED TO THE IDEA.''

''THEY SAY THEY CAN'T AFFORD IT,'' HE RELATED. ''THEY BELIEVE THAT THEY NEED TO REDUCE OUTSTANDING GOVERNMENT DEBT.''

ON THE QUESTION OF KEIRETSU OR INTERLOCKING BUSINESS RELATIONSHIPS, THE OFFICIAL ASSERTED THAT THE U.S. IS NOT ASKING JAPAN TO DISBAND THE INTRINSICALLY JAPANESE SYSTEM.

''WE HAVE ONLY SAID THAT THERE ARE OCCASIONS WHEN KEIRETSU ACTIVITIES EXCLUDE FOREIGN IMPORTS AND GO AGAINST THE ANTIMONOPOLY LAW,'' HE EXPLAINED.

ANOTHER AMERICAN OFFICIAL TOLD JAPANESE REPORTERS THE U.S. IS SEEKING MORE TRANSPARENCY ON JAPANESE CORPORATE DATA TO AVOID COLLUSIVE BUSINESS PRACTICES IN JAPAN.

THE U.S. HAS SINGLED OUT JAPAN'S DISTRIBUTION SYSTEM, INVESTMENT/SAVINGS IMBALANCE, KEIRETSU, PRICING, EXCLUSIONARY BUSINESS PRACTICES AND LAND-USE POLICIES AS AREAS WHERE MAJOR STRUCTURAL BARRIERS TO FOREIGN TRADE AND INVESTMENT EXIST.

''THE SIX AREAS ARE OVERLAPPING AND INTERCONNECTED,'' THE SENIOR U.S. OFFICIAL SAID IN THE INTERVIEW.

HE SAID A MIDTERM REPORT WILL CONSIST OF FOUR SECTIONS DEALING WITH THE STRUCTURAL PROBLEMS, THEIR SOLUTIONS AND COMMENTS BY THE TWO GOVERNMENTS.

THE TWO COUNTRIES ARE SCHEDULED TO HOLD A FOURTH FULL-SCALE SII MEETING HERE ON APRIL 2-3 TO HELP HAMMER OUT A INTERIM REPORT.

''THE CHANCES OF THE REPORT DEPEND ON HOW FLEXIBLE THE JAPANESE BUREAUCRATS OR POLITICIANS ARE,'' THE OFFICIAL MAINTAINED.

''THIS IS AN OPPORTUNITY FOR JAPAN TO MAKE SOME BOLD CHANGES. IT'S TIME THAT FOREIGNERS HAVE THE SAME OPORTUNITY IN JAPAN AS JAPANESE FIRMS HAVE ABROAD WITH FREE MARKETS.''

MINNEAPOLIS/ST. PAUL (MARCH 27) PR NEWSWIRE - Richard O. Moore will retire as president and chief executive officer of KTCA/TV and KTCI/TV, Minneapolis/St. Paul, Twin Cities Public Television, on Friday, March 30. Moore planned his retirement from broadcasting to coincide as closely as possible with his 70th birthday which occurred last month.

Moore presided over the planning, funding and construction of the Minnesota TeleCenter, the new production facility in downtown St. Paul housing the KTCA/TV and KTCI/TV studios. A $10 million capital campaign to fund it was completed at the same time the building became operational and fully occupied in June of 1989.

As president and chief executive officer, Moore's leadership also provided Twin Cities Public Television with continued long-range fiscal stability and programming excellence, and a dynamic, creative production presence. KTCA/TV's locally produced national series include the Emmy award-winning NEWTON'S APPLE, and the ground-breaking performance art PBS series ALIVE FROM OFF CENTER.

When Moore came to KTCA/TV in 1981 as director of national production, he was a nationally noted writer-producer whose credits included TOM WOLFE'S LOS ANGELES; DUKE ELLINGTON: LOVE YOU MADLY; and the series JAZZ CASUAL, with Ralph Gleason; TAKE THIS HAMMER, with James Baldwin; and THE ORIGINALS: THE WRITER IN AMERICA, featuring such authors as Eudora Welty, Robert Duncan, and Toni Morrison. He had also headed KQED/TV, San Francisco's public television station.

Moore will retire to Northern California with his wife, Ruth, where he plans to continue his poetry writing.

Jack Willis, president of the Willis Group, a New York independent film production company, will be formally elected as president and chief executive officer at the board of trustees annual meeting, Thursday, March 29.

CONTACT: Peter Myers of KTCA/TV, 612-229-1353.

EL SEGUNDO, CA (MARCH 27) PR NEWSWIRE - INFONET announced today that it has received a contract from the U.S. Social Security Administration (SSA) to provide remote computing services.

The contract is for one year and contains four one-year renewal options. INFONET values the award at $2.2 million for the first year and at $11 million over the five-year period if all renewal options are exercised.

Under this contract, 10 large-scale SSA database applications will reside on a UNISYS 1100/82 computer at INFONET's data processing center. These applications are considered mission-critical to the SSA's internal business operations and reporting requirements.

INFONET's remote computing services will be accessed by nearly 200 SSA users at 15 widely dispersed office locations throughout the United States.

As a leading provider of communications and remote computing services to the federal government, INFONET performs facilities management; data center, applications and development support services; supercomputing; workstation services; professional services, and network integration for complex telecommunications requirements.

Established in 1970, INFONET is the leading standards-based international value added services company. It provides communication and computer services and directly supports those services in 34 countries. The company is jointly owned by MCI (U.S.) and the telecommunications administrations of major European and Asia Pacific countries.

CONTACT: Mike Radice of INFONET, 213-335-2875.

TORRANCE, CA (MARCH 27) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) today announced a marketing agreement with Macreations, the Pacifica, Calif.-based developer of Macintosh software. Under this agreement, Ashton-Tate is offering Macreation's Tycho Table Maker to FullWrite Professional users for $12, effective immediately. The Tycho Table Maker normally retails for $149.95.

The Tycho Table Maker complements FullWrite's wide range of word processing features. Using the Tycho Table Maker, users can create complex tables and then insert them into FullWrite documents. These tables can have virtually any number of columns or rows yet load quickly, using memory sparingly.

FullWrite Professional is an advanced word processor with a true WYSIWYG interface that takes full advantage of Macintosh standards. It features sophisticated editing, page layout and graphic design; import and export

capabilities; a complete MacDraw-like drawing environment and integrated document outlining.

FullWrite is used in financial, scientific, educational and contracting communities to produce reports using the software's footnoting, chapter and side bar capabilities.

The Tycho Table Maker allows users to create, format, and save tables of virtually any size. It includes full design and formatting control over tabular material, including all traditional Macintosh text formatting commands, and has a rich global style sheet ability. Tycho Tables can be set to automatically re-size by rows or columns.

Ashton-Tate markets microcomputer business applications for Macintosh and DOS operating systems. Products are available in five major categories: database management, word processing, integrated decision support, spreadsheets and graphics. The company's Macintosh products include FullWrite Professional in word processing, Full Impact in spreadsheets, dBASE Mac in database management systems and FullPaint in graphics.

Ashton-Tate also markets a comprehensive line of services and support programs for individuals, corporations and government agencies.

Based in Pacifica, Calif., Macreations Publishing Corp. has provided software for Macintosh computers since 1984. The company has developed a number of software products; the Tycho Table Maker is the first to bear the Macreations name. Tycho is named for Tycho Brahe, a 16th century astronomer who was the first to publish data in a tabular form.

#90086p0034 03/27/1990 ~PR Newswire

TORRANCE, CA (MARCH 27) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) today began shipping Control Room, utility software that offers users an easy and convenient way to inspect their computer configuration, personalize their systems, and protect their machine and software investments. The product has a suggested retail price of $129 and is immediately available through Ashton-Tate authorized resellers.

The software is designed around nine panels that outline, in plain English, system specifics and customization options. These panels also list a wide range of useful tasks such as a viral scan and a hardware and software inventory report.

Control Room consists of two main parts: a program with a series of panels, and a TSR (terminate and stay resident program) that loads and

implements panel selections every time the computer is turned on. The TSR is typically 5 to 20K in size, and is incrementally built based on each option the user selects.

A summary of hardware and performance metrics quantifies the performance of a computer, including information on memory, processors, disk cache and DOS version.

In addition to the features on the eight menu panels, Control Room includes an automatic hardware and software inventory. This listing lets users determine computer configuration without removing the computer case. The information collected during the equipment and executable file surveys is automatically downloaded over a network or accessed by any other program that reads ASCII or dBASE files. dBASE templates are included for simple hardware and software reports.

Control Room runs on any IBM or 100 percent compatible microcomputer with at least 384K of memory, and two floppy diskettes or a hard disk. The product has a suggeted retail price of $129, and is available through the Ashton-Tate authorized reseller network.

Based in Torrance, Ashton-Tate markets microcomputer business applications for DOS and Macintosh operating systems. Products are available in five major categories: database management systems, word processing, integrated decision support, spreadsheets and graphics. Ashton-Tate also markets a comprehensive line of service and support programs for individuals, corporations and government agencies.

CONTACT: Linda Duttenhaver of Ashton-Tate, 213-538-7011.

#90086p0038 03/27/1990 ~PR Newswire

LEONIA, NJ (MARCH 27) PR NEWSWIRE - Jaguar Cars announces today that Sir John Egan has decided to retire from the company at the end of June. William (Bill) Hayden who is currently vice president, manufacturing group Ford of Europe, and has been leading Ford's transition team at Jaguar, will succeed him as chairman at that time.

To ensure an orderly handover of responsibility, Hayden has been appointed to the Jaguar board in the role of chief executive with immediate effect. Sir John will retain the role of non-executive chairman for the next three months. John Grant continues as deputy chairman.

Commenting on his decision to leave Jaguar, Sir John said: "It is exactly ten years since my appointment as chairman of Jaguar Cars, and during that time I have concentrated on the rescue and recovery of a fine British car company. Since 1980 our production and sales volumes have more than

trebled, we have substantially modernized our engineering and manufacturing facilities, set up an excellent worldwide sales network and, most importantly, re-established Jaguar's credibility in the world car industry.

"For the past year or so, however, I have been conscious that if Jaguar was to continue to develop and prosper it needed the assistance of a large world-class car manufacturer to fully exploit its growth potential.

"I was therefore delighted that Ford acquired Jaguar and am extremely encouraged by their ambitious long-term plans for the company together with their determination that Jaguar has a high degree of self-determination within the Ford organization. I am also pleased that they recognize the skills and experience of Jaguar employees in our three Midlands factories. It is clear they understand the heritage and traditions of the company, and are anxious that Jaguar maintains its separate identity.

"I consider that I have made my best contribution to Jaguar and my advice to Ford was that the big growth opportunities available to Jaguar under their ownership could only be fully exploited if the company was led by a senior Ford executive. I am therefore delighted to hand over Jaguar to Bill Hayden who, with 40 years experience in the automobile industry, is exactly the right man for the job."

CONTACT: Tom McDonnell, 201-592-5210, or Mike Cook, 201-592-5212, both of Jaguar Cars.

#90086p0040 03/27/1990 ~PR Newswire

NEW YORK (MARCH 27) PR NEWSWIRE - Isramco, Inc., reported today that the partners of the Negev Venture 2 had agreed to a $1.5 million increase in the budget for the Yam 2 well, being drilled to a projected total depth of 17,000 feet in the Mediterranean Sea off the coast of Ashdod in Israel. The increase brings the total budget to $18.9 million. Originally the Yam 2 had been budgeted for $12 million; however, slower than expected drilling since the well was begun in October 1989 necessitated two budget increases, totaling $6.9 million.

Isramco's portion of the increase is 1 percent, representing its working interest. However, the Israeli government's anticipated grant of $.44 for every U.S. dollar invested will further reduce Isramco's expense. The main portion of Isramco's ownership is a 3.28 percent overriding royalty after payout in the Negev Venture 2.

In making the announcement, Joseph Elmaleh, chairman, said that on Sunday, March 25, drilling had reached the depth of 13,900 feet in limestone. The primary zone of interest in the Yam 2 is a 1,500-foot structure located

between approximately 15,000 and 16,500 feet. Total depth is now anticipated to be reached in the latter part of April.

CONTACT: Joseph Elmaleh, chairman of Isramco, 212-888-0200, or John Swanson of Swanson Communications, 212-683-4890, for Isramco.

#90086p0041 03/27/1990 ~PR Newswire

NORTH WHITE PLAINS, NY (MARCH 27) PR NEWSWIRE - Fingermatrix, Inc. (NASDAQ: FINX) announced today that it has received a letter of intent from NEC Technologies, Inc., a subsidiary of Nippon Electric Corporation (NEC) (NASDAQ: NIPNY), to purchase five Z1050R live scan finger terminals to be installed as soon as details of technical requirements are finalized. The total purchase price is estimated at over $200,000.

The first of four systems, to be provided to one NEC customer, is already operative. The fifth terminal will be used to book arrested subjects in conjunction with the NEC Automated Fingerprint Identification System (AFIS) presently in operation at the Jacksonville, Fla., police department.

The Z1050R introduces a state-of-the-art concept in law enforcement called direct electronic fingerprinting, an inkless process which uses electronics and laser technology to directly scan live fingers and digitally produce clear, undistorted and repeatable fingerprints which improve the quality of computerized files. The use of direct, live scan fingerprints produced by the Fingermatrix Z1050R will enhance the effectiveness of NEC AFIS systems, since the fingerprint data will be interfaced directly with the AFIS without any intermediary process.

The San Francisco Police Department (SFPD) recently made the first purchase of the Z1050R. The system is currently being used to fingerprint juvenile offenders and persons requiring fingerprinting for employment and licensing applications.

Successful benchmarking is already providing the opportunity for dramatic sales of the Z1050R. Current and future requirements of both the law enforcement and commercial markets indicate the demand for thousands of these systems.

Fingermatrix, Inc. is a world leader in state-of-the-art, automated fingerprint technologies, with system applications ranging from access control to law enforcement.

CONTACT: Scott G. Schiller of Fingermatrix, 914-428-5441, or Morgan Molthrop of Georgeson & Company, 212-440-9803, for Fingermatrix.

SARASOTA, FL (MARCH 27) PR NEWSWIRE - Salvatori Ophthalmics (OTC) today reported results of operations for the three months and year ended Dec. 31 1989. For the three months ended Dec. 31, 1989, the company had net income of $67,428 ($0.01 per share) on sales of $1,421,807. This compares to a net loss of $370,032 ($0.15 per share) on sales of $773,714 for the same three month period ended in 1988. All per share data reflects the previously announced 1 for 25 reverse split of the company's common stock which shall be effective March 30, 1990.

For the year ended Dec. 31, 1989, the company had net income of $114,190 ($0.02 per share) on sales of $5,232,300 compared to a net loss of $1,187,274 ($0.48 per share) on sales of $2,988,359 for 1988.

Management of Salvatori Ophthalmics attributes the company's 1989 turnaround to its strategy of increasing emphasis on high profit margin, specialty contact lens products. As a part of that strategy, the company completed, in March 1989, the acquisition of substantially all of the assets of Vision-Ease Contact Lens Company (the "Lincoln Division") of Lincoln, Neb. The Lincoln Division is primarily a manufacturer of rigid gas permeable ("RGP") contact lenses and, with its acquisition and growth in the company's prior customer base, the company's sales of RGP contact lenses more than doubled.

In addition, the company was successful in introducing a new specialty soft contact lenses, the Sof-form 55 Toric, in March 1989. The Sof-form 55 Toric is a soft daily wear lens designed to correct astigmatism. The company manufactures the lens on a custom basis to the doctor's prescription. The company believes the custom approach to manufacturing to be an advantage over competitors who sell soft toric lenses from an inventory of a limited range of prescriptions. Initial sales of the Sof-form 55 Toric during 1989 contributed to the company's profitability and cash flow. Management anticipates further sales growth for the product.

WILMINGTON, MA (MARCH 27) PR NEWSWIRE - ElectroScan Corporation announced that Nikon Corporation of Japan has invested $1,000,000 in ElectroScan and will serve as the exclusive representative for Far East sales and service of the U.S. company's Environmental Scanning Electron Microscope (ESEM).

ElectroScan President Richard S. Melanson said the three-year agreement creates a major opportunity to penetrate the Japanese market. "Japan alone represents about 30 percent of the world market for all types of electron microscopes," Melanson pointed out. The global market was projected at $400 million for 1990, he added.

The ESEM, developed and manufactured by ElectroScan, is a new generation of scanning electron microscope -- the first of its kind -- that allows researchers to view untreated wet samples, examine microstructures of biological specimens in their natural state and watch the molecular dynamics of chemical change taking place.

Nikon will distribute ESEM's from its Tokyo-based Industrial Supplies and Equipment Division to Japan, South Korea, Taiwan, China, Singapore and Hong Kong. Instruments destined for Far East delivery will be manufactured in ElectroScan's Wilmington, Mass. facility to meet local requirements.

"Nikon, now the world's leading manufacturer of semiconductor equipment, has long been known for its technical excellence in cameras and optical microscopes," Melanson said. "We believe our relationship with Nikon will enable us to gain market share in the Far East that normally would be impossible to obtain."

Melanson said the agreement is key to the company's drive to increase sales from $4 million in 1989 to about $10 million this year.

FORKED RIVER, NJ (MARCH 27) PR NEWSWIRE - Oyster Creek Nuclear Generating Station began a scheduled outage early this morning for corrective and preventive maintenance activities and tests to prepare the plant for summer electrical generating demands.

The scheduled outage will last about two weeks and will include servicing the equipment that maintains a vacuum in the plant's main steam condenser and replacing a reactor water pump seal. Regularly scheduled preventive maintenance activities and equipment operability checks also will be completed.

Fluctuations in the main condenser vacuum levels during the past two weeks have kept the 650-megawatt plant from operating at full power. The amount of vacuum in the condenser affects the efficiency of the plant's turbine generator, which produces electricity.

Oyster Creek is operated by GPU Nuclear Corp. and owned by Jersey Central Power & Light Co.

SAN FRANCISCO (MARCH 27) PR NEWSWIRE - BEI Electronics Inc. (NASDAQ/NMS: BEII), today announced that its subsidiary BEI Motion Systems Co., completed the acquisition of the encoder business of Litton Industries Inc.

The transaction includes the ITEK Measurement Systems operation in Newton, Mass., and the Litton Encoder operation in Chatsworth, Calif.

In making the announcement, George S. Brown, BEI president and chief executive officer, said, "the Litton encoder business manufactures and markets a broad range of optical encoders for motion control systems applications which complements and extends the existing business of BEI Motion Systems Co. Combining these operations," he added, "gives BEI an excellent opportunity to enhance its marketing activities and leverage its costs to improve operating margins."

For the latest 12 months, sales of the products acquired with these operations were approximately $17 million. BEI's sales for fiscal year 1989 were $73 million and for the first quarter of fiscal year 1990 were $19.2 million. The acquired business has approximately 175 employees.

The acquisition was for cash and the assumption of specific liabilities; however, specific terms of the transaction were not disclosed.

BEI designs, manufactures and markets electronics, ordnance and motion control systems and components used in military, commercial, industrial and aerospace applications. The company has major operations in California, Texas and Arkansas.

LOS ANGELES (MARCH 27) PR NEWSWIRE - National Mercantile Bancorp (NASDAQ: MBLA), the holding company for Mercantile National Bank, today announced that it is restating previously announced 1989 year-end financial information to include an increase to the bank's reserve for loan losses.

"Management has decided to take this action as a result of its identification of an event that occurred subsequent to year-end involving an adverse change in the financial circumstances of an individual borrower " stated Terry T. Tomich, president and chief executive officer.

The restatement reflects an additional $800,000 charge to pre-tax earnings to increase the bank's overall reserve for loan losses. "This will bring the total reserve for loan losses to a level sufficient to reflect this subsequent event," stated Tomich. The restatement will result in a

decrease in previously reported fiscal 1989 net income from $3.5 million, or $1.34 per share, to $3.0 million or $1.16 per share. Net income for the fourth quarter is being revised downward from $845,000, or $.32 per share, to $373,000, or $.14 per share.

The revised net income figure for 1989 compares favorably to the $2.7 million or $1.11 per share reported for the fiscal year of 1988.

The reserve for loan losses at Dec. 31, 1989 will now be reported as $4.4 million, or 1.87 percent of gross loans of $234 million at Dec. 31, 1989.

Mercantile National Bank, member FDIC, is an independent commercial bank located in Century City, Calif. The bank offers a wide range of financial services including special services geared to middle market companies, the entertainment industry, real estate community, professionals, high net worth individuals, and the escrow and title industries.

PITTSBURGH (MARCH 27) PR NEWSWIRE - National Intergroup Inc. (NYSE: NII) today announced that it has completed the sale of its 54.5 percent interest in an aluminum smelter at Hawesville, Ky., to the Southwire Co. of Carrollton, Ga., which already owns a 45.5 percent interest in the facility.

Under the agreement, NII will receive approximately $17.4 million in cash and Southwire Co. will assume $22.6 million of bond financing debt, for a total closing price of $40 million, which approximates book value. In addition, NII has the right to receive up to $60 million of contingent cash payments under a 'pay-out' provision based on a formula principally driven by the differential between the price of aluminum on the Midwest Metals Exchange and the cost of producing aluminum at the smelter. These cash payments will be payable annually over a maximum of 10 years and will be recognized as gains in the years in which they are received. Proceeds from the sale will be used to reduce NII's debt, improve cash flow and strengthen the balance sheet.

Howard M. Love, NII's chairman and chief executive officer, said, "With the sale of the smelter, NII has completed the divestiture of its aluminum business and provided a good return for our shareholders. Upon receipt of the contingent payments, the total amount NII will have received for the sale of its entire aluminum division, including the smelter, is expected

to approximate $235 million which will include a $91 million pre-tax gain. This sale is in keeping with our strategy to divest our metals businesses and to focus on our long-term strategy of being a leader in wholesale distribution, which primarily includes pharmaceuticals," Love concluded.

MONTVALE, NJ (MARCH 27) PR NEWSWIRE - The Great Atlantic & Pacific Tea Company (NYSE: GAP) today announced the promotions of several members of its senior management group.

Michael Larkin, 48, formerly senior vice president, has been named executive vice president-operations, responsible for all company operations with the exception of the Waldbaum's and Borman's subsidiaries. In the supermarket business for more than 27 years, Larkin joined A&P in 1985 as vice president-operations for the Metro New York group. He was named senior vice president-east coast operations in 1987. He is a graduate of Iona College in New York.

Aaron Malinsky, 41, has been named executive vice president, A&P Subsidiaries, with responsibility for Waldbaum, Inc., Waldbaum's Food Mart in New England, and the Borman's subsidiary in Michigan. Malinsky had been president of Waldbaum, Inc. since January of 1987. Prior to the company's acquisition by A&P, he had served in several management positions at Waldbaum's including Director of Real Estate Development and later executive vice president. Malinsky is a graduate of Franklin & Marshall College.

Peter O'Gorman, 51, has been named executive vice president, development, responsible for store design and construction and real estate operations. He joined A&P in 1983 as senior vice president. He was previously president of The Doody Company, Columbus, Ohio, a consulting firm specializing in retail store planning, design and construction. Prior to that he was senior vice president of Tesco Holdings, Ltd., one of the United Kingdom's largest retail food chains. O'Gorman earned a degree in nautical science in the United Kingdom.

George Graham, 40, has been named senior vice president and chief merchandising officer, with responsibility for purchasing, merchandising and marketing for A&P and all subsidiaries. With A&P since 1965 when he joined the company as a part-time store employee, Graham progressed through a number of store level assignments. After completing his formal education in 1977, he became director of merchandising for the company's Bronx, N.Y. division, the first of a succession of management positions that later included vice president-Baltimore division; vice

president-marketing for Super Fresh Pennsylvania; vice president-merchandising for the Metro New York group and most recently, Metro group president. A graduate of Fordham University, Graham holds a Master's of Business Administration from Iona College.

Larkin, Malinsky, O'Gorman and Graham report directly to James Wood, chairman, president and chief executive officer.

Eckart Siess has resigned as vice chairman of the board, but remains a director of the company and international liaison officer.

In addition, the company announced that Stanley Lang has been named President of Waldbaum's, succeeding and reporting to Malinsky. He was previously Executive vice president-store operations. James Hyland, formerly vice president-budgets and controls for A&P, moves to Waldbaum's as executive vice president-supermarket services, reporting to Lang.

INDIANAPOLIS (MARCH 27) PR NEWSWIRE - Quad Pharmaceuticals, Inc., a majority owned subsidiary of Par Pharmaceutical, Inc. (NYSE: PRX), stated today that, based on further results from a company-initiated investigation announced by Quad on March 16, it has placed a moratorium on the distribution of all products made by Quad that are subject to approval by FDA under abbreviated new drug applications (ANDAs). Quad said that it intends to continue to ship products for which FDA approval is not presently required.

In announcing the action, Quad stressed that it is implementing the moratorium as a precaution to ensure that, with respect to approved products, the company only distributes products that fully conform to the terms in Quad's approved ANDAs. Quad emphasized that it has uncovered no evidence that any of its products are not safe and effective.

Today's action is another step in the company's investigation into whether certain Quad products were changed without following applicable regulatory notification or approval processes. Quad stated that the moratorium will continue until the independent consultant supervising the investigation determines that the products may be reintroduced into commerce under their original conditions of approval, or additional clearances are secured from FDA. The consultant also will review the documentation underlying each approved ANDA to ensure that the company only markets products with valid ANDA approvals.

Kenneth I. Sawyer, Par president, commenting on Quad's action, stated: "This action is being taken to assure consumers, health care professionals and the government who have relied on the quality of Quad's products that such reliance can be maintained. Quad is committed to correcting any weaknesses in processes or personnel that have led to this situation. This moratorium will allow the company to devote its resources to that effort. We hope that this interruption in service does not create any confusion or hardship for the medical community that has relied on Quad's products. While presently we know of no information compromising the safety or effectiveness of any Quad product, we think this step is essential to retain the confidence of FDA and the public in the company's products."

Sawyer also said that any action taken by Quad, whose products are primarily injectable drugs sold mainly under the Quad label, would not affect Par's product line, which consists of oral solid, oral liquid, and topical products. Quad announced that the moratorium affects products that represent about 85 percent of Quad's gross sales. Sawyer stated that this entire situation would have a material adverse impact on Par's consolidated financial position and results of operations.

HAUPPAUGE, NY (MARCH 27) PR NEWSWIRE - United-Guardian, Inc. (NASDAQ: UNIR) announced today that it has signed a contract with the Schering Corporation, a subsidiary of Schering-Plough Corporation (NYSE: SGP), in which Schering has acquired the exclusive right to distribute products containing "Lubrajel," United's proprietary water- based gel, for specific consumer and health care uses in the United States and Canada. United has also granted Schering an option to expand its marketing of the product on an international basis.

Lubrajel has a long history of safe use in a wide range of products. It is used in variety of consumer products and medical devices, many of which are marketed by major companies.

Dr. Alfred R. Globus, chairman and CEO of United, said, "In addition to the normal sales growth of this product, we expect this contract to result in a substantial increase in revenues to United."

United-Guardian is a manufacturer of pharmaceuticals, medical devices and specialty healthcare products.

WORCESTER, MA (MARCH 27) PR NEWSWIRE - Scientists at Transgenic Sciences, Inc. (NASDAQ: TSIN) in collaboration with researchers in the Department of Veterinary and Animal Sciences at the University of Massachusetts at Amherst, reported the sucessful development of a commercial prototype system for producing human pharmaceutical proteins in animal milk. Based on the research, the company is scaling up a system in rabbits for production of human growth hormone.

The research, presented at the Third International Ruminant Reproduction Symposium in Nice, France, is the first demonstration that transgenic animals can produce extremely high levels of human growth hormone in their milk without causing adverse effects on animal health. Using mice as a prototype system, the researchers developed transgenic animals that produce human proteins in their milk in quantities as high as one-half gram per liter. High levels of growth hormone in transgenic animals produced in other experiments have resulted in effects on animal growth and fertility.

Transgenic Sciences Chairman and CEO, James Sherblom said, "The successful development of a prototype allows us to scale-up the technology into rabbits, the animal system we expect to develop as a commercial bioreactor. The rabbit system offers a number of advantages over other larger animals, including a shorter reproductive cycle and a higher concentration of protein in milk. In addition, rabbits can be maintained at a lower cost than larger animals. We believe that in as little as two years the rabbit system can produce sufficient quantities of growth hormone for extensive preclinical testing."

The TSI and the University of Massachusetts researchers produced

transgenic mice by inserting the gene for human growth hormone and genetic instructions for producing the protein into fertilized mouse embryos. The embryos were then inserted into a female for continued gestation. The growth hormone-containing milk was produced when the transgenic females produced their own offspring. The human growth hormone gene was also passed onto second-generation mice, creating a stable line of human growth-hormone producing animals.

TSI is a life sciences company developing advanced toxicology tests and disease models based on genetic engineering and transgenic techniques to improve the efficiency of the pharmaceutical/chemical development process. TSI is also developing animal strains capable of producing commercially valuable pharmaceutical proteins, as well as strains with desirable growth and genetic characteristics.

WORCESTER, MA (MARCH 27) PR NEWSWIRE - Cambridge BioScience Corporation (NASDAQ: CBCX) today announced that it has reached an agreement to grant a sublicense for gp120 to Repligen Corporation (NASDAQ: RGEN). Cambridge is the exclusive licensee of a Harvard University patent for gp120, a key envelope protein of the AIDS virus. Of all the sublicenses Cambridge has granted so far, the Repligen sublicense represents the first in a field of use other than diagnostics.

Repligen, which has a research program to develop an AIDS vaccine and AIDS drugs, recently announced the identification of a fragment of the gp120 protein which induces the production of neutralizing antibodies.

In making the announcement, Cambridge BioScience President Patrick J. Leonard said, "Repligen is among the leaders in the research program to develop AIDS vaccines and therapeutics. The Repligen sublicensing of gp120 exemplifies the importance of this patent in the CBC portfolio."

Dr. Leonard went on to say: "We are pleased with the progress of our sublicensing program, and we expect royalties to be a significant revenue source over time." Gp120 has been demonstrated to be a key protein for early detection of HIV antibodies; CBC uses this protein in its Recombigen(R) HIV-1 test kits for AIDS. The company also uses gp120 and its precursor protein, gp160, in its own AIDS vaccine program.

Previously announced sublicensees were SmithKline Beckman, Baxter Healthcare Corporation, Becton Dickinson, Abbott Laboratories, Behring,

and Pharmacia ENI Diagnostics Inc., all for diagnostic purposes. Additionally, Cambridge has entered a series of cross-licensing agreements with Diagnostics Pasteur concerning the gp120 patent and HIV-2, allowing the company to extend its international role in AIDS-related diagnostics.

Cambridge BioScience Corporation is a biotechnology company utilizing recombinant technology in the development and production of antigens, adjuvants, and monoclonal antibodies, as the basis for its product lines of diagnostics, vaccines, and therapeutics for humans and animals.

ROCHESTER (MARCH 27) PR NEWSWIRE - A richly featured mid-volume copier that can literally call for help when it feels a problem coming on was announced today by Xerox Corporation (NYSE: XRX).

The Xerox 5065 copier, which operates at a speed of 62 copies per minute, is the first in its class to offer an integral Xerox Remote Interactive Communications (RIC) capability.

RIC is a self-monitoring system that continuously checks copier performance against operating standards. It is designed to avoid emergency maintenance by alerting Xerox service technicians to a developing problem before it actually interferes with copying operations.

The 5065's RIC system automatically transmits copier operating data via phone line to a central computer system programmed with artificial intelligence. A computer analyzes the data and triggers a service alert if it perceives that the 5065 is deviating from preset performance standards and is likely to malfunction.

RIC also transmits copier-usage data automatically, freeing customers from the responsibility of filling out monthly meter cards and reducing the possibility of billing errors. This capability assures customers that their administrative accounts are handled accurately and promptly.

The RIC capability is available to all customers who either rent their 5065 or have a term-lease or full-service maintenance agreement with Xerox. It is offered at no cost to the customer except for installation of a dedicated telephone line and local charges for its use.

The 5065 produces high-quality copies as large as 11 by 17 inches from a variety of originals, including computer forms and bound documents. Its

auto contrast control optimizes the copying of colored- paper originals, while its photo mode provides high-quality reproduction of photographs.

The copier can reduce and enlarge documents, in a range of 64 percent to 142 percent of original size, in 1-percent increments. It also offers automatic duplexing, margin shift, and automatic covers insertion. The 5065 maintains its rated speed even when the user has selected one or more of these special features.

The Xerox 5065 copier, including an optional finisher, can be purchased for $30,650.

Order taking will begin immediately through the Xerox direct sales force and sales agents, with availability nationwide.

PITTSBURGH (MARCH 27) PR NEWSWIRE - Equitable Resources Energy Company (EREC) announced today that it had participated in high bids on six offshore tracts at Central Gulf of Mexico Oil and Gas Lease Sale 123 held on March 21, 1990.

Subject to formal acceptance of the bids by the Minerals Management Service, EREC's net cost for the new leases will total approximately $1 million.

EREC's working interest in the tracts ranges from 12.5 percent to 20 percent. Companies that EREC is participating with in these tracts include the Louisiana Land and Exploration Co., Northern Michigan Exploration Co., and Nerco Oil and Gas Inc.

The tracts cover approximately 27,000 acres in shallow water of 400 feet or less in depth. Geological and geophysical evaluation of these tracts will be concluded during 1990 with initial exploratory drilling planned for 1991.

During 1989, EREC was successful in leasing 13 tracts at two federal lease sales. Initial drilling on three of the tracts includes one well last December and two additional wells in January. Early results indicate that one of these wells is successful, and additional drilling is being conducted on that tract. EREC expects to participate in at least five more offshore wells in 1990.

Equitable Resources Energy Co. is a wholly owned subsidiary of Equitable Resources Inc. (NYSE: EQT). EREC explores for and produces natural gas

and oil primarily in the Appalachian Basin with activities also in the Rocky Mountain and southwestern regions of the country.

DANIA, FL (MARCH 27) PR NEWSWIRE - Carnival Air Lines today announced the airline will begin flying from New Orleans and Nashville beginning April 1 1990 as part of its regular scheduled jet service. These cities have been added in place of Pittsburgh, Hartford, Detroit and Miami. Carnival Air Lines now flies from seven U.S. cities to Nassau in The Bahamas.

Carnival Air Lines' new shcedule includes Tuesday and Friday departures from Nashville, and Monday and Friday departures from New Orleans. Round-trip airfare to Nassau is available from these cities.

Carnival Air Lines will continue to fly from Cincinatti (Wednesdays and Saturdays), Cleveland (Wednesdays and Saturdays), and Baltimore (Thursdays and Sundays), as part of the summer program.

In addition, scheduled flights depart from West Palm Beach on Wednesdays and Saturdays, and once daily from Fort Lauderdale. Night flights are available from Fort Lauderdale on Wednesdays, Thursdays, Fridays and Saturdays.

Carnival Air Lines currently offers a $59 round-trip "Play Day" package to Carnival's Crystal Palace Resort & Casino, Nassau's newest mega-resort on the "Bahamian Riviera." The special round-trip package is available to one-day vacationers departing from Fort Lauderdale or West Palm Beach airport.

All-inclusive summer packages for three-, four-, and seven-night stays at Carnival's Crystal Palace Resort & Casino also are available. Budget Saver packages begin at only $319 for three nights from Cincinnati (Wednesdays), $299 from Nashville (Fridays), $319 from New Orleans (Fridays), $329 from Cleveland (Wednesdays), and $339 from Baltimore (Thursdays).

Sun Saver packages begin at only $359 for three nights from Cincinnati (Sundays), $339 from Nashville (Sundays), $359 from New Orleans (Sundays), $369 from Cleveland (Sundays), and $379 from Baltimore (Sundays).

Vacationers taking advantage of these special packages will receive roundtrip jet transporation, roundtrip transfers airport/hotel, $25 match play coupon for use at Carnival's Crystal Palace's 30,000 square-foot casino, lounges and towels at poolside and beach area, a manager's Monday night cocktail party and daily activities and entertainment, plus a

special coupon book featuring discounts at Nassau's newest mega-resort.

A special package rate of $139 will be available for children under 12 accompanied by two full-fare paying adults sharing the same room.

The 1,550-room luxury resort features 13 specialty restaurants, including the only Sushi/Health Bar in The Bahamas, an 8,000 square-foot spa with a spectacular ceiling-to-floor ocean view, and a Las Vegas-style revue offered in the resort's Palace Theatre.

At night, guests can try their luck in the Casino, with over 30,000 square feet of floorspace offering craps, roulette, blackjack, baccarat and 750 slot machines.

For information and reservations, call Carnival Air Lines at 800-222-7466.

#90086p0076 03/27/1990 ~PR Newswire

NEW YORK (MARCH 27) PR NEWSWIRE - The Topps Company, Inc. (NASDAQ: TOPPC) today reported record sales and earnings for both its fourth quarter and fiscal year ended March 3, 1990. Net sales for the fiscal year increased 24 percent to $246,399,000 as compared with $198,833,000, for the same period last year. Net income (including royalty and other income) increased 34 percent to $37,554,000, or $1.20 per share, from last year's $27,977,000, or $.89 per share.

For the fourth quarter, net sales increased 28 percent to $67,312,000 from $52,404,000, for the same period last year. Net income increased to $10,511,000, or 34 cents per share, from last year's $7,272,000 or 23 cents per share.

Arthur T. Shorin, chairman, stated that the excellent results were generated by strong growth in each of the company's product lines -- collectibles, gum and candy. He also noted that the company has recently introduced picture products featuring "Teenage Mutant Ninja Turtles," the successful television cartoon series, and "New Kids on the Block," the popular new music group.

As of March 3, 1990, the company had long-term debt of $85,000,000, a decrease of $42,000,000 from its previous fiscal year-end. The company is now more than three years ahead of its debt repayment schedule.

Topps is well known for its baseball bubble gum picture cards and its internationally registered trademark Bazooka.

#90086p0080 03/27/1990 ~PR Newswire

ALBUQUERQUE, NM (MARCH 27) PR NEWSWIRE - Summa Medical Corporation (NASDAQ: SUMA) said today in remarks prepared for its annual stockholder meeting that it has reached an agreement with Hughes Aircraft Corporation for Summa's voice compression technology.

Under the agreement, which is expected to be signed imminently, Hughes will commit a significant amount of funding, technical personnel and other resources to assist in the expeditious completion of the voice compression development program.

The agreement further calls for negotiations which could lead to a final master licensing agreement, the terms of which must be settled by the fourth quarter of this year, the company noted.

"This commitment by Hughes represents a major step forward by Summa in bringing voice compression to the marketplace," said Paul B. Goldberg, president and chief operating officer. Goldberg further said that the design goal of a 25 to 1 compression factor will provide a 500 percent improvement in the effectiveness of current telecommunication operations.

In further developments, Summa told shareholders it has developed a new active matrix flat panel display which is a derivative product of its HDTV technology. Invented by Iben Browning, Summa's chief scientist, this technology is sufficiently mature to bring the product to the marketplace in a relatively short period of time and at little expense. Summa demonstrated an engineering model at the annual meeting and further told shareholders it has entered into discussions for licensing the product with a major U.S. corporation.

As part of its reorganization into an operating company, Summa, according to Goldberg, is bidding on a number of contracts involving its technologies. The cumulative value of the contracts now being discussed totals $33 million. It is expected Summa will be awarded a reasonable percentage of those contracts utilizing its proprietary technology during the current year.

Summa also announced that its subsidiary, COTA Biotech, Inc., has reached an agreement and is proceeding with Braton Biotech Corporation on a joint venture associated with clinical trials on COTA kit. This program is anticipated to provide rapid development of the kit for research and development purposes for use by appropriate medical personnel.

Shareholders were also told that former Undersecretary of the Department of Defense Harold Williams agreed to serve on the board of Summa's technology excellence center, Quality Communications Products, Inc. in Orlando, Fla.

At the meeting shareholders approved the election of four directors to one-year terms: Francisco Urrea, Jr., Robert H. McBride, Ralph F. Petty, Jr., and Francisco Urrea, III.

In addition, shareholders approved the amendment to the company's 1983 stock option plan and ratified the appointment of KPMG Peat Marwick as auditors for the current fiscal year.

WASHINGTON (MARCH 27) PR NEWSWIRE - Alpha 1 Biomedicals, Inc. (NASDAQ: ALBM) announced toady that the board of directors has elected Vincent F. Simmon, Ph.D., president and chief executive officer.

Previously, Dr. Simmon was vice president, Biotechnology Research at W.R. Grace & Co.'s Corporate Research Division. Prior to joining W.R. Grace & Co., Dr. Simmon held several executive positions at the Genex Corporation in Gaithersburg, Md., including senior vice president for Research and Development and vice president for Technology Marketing. Dr. Simmon received his Ph.D. degree from Brown University in Providence, R.I. and received post doctoral training and business management training at Stanford University in Palo Alto, Calif. He has also served as an assistant director in the Life Sciences Division of SRI International, Menlo Park, Calif. According to Allan Goldstein, Ph.D., chairman of the board, "Vince Simmon brings us a strong combination of substantial business experience and an excellent technology background within the biotechnology and pharmaceutical industries."

Alpha 1 Biomedicals, Inc. (Alpha), a Washington-based biotechnology company, is engaged in the development of peptide-based pharmaceutical products for the treatment of immune system deficiencies and associated diseases. Alpha has developed and is commercializing a new proprietary technology to efficiently scale-up the synthesis of peptides which is applicable to the majority of peptides under development by pharmaceutical companies worldwide. Advanced Phase III human trials are currently under way and/or planned in the United States and Europe with Thymosin alpha 1 to further the clinical understanding of this important new therapeutic agent.

The company's principal products, the Thymosins, are natural and synthesized hormones of the thymus gland which act as modulators of the body's immune and neuroendocrine systems. Recently completed Phase II/III clinical trials with one of the company's products, Thymosine alpha 1 indicates a potential usefulness in the treatment of chronic hepatitis B and in increasing the effectiveness of influenza and hepatitis vaccines in elderly and immunocompromised individuals.

Through its joint venture, Viral Technologies, Inc. (VTI), Alpha 1 is the first company to begin human testing of a synthetic p17 "core" vaccine termed HGP-30 for AIDS. Human phase trials began in May 1989 in London, England, and the prototype vaccine was most recently approved for testing by the state of California in March 1990 at the University of Southern California Medical Center in Los Angeles and at the University of California Medical Center, San Francisco General Hospital in San Francisco.

ROCHESTER, NY (MARCH 27) PR NEWSWIRE - Bausch & Lomb Incorporated (NYSE: BOL) today announced that the company will hold its annual meeting of shareholders on Tuesday, April 24, at 11:00 a.m. in the auditorium at Lincoln First Tower, corner of East Main Street and South Clinton Avenue in Rochester, N.Y. Shareholders of record as of March 9, 1990 are eligible to vote at the meeting.

Linda Johnson Rice, president and chief operating officer of Johnson Publishing Company, Inc., has been nominated for election to the company's board of directors. Johnson Rice is a director of Continental Bank Corporation, the Magazine Publishers Association and the Museum of Contemporary Art. She received a B.A. degree in journalism from the University of Southern California and an M.B.A. degree from Northwestern University's J.L. Kellogg Graduate School of Management.

Current directors standing for re-election are: Jay T. Holmes, senior vice president-corporate affairs and secretary of Bausch & Lomb; Thomas C. McDermott, president and chief operating officer of Bausch & Lob; John R. Purcell, chairman and chief executive officer of Grenadier Associates, Ltd.; Alvin W. Trivelpiece, Ph.D., vice president of Martin Marietta Energy Systems and director of the Oak Ridge National Laboratory; and William H. Waltrip, business consultant.

In addition to the election of directors, shareholders will vote on a new stock incentive plan under which options for the company's Class B stock may be granted to directors, officers and other key employees. The appointment of Price Waterhouse as independent accountants for 1990 will also be voted on.

HOUSTON (MARCH 27) PR NEWSWIRE - Cattleguard, Inc. (NASDAQ: CGXX), owner and operator of Sears Bakery, Deli & Cafes, today announced that it has entered into formal discussions with senior management of Kentucky Fried Chicken (KFC) to provide development services for KFC to test food service within Sears department stores. Pursuant to the proposed agreement, Cattleguard, in exchange for development service fees, would be responsible for location, layout and sign permitting for any KFC food operation within the Sears store system. The planned initial test will be in two Sears stores. If the test is successful, KFC could expand further into the Sears system.

According to Steven M. Duin, chief financial officer of Cattleguard, "Approval of Sears and KFC senior management is necessary. We expect to execute a formal agreement which would authorize the two-store test, and possible further expansion, very shortly."

Cattleguard, Inc. is engaged in retail food and beverage sales and service business with operations in Arizona, Illinois, Oklahoma, Texas, Missouri, Ohio, Michigan and Florida. As a national concessionaire for Sears, Roebuck, the company operates 36 Sears Bakery, Deli & Cafes.

NEW YORK (MARCH 27) PR NEWSWIRE - AT&T Computer Systems today announced a major new networked computing solution that increases the efficiency and productivity of workgroups by coordinating and automating the flow of work communication and information.

The AT&T Rhapsody(TM) Business Orchestration Solution builds on customers' existing hardware and integrates extensive communications capabilities, popular word processing and spreadsheet tools and a business orchestration development environment with associated applications. These applications significantly enhance the way people work together and with other groups to complete ad hoc projects and routine business tasks.

The AT&T Rhapsody system provides customers six integrated capabilities:

-- workflow application development, which enables users to design workflows that automate routine, repetitive and ad hoc business procedures such as creating and approving expense vouchers or processing insurance claims.

-- workgroup productivity tools, which enable users to better coordinate team projects, such as the preparation of a proposal involving individuals from various organizations.

-- global multimedia messaging, which provides communications with people around the world using electronic mail, fax and voice.

-- intuitive user interface, which is a PC desktop modeled after a real-life business environment, using icons such as file cabinets, pads of forms and fax machines.

-- information access, which is the ability to access information regardless of where it resides.

-- personal productivity tools, which include the familiar applications such as word processing, spreadsheets and business graphics that individuals use today.

AT&T will assemble, load and test the AT&T Rhapsody system prior to delivery to assure quality implementation. AT&T also offers extensive training and support through a nationwide network of service technicians, and will offer remote administration of the AT&T Rhapsody system. AT&T also will offer a range of professional services for business orchestration consulting, application design and development.

OTTAWA (MARCH 27) PR NEWSWIRE - SHL Systemhouse Inc. (NASDAQ: SHKIF) of Ottawa today announced that its ComputerLand Canada subsidiary has been selected as the exclusive supplier of micro computer technology to the Regroupement R.I.Q., Informatique Inc., the largest university computer buying group in the province of Quebec.

Both ComputerLand and R.I.Q. anticipates the value of the award to be $30 million in its first year commencing in the first week of March and some $20 million for each consecutive year.

Under the province-wide program, the Ministry of Higher Education and Science will grant a university or CEGEP student a loan guarantee of up to $3,000 toward the purchase of a micro computer. More than 110,000 post secondary students are eligible.

ComputerLand will supply a full range of micro technology products from IBM, Apple, Compaq, Toshiba and Hewlett-Packard as well as training and technical support.

Jim Yeates, president of ComputerLand Canada said, "We are pleased to be the major supplier to this exciting program. We applaud the Ministry's commitment to putting advanced technology into the hands of its students as they prepare to face an increasingly computer-oriented world."

WASHINGTON (MARCH 27) PR NEWSWIRE - Building on two decades of success with its highly regarded internal golf program, Marriott Corporation (NYSE: MHS) today announced plans to create a new division solely devoted to aggressively marketing its golf management services worldwide.

"We're taking this step in order to capitalized on the technical expertise we've acquired while developing and managing our own golf portfolio," said J.W. Marriott Jr., chairman and president of Marriott Corporation.

Called Marriott Golf, the new division will offer its services to developers of free-standing public or private courses or any commercial, residential or resort development currently in existence or in the planning stages.

Among the services Marriott Golf will offer are day-to-day course management, pro shop management, agronomic supervision and management, food and beverage management, general technical services, and marketing and accounting services.

"We are offering a business approach to the business of golf," said Roger Maxwell, vice president for golf operations and development, who will head the Marriott Golf Division.

"It's a proven approach that has enabled Marriott, in less than 20 years, to become the largest operator of resort golf in the U.S. and a recognized leader in quality and profitable golf merchandising."

Assisting Maxwell in marketing Marriott's golf management services will be Claye Atcheson, director of golf and development at Marriott's Camelback Inn Resort, Golf Club and Spa; John Easterbrook, director of golf and development at The Golf Club at Fossil Creek, a free-standing, Marriott-managed public facility in the Dallas/Fort Worth area; and Tony Austin, director of golf and development at Marriott's Orlando World Center Resort.

Maxwell noted that Marriott Golf's singular strength rests with the more than 130 PGA professionals currently on staff.

"The primary focus of each of these young golf professionals is the creation of a financially responsible, quality golf experience for players of all skill levels," he said. "They're attuned to offering the exceptional services and facilities that encourage players to keep coming back.

"Furthermore, these professionals are acknowledged throughout the golf world for their retailing flair. We're very proud of the fact that five of our pro shops were rated among the top 100 in the country by Golf Shop Operations magazine this year."

Supporting Marriott's on-staff golf professionals is a network of on-staff grounds superintendents who are each experts in agronomy, horticulture and landscape maintenance.

CHICAGO (MARCH 27) PR NEWSWIRE - Medical Management of America Inc. (AMEX: MMA) announced today that its board of directors has authorized the repurchase of up to 500,000 shares of its common stock in the open market.

This amounts to approximately 2.5 percent of the company's 19.8 million shares outstanding.

James H. Desnick, M.D., chairman and CEO, said the repurchase program was being initiated because the board finds the stock attractively priced and believes it is a better investment for the company's available funds than current alternatives.

"In reacting to our 1989 performance, which was adversely affected by several real estate writedowns, the market has moved to an undervalued position in our stock. Coupling this with the substantially improved profit picture witnessed in first quarter -- historically our slowest of the year -- and our projections for the remainder of fiscal 1990, both management and the board agreed that our own stock represented an unequaled investment opportunity," Desnick explained.

In addition, the company declared a quarterly cash dividend on the company's outstanding common stock of 2.25 cents per share. The dividend is payable April 20, 1990, to stockholders of record as of April 5, 1990.

MMA owns and operates ambulatory surgical centers and manages medical practices specializing in comprehensive eye care and surgery. Headquartered in Chicago, the company's current medical operations are located in Illinois, Indiana, Florida and southern California.

PALO ALTO, CA (MARCH 27) PR NEWSWIRE - Emery Worldwide, a leading air freight carrier, has won a first-time, exclusive contract from the Military Airlift Command (MAC) for international priority movement of Department of Defense shipments of 100 pounds or less, the company announced today.

Under the one-year contract, effective March 1, Emery Worldwide will handle small-package shipments between U.S. military bases here and abroad except for those transported solely within the continental U.S.

Because Emery Worldwide will provide the service on an "as-needed" basis, no dollar figure was assigned to the contract. Last year, the U.S. military spent more than $10 million on international air transportation with a variety of carriers.

"We are extremely pleased to have been chosen by the Military Airlift

Command as its first exclusive commercial carrier of small- package shipments," said Daryl V. Mosby, Emery Worldwide's director of government sales. "This clearly demonstrates the Defense Department's confidence in our ability to handle overnight envelopes, packages and small parcels."

This is the first time that military air transportation of small packages has been consolidated under one commercial carrier. Previously, military transportation officers arranged small-package transportation with commercial air freight companies on an individual basis.

According to Military Airlift Command officials, MAC developed a plan in 1986 that would reduce DOD shipping costs by consolidating shipments under a single carrier. After a period of solicitation and bidding, Emery Worldwide was awarded the first-ever contract.

MAC officials said the Emery contract gives DOD transportation officers a shipping alternative to meet time-sensitive requirements, especially to locations outside of or infrequently served by the MAC channel or route system.

The contract calls for Emery Worldwide to provide door-to-door delivery service, electronic-tracing capability through EMCON, and customs clearance through Emery Customs Brokers. A discount-rate schedule also is part of the agreement.

According to MAC, Emery Worldwide will not ship classified, sensitive and controlled cargo, explosives or shipments weighing more than 100 pounds.

Emery Worldwide, based in Palo Alto, is a subsidiary of Consolidated Freightways, Inc. (NYSE: CNF), a $4 billion diversified transportation company with businesses in long-haul and regional trucking, air freight, ocean container freight and intermodal rail service.

STAMFORD, CT (MARCH 27) PR NEWSWIRE - Michael A. Neal, vice president and general manager of GE Capital Vendor Equipment Financing, has been named vice president and general manager of GE Capital Commercial Equipment Financing. Thomas H. Mann, executive vice president-mortgage insurance operations of GE Capital Mortgage Insurance Company, has been named to succeed Neal as general manager of GE Capital Vendor Equipment Financing.

As vice president and general manager of GE Capital Commercial Equipment Financing, Neal is responsible for the business that provides equipment

leases and loans to medium-sized and large corporate clients worldwide. Major markets served by the business include construction, corporate aircraft, fleet trucking, manufacturing, office automation and municipal leasing. In 1989, the business had $4.8 billion in assets.

A graduate of Georgia Institute of Technology, Neal joined GE in 1979. Neal resides in Weston, Conn.

As general manager of GE Capital Vendor Equipment Financing, Mann is responsible for the business that creates third-party financing programs designed to help manufacturers worldwide sell and lease products to their customers. Major markets served by the business include technology equipment, health care, telecommunications, office furniture and machine tools. In 1989, the business had $1.15 billion in total assets.

A graduate of University of North Carolina, Chapel Hill, Mann joined GE in 1973. Mann is relocating to Fairfield County from Raleigh, N.C.

GE Capital, headquartered in Stamford, is one of the nation's largest diversified financial services companies with assets of $58.7 billion.

#90086p0119 03/27/1990 ~PR Newswire

CHERRY HILL, NJ (MARCH 27) PR NEWSWIRE - Science Dynamics Corp. (NASDAQ: SIDY), manufacturer of distributed processing equipment for the telecommunications industry announced sales and earnings for 1989 as follows:

	1989	1988
Revenues	$5,102,902	$3,628,621
Net income	123,798	(726,540)
Per-share earnings	$.04	($.25)

Sales resulted in a 41 percent increase, a significant improvement over 1988. Net income was 2.4 percent of sales. Management said it believes with certain circumstances falling into place during 1990, these events could have a very positive effect on sales in 1990 and beyond.

Cost of sales in 1989 was 43 percent of revenue and 51 percent in 1988. In dollar terms, the cost of sales increased $331,846 in 1989 compared to 1988. The dollar increase, of course, was a direct result of higher sales in 1989. The percent decrease in cost of sales from 1988 to 1989 also resulted from increased 1989 sales.

Selling, general and administration expenses amounted to 44 percent of

sales in 1989 compared to 55 percent in 1988. In dollar terms, S, G and A increased by $232,003 in 1989 as compared to 1988. The 1989 S, G and A increase was in general a result of increased 1989 sales.

The company expended $901,935 on research and development during 1989. This was an increase of $22,474 over 1988 expenditures. However, as a percentage of sales, R&D amounted to 17.7 percent as compared to 24 percent in 1988. Throughout 1989, the company completed the design and shipped seven new products of different designs. In addition, there are nine new systems continuing development, and six systems completed and trialed or awaiting telco trials.

For the year ended Dec. 31, 1989, there was a $972,672 net decrease in the company's cash position, primarily due to the advances in the amount of $1,023,518 made to its former subsidiary TelVue Corp. prior to Nov. 2, 1989.

On Nov. 2, 1989, an agreement culminated between TelVue and an investor which specified the purchase of a majority of the voting common stock of TelVue for $2.5 million. The initial payment of $1,250,000 was made to TelVue for working capital, with the balance of $1,250,000 placed in escrow pending stockholder approval to provide for preferred stock and to increase the authorized common shares of TelVue stock. Such approval is expected during the April 11, 1990, TelVue stockholder meeting.

Under the agreement, Science Dynamics will be paid $500,000, plus interest in the amount of $71,444 from the escrowed funds upon approval at the stockholders meeting. The remaining balance, including loans made prior to the spin-off and due Science Dynamics, is to be repaid in equal quarterly payments with 12 percent interest over a 24-month period. Loans in the amount of $436,457 to TelVue were not recognized in either 1988 or 1989. This amount will be recognized in income in 1991 as the quarterly cash payments are made by TelVue based upon the agreed payment schedule.

The company's balance sheet continues to be quite strong with no long-term debt and considerable cash equivalents. Stockholder's equity amounts to $1.68 per share based upon the number of outstanding shares. Those items of previously deferred income and loans made to the former subsidiary, TelVue, have now been recognized in the financial statements, with the exception of the $436,457 to be recognized at a later date.

Based upon the company's cash position and current ratio there appears to be no liquidity problem. The company's working capital was approximately $4,556,344 at Dec. 31, 1989, approximately the same as $4,712,460 in 1988. The company said it believes that its current liquid assets are sufficient to meet the company's cash requirements for the foreseeable future including funds that might be required in executing an exceptionally large purchase of the company's products.

#90086p0124 03/27/1990 ~PR Newswire

HOUSTON (MARCH 27) PR NEWSWIRE - LL&E Royalty Trust (NYSE: LRT) announced today that its monthly distribution to unit holders will be made on April 15, 1990 to unit holders of record on April 5, 1990. This distribution represents amounts payable to the trust with respect to production for the month of January 1990.

The total amount of the April distribution will be $988,708 or approximately $.05206 per unit. Excess expenses of $156,000 associated with the Offshore Louisiana property were recouped in the current month, with a resulting distribution of approximately $4,000. Due to the nature and timing of other operating and capital projects along with monthly production fluctuations, this distribution is not necessarily indicative of future monthly distributions.

As previously announced, the working interest owner has begun to escrow amounts for the Fort Worth Basin property in connection with the issue of recapture of intangible drilling and development costs under Section 1254 of the Internal Revenue Code. The trust's interest in the amount escrowed from the current month's distribution and the cumulative balance of such are $407.72 and $487,404.60 respectively. As stated last month, pending the possible appeal by the IRS of the previously announced favorable ruling rendered by the United States Tax Court on the Section 1254 issue, the working interest owner has made no decision on whether and when these amounts will be released from escrow.

The working interest owner has determined under the terms of the trust documents that it is eligible to escrow funds from all trust properties for the 1254 recapture issue. However, it has advised the trustee that it does not intend to exercise its rights to escrow funds, other than for the Fort Worth Basin, for this issue for the April 1990 distribution. However, the working interest owner intends to continue to monitor its estimates of relevant factors in order to evaluate the necessity of escrowing funds for this issue on an ongoing basis. The working interest owner is under no obligation to give any advance notice to the trustee or the unit holders in the event it determines that funds should be escrowed. If the working interest owner does begin to escrow such funds with respect to the productive properties, other than Fort Worth Basin, the effect on royalties paid to the trust would be significant, and in certain circumstances could eliminate distributions for a period of time.

RESTON, VA (MARCH 27) PR NEWSWIRE - Lucas Aerospace has been awarded a $1.3 million follow-on contract by British Aerospace, Prestwick, Scotland, to provide the 300 ampere DC starter-generator electrical systems for the British Aerospace Super 31 commuter aircraft.

Lucas Aerospace Power Equipment Corp., Maple Heights, Ohio, is the designer and manufacturer of the system. The British Aerospace Super 31 program is expected to continue into the year 2000.

Lucas Aerospace Power Equipment Corp. designs and manufactures AC electrical power systems, DC generator and starter-generator systems, and electromechanical servo and actuation systems. Lucas Avitron, Stamford, Conn., is the international sales and marketing representative for Lucas Aerospace Power Equipment Corp.

The DC starter-generator system selected by British Aerospace is used to start the engines and provide continuous power to the aircraft.

With annual sales of $400 million, Lucas Aerospace's North American presence now involves more than 4,300 employees based in 15 operating locations in the United States and Canada. Lucas Aerospace Ltd., with 12,000 employees and sales of $1 billion, has operations in North America, the United Kingdom and France, and marketing facilities in many other countries. Lucas Industries plc, with more than 56,000 employees and revenues of more than $3.5 billion, has international interests in aerospace, automotive and industrial markets throughout the world.

PORT WASHINGTON, NY (MARCH 27) PR NEWSWIRE - Continuing its record of consistent improvements in quarterly sales and earnings, Compuflight Inc. (NASDAQ: CMFLU) today reported a 63.9 percent rise in earnings on a 1.8 percent gain in service fees during the company's fiscal first quarter ended Jan. 31, 1990.

According to Bert E. Brodsky, chairman of the computerized flight planning service firm, "Expanded usage and the addition of new customers helped to improve service fees figures, while operational efficiencies and lower administrative costs contributed to higher earnings."

For the recent quarter, net income amounted to $56,757, up 63.9 percent from $34,615 reported for the comparable three months of 1989. Service fees rose 1.8 percent to $366,941 from $360,476 in the corresponding quarter a year ago. Revenue (service fees and other income, primarily interest income) increased to $376,393 in the recent quarter, up from $368,165 in the prior-year period, an increase of 2.2 percent.

On Dec. 12, 1989, the company's board of directors voted to effect a 40-for-1 reverse stock split, subject to shareholder approval at the annual meeting to be held at corporate headquarters on Tuesday, April 24, 1990, at 10 a.m.

#90086p0133 03/27/1990 ~PR Newswire

CHICAGO (MARCH 27) PR NEWSWIRE - McCormick Capital, Inc. (NASDAQ: MKOR), announced today year-end results for 1989. Revenues for 1989 were $9,913,666, compared to $10,091,226 for 1988. Net income was $337,811, down from $641,469 in 1988. Earnings per share were $.15 vs. $.26 for 1988.

Peter Dauchy, president of McCormick Capital, Inc., commented that "while income during 1988 benefited from the sale of various company exchange memberships, there were no comparable sales in 1989 which accounts principally for our decrease in net income; and, as has been pointed out in previous reports, the sale of exchange memberships should not be construed as an ongoing operational source." Dauchy went on to say, "Two new commodity pools were completed and began trading during 1989, McCormick International Fund I and McCormick Fund III." He added, "For some time the company had felt the need for an organization to underwrite and facilitate distribution of commodity pools, and to this end, McCormick Capital Investments, Inc., was incorporated and established as a broker/dealer with the SEC and approved by the NASD. Bruce Nesbit, a highly regarded veteran securities executive, is president and CEO with offices in the San Francisco area."

McCormick Capital, Inc., is engaged in various aspects of the futures and securities business including brokerage and organization and management of futures investment limited partnerships.

ST. PAUL, MN (MARCH 27) PR NEWSWIRE - Merrill Corporation (NASDAQ: MRLL) today announced operating results for the three-month and 12-month periods ended Jan. 31, 1990.

Revenue for the quarter was $19,440,000, an increase of 34 percent from $14,480,000 for the same period a year ago. Net loss for the quarter was $(414,000) or (11) cents per share compared to net income of $572,000 or 16 cents per share last year.

Revenue for the 12-month period was $69,022,000, up 9 percent from $63,394,000 a year ago. A net loss of $(1,238,000) or (33) cents per share was incurred for the 12-month period compared to net income of $2,970,000 or 78 cents per share for the same period a year ago. Results for the current 12-month period include a non-operating charge of approximately $1.8 million, or 48 cents per share, from the previously announced write-off of the company's investment in Sorg, Inc.

Merrill President and CEO, John Castro, said, "Our disappointing fourth-quarter results continue to reflect margin pressures from industry price competition and higher costs associated with the integration of acquired operations. We expect some improvement in the competitive environment in certain locations where competitors have consolidated or withdrawn. We also expect the procss of integrating operations acquired during the past year to be completed during our April quarter."

Merrill Corporation is a leading provider of on-demand 24-hour-a-day typesetting, printing, document reproduction and distribution services to

financial, legal and corporate markets nationwide.

HOUSTON (MARCH 27) PR NEWSWIRE - Seagull Energy Corporation (NYSE: SGO) today announced the completion of a natural gas discovery offshore Texas in the Gulf of Mexico.

Seagull said it encountered three pay zones, one of which was tested, in federal waters 240 feet deep at North Padre Island, East Addition, Block A-72. The discovery well tested at a rate of two million cubic feet of gas per day through perforations at a depth of 4,872 to 4,884 feet through a 12/64-inch choke with a flowing tubing pressure of 1,806 pounds per square inch. Shut-in tubing pressure was 1,884 pounds per square inch.

Seagull's exploration and production subsidiary operates and has a 50

percent working interest in the property, which is approximately 65 miles south-southeast of Corpus Christi. Other partners are Ashland Exploration, Inc. and Ampolex (Texas), Inc. of Denver, a subsidiary of Ampol Exploration Ltd. of Sydney, Australia, which holds interest of 30 percent and 20 percent, respectively.

Further drilling and development plans are currently being evaluated. In addition to its exploration and production activity, Houston- based Seagull is engaged in the transportation, distribution and marketing of natural gas, liquids products and petrochemicals, and natural gas processing.

#90086p0142 03/27/1990 ~PR Newswire

VALLEY FORGE, PA (MARCH 27) PR NEWSWIRE - Directors of UGI Corp. (NYSE: UGI) today approved a 2-for-1 split of the company's common stock and an amendment to the company's articles to double the number of authorized common shares from 20 million to 40 million.

Separately, UGI's board also declared a 4.9 percent increase in the common dividend to a quarterly rate of 59 cents on existing shares or 29-1/2 cents on post-split shares. The higher dividend is payable July 1, 1990, to holders of record May 31.

The amendment to the company's articles, which would provide sufficient shares for the stock split, is subject to approval by shareholders at the annual meeting on May 22. A Pennsylvania gas and electric utility and national distributor of propane, UGI had 10,017,948 common shares outstanding on Feb. 28, 1990. The company must also obtain approval by the Pennsylvania Public Utility Commission to issue the additional shares.

James A. Sutton, chairman and chief executive officer, said the proposed split would become effective July 1 for holders of record May 31 if the required approvals are received. It would make more shares available for trading, result in a wider distribution of and a broader market for the stock and, thereby, benefit both the company and shareholders, Sutton said.

The higher dividend, UGI's third increase since 1988, was declared "despite substantially warmer-than-normal weather in the first quarter that will adversely affect utility and propane earnings in the period," Sutton noted. "This action," he said, "reflects UGI's sound financial position and the board's confidence in the continuing strength of our utilities and the earnings potential of our expanding, wholly owned propane operations."

UGI's board also declared quarterly dividends of 45 cents, $2.12-1/2 and $2.25 a share, respectively, on the company's $1.80 series, $8.50 series and $9.00 series preferred stock, payable July 1 to holders of record May 31.

BOSTON (MARCH 27) PR NEWSWIRE - Following approval by the shareholders of City Realties Limited ("CRL") on March 19, 1990, of the proposed acquisition of the 25 New Zealand properties from Gulf Resources & Chemical Corporation (NYSE: GRE), a minority shareholder of CRL instituted litigation in New Zealand to enjoin the settlement of the transaction based upon procedural deficiencies at the March 19 meeting which were outside the control of GRE. Yesterday, the Court in New Zealand ruled in favor of CRL; however, it preliminarily restrained the settlement of the transaction until today in order to give the plaintiff the opportunity to appeal the decision. It is unknown whether an appeal will be filed.

On March 23, 1990, GRE loaned Zelas Enterprises Limited, on a fully secured basis, an additional $22 million, the proceeds of which were used to complete Zelas' purchase of 100 million shares (approximately 71 percent) of CRL.

#90086p0147 03/27/1990 ~PR Newswire

HOUSTON (MARCH 27) PR NEWSWIRE - Approximately $100 million of Houston-area multi-family properties will be acquired by Houston-based

Duddlesten Realty Advisors, Inc. and Paul Revere Life Insurance Company of Providence, R.I., advised by Textron Investment Management Company, in a funding arrangement that unites a single investor and local partner in a two-year acquisition program.

Funding for Duddlesten Realty Acquisition Fund I, which has acquired the first of the properties, was arranged by Sonnenblick-Goldman Corporation, a New York-based real estate investment banker.

According to Duddlesten Realty Advisors and Sonnenblick-Goldman officials, this may be the first time funds have been committed by a single investor to a local operator prior to identifying properties to be acquired. "To our knowledge, no one else has put together an investment fund for the purpose of buying properties," said Donald K. Reed, president of Duddlesten Realty Advisors.

According to William C. Dabney, president of Sonnenblick-Goldman's Denver office, the funding arrangement commits Duddlesten Realty Advisors and Paul Revere Life Insurance to a two-year partnership. "Unlike most situations, where the investor and local partner work one deal at a time, the institution only has to underwrite the local developer once, creating a lasting partnership," Dabney said. He expects to see growth of this type of financing arrangement.

Duddlesten Realty Advisors, Inc. will look for Houston apartment properties in the 150 to 500-unit range, including those requiring major rehab, where there is opportunity to enhance value through aggressive marketing and creative management. Properties will be evaluated for their rental-rate growth and current and future occupancy potential.

The fund has already acquired the 192-unit Sunscape Apartments in the Clear Lake area from Connecticut General Realty Investors II. Doug Vikser, vice president of L.J. Melody & Company, represented the seller. Donald K. Reed, president, and Mark W. Millis, vice president, of Duddlesten Realty Advisors, Inc. represented the purchaser. The Class A. property has a 96 percent occupancy rate.

Duddlesten Realty Advisors, Inc. will locate suitable properties, handle market research, financial projections, brokerage and due diligence, including developing a market and value-enhanced strategy for each property. Duddlesten Management Corporation, a sister company, will manage all the properties. Reed estimates that the holding period for most properties will be five to 10 years.

Duddlesten Realty Advisors, Inc. was established three years ago to provide the services of disposition and acquisition of income-producing real estate for its institutional clients. The company also provides financial consultation, investment analysis and marketing expertise.

PHILADELPHIA (MARCH 27) PR NEWSWIRE - PHLCorp, Inc. (NYSE: PHX) today announced that on March 26, 1990, it received the stock of certain companies that, although legal subsidiaries of PHLCorp, has been under the control of the Wisconsin Insurance Commissioner and, therefore, had not been reflected in PHLCorp's consolidated financial statements.

Included in the assets received was approximately 7 percent of the outstanding shares, of PHLCorp's subsidiary, Empire Insurance Company, ("Empire"), thereby increasing PHLCorp's interests in Empire to approximately 97.7 percent. During the first quarter of 1990, PHLCorp will reflect a direct increase in shareholders' equity of approximately $6,700,000 as a result of the receipt of the assets.

At Dec. 31, 1989, PHLCorp had a consolidated shareholders' equity of $77,237,000. PHLCorp noted that it expects to receive additional assets having significant value, which are currently subject to the control of the Wisconsin Insurance Commissioner.

DETROIT (MARCH 27) PR NEWSWIRE - Crowley, Milner and Company (AMEX: COM) announced its sales and earnings for the year ended Feb. 3, 1990.

Crowley's reported net earnings of $85,000, or $0.17 per share, for the year ended Feb. 3, 1990, compared with net earnings of $686,000, or $1.35 per share the previous year. Sales for the year increased 2.6 percent to $113,623,000 from $110,741,000.

For the fourth quarter, net earnings were $1,714,000, or $3.37 per share, compared with $1,636,000, or $3.21 per share, for the fourth quarter a year earlier. Sales for the fourth quarter increased 5.2 percent to $38,122,000 from $36,249,000.

The company also declared its regular first-quarter dividend of $0.25 per sahre, payable April 27, 1990, to shareholders of record on April 9, 1990.

#90086p0163 03/27/1990 ~PR Newswire
OAKBROOK TERRACE, IL (MARCH 27) PR NEWSWIRE - Telesphere Communications, Inc. (AMEX: TSP), a full service interexchange carrier and provider of enhanced telecommunications services, reported today that the company had a net profit of $2 million in the fourth quarter. This produced a profit of $789,000 for the full year, the first such occurrence since 1983.

Fourth quarter net income, achieved on $60 million in revenues, was equal to $.08 per share on a primary basis and $.05 per share fully diluted. Weighted average shares were 26,623,641 and 47,377,794 respectively. Contributions to fourth quarter net income were from operations, from reduction of previous tax accruals and from the reversal of leased equipment write-offs taken in early 1989.

Importantly, net income of $2 million in the quarter was net of a $300,000 reserve set up to provide for litigation filed during 1989.

Revenues in the quarter were on plan, which incorporated the seasonal effect of the holidays. Contributions from operator services were affected by the final stage of cleansing the revenue stream to insure 100 percent collectibility.

Full year net income resulted from $192.5 million in revenues and was equal to $.05 per share on a primary basis and $.04 per share on a fully diluted basis. Weighted average shares were 21,905,133 and 18,921,771

respectively.

With regard to the fourth quarter and full year results, Harry R. Thompson chairman of Telesphere, stated "While 1989 was not an enormously profitable year and much work still needs to be done, our performance did represent a $29-million turn around. We have invested in systems and people and are now operationally balanced. A revamped full-service product portfolio for business and an impressive base of interactive 900 services and systems put us in a strong competitive posture. We look forward to a satisfying year in 1990."

Telesphere Communications Inc., with a nationwide digital fiber optic network, is a provider of long distance network services, operator services, interactive 900 services and other enhanced communications services.

DEARBORN, MI (MARCH 27) PR NEWSWIRE - Ford Motor Company's Transmission & Chassis (T&C) Division has become the first of the company's major North American Automotive Operations manufacturing groups -- as well as the largest company component -- to achieve 100-percent Q1 status.

Henry A. Nickol, general manager - Ford North American Powertrain Operations, congratulated T&C's 16,000 employees, saying, "The powertrain is one of the most critical items in determining customer satisfaction. By being the first major manufacturing operation to achieve 100-percent Q1 status, you're telling our competitors and our customers that we intend to be second to none in this critical area."

The division's Van Dyke Plant, located in Sterling Heights (Mich.), will receive the coveted Q1 award in early May, becoming the seventh and last division facility to do so. In November 1987, the Batavia Transmission Plant, located near Cincinnati (Ohio), was the first manufacturing plant in the United States to receive the award.

Other T&C facilities which have received the award are: San Juan (Puerto Rico) Plant (March 1989); Sharonville (Ohio) Transmission Plant (October 1989); Indianapolis (Ind.) Plant (November 1989); Livonia (Mich.) Transmission Plant (December 1989); and the Sterling Plant, also in Sterling Heights (February 1989).

Transmission & Chassis Division joins four smaller divisions from Ford's Automotive Components Group in the 100-percent Q1 ranks: Casting Division (5,900 employees), Electrical and Fuel Handling Division (5,000),

Climate Control Division (6,400), and Plastic Products Division (5,700).

By early May, more than 50 Ford manufacturing or assembly plants worldwide will have received their Q1 Awards.

In addition, more than 1,500 of Ford's 2,000 outside supplier locations to its North American Automotive Operations have received the award, which was established in 1981 as the company's primary recognition of quality excellence.

#90086p0169 03/27/1990 ~PR Newswire

CALGARY, ALBERTA (MARCH 27) PR NEWSWIRE - Shell Canada Limited (Montreal, Toronto, Vancouver: SHC) must meet the challenge of achieving sustained growth in earnings and return on investment while funding a high level of capital expenditures in the 1990s, J.M. MacLeod, president and chief executive officer, says in the company's 1989 annual report released today.

The high expenditures level is driven by particularly attractive natural gas exploration and development opportunities and builds on Shell's gas exploration successes in Western Canada in recent years, he says.

The company's capital and exploration expenditures in 1990 are anticipated to total $768 million, $55 million higher than in the previous year. Of the spending total, $509 million is allocated to the Resources segment, $178 to Oil Products and $14 million to Chemicals. Expenditures in other corporate activities will amount to $67 million. Within the Resources allocation, $250 million is for natural gas development and $127 million for Western Canada gas exploration.

As reported earlier, Shell's consolidated earnings in 1989 fell to $212 million from a record $427 million in 1988.

Reserves additions in 1989 significantly exceeded production of natural gas, natural gas liquids, sulphur and condensate. It was the fifth consecutive year natural gas additions more than replaced production. Net crude oil reserves remained constant, with net additions matching 1989 production.

MacLeod says that consolidated earnings are expected to decline in 1990 because of the dominant influences of a full year of low world petrochemical prices and the cost of anticipated increased debt.

But "despite a continued high investment level, it is expected that earnings growth will be resumed in 1991, driven by improved natural gas

and sulphur markets and improved performance by the Oil Products business " he adds.

MacLeod says Shell Canada is committed to conduct all its activities in a manner compatible with the national goal of sustainable development -- the integration of economic and environmental decision-making. This goal is "in response to the legitimate concern that the global ecosystem is being destroyed at a rate beyond the capacity of recovery measures."

ANN ARBOR, MI (MARCH 27) PR NEWSWIRE - J.P. Industries, Inc. (NYSE: JPI) of Ann Arbor, Mich., and T&N plc of the United Kingdom, announced today that the boards of directors of both companies have approved a definitive merger agreement providing for the acquisition of J.P. Industries by T&N.

Under the agreement, a U.S. subsidiary of T&N will commence a tender offer for all of the outstanding shares of J.P. Industries at $17.30 cash per share, for a total consideration approximately $375 million, which includes $185 million of debt.

The tender offer is expected to commence no later than Monday, April 2, 1990 and will be subject to a number of conditions, including the tender of shares representing at least a majority of outstanding shares. It will be followed by a merger in which all remaining shares will be acquired at the same price in cash. The merger agreement provides that T&N will be entitled to receive a payment of $12 million in the event of the acquisition of J.P. Industries by a third party.

The chairman and group managing director of T&N, Colin Hope, and the chairman, president and founder of J.P. Industries, Dr. John Psarouthakis, made the following joint statement: "This merger will substantially improve the ability of T&N and J.P. Industries to serve the global transportation components markets. The two companies are complementary in manufacturing facilities, products and regional coverage."

Psarouthakis added, "This is a unique merger through which shareholders receive a good and fair price, employees will have continued opportunities for creativity and growth while customers will be provided with a complete line of products. The merger is a further step in the planned strategy of J.P. Industries to become a major factor in the worldwide transportation components industry. T&N's presence in Europe, combined with J.P. Industries' leadership in the U.S. market, will open new channels for both companies' products. In addition, the increased financial and R&D resources that T&N offers will bring new opportunities

to the J.P. Industries family of companies."

Psarouthakis also said that based in part on the advice of Donaldson, Lufkin & Jenrette, and Salomon Brothers, the board of directors determined the merger to be fair and in the best interests of the shareholders of J.P. Industries.

The companies said they plan to maintain J.P. Industries' headquarters in Ann Arbor with Psarouthakis remaining as chairman of J.P. Industries.

T&N is a diversified industrial company which supplies materials and components to the automotive, petrochemical, power generation, aerospace and electrical industries. T&N's 1989 sales were approximately $2 billion worldwide.

J.P. Industries is a global manufacturer and marketer of engines and transmission components with annual sales of over $400 million.

#90086p0179 03/27/1990 ~PR Newswire

NEW YORK (MARCH 27) PR NEWSWIRE - Time Warner Inc. has reached an agreement in principle to acquire Lane Publishing Co. and certain related assets. Lane, with headquarters in Menlo Park, Calif., publishes Sunset, The Magazine of Western Living, and Sunset Books, and produces Sunset Films. The purchase price will be approximately $225 million, consisting principally of approximately $80 million cash and $145 million face amount of preferred stock.

Sunset Magazine and Sunset Books will be part of The Time Inc. Magazine Company, a wholly owned subsidiary of Time Warner Inc. In making the announcement, Steven J. Ross and J. Richard Munro, co- chairmen and co-chief executive officers of Time Warner Inc., said: "This transaction underscores our optimism about the prospects for the magazine and book businesses. It also allows Time Warner to utilize its publishing resources and direct marketing skills to create significant additional value for Time Warner shareholders."

Reginald K. Brack Jr., chairman, president and chief executive officer of The Time Inc. Magazine Company, said: "Lane Publishing is the pre-eminent publishing franchise in the country's fastest growing market, the 13 Western states. With this acquisition, Time Inc. Magazines completes its strategy of having a major regional publishing presence in two of the nation's most dynamic areas -- the South (where we own Southern Progress Corporation, which publishes Southern Living Magazine) and the

West."

L.W. (Bill) Lane Jr. and Melvin B. Lane are the co-chairmen of Lane Publishing Co., which they and their families own. Bill and Mel Lane have agreed to become consultants to The Time Inc. Magazine Company.

In commenting on the acquisition, Messrs. Lane said, "Our highest priorities have always been to maintain Sunset's editorial excellence, to continue its growth, and to ensure that the future of Sunset is in the right hands. We're confident that these will now be achieved."

Sunset Magazine was founded by the Southern Pacific Railroad Company in 1898. Its purpose at that time was to influence travel to the Western United States. Southern Pacific sold Sunset to the magazine's employees in 1914, and in 1928 L.W. (Larry) Lane, Bill and Mel's father, acquired Sunset Magazine and founded Lane Publishing Co.

Sunset Magazine pioneered regional editions in magazines in 1932 and today publishes four regional zone editorial editions each month in its 13-state distribution area, with 25 percent of the editorial content localized.

Sunset Magazine has consistently developed five major editorial areas -- travel and recreation, home design and use, food and entertaining, gardening and landscaping, and the environment -- for its loyal and upscale audience.

Time Warner Inc. is the world's largest media and entertainment company.

REGINA, Saskatchewan (MARCH 27) PR NEWSWIRE - Westbridge Computer Corp. announced today that it will incur a loss from operations in its fourth quarter, and for its fiscal year ending March 31, 1990. Westbridge had previously announced its results for the fourth quarter would be less than previously forecast.

A further loss will result from one-time costs which are a direct result of a re-organization undertaken in the fourth quarter and a provision for costs associated with lease terminations and moves to a new facility at the university of Regina. In addition to providing significant cost savings, the move will facilitate the integration of all Saskatchewan divisions and subsidiaries into one operating company with the corporate group more involved in the day-to-day operations.

Westbridge expects to release its results for the fiscal year ending March 31, 1990 by mid-May.

Westbridge is a major Canadian information technology company providing corporate computer solutions to mid and large size organizations. Headquartered in Regina, Westbridge has locations across Canada and in two United States markets.

NEWPORT BEACH, CA (MARCH 27) PR NEWSWIRE - Spring Mountain Group, whose principal subsidiary is the 42-office Spring Mountain Escrow Corp., has acquired Pioneer Savings and Loan Association, Newport Beach, upon receipt of both federal and state regulatory approvals, Frank O'Bryan, chairman and chief executive officer, announced today.

The purchase was from James Deane, an Orange County homebuilder, for an undisclosed price.

Anne Bacon has been brought in by Spring Mountain Group as president and chief executive officer of Pioneer Savings. Previously Bacon managed Butterfield Savings and Westco Savings for the regulators, and before that was an executive of Downey Savings.

Christine Sanderson, president and chief operating officer of Spring Mountain Group and Spring Mountain Escrow Corp., has been named chairman of the board of Pioneer Savings.

O'Bryan said Pioneer Savings has been recapitalized at a higher level, and now exceeds all three of the fully phased in capital requirements which FIRREA requires be met by December 1992.

He added: "Because of the many builder and realtor contacts of Spring Mountain Escrow which will be brought to Pioneer Savings, we think the two companies will make an excellent fit as we build a diversified financial services company."

Bacon said: "Pioneer will be run like a traditional savings and loan association, taking in retail deposits and lending those deposits out for home loans and some consumer loans. In spite of the current turmoil in

the nation's savings and loan industry, we feel there will always be a place for a small institution which gives good personalized service."

Pioneer is looking for a permanent facility as it is currently housed in temporary quarters.

#90086p0195 03/27/1990 ~PR Newswire

LOS ANGELES (MARCH 27) PR NEWSWIRE - Prism Entertainment Corporation (AMEX: PRZ) announced today that it has commenced the public offering of up to $6 million principal amount of 13 percent convertible senior subordinated debentures due Dec. 1, 1999.

The debentures are convertible into the company's common stock at a conversion price of $5 per share. Offerman & Company of Minneapolis is the sole underwriter of the offering.

The net proceeds from the offering will be used for general corporate purposes, primarily the acquisition of product. Prism said it anticipates that the proceeds of the offering, when combined with the other financial resources available to it, will enable the company to improve the quality of its products and be more competitive in an increasingly selective marketplace. The company will also pay off its existing revolving bank debt of $2,584,500.

As of Nov. 30, 1989, Prism entered into an exclusive five-year agreement with Paramount Pictures Corporation under which Paramount will distribute Prism's product in the United States.

Under the agreement, Prism is continuing its acquisition and development of independent films and non-theatrical programming, while Paramount is responsible for all sales and marketing of Prism product. Paramount also has agreed to advance funds on a revolving basis up to an amount of $5 million to be used for the acquisition of product. In addition, Prism has granted Paramount warrants to purchase up to 500,000 shares of Prism common stock at $5 per share.

Paramount's large sales force, now available to Prism, and Paramount's reputation in the industry for service will enhance the company's ability to market its product. The revolving credit agreement with Paramount, when combined with Prism's other capital resources, including the proceeds from the sale of the debentures, will improve its ability to acquire rights to and market quality programming.

On March 10, 1990, Prism sold 90 percent of its Fox/Lorber subsidiary, an

international sales and distribution company for home video and television syndication. The purchaser is a company owned by David M. Fox and Richard Lorber, co-founders of Fox/Lorber, and GaGa Communications, Inc., a Japanese film and video distribution company, which is Prism's joint venture partner in videocassette distribution in Japan.

The purchase price was $2,700,224 payable in a combination of cash, notes, and the surrender of 111,000 shares of Prism's common stock and the cancellation of options to purchase an additional 70,000 shares of Prism common stock.

The sale will enable Prism to concentrate on its core business, the sale and distribution of home videocassettes in the United States and Canada.

Prism Entertainment Corporation is a home video company which sells and distributes videocassettes of theatrical and television films, children's programming, concert performances of music and comedy artists and other programming in the United States and Canada.

SEATTLE (MARCH 27) PR NEWSWIRE - Continental Airlines today announced it will significantly enhance its local service, develop Seattle/Tacoma into a major west coast Asian gateway, and add flights to up to three more Asian cities.

Continental expects to begin the only nonstop service from Seattle/Tacoma to the important industrial city of Nagoya, Japan during the first quarter of 1991, subject to government approval.

In addition to the Nagoya service, Continental intends to operate to Seoul

and beyond to one or two other Asian destinations.

Some $15 million in facility improvements at SeaTac have also been planned.

"Our commitment to developing our operation here in the Puget Sound area and contributing to the local economy is stronger than ever," said Continental President Mickey Foret. "The success of our Tokyo service has given us the confidence and foundation for the development of this market into a major Asian gateway."

Continental's strategic plans call for developing Seattle into a major west coast Asian gateway.

Continental has applied for rights to operate daily nonstop service between SeaTac and Nagoya. Seattle/Tacoma is the largest west coast community without service to central Japan, yet is the third largest U.S. Mainland gateway for Far East traffic.

"Nonstop service between SeaTac and Nagoya is a major step in developing the important economic ties between the two communities," said Foret. The 75 mile radius around Nagoya is one of the world's richest industrial areas.

This new service, when approved, would begin during the first quarter of 1991.

In addition, Continental intends to begin nonstop service to Seoul, with continuing service on to one or two other Asian destinations during the first quarter of 1991.

The proposed service would bring to at least four the number of Asian cities with Continental service to SeaTac.

BATTLE CREEK, MI (MARCH 27) PR NEWSWIRE - Mrs. Smith's Frozen Foods Company has announced the addition of two new waffle varieties to their popular line of EGGO(R) frozen waffles. Kellogg's(R) NUTRI-GRAIN Multi-Bran Waffles and EGGO Nut and Honey Waffles will be available nationwide this spring.

Kellogg's NUTRI-GRAIN Multi-Bran Waffles are made with four of today's most popular brans -- corn, wheat, rice and oat. Consistent with the NUTRI-GRAIN line, they contain no cholesterol, no preservatives and no added sugar. One waffle provides three grams of dietary fiber, the highest level of any frozen waffle.

EGGO Nut and Honey Waffles combine the great taste of peanuts with natural honey, a unique flavor combination for waffles. One waffle is a good source of nine vitamins and minerals.

"The convenience and great taste of EGGO Waffles makes them an ideal breakfast option for today's busy, nutrition-conscious consumer," said John J. Feeney, chairman, Mrs. Smith's Frozen Foods Company. "We expect NUTRI-GRAIN Multi-Bran and EGGO Nut and Honey Waffles to appeal to children and adults alike."

Both products will be supported with television advertising and couponing. Leo Burnett, Chicago, handles the advertising.

Mrs. Smith's, a subsidiary of Kellogg Company (NYSE: K), manufactures and markets 11 varieties of EGGO Waffles, including NUTRI-GRAIN and COMMON SENSE(tm) Oat Bran Waffles. The frozen waffle category is one of the fastest-growing segments of the frozen food industry.

PITTSBURGH (MARCH 27) PR NEWSWIRE - Davy and Spie Batignolles have

entered into a conditional agreement to merge their metals engineering interests, it was announced today.

This will be effected by Davy acquiring from Spie Batignolles the whole of the issued share capital of Clecim, a wholly owned subsidiary of Spie Batignolles, in exchange for 17.4 million Davy shares of 25 pence (p) each which Spie Batignolles intends to hold as a long-term investment.

The Clecim Group, comprising Clecim SA in France, and its principal subsidiaries, Comstock Engineering in the USA and Cosim in Spain, will become part of the metals division of Davy, thereby forming one of the world's leading metallurgical engineering and construction groups.

The Clecim Group designs, manufactures and supplies plants to the world's metals industries. It has special expertise in electric arc furnaces, rolling mills, process lines, finishing lines and mill automation products.

The Davy Metals Division, which is the core business of the Davy Group, designs, manufactures and supplies plant and equipment to the world's metals industries, its technologies range from the handling of raw materials to metal processing and forming, advanced product design is complemented by highly automated manufacturing and roll-making facilities.

WILMINGTON, DE (MARCH 27) PR NEWSWIRE - Hercules Inc. (NYSE: HPC) Chairman and Chief Executive Officer David S. Hollingsworth today told shareholders at the company's annual meeting, "Hercules is well positioned for the 1990s, which will be a period of growth and a time when we will reap the rewards of the position we have so carefully built."

He began the meeting with discussion of the reserve and change of $323 million the company took in late 1989 as a result of cost overruns and deferred development costs in its aerospace business. He also spoke about other 1989 problem areas -- Aircraft & Electronic Products, film, resins and a Mexican affiliate -- and the solutions to those problems. Based on corrective action taken so far, he said, "During 1990, we believe that each of these four business areas will show good profit improvement. Compared with 1989, the 1990 business plans for these units call for an aggregate improvement of $.30 to $.35 per share."

He also commented on the opportunities in place for the future. "In 1989, we created the Advanced Materials & Systems Company, and Fragrance & Food Ingredients has been challenged to grow aggressively to $1 billion in sales revenue. We took full ownership of Aqualon, which had been a joint venture with Henkel, and we announced plans to divest businesses that do not fit our strategy for the '90s. We also approved the establishment of a European Central Research and Development Center at Barneveld, the Netherlands, and created a European Advisory Council of distinguished experts from the U.K., Germany, Belgium and France to help us guide our business planning in this dynamic growth market. In addition, we changed the centralized organization form of Hercules that existed in the 1980s to a more customer- and market-oriented global management approach, and are continuing to invest in a state-of-the-art processing and process technology in our manufacturing facilities. Underlying our strategy is management's commitment to quality, marketing, improved productivity and the safety of our employees and the environment."

As to the environment, Hollingsworth committed the company to an 80 percent worldwide reduction in emissions from its manufacturing sites. He said, "Longer range, our goal is zero emissions, but we shall work to an 80 percent benchmark, to be achieved by the end of the decade. Environmental protection is a global challenge, and as a worldwide chemical company, we shall commit our technology, science and skills to this effort."

In the business portion of the annual meeting, shareholders voted to elect the four directors standing for re-election to a three-year term to expire at the 1993 meeting. Elected were Eugene D. Crittenden Jr., Thomas L. Gossage, Hollingsworth, and Gaynor N. Kelley. Arthur C. Nielsen Jr., a

director since 1977, and Guy T. McBride, a director since 1980, have reached retirement age and did not stand for re-election.

Shareholders also voted to ratify the election of Coopers & Lybrand as independent auditors for 1990. Stockholder proposals to adopt cumulative voting and to opt out of the state of Delaware's Section 203 (a so-called Anti-Takeover Provision) of the General Corporation Law were defeated.

GLENDALE, CA (MARCH 27) PR NEWSWIRE - In response to the previously announced Securities and Exchange Commission lawsuit pertaining to a former officer and director, ATI Medical Inc. (AMEX: ATI) issued the following statement from Paul E. Stevenson, its president and chief executive officer:

"We feel it is important to set the record straight for our shareholders. Michael Kaufman, subject to the SEC legal action, assisted ATI with initial financing and was not a founder of the company, as was described. He was a board member until 1989 and his title of chairman, which he held until 1987, carried absolutely no managerial or operating responsibility. He literally had nothing to do with the operation of our business.

"He is no longer a board member or officer of ATI and, to the best of the company's knowledge, has not owned any ATI stock directly or indirectly since September 1989."

"ATI is willingly cooperating with the SEC in their efforts," he concluded.

ATI Medical expects to report record sales and earnings for its fiscal year, ending July 31, 1990. For the most recent six-month period, ATI's earnings more than doubled to $1.7 million, or 31 cents per share, on sales of $24.1 million.

The company rents medical equipment primarily to hospitals as well as the entertainment industry through offices in major cities across the country. ATI also sells medical equipment and certain disposables and markets, through its subsidiary, CAMS Inc., a software system to monitor equipment usage within hospitals.

IRVINE, CA (MARCH 27) PR NEWSWIRE - Fluor Daniel announced today that it has been awarded a contract by Nissan Motor Manufacturing Corporation U.S.A. The contract is valued at approximately $22 million.

The automotive and electronics business unit of Fluor Daniel's Industrial Sector will provide construction services for an 800,000- square-foot addition to the existing body, frame and stamping plant in Smyrna, Tenn.

The project is scheduled for completion in September 1991. Fluor Daniel was the general contractor for the original 3.4-million- square-foot facility that broke ground in 1981.

The body, frame and stamping addition is one part of a $490 million expansion of Nissan's Smyrna facility. The total expansion will almost double the plant's annual production capacity to 440,000 vehicles. The new plant addition will house the production line for a four-door passenger car currently under design.

ANNAPOLIS, MD (MARCH 27) PR NEWSWIRE - Gov. William Donald Schaefer today announced that KLM Royal Dutch Airlines has been granted approval by the U.S. Department of Transportation (USDOT) to inaugurate service from Baltimore/Washington International Airport (BWI) to Amsterdam.

KLM was the first airline to apply for route authority under a new USDOT expanded international air service program that encourages foreign airlines to provide service to U.S. gateways.

"What this means for Maryland is that we will have a new gateway on the continent of Europe," Schaefer said.

"Although BWI has had non-stop service to London for many years, this is our first non-stop service to the European continent. This KLM service gives a tremendous boost to BWI's international service. The fact that BWI was selected as the first airport in America for expanded international service confirms Maryland's potential in the world marketplace."

Just one month ago, Schaefer was joined by U.S. Sens. Paul Sarbanes and Barbara Mikulski (both D-Md.), and William Hudson, executive director, Business Development, from Westinghouse, in announcing Maryland's support for the KLM application. At that time, the governor emphasized the importance of international business to Maryland, and the public-private sector teamwork which had attracted KLM to BWI.

KLM had announced plans to begin service on the new route in June of this year, beginning with one flight a week. Service is planned to increase to three flights a week by the end of the summer traffic season.

KLM plans to use a 747-400 combination aircraft, which offers excellent passenger and cargo capacity, between Maryland and the Netherlands.

PITTSBURGH (MARCH 27) PR NEWSWIRE - Chambers Development Co. (AMEX: CDVB), a leading Pennsylvania environmental services firm, said it wholeheartedly supports a bill passed today requiring background checks on trash haulers.

The bill, which was proposed earlier this year by state Sen. Michael Fisher (R-Allegheny) and Attorney General Ernie Preate Jr., imposes more stringent licensing and disclosure requirements on Pennsylvania's waste industry.

Fisher's bill requires waste haulers, brokers and landfill operators to report to the attorney general's office convictions or pending charges for any of 22 crimes associated with organized crime.

"We are 100 percent in favor of background checks for waste disposal companies," said John G. Rangos Jr., Chambers' executive vice president of operations. "This is an important piece of legislation and we want the public to be aware of our stance.

"Chambers encourages the background checks and is also in favor of strong environmental controls for sanitary landfills in Pennsylvania.

"We are sympathetic to citizens' concerns and understand the need for our industry to conform to the highest standards as demanded by our state leaders. They have our complete cooperation," Rangos said.

Chambers Development Co., headquartered in Pittsburgh, provides services in recycling, collection, hauling, disposal and landfill development.

The company also provides security through its wholly owned subsidiary, Security Bureau Inc., which is the 14th-largest U.S. security firm.

COSTA MESA, CA (MARCH 27) PR NEWSWIRE - SPI Pharmaceuticals Inc. (AMEX: SPI) today reported first quarter sales increased 14 percent to a record $34 million.

Net income of $2.8 million in the fiscal quarter ended Feb. 28 compared to net income of $2.6 million in the first quarter of last year. Per share earnings increased 10 percent to 23 cents from 21 cents in last year's first quarter. Sales were a record for any first quarter in the company's history.

The company said its gross profit margin increased five percentage points in the year-to-year comparison. Pre-tax profit of $4.1 million was 82 percent ahead of pre-tax profit of $2.3 million in the first quarter a year ago.

The company said its operations in Mexico made a major contribution to the first quarter sales gain, with sales running 38 percent ahead of the first quarter of 1989. Sales of Bedoyecta, an injectable multivitamin, were substantially ahead of last year's first quarter, as were antibiotic sales.

Sales in Mexico also benefited from increased demand for the company's antiviral drug ribavirin, which is marketed in Mexico under the Vilona and Virazid tradenames. The company said ribavirin was in strong demand in Mexico for the treatment of patients hospitalized with severe cases of measles. It said an increased incidence of the virally engendered disease had been reported in Mexico. Ribavirin sales also benefited from increased medical use for the treatment of herpes zoster and herpes simplex virus.

In the United States, sales of the company's line of dermatological products experienced good growth in the quarter, as did sales of Virazole (ribavirin), which is authorized for marketing in the United States in aerosolized form for the treatment of infants and children hospitalized with severe lower respiratory tract infection caused by respiratory syncytial virus.

SPI, which is listed on the American Stock Exchange, makes, markets and distributes some 300 prescription and non-prescription pharmaceuticals throughout the world, predominantly in the United States, South and Central America, Europe and the Far East.

FAIRFIELD, NJ (MARCH 27) PR NEWSWIRE - S2 Golf Inc. (NASDAQ-NMS: GOLF) (doing business as Square Two Golf), a manufacturer of a complete line of men's and women's golf clubs, today announced record sales and earnings for the year ended Dec. 31, 1989. Square Two Golf is the officially endorsed club of the Ladies Professional Golf Association (LPGA). Shipments for the year rose to $4,903,914 from $3,323,393 in 1988. The company posted a net profit before taxes of $627,812 or $.073 per share with an after-tax profit of $446,093 or $.052 per share, for 1989. This compares with a net profit before taxes of $139,356, or $.026 per share, in 1988 and an after-tax profit of $138,014 or $.026 per share, when the company had a fewer average number of shares outstanding.

L. R. Jeffrey, president, attributed the improved operational performance to continuing high levels of consumer acceptance of the company's products a higher percentage of shipments of graphite clubs and to an increased number of dealers. Jeffrey stated "We had a very successful year. Shipments more than doubled and pre-tax profits more than quadrupled. At the present time, we believe that the 1990 golf season should be good. Our incoming order level remains strong and shipments for the first two months of 1990 were double the comparable period in 1989. We have recently completed the more to enlarged production facilities with a minimum of disruption to ongoing operations. We are continuing to add new dealers

and anticipate being in an excellent position for the 1990 golf season."

The company's common stock is listed daily in the additional NASDAQ Quotes list (Additional List) which is carried in the Wall Street Journal, Investors Daily, and The New York Times.

ATLANTA (MARCH 27) PR NEWSWIRE - The U.S. Environmental Protection Agency announced today that 745 Property Investments Inc. has agreed to undertake a comprehensive study to determine the extent of contamination at the

Anodyne Inc. Superfund site in North Miami, Fla.

Under the terms of the agreement, issued in an Administrative Order on Consent, the study will include a selection of alternatives from whick a cleanup method will be chosen.

The Administrative Order on Consent provides for the responsible party to devise a workplan within 90 days of signature of the Order which will describe sampling and analysis of groundwater, surface water and soils. Treatability studies may be necessary if sampling results warrant. A risk assessment which identifies possible exposure routes of contaminants to the human population, as well as to plants and animals, will also be a part of the work performed at this site. Planning activites are expected to commence at the site in late spring of this year.

All work will follow EPA guidelines for remedial investigations and feasibility studies as outlined by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the National Contingency Plan. Decisions regarding a cleanup strategy should be forthcoming late next year.

The Anodyne Inc. site, located at 1275 N.W. 165th St., is contaminated by metals and solvent-type organics. The facility produced lithographs and silk screen prints from 1960 to 1978. Contamination at the site appears to have occurred primarily through the discharge of wastewater containing inorganics onto the ground. Wastewater containing organics was discharged into an injection well. The site was placed on EPA's National Priorities List of hazardous waste sites in February.

GREENBELT, MD (MARCH 28) PR NEWSWIRE - Group 1 Software (NASDAQ-NMS: GSOF) announced today it will release a new product line for direct marketers using the IBM AS/400 midrange computer.

The software is nearing completion of an extensive and successful field testing program. Shipments are expected to begin in April 1990.

The new midrange software products mirror the functions of Group 1's well-established software systems for mainframe computers. Those functions include list conversion, duplicate identification, ZIP Code correction, label printing, postal presorting, address standardization, ZIP+4 and carrier route coding.

Group 1 has traditionally provided software for the mainframe and

microcomputer markets, with over 4,500 customers for these products. Users range from small businesses to the largest corporations in North America.

According to Ron Friedman, president of Group 1 Software, "Group 1's new software packages, together with the IBM AS/400 hardware platform, will allow more direct marketers to bring their computer processing in-house. The AS/400 is powerful enough to handle large mailing programs, yet manageable enough for a marketing staff to use with ease." Friedman continued, "We think this system will be the perfect solution for many organizations."

Group 1 Software offers a broad range of list management, postal discount, mail personalization and demographic database software products for all IBM hardware platforms, including mainframe, midrange and microcomputers. The company has offices throughout the United States and in Canada, and is represented in the United Kingdom, Australia and New Zealand. Group 1 is traded on the NASDAQ National Market under the symbol "GSOF."

NEW YORK (MARCH 27) PR NEWSWIRE - William A. Simpson, 51, has been elected president and a member of the board of directors of USLIFE Corporation (NYSE: USH) and has been named a member of the board of directors and the executive committees of All American Life Insurance Company, The Old Line Life Insurance Company of America, The United States Life Insurance Company and USLIFE Life Insurance Company, all wholly owned subsidiaries of USLIFE.

At the same time, Robert J. Casper, 47, president-chief executive officer and a member of the board of directors and the executive committees of The United States Life Insurance Company and USLIFE Equity Sales Corporation, has been elected to the board of directors of USLIFE Corporation. Christopher S. Ruisi, 41, has been appointed to the newly created position of senior executive vice president-administration.

William A. Simpson has a 26-year career in the life insurance business. A native of Oakland, Calif., he graduated from the University of California at Berkeley in 1961. Following service in the regular Army from 1961 through 1964 and attaining the rank of captain, he entered the life insurance business in 1964 in Los Angeles, Calif.

Following four years as a life insurance agent and, then, five years as an agency manager in San Jose, Calif., with Occidental Life Insurance Company of California, Simpson served from 1973 through 1977 as sales vice president with Countrywide Life Insurance Company, an Occidental Life

subsidiary. From 1977 through 1979, he was agency vice president at Occidental Life Insurance Company with total responsibility for all U.S. sales operations.

Simpson and his wife, Nancy, reside in La Canada, Calif. They have two daughters, Sharon and Shelley. Initially, the Simpsons will continue to maintain their home in La Canada with Mr. Simpson headquartered at USLIFE Life Insurance Company in Pasadena, Calif.

Robert J. Casper joined USLIFE in 1988 as president-chief executive officer and a member of the board of directors and executive committee of The United States Life Insurance Company and president-chief executive officer and a member of the board of directors and executive committee of USLIFE Equity Sales Corporation.

Casper has spent his entire career in the life insurance industry. Most recently, he was executive vice president and a member of the board of directors of Home Life Insurance Company of New York to which he was appointed in 1984. Previously, he was senior vice president-marketing from 1982-1984 for that same company.

A native of Wisconsin, Casper started his life insurance career in 1964 as an agent and assistant manager in Green Bay, Wis., with Mutual Life Insurance Company of New York. In 1969 he was appointed manager of that company's office in Tulsa, Okla., and was promoted in 1972 to field sales director of its Los Angeles office. In 1975 Casper became assistant vice president-sales at the company's New York headquarters, and he was promoted in 1980 to regional vice president in Dallas, Texas.

A 1965 graduate of the University of Wisconsin with a BBA in insurance and the Wharton School Executive Program, Casper and his family reside in Monmouth Beach, N.J.

Christopher S. Ruisi joined USLIFE Corporation in 1974. Prior to his new position, Ruisi served as executive vice president- administration and senior officer for the company's new facility located in Monmouth County, N.J.

In his new position, Ruisi will assume additional responsibility for other corporatewide administrative functions. He will also continue to serve as the senior officer in charge of the USLIFE Operations Center in Neptune N.J., which is the home of the company's group life and accident and health insurance operations and other corporate and subsidiary support functions.

Ruisi is a graduate of St. Francis College and holds a B.A. degree in psychology. He and his wife, Paula Marie, and their three children reside in Staten Island, N.Y.

DENVER (MARCH 27) PR NEWSWIRE - Apache Corp. (NYSE: APA) announced today that Richard Zieren has accepted the position of associate general counsel at Apache headquarters in Denver. Zieren will have responsibility for corporate legal matters.

Active in the oil and gas business for the past 15 years, Zieren joined Apache's region office in Tulsa in 1986 as associate general counsel with primary responsibility for oil and gas matters. Before coming to Apache, he was general counsel with Unit Corp. in Tulsa.

Zieren earned a bachelor's degree in accounting from the University of Illinois and a master's of business administration and juris doctorate from the University of Oklahoma. He has served on various committees of both the Oklahoma Petroleum Association and the Mid-Continent Oil and Gas Association.

Assuming the post of associate general counsel in the Tulsa region office is Thomas P. Schroedter. Schroedter was formerly a partner with the Tulsa law firm Pray, Walker, Jackman, Williamson and Marlar, specializing in oil and gas law.

Schroedter received a bachelor's degree in political science from Duke University. He holds a juris doctorate from the University of Tulsa where he is currently an adjunct professor of oil and gas law. Schroedter is the chairman of the Oklahoma Independent Petroleum Association's legal committee and serves as an advisory member on its board of directors.

Apache is an independent oil and gas exploration and production company with securities trading on the New York and Midwest Stock Exchanges (symbol APA).

PARK RIDGE, NJ (MARCH 27) PR NEWSWIRE - Sony Engineering and Manufacturing of America (SEMA), has been formed as a new operating unit of Sony Corporation of America and will be headed by Kunitake Ando as president and chief operating officer, it was announced by Masaaki Morita, chairman and chief executive officer of Sony Corporation of America and

deputy president, Sony Corporation. Morita will also serve as chairman of SEMA.

"To enhance the potential of Sony's growing scope of American manufacturing, engineering, and R & D activities, we have established SEMA in order to centrally optimize the capabilities of Sony's current and future local U.S. manufacturing and engineering resources," Morita said. "Under the direction of Kuni Ando, the United States facilities which make up SEMA will maximize their integration domestically, as well as globally within Sony's worldwide manufacturing network."

Headquartered in Park Ridge, N.J., SEMA will include the manufacturing and engineering activities of Sony's U.S. facilities dedicated to production of consumer and industrial display products, professional audio and video products, and audio speakers. It will also work closely with Sony's planning activities and global business groups to develop and implement long range manufacturing plans.

"Since establishing our first manufacturing facility in San Diego in 1972, we have invested nearly $1 billion in the steady enhancement of our ability to supply the United States and other markets with products made in this country," Morita continued. "And, as we plan to invest a similar amount over the next three to five years, it is important that we develop local mechanisms for directing and integrating the various manufacturing and engineering operations as they grow. We also believe that SEMA will serve to strengthen our long-term commitment to contributing and being a part of the local U.S. communities where we operate."

Ando was born in 1942 and holds degrees from Bucknell University and the University of Tokyo. During his career with Sony he has been responsible for strategic planning related to Sony's establishment of overseas manufacturing, has served as manager of corporate planning for Sony Corporation of America, and as deputy president of Sony Pruco Life Insurance Company. Ando and his wife, Keiko and daughter, Maki, reside in Ft. Lee, N.J.

LOS ANGELES (MARCH 27) PR NEWSWIRE - IDB Communications Group Inc. (NASDAQ: IDBX) today reported results for the year and quarter ended Dec. 31, 1989.

Revenue for 1989 was $60,746,000, up 203 percent from revenue of $20,079,000 for the year ended Dec. 31, 1988. Operating income increased 528 percent to $11,918,000 versus $1,899,000 in 1988. Net income was up 325 percent to $1,796,000, or 36 cents per share, as compared to $423,000, or 9 cents per share, for the prior year.

For the fourth quarter, revenue was $19,172,000 versus $4,553,000 last year. Operating income was $31,157,000 as compared to a loss of $1,491,000 one year ago. Net income was $300,000, or 6 cents per share versus a loss of $1,381,000, or 28 cents per share in 1988. In the fourth quarter, the company reduced its estimated effective income tax rate and sold a 50 percent interest in certain operating equipment. These items increased fourth quarter net income by approximately $550,000.

"The results for the year are in line with our expectations," said Jeffrey Sudikoff, chairman and chief executive officer. "The acquisitions of Hughes Television Network and CICI significantly increased our revenue during the year. Additionally, revenue from internal growth increased by approximately 50 percent."

"We were particularly pleased with the operating income levels attained by the company during the year," stated Edward Cheramy, president. "Net income, however, was impacted by the debt incurred to finance the two acquisitions."

IDB Communications Group Inc. is a leading supplier of transmission and distribution services for domestic and international radio, television and data/voice communications.

NEW YORK (MARCH 27) PR NEWSWIRE - Whitehall Corporation (NYSE: WHT) Chairman Lee D. Webster yesterday rejected a request by Cambridge Capital Fund, L.P. for a meeting to discuss a negotiated transaction in which Cambridge Capital, or an affiliated buyer, would acquire Whitehall Corporation, Cambridge Capital announced today. The rejection was made during a phone conversation between Webster and a principal of Cambridge Capital.

In a letter delivered to him yesterday morning, Webster was asked to advise Cambridge Capital of his intentions regarding the request no later than noon, New York time, today. Cambridge Capital said it received no further communications from Webster within that time frame.

Cambridge Capital intends to nominate its own slate of directors to run in opposition to those of management at Whitehall's upcoming annual meeting of stockholders, scheduled for April 23, 1990. Cambridge Capital will distribute proxy material upon receiving clearance from the Securities and Exchange Commission, which it hopes to obtain shortly.

Cambridge Capital Fund, L.P. is one of a family of funds with aggregate capital of over $500 million.

PITTSBURGH (MARCH 27) PR NEWSWIRE - Howard M. Love, chairman and chief executive officer, and James S. Pasman, Jr., president and chief operating officer of National Intergroup Inc. (NYSE: NII), today sent the following letter to NII's shareholders:

We have reviewed the Centaur Group solicitation materials and have also met twice with two of your principals to discuss any suggestions they might have with respect to the future of the Company. Now, having heard Centaur out, we continue to believe that they have nothing to add to our

existing restructuring program.

We remain convinced that our program will maximize stockholder value and that the Centaur proposal is a vague and illusory plan that will impair the value of our on-going businesses and could derail transactions already in progress.

While we see significant long-term value in the Company, we believe Centaur's $29.34 per share amount for selling or liquidating the Company today is pure fantasy, and we think it is wholly inappropriate for them to ask you, the stockholder, to trust them while they conduct their experiment. If they believe the Company can fetch that amount now, they should stop talking and make a firm cash offer to buy the Company for that amount. Accordingly, we sent a letter to Centaur today setting forth our views.

We believe that it is in your best interest to continue to protect your investment in the Company by supporting the current restructuring program and rejecting Centaur's attempt to seize control and liquidate your Company. YOUR BOARD OF DIRECTORS URGES YOU TO COMPLETE, SIGN AND DATE THE ENCLOSED BLUE REVOCATION CARD. Keep your by-laws intact and enable us to deliver to you the value inherent in your Company.

If you have any questions, please call us toll-free at 800-535-2786. Your Board appreciates your support and encouragement, and we remain committed to continuing to act in your best interests.

Sincerely, /s/ Howard M. Love and James S. Pasman, Jr.

DANIA, FL (MARCH 27) PR NEWSWIRE - Carnival Air Lines today announced the airline will begin flying from New Orleans and Nashville beginning April 1 1990 as part of its regular scheduled jet service. These cities have been added in place of Pittsburgh, Hartford, Detroit and Miami. Carnival Air Lines now flies from seven U.S. cities to Nassau in The Bahamas.

Carnival Air Lines' new schedule includes Tuesday and Friday departures from Nashville, and Monday and Friday departures from New Orleans. Round-trip airfare to Nassau is available from these cities.

Carnival Air Lines will continue to fly from Cincinatti (Wednesdays and Saturdays), Cleveland (Wednesdays and Saturdays), and Baltimore (Thursdays and Sundays), as part of the summer program.

In addition, scheduled flights depart from West Palm Beach on Wednesdays and Saturdays, and once daily from Fort Lauderdale. Night flights are available from Fort Lauderdale on Wednesdays, Thursdays, Fridays and Saturdays.

Carnival Air Lines currently offers a $59 round-trip "Play Day" package to Carnival's Crystal Palace Resort & Casino, Nassau's newest mega-resort on the "Bahamian Riviera." The special round-trip package is available to one-day vacationers departing from Fort Lauderdale or West Palm Beach airport.

All-inclusive summer packages for three-, four-, and seven-night stays at Carnival's Crystal Palace Resort & Casino also are available. Budget Saver packages begin at only $319 for three nights from Cincinnati (Wednesdays), $299 from Nashville (Fridays), $319 from New Orleans (Fridays), $329 from Cleveland (Wednesdays), and $339 from Baltimore (Thursdays).

Sun Saver packages begin at only $359 for three nights from Cincinnati (Sundays), $339 from Nashville (Sundays), $359 from New Orleans (Sundays), $369 from Cleveland (Sundays), and $379 from Baltimore (Sundays).

Vacationers taking advantage of these special packages will receive roundtrip jet transporation, roundtrip transfers airport/hotel, $25 match play coupon for use at Carnival's Crystal Palace's 30,000 square-foot casino, lounges and towels at poolside and beach area, a manager's Monday night cocktail party and daily activities and entertainment, plus a special coupon book featuring discounts at Nassau's newest mega-resort.

A special package rate of $139 will be available for children under 12 accompanied by two full-fare paying adults sharing the same room.

For information and reservations, call Carnival Air Lines at 800-222-7466.

#90086p0342 03/27/1990 ~PR Newswire

GREENVILLE, MI (MARCH 27) PR NEWSWIRE -- The first successful field trial results of genetically engineered cotton and advances in insect-resistance for cotton were among the announcements made today at a press conference by Calgene, Inc. (NASDAQ: CGNE), a leading agricultural biotechnology company.

Making these announcements at Stoneville Pedigreed Seed headquarters was Robert Goodman, Ph.D., executive vice president of research and development at Calgene. Charles E. Hess, Ph.D., assistant secretary of

science and education for the United States Department of Agriculture (USDA), spoke on the USDA's commitment to technological advances in agriculture and their impact of the cotton industry.

Utilizing recombinant DNA technology, Calgene scientist have isolated proprietary genes for insect resistance and for safening plants for use with environmentally benign weed control chemicals. Results of the first field trials conducted with plants engineered for use with the herbicide bromoxynil were disclosed by Calgene today.

Many herbicides used in cotton production persist in the environment. In contrast, bromoxynil is biodegradable, breaking down rapidly into harmless components in the soil. Bromoxynil is currently applied only to crops such as corn, wheat and barley, which are naturally safened. Calgene's herbicide-safening breakthrough allows bromoxynil to be applied to broadleaf crops, such as cotton, for the first time.

Bromoxynil-safened cotton will produce significant benefits for farmers and for the environment. According to Robert Goodman of Calgene, "U.S. cotton farmers currently spend over $150 million annually for weed control yet their crops still suffer yield and quality losses due to weed infestation. The use of these safened cotton seeds will provide growers with an effective weed control system using significantly lower doses of a non-persistent herbicide. The results will be major cost savings, better yields, and a cleaner environment."

Based in Davis, Calif., Calgene is a genetic engineering-based seed, food and specialty chemical company, with leading U.S. market positions in planting seed for canola (edible rapeseed), cotton, alfalfa and potato tubers.

#90086p0347 03/27/1990 ~PR Newswire

PASADENA, CA (MARCH 27) PR NEWSWIRE - Countrywide Credit Industries Inc. (NYSE: CCR) today announced that unaudited net earnings for the fourth quarter ended Feb. 28, 1990, were $3,450,000, or $.20 per primary share and $.19 per fully diluted share. Net earnings for the comparable year-ago quarter were $1,679,000, or $.10 per share, both primary and

fully diluted.

The company's board of directors declared a cash dividend of $.07 per share for the quarter, payable on April 25, 1990, to shareholders of record on April 4, 1990.

Unaudited net earnings for the year ended Feb. 28, 1990, were $13,085,000, or $.74 primary earnings per share and $.72 fully diluted. Prior-year net earnings, before an extraordinary item, were $10,840,000 or $.63 per primary share and $.61 per fully diluted share. The company reported in the prior year an after-tax extraordinary gain of $2,314,000, or $.13 per primary share and $.12 per fully diluted share. The gain was the result of the company's repurchase of $18,732,000 of its 7 percent Convertible Subordinated Debentures due 2011.

"We are pleased with the significant progress the company has made during the past fiscal year," commented David S. Loeb, chairman. "Our annual revenues, net of interest expense, surpassed $100 million for the first time in our history. Annual loan production was a record $3.6 billion, and the servicing portfolio stood at a record $12.5 billion at year end. Earnings for the full year ended Feb. 28, 1990, were 21 percent higher than the comparable results for the prior year. Fourth-quarter earnings for the year just ended were double the earnings of the prior year's fourth quarter.

"Looking forward we are optimistic about the company's earnings prospects for the new fiscal year," Loeb added. "We expect that our strong financial position, including credit lines from the country's leading commerical banks, our $12.5-billion servicing portfolio and loan origination network will lead to increased earnings in the coming year."

Countrywide Credit Industries Inc. is engaged primarily in the mortgage lending business, originating, selling and servicing residential mortgage loans. Countrywide operates through a nationwide network of approximately 100 offices serving real estate brokers and homebuyers, as well as mortgage brokers. Countrywide also operates through a correspondent loan program serving financial institutions in all 50 states and through a newly formed consumer division serving individual homebuyers and homeowners directly.

BRONX, NY (MARCH 27) PR NEWSWIRE - Since Nov. 29, 1989, Mogen David

Kosher Meat Products Corp. (the company) has been a party to a manufacturing agreement pursuant to which all of its products have been manufactured and packaged by Shofar Kosher Foods, Inc., under the company's name and/or trade logos, Mogen David announced today. Shofar is engaged in manufacturing and distributing kosher products similar to those sold by the company.

On March 12, 1990, Shofar filed a petition for relief pursuant to Chapter 11 of the Bankruptcy Code. Immediately thereafter, Shofar advised the company that it was no longer able to manufacture and process products under the terms of the November 1989 manufacturing agreement.

In order to insure a continued supply of its products, on March 24, 1990, the company entered into a new manufacturing agreement with Shofar pursuant to which all of the company's products will continue to be manufactured and packaged by Shofar under the company's name and/or trade logos. Shofar will provide for the delivery of products to the company's customers.

This agreement is scheduled to become effective by April 7, 1990. The agreement has been submitted to the Bankruptcy Court for approval. The company must also obtain releases from its union and truck leasing obligations.

CONTACT: Darren Berger of Bangser Klein & Rocca, 212-856-5828, for Moren David.

WILMINGTON, DE (MARCH 27) PR NEWSWIRE - The board of Imperial Chemical Industries PLC of London has appointed Colin Short to be an executive director of the company, effective June 1, 1990, it was announced today.

Short, a fellow of the Institute of Chartered Accountants in England and Wales, will succeed Alan Clements at the end of the year as group finance director. Clements, an ICI director since 1979, is retiring in December when he will reach the retirement age of 62.

Short was, until recently, a vice president and the treasurer of Chevron Corp. He was a vice president and the chief financial officer of Gulf Oil Corp. prior to its acquisition by Chevron in 1984. Short was born in Carmarthen, Wales, in 1934, and joined Gulf in London in 1968. His subsequent posts included four years as treasurer of Gulf's European operations from 1975 to 1979.

Commenting on the appointment, the chairman of ICI, Denys Henderson, said, "We are delighted that Mr. Short has agreed to join us. His wide range of

international experience will complement the strengths of our existing financial team."

NEW YORK (MARCH 27) PR NEWSWIRE - Michael A. Carpenter, president and chief executive officer of Kidder, Peabody, was elected to the additional post of chairman, the board of directors of Kidder, Peabody Group Inc. announced today. Carpenter fills the position left vacant by Silas S. Cathcart, who retired in January.

Carpenter, 42, joined Kidder in January 1989 as president and chief executive officer from GE Capital, where he had been an executive vice president with responsibility for seven financial services businesses. GE Capital's corporate finance group continues to report to Carpenter.

Two Kidder executives were elected to the board: Scott C. Newquist, managing director and head of Kidder's investment banking group, who joined the firm in May from Cambridge Capital Holdings Inc., where he was a partner, and Richard W. O'Donnell, who recently was named chief financial and administrative officer of Kidder. O'Donnell had been managing director-operations for the firm, and is a former corporate treasurer of Lehman Brothers Kuhn Loeb.

Kidder, Peabody is a leading global investment banking and brokerage concern. GE Financial Services holds an 80 percent interest in the 125-year-old company.

CHICAGO (MARCH 27) PR NEWSWIRE - Johnson Products Co., Inc. today (AMEX: JPC) reported a net profit on higher sales for the second quarter ended Feb. 28, 1990.

Second quarter sales were $8,166,000, up 13 percent from $7,238,000 for the corresponding quarter last year. Net income was $208,000 or five cents per share, compared with a net profit of $22,000 for the fiscal 1989 second quarter.

Net sales for the first six months were $14,312,000, up 8 percent from $13,214,000 reported in the first half of 1989. Net income was $628,000, or 16 cents per share, including a gain of $369,000 from a previously reported sale of common stock of Johnson Products Nigeria and the utilization of a tax loss carryforward credit of $233,000. For the first six months last year, net income was $1,780,000, or 44 cents per share. Last year's net income included the previously reported $2,200,000 gain on the sale of real estate and the utilization of tax loss carryforward credits.

The company reported income from operations of $615,000 for the first half of 1990 versus a loss from operations of $65,000 for the same period last year.

Eric G. Johnson, president and chief executive officer, stated, "Higher sales coupled with a reduction in cost of sales contributed to our profitability in the second quarter."

Johnson Products manufactures and markets personal care products for the retail and professional markets in the United States and overseas, under such leading brand names as Gentle-Treatment, Ultra Sheen, Classy Curl, Sta-Sof-Fro and Sof N' Free.

#90086p0378 03/27/1990 ~PR Newswire

CLEVELAND (MARCH 27) PR NEWSWIRE - Blue Cross & Blue Shield of Ohio (BCBSO) has reported to the Ohio Department of Insurance net income of $7 million and year-end surplus reserves of $102 million in its audit just completed for 1989.

The audit, conducted by the accounting firm of Ernst & Young using Generally Accepted Accounting Principles (GAAP), also showed 1989 net premiums earned totaling $1.4 billion. Total reserves for policyholders' protection improved $7.3 million from the previous year- end total of

$94.7 million under GAAP.

The company reports to the Ohio Department of Insurance using Statutory Accounting Principles (SAP), which treats capital assets, such as equipment and computer software, and profits from subsidiaries differently from the more generally used GAAP. Under statutory reporting, BCBSO had a 1989 net loss of $5.6 million. Nevertheless, statutory surplus was $54.7 million, an increase of $6 million from the previous year.

BCBSO experienced positive cash flow from operations of $31 million, according to the audited financial statements. Cash and investments in marketable securities totaled approximately $179 million at Dec. 31, 1989, versus $158 million the year before. Total liquid assets at year-end, representing cash, investments and accounts receivable, were $392 million.

Ernst & Young also performed certain procedures to determine BCBSO's performance regarding administrative expenses in comparison with the company's own 1986 financial projections for the merger of the Cleveland and Toledo Blue Cross plans. Ernst & Young found that BCBSO's actual administrative expenses for 1989 were nearly $2 million less than had been projected in 1986.

Actual administrative expenses of the parent company were $132.5 million in 1989, excluding administrative expenses of subsidiaries, versus $134.4 million originally projected. The original projections were calculated for the parent company only, exclusive of subsidiary expenses.

WILSON, NC (MARCH 27) PR NEWSWIRE - John A. Allison IV, Chairman and

Chief Executive Officer of BB&T Financial Corporation (NASDAQ-NMS: BBTF), and James H. Spearman, Chairman and Chief Executive Officer of Gate City Federal Savings and Loan Association, today jointly announced the aproval by the respective Boards of Directors of an Agreement and Plan of Reorganization to provide for the acquisition of Gate City by BB&T.

Terms of the agreement and related Plan of Conversion provide for the conversion of Gate City from a mutual to a capital stock savings bank, and for the simultaneous acquisition of Gate City by BB&T. The conversion and acquisition transaction is subject to a number of conditions, including approval by applicable regulatory authorities and the affirmative vote of a majority of the eligible members of Gate City Federal Savings and Loan Association. The conversion and acquisition will have no effect on Gate City's customer relationships. Upon completion of the transaction Gate City will become a wholly-owned federal savings bank subsidiary of BB&T.

In connection with the conversion and acquisition, shares of BB&T common stock will be offered in a subscription offering to eligible account holders as of December 22, 1989 and voting members of Gate City. The Plan of Conversion as adopted by Gate City currently provides that the subscription offering price will be equal to 95 percent of the last sale price of the BB&T common stock on the day following the expiration of the subscription offering. In addition, the Plan of Conversion does not currently provide for an offering to the public of the BB&T stock not subscribed for by the Gate City account holders and voting members. The provisions in the Plan of Conversion relating to the subscription purchase price discount and the offering of BB&T stock only to account holders and voting members are subject to receipt of appropriate waivers by the Office of Thrift Supervision, whose approval is required in connection with the conversion and acquisition. There can be no assurances that such waivers will be received. The failure to obtain either waiver will result in amendment to the Plan of Conversion to eliminate the subscription purchase price discount and/or to provide for an underwritten offering to the public of the shares of BB&T stock not subscribed for by Gate City's account holders and voting members. The number of shares to be offered in the subscription offering will be determined by dividing the pro forma market value of Gate City, as determined by an independent appraiser, by 95 percent of the last sale price of BB&T common stock on the day following the expiration of the subscription offering. The offering will be made only by means of a prospectus. BB&T estimates that the acquisition will be anti-dilutive in terms of earnings per share to BB&T shareholdrs on a pro forma basis.

BB&T is the oldest bank in North Carolina having been organized in 1872. With over $300 million in capital, it is one of the Carolinas' strongest financial institutions. Through its subsidiary banks in North Carolina and South Carolina, BB&T Financial Corporation operates 191 offices in 105

communities. BB&T Financial Corporation common stock is traded on the NASDAQ National Market System and is listed under the symbol BBTF.

WEIRTON, WV (MARCH 27) PR NEWSWIRE - Herbert Elish, chairman and president of Weirton Steel Corp. (NYSE: WS), stated the company has been unable to achieve expected operating levels during the first quarter, after a planned shutdown of its hot strip mill, which was part of its modernization program.

Due to this situation, the company expects to report that earnings for the first quarter ending March 31 will be lower than the $6.1 million earned in the first quarter of 1989. The current situation is attributable to difficulties incurred in returning the mill to full operation after a planned outage resulting in unscheduled downtime and reduced shipments. Management believes the revamped hot mill will operate at expected levels, but current operating problems could continue into the second quarter.

In 1989, the Weirton, W.Va.-based integrated steelmaker earned $16.0 million, or $.77 a share on revenue of $1.329 billion.

COLTON, CA (MARCH 27) PR NEWSWIRE - Stater Bros. Markets, the no. 1 supermarket chain in Riverside County and the Greater Inland Empire, announces the opening of a new Stater Bros. market. The Stater Bros. supermarket is located at the intersection of Blaine and Iowa streets in Riverside, Calif.

Jack H. Brown, chairman, president, and chief executive officer, stated, "All of us at Stater Bros. Markets are really excited about serving our "valued" customers in the University area with this new and modern supermarket, especially since we are Riverside's 'hometown' supermarket chain."

The new Stater Bros. supermarket will be in excess of 35,000 square feet and will feature Stater Bros.' "famous" service meat department as well as

a service delicatessen, a fresh on-premise service bakery department, a garden-fresh produce department, and Stater's low-priced, quality grocery merchandise. The full service meat department includes a 'personal' butcher to assist in selecting "just the right cut of fresh meat" for the customer's dining pleasure. Only at Stater Bros. do customers have their own 'personal' butcher. At Stater Bros., "It's our meat that made us famous."

This new Stater Bros. supermarket will be the 102nd supermarket in the Stater Bros. supermarket chain and the company's 32nd supermarket in Riverside County. The first Stater Bros. Market in Riverside was built in the early 1940's on University Avenue, and Stater Bros. has been serving the City of Riverside for over 50 golden years.

Stater Bros. Markets serves valued customers in each of the five counties of Riverside, San Bernardino, Orange, Los Angeles, and Kern.

There are nearly 8,000 members of the Stater Bros. "family" of employees.

VANCOUVER, BRITISH COLUMBIA (MARCH 27) PR NEWSWIRE - CCC Coded Communications Corp., (Vancouver: CCE) today announced, as expected, a net loss for the fourth quarter of fiscal 1989, ending Dec. 31, 1989. For the last quarter of the year, the net loss was $371,900 (Canadian $438,000), or $.04 per share, compared to a net loss of $221,700 (Canadian $270,400), or $.04 per share, in the same quarter last year. Revenues in the recent quarter were $385,800 (Canadian $454,000), down from sales of $589,100 (Canadian $718,400) last year.

For the year, the net loss was $1,016,800 (Canadian $1,196,000), or $.10 per share, compared to a net loss of $434,800 (Canadian $530,200), or $.05 per share, for fiscal 1988. Revenues in fiscal 1989 were $1,852,400 (Canadian $2,179,000) compared to $2,769,900 (Canadian $3,378,000) last year.

Robert Hillman, chief executive officer and president of Coded, commented, "Our financial performance will improve in 1990. Based on recent proposal activity, we expect revenues to increase dramatically this year, although customer delivery requirements indicate this growth will likely come in the second half of the year.

"We successfully completed the installation of our equipment for IBM's mobile date communications system in December and are awaiting final approval of the pilot program. All indications are the pilot will be a

success, and volume equipment orders are anticipated for release late this year. The go-ahead on this program will be a major milestone for Coded."

He added, "The loss in the last quarter of the year was larger than anticipated, and resulted from delays in completing orders and a cost overrun on the IBM pilot system contract."

Hillman noted the loss in 1989 weakened Coded's financial condition and the company was actively pursuing the financing needed to complete development programs and fund anticipated working capital requirements.

CCC Coded Communications Corp. manufactures and designs digital communications equipment used in land mobile radio systems.

PLYMOUTH MEETING, PA. (MARCH 27) PR NEWSWIRE - Bjorn Bayley, president of IKEA in North America, has decided to leave IKEA to start his own business.

Bayley has been with IKEA for 21 years in various positions. Most recently from 1979 through 1986, he held the position of president for IKEA Canada Limited and since then he has been responsible for IKEA in North America. Under Bayley's direction, IKEA entered the U.S. market and he now leaves behind seven stores in Canada, four U.S. stores (Philadelphia, Washington, Baltimore and Pittsburgh) as well as three stores under construction (Elizabeth, N.J., Burbank, Calif. and Hicksville, Long Island, N.Y.)

Bayley will be succeeded by Goran Carstedt, who comes to IKEA from the Volvo Corp. in Sweden. He has managed several areas of operation, including responsibility for corporate-wide planning and the Volvo Car Co. in France. Presently Carstedt is responsible for the automotive branch of Volvo in Sweden.

After extensive introduction into IKEA, he will take over the North American activities in Plymouth Meeting, in Spring 1990.

ATLANTA, (MARCH 27) PR NEWSWIRE - National Data Corp. (NASDAQ: NDTA) announced today that its earnings estimate for the fiscal year ending May

31, will be lower than the $2.25 earnings per share projection made at the beginning of the fiscal year.

NDC earned $1.75 per share for fiscal year 1989. NDC Chairman, L.C. Whitney, attributed the decline to timing issues, principally the faster-than-expected loss of US Sprint Operator Service revenue and the slower-than-expected addition of replacement revenue. Also, implementation of Health Care Electronic Claims Processing contracts continue to lag behind earlier expectations.

Whitney added, "With the successful merchant processing program, continued excellent prospects for additional operator services contracts and the potential in Health Care Electronic Claims Processing, we expect fiscal 1990 and 1991 to reflect continued growth in revenue and earnings."

National Data is a leading independent and global provider of critical and timely information services to the retail, health care, financial and communications markets.

BELMONT, CA (MARCH 27) PR NEWSWIRE - Oracle Corp. (NASDAQ: ORCL), developer and marketer of the ORACLE(R) relational database management system, today announced record revenues for the period ending Feb. 28, the third quarter of its 1990 fiscal year.

For the third quarter of fiscal 1990 ended Feb. 28, revenues increased 54 percent to $236.4 million from $153.4 million in the like period last year. Operating income increased 12 percent to $41.0 million compared to $36.7 million and net income increased 1 percent to $24.2 million compared to $24.0 million in the third quarter of fiscal 1989. Earnings per share this quarter was unchanged from 18 cents in the third quarter of fiscal 1989.

Nine month revenues increased 73 percent to $636.4 million, compared to $367.7 million in the first nine months of fiscal 1989. Operating income increased 46 percent to $105.3 million compared to $71.9 million and net income increased 34 percent to $64.5 million compared to $48.2 million for nine months in the previous year. Nine months earnings per share were 47 cents compared to 36 cents in the first nine months of fiscal 1989 adjusted for the company's 2-for-1 stock split in June of 1989.

"While we were disappointed with a $15 million shortfall on almost $240 million in revenues that went straight to our bottom line," said Lawrence Ellison, Oracle's president and CEO, "we expect to make it up in the

fourth quarter and get back on our annual plan."

Oracle Corp., headquartered in Belmont, is the world's largest supplier of database management software and services. Additional information on the third-quarter results is in the attached schedules.

Oracle Systems Corp. is a publicly-held corporation whose shares are traded on NASDAQ/NMS with ticker symbol ORCL.

NOTE TO EDITORS: ORACLE is a registered trademark of Oracle Corp., Belmont.

#90086p0421 03/27/1990 ~PR Newswire

HOUSTON (MARCH 27) PR NEWSWIRE - Retired Admiral Elmo R. Zumwalt Jr. today responded to Lockheed Corp.'s (NYSE: LK) recent newspaper advertisements relating to NL Industries Inc. (NYSE: NL) and Harold Simmons. Zumwalt stated that "We had hoped that this proxy contest would focus on the critical issues facing Lockheed. Instead, Lockheed has run a campaign of personal attacks of Harold Simmons."

Zumwalt stated, "Lockheed's ads yesterday about proposed transactions between NL and Valhi do not tell the whole story. In each of the transactions Lockheed focused on NL's independent directors -- including me -- reviewed the transactions on behalf of minority shareholders. Rather than criticize Simmons for the proposals that he made to NL, Lockheed should credit Simmons' series of initiatives that, in 1988,

successfully led to a transaction that was, in my view, in the best interests of all NL shareholders. Frankly, I think the ad campaign is a cheap shot."

Zumwalt has been a member of NL's board of directors since 1987 and is a member of the slate that NL will nominate for election to the Lockheed board at Lockheed's annual meeting of shareholders on Thursday, March 29. Other members of the NL slate include retired General Earl O'Loughlin, Former Senator John Tower and Hans Mark, Chancellor of the University of Texas System and a former secretary of the Air Force and deputy administrator of NASA.

NL Industries is a worldwide supplier of titanium dioxide pigments and specialty chemicals.

TACOMA, WA (MARCH 27) PR NEWSWIRE - Tacoma Police announced today that they have arrested a suspect in a double shooting which killed one man Monday, March 19, at 8:15 p.m.

Larry Henderson, 20 years old, of Tacoma, was formally charged today with the first-degree murder of 20-year-old Howard Hare and first-degree assault in the shooting of Calvin Walker, 22. Both Hare and Walker were Tacoma residents.

Police have focused on Henderson since days after the shooting, as a result of informant information. Police cannot provide details of that information without exposing the informants.

Henderson, with his attorney, turned himself in to Tacoma Police detectives yesterday, at approximately 4 p.m. Henderson provided police with a statement, however this information is not at all consistent with the police informant's statements.

Henderson is currently being held at the Pierce County Jail pending hearing and/or the posting of bail.

CONTACT: Mark Mann of the Tacoma Police Department, 206-591-5968, or after hours, 206-851-2988, or pager, 1-597-9989.

#90086p0427 03/27/1990 ~PR Newswire

FAIRFAX, VA (MARCH 27) PR NEWSWIRE - Scottish Heritable Inc. (NASDAQ: SHER), a chemical lime and limestone producer, reported revenues from continuing opertions for the five months ended Dec. 31, 1989 of $15,664,000, compared to $38,034,000 for fiscal year ended July 31, 1989.

The company is reporting results for the five-month period to reflect its new fiscal year-end of Dec. 31. The results include a net loss of $3,824,000 or 99 cents per share.

"This loss is in part the result of a 31-day strike at our Pennsylvania plant during a peak shipping month for crushed limestone," said Neville C. Platt, president and chief executive officer. "Other contributing factors included major kiln repairs at our Virginia facility, which limited our production capacity for almost four months.

"We also conducted a further write-down of nonperforming assets," said Platt. "In addition, the change in our financial year-end to Dec. 31 resulted in a one-time charge for certain year-end related costs for this five-month period."

The loss for the five-month period includes specific write-offs for loan acquisition costs ($130,000) to refinance borrowings at lower interest rates, ineffective plant equipment ($707,000), and aborted acquisition-related costs ($251,000).

A major portion of the nonrecurring charges against profits was incurred during the two months ended Dec. 31, 1989. The loss from continuing operations amounted to $3,476,000 or 90 cents per share, compared to losses of $10,082,000 or $2.62 per share from continuing operations during fiscal year ended July 31, 1989. For fiscal year ended July 31, 1989 the company posted a loss of $11,175,000 or $2.90 per share.

During fiscal year ended July 31, 1989 Scottish Heritable Inc. sold its general contracting and manufacturing divisions to concentrate on its lime and limestone operations in Arkansas, Pennsylvania, Texas and Virginia.

"In refining our company's focus, we have eliminated many nonperforming assets and are well postioned to make substantial progress during the second quarter of fiscal year 1990," said Platt.

#90086p0430 03/27/1990 ~PR Newswire

CALGARY, ALBERTA (MARCH 27) PR NEWSWIRE - Coseka Resources Limited (Toronto: CKS) has announced its year-end results reporting improved operating performance. However, the company's overall financial condition

is virtually unchanged from 1988. As a result, the company is concerned with its ability to meet scheduled principal repayments on the substantial exisiting long-term debt. This concern arises from the continuation of the current product prices combined with higher interest rates and the prospect of cash taxation in the near future.

Funds generated from operations for 1989 were $7.4 million, down 5 percent from $7.8 million in 1988. Net earnings for the year were $100,000 as compared with a loss of $68.5 million for 1988 that included a $63.4 million write-down of assets. Funds from operations and net earnings were reduced in 1989 by a $5.0 million special provision pertaining to the uncertainty of collection of amounts advanced during the year to company operated drilling partnerships.

Crude oil production rose to an average of 2,757 barrels per day, up 11 percent over the 1988 level of 2,476 bpd. This production increase was accompanied by improved oil prices averaging $17.35 per barrel, up 25 percent over the 1988 average of $13.91 per barrel.

Natural gas production averaged 42.3 million cubic feet per day for the year, up 16 percent over the 1988 level of 36.5 mmcfd. Gas prices averaged $1.46 per mcf, up two percent over the previous year's average of $1.42 per mcf.

Oil and gas net revenues reflected these higher production and price levels reaching $28.9 million, a 17 percent increase over $24.7 million in 1988.

As at Dec. 31, 1989, the proven and probable reserves of the company were 214 billion cubic feet of natural gas; 9.3 million barrels of crude oil and natural gas liquids and 760,000 long tons of sulphur. These reserves compare favorably to 1988 levels of 197 bcf; 8.2 mmbbls and 446,000 long tons respectively.

Coseka Resources Limited is a Calgary-based company engaged in the oil and gas business and its shares are traded on the Toronto Stock Exchange.

#90086p0437 03/27/1990 ~PR Newswire

COARSEGOLD, CA (MARCH 28) PR NEWSWIRE - Sierra On-Line Inc. (NASDAQ: SIER) today announced the signing of a non-binding letter of intent to acquire Dynamix Inc.

Dynamix Inc. is a Eugene, Ore.-based software publishing and development company that specializes in entertainment software for use on high-end home computers. Dynamix is best known as the developer of "3Space," a fast and powerful 3-Dimensional modeling and display system use for development of computer simulations. Sierra originally licensed this proprietary software technology from Dynamix last summer.

According to Sierra President Ken Williams, the acquisition of Dynamix represents a strategic move for Sierra. "The Dynamix technologies not only provide superior entertainment products for today's computers, but offer a superior platform for the development of optical-based products for the next generation of computer systems." Dynamix President Jeffrey Tunnell called the move "... a terrific pooling of talents ... through our work over the last month with Sierra (on 3Space licensing) we have found that our development practices and the marketing philosophies of our two companies are very similar. I believe the two companies will work very well together."

Sierra hopes to consummate the acquisition within 60 days, and intends to begin distribution of Dynamix's current products, A-10 Tank Killer and David Wolf: Secret Agent, almost immediately. Sierra also anticipates shipment of four new Dynamix products for the 1990 Christmas season. Sierra is acquiring Dynamix primarily for strategic reasons and believes that the impact of the acquisition on the company's financial standing and results of operations for the fiscal year ending March 31, 1991, will not be material.

Sierra On-Line Inc., located in Oakhurst, Calif., develops premium-priced interactive entertainment software products for the high end of the consumer market. The companies' products are designed primarily for IBM PCs, IBM PC compatibles and computers manufactured by Apple Computers Inc.

CONTACT: Ed Heinbockel, 209-683-4468, or Jeffrey Tunnell, 209-343-0772, both of Sierra On-Line.

(MARCH 27) UPI - Cleveland kept pace with Atlanta for the eighth and final playoff position in the Eastern Conference, while Houston climbed closer to Seattle in the Western for the last spot.

Brad Daugherty scored 26 points to lead the Cavaliers to a 116-95 rout of the Sacramento Kings, keeping Cleveland 1/2 game behind the eighth-place Hawks, who also won Monday. The Rockets socked the San Antonio Spurs 113-95 to move within 1 1/2 games of the SuperSonics.

Cleveland has 14 games left; Houston 13 remaining. The top eight teams in each conference advance to the playoffs while the remaining 11 teams go into the NBA lottery for a chance to pick first in the annual draft.

At Richfield, Ohio, rookie Chucky Brown scored 13 fourth-quarter points including seven in a critical 9-0 run, to power Cleveland.

Cleveland led 91-86 in the final quarter before going on its run to lead 100-86 with 4:46 left. The Cavaliers outscored the Kings 37-22 in the fourth quarter.

Brown, from North Carolina State, made a 15-footer for the first two points of the spurt. Antoine Carr was then called for goaltending on John ''Hot Rod'' Williams' shot that gave the Cavaliers a 95-86 lead. Brown completed a 3-point play and then hit a layup that finished the run, sealing the victory for Cleveland.

''I just tried to go out and play hard and get the team ignited,'' said Brown, who hit six of his seven fourth-quarter shots. ''We seemed to go a little flat tonight. It was slow in the first half.''

Brown finished with 15 points for Cleveland, which has won seven of nine and eight in a row at the Coliseum.

Craig Ehlo scored 22 points and had 12 assists for the Cavaliers. Rodney McCray led Sacramento with 27 points. Wayman Tisdale had 19 points and Harold Pressley added 17 for the Kings.

At Houston, Otis Thorpe scored 30 points and Akeem Olajuwon added 27 and pulled down 18 rebounds to help the Rockets snap the Spurs' five-game winning streak.

''We've got to play every game like it's the last game of the season,'' Thorpe said. ''I just felt that I had to go out and do more.''

Thorpe scored 10 points and the Rockets connected on 72 percent of their shots to hold a 34-26 lead after the first period. Houston increased its lead to 63-49 at halftime.

San Antonio went on a 9-0 run to pull within 74-64 with 5:18 left in the third period, but Houston answered with an 8-0 spurt to lead 86-70 entering the final quarter.

David Robinson led San Antonio with 24 points while Terry Cummings added 18.

''They (the Rockets) played great against us this year,'' Spurs Coach Larry Brown said. ''They'll be a very dangerous team if they make it into the playoffs.''

-- AROUND THE NBA --

Elsewhere in the NBA, Atlanta defeated Denver 113-102, Charlotte clipped New Jersey 97-83, Chicago blasted Phoenix 121-92 and the Los Angeles Clippers outlasted Minnesota 101-96 in overtime.

HAWKS 113, NUGGETS 102

At Atlanta, Dominique Wilkins scored 36 points and Moses Malone added 25 and 18 rebounds for Atlanta, which sealed the victory by outscoring Denver 14-5 in the final 3:37. Joe Barry Carroll led the Nuggets with 18 points.

HORNETS 97, NETS 83

At Charlotte, N.C., Armon Gilliam scored 28 points and grabbed 11 rebounds to lead Charlotte over New Jersey, which suffered its 11th straight loss and 24th consecutive road loss. Dell Curry added 16 points for the Hornets who won for the fourth time in six games. Purvis Short led the Nets with 23 points.

BULLS 121, SUNS 92

At Chicago, Michael Jordan scored all 28 of his points in less than three quarters and Scottie Pippen added 27 to lead Chicago to the rout of Phoenix. Phil Jackson surpassed Ed Badger for most victories by a Bulls rookie coach. Chicago has 45 victories this year; Badger had 44 after the 1976-77 season.

CLIPPERS 101, TIMBERWOLVES 96, OT

At Los Angeles, Charles Smith and Danny Manning combined for 10 points in overtime to help the Clippers end their five-game losing streak. Smith scored four of his 28 points in the extra session, while Manning had six of his 26 points in overtime. Tony Campbell led Minnesota with 27 points.

#90086u0351 03/27/1990 ~United Press International

(MARCH 27) UPI - New violence in the three-week-old strike against Greyhound. Officials say a St. Petersburg-to-Chicago Greyhound bus was hit by at least one bullet late Monday 30 miles west of Orlando, Florida. None

of the 32 passengers aboard was reported injured. On Tuesday, the company is expected to announce its strategy for dealing with the violent incidents that have marred the bitter walkout.

The war of nerves between Moscow and Lithuania continued Monday despite another meeting between Soviet military officers and Lithuanian leaders. A military helicopter dropped leaflets near the Lithuanian parliament building, urging residents of Vilnius to take to the streets Tuesday to protest their government's declaration of independence.

In Moscow, Soviet President Gorbachev told Senator Edward Kennedy Monday he would NOT use force against freedom-minded Lithuania unless lives were threatened. But Lithuanian President Landsbergis says he finds that statement ''very dangerous.'' Landsbergis says it means the Kremlin leader is ''setting a condition under which he could use force.''

(MARCH 27) UPI - The president of Honduras says now that the Nicaraguan Contra rebels in his country have agreed to demobilize, it's time to consider cutting the number of American troops in Honduras. In recent years, Honduras has become disappointed with the U-S military presence because it has received less aid than it expected in return for its friendly ties with the United States.

The Supreme Court is weighing the deductibility of missionary aid. A government lawyer argued before the high court Monday that money parents send to children serving as religious missionaries is an ordinary gift... NOT a tax-deductible contribution to charity. But a lawyer for a Mormon couple from Idaho who want to write off money they sent their missionary sons says they should get the tax break. He says the aid ultimately benefitted the church, NOT the sons. A high court ruling is expected by this summer.

At the Oscars in Los Angeles, the big winner was- ''Driving Miss Daisy.'' The movie took honors for best picture, best actress- Jessica Tandy- original screenplay and makeup. Best director honors went to Oliver Stone for ''Born On the Fourth of July.'' The best actor award was won by Daniel Day-Lewis in ''My Left Foot.'' Denzel Washington of ''Glory'' was named best supporting actor, and Brenda Fricker was a surprise winner in the supporting actress category for her role in ''My Left Foot.''

#90086u0375 03/27/1990 ~United Press International

(MARCH 27) UPI - ALMANAC:

Today is Monday, April 2, the 92nd day of 1990 with 273 to follow.

The moon is in its first quarter.

The morning stars are Venus, Mars and Saturn.

The evening stars are Mercury and Jupiter.

Those born on this date are under the sign of Aries. They include Charlemagne, founder of the Holy Roman Empire, in 742; Italian adventurer Giacomo Casanova in 1725; Danish storyteller Hans Christian Andersen in 1805; French sculptor Frederic Bartholdi, creator of the Statue of Liberty in 1834; French novelist Emile Zola in 1840; surrealist artist Max Ernst in 1891; actors Buddy Ebsen in 1908 (age 82), Alec Guinness in 1914 (age 76) and Jack Webb in 1920; Australian auto racer Jack Brabham in 1926; soul singer Marvin Gaye in 1939 and country singer Emmylou Harris in 1947 (age 43).

On this date in history:

In 1792, Congress passed legislation authorizing the U.S. Mint to coin money, all to be inscribed with the Latin words ''E Pluribus Unum,'' a motto meaning ''Out of Many, One.''

In 1917, President Woodrow Wilson asked Congress for a declaration of war against Germany.

In 1932, Charles Lindbergh left $50,000 in bills in a New York City cemetery in hope of regaining his kidnapped son. Bruno Hauptmann subsequently was found guilty of kidnapping and murdering the Lindbergh child and was executed.

In 1982, Argentine troops stormed the Falkland Islands, overwhelming the small British Royal Marine unit stationed there.

In 1987, the Senate overrode a Reagan veto by one vote to enact a highway bill that authorized states to raise the speed limit to 65 miles an hour from 55 miles an hour in certain areas.

A thought for the day: French novelist Emile Zola wrote, ''Truth is on the march, nothing can stop it now.''

-30- 1951
#90086u0377 03/27/1990 ~United Press International
(MARCH 27) UPI - ALMANAC:

Today is Tuesday, April 3, the 93rd day of 1990 with 272 to follow.

The moon is waxing, moving toward its full phase.

The morning stars are Venus, Mars and Saturn.

The evening stars are Mercury and Jupiter.

Those born on this date are under the sign of Aries. They include historian and story writer Washington Irving in 1783; comedian George Jessel and publisher Henry Luce, both in 1898; actress Doris Day and actor Marlon Brando, both in 1924 (age 66); astronaut Virgil ''Gus'' Grissom in 1926; anthropologist Jane Goodall in 1934 (age 56); actress Marsha Mason and entertainer Wayne Newton, both in 1942 (age 48); and actor-comedian Eddie Murphy in 1961 (age 29).

On this date in history:

In 1860, the Pony Express postal service began with riders leaving St. Joseph, Mo., and Sacramento, Calif., at the same time.

In 1962, the federal government ordered New Orleans to integrate the first six grades of its public schools.

In 1975, President Gerald Ford said the rest of the world should not regard losses in South Vietnam as a sign that American commitments would not be fulfilled elsewhere.

In 1982, Argentina captured the Falkland Islands dependency of South Georgia and the U.N. Security Council demanded Argentina withdraw from the British-ruled islands.

In 1989, Richard M. Daley was elected mayor of Chicago, the post his father had held for 21 years.

A thought for the day: Writing about money, author Washington Irving said, ''That almighty dollar, that great object of universal devotion throughout our land.''

(MARCH 27) UPI - ALMANAC:

Today is Thursday, April 5, the 95th day of 1990 with 270 to follow.

The moon is waxing, moving toward its full phase.

The morning stars are Venus, Mars and Saturn.

The evening stars are Mercury and Jupiter.

Those born on this date are under the sign of Aries. They include English philosopher Thomas Hobbes in 1588; Benjamin Harrison, signer of the Declaration of Independence, in 1726; English physician Joseph Lister, who introduced antiseptic surgery, in 1827; educator Booker T. Washington, in 1856; actors Spencer Tracy in 1900, Melvyn Douglas in 1901, Bette Davis in 1908 and Gregory Peck in 1916 (age 73); novelist Arthur Hailey in 1920 (age 70) and impressionist Frank Gorshin in 1934 (age 56).

On this date in history:

In 1951, Julius and Ethel Rosenberg were sentenced to death in New York for stealing atomic secrets for the Soviet Union.

In 1968, violence erupted in several American cities in response to the assassination of Martin Luther King Jr.

In 1976, reclusive billionaire Howard Hughes died of kidney failure during a flight from Acapulco, Mexico, to Houston.

In 1982, the British fleet sailed to recapture the Falkland Islands from Argentina.

A thought for the day: Booker T. Washington said, ''No race can prosper till it learns that there is as much dignity in tilling a field as in writing a poem.''

(MARCH 27) UPI - TV HIGHLIGHTS:

WEDNESDAY, MARCH 28

6:30 p.m.
PBS, ''Nightly Business Report.''

7 p.m.
(Note: In some regions, news is broadcast at 6 and 6:30 p.m. Check with local affiliates for details.)
ABC, ''World News Tonight with Peter Jennings.''
CBS, ''CBS Evening News with Dan Rather.''
NBC, ''NBC Nightly News with Tom Brokaw.''

8 p.m.
ABC, ''Growing Pains.''
CBS, ''Normal Life'' - The family offers advice to Simon, who is continually getting roughed up by the school bully.
NBC, ''Unsolved Mysteries.''

8:30 p.m.
ABC, ''Head of the Class.''
CBS, ''Sydney'' - Fastidious Matt Keating is roughed up by henchmen and hastily moves into Syd's decidedly unkempt apartment until the danger blows over.

9 p.m.
ABC, ''Doogie Howser, M.D.''
CBS, ''Jake and the Fatman'' - Jake's best friend surfaces in Honolulu, ostensibly on a carefree vacation with his family but actually with a darker purpose in mind, one that could write finis to more than their friendship.
NBC, ''Night Court.''

9:30 p.m.
ABC, ''Anything But Love.''
NBC, ''Dear John.''

10 p.m.
ABC, ''Equal Justice'' - Regular time slot premiere.
CBS, ''Wiseguy'' - Vinnie draws the line at dumping toxic waste and

endangering the health of schoolchildren, and in Lynchboro, McPike and Lorocco take a daring approach to help Volchek free himself from the ghosts of his past.
NBC, ''Quantum Leap.''

11:30 p.m.
ABC, ''ABC News Nightline.''
CBS, ''The Pat Sajak Show.''
NBC, ''The Tonight Show Starring Johnny Carson.''

12:30 a.m.
CBS, ''Night Heat'' - Colby gets shot while investigating a robbery at a pharmacy; Carson copes with the guilt of feeling he should have reacted sooner.
NBC, ''Late Night With David Letterman.''

1:30 a.m.
CBS, ''Nightwatch.''
NBC, ''Later With Bob Costas.''

#90086u0427 03/27/1990 ~United Press International
LOS ANGELES (MARCH 27) UPI - ''Driving Miss Daisy,'' a simple movie about the softer side of racism as told through a Southern black chauffeur and his Jewish matron, was named best picture at the 62nd Annual Academy Awards, and provided Jessica Tandy with her first Oscar in a 62-year career.

Nominated for nine awards, ''Miss Daisy'' also won for screenplay and makeup, making it the biggest winner at the Academy Awards.

The 80-year-old Tandy called her Oscar ''a miracle'' and gently chided the Academy of Motion Picture Arts and Sciences by thanking ''most especially that forgotten man, my director, Bruce Beresford,'' who was not nominated for a directing award.

The evening's biggest surprise was the victory of Daniel Day-Lewis as best actor for his difficult role in ''My Left Foot'' as Christy Brown, a renowned Irish writer and painter who was virtually helpless from cerebral palsy and could write and paint only with his left foot.

The London-born Day-Lewis received a standing ovation when he took the stage to accept the Oscar he won over such better-known actors as Tom Cruise, Robin Williams and Morgan Freeman.

''You've just provided me with the makings of one hell of a weekend in Dublin,'' said Day-Lewis, who spent each working day during six weeks of

filming in Brown's wheelchair, even having crew members feed him his meals.

Oliver Stone, who won the Directors Guild Award March 10, won his second Oscar as best director for ''Born of the Fourth of July,'' about Vietnam veteran Ron Kovic's patriotism turned to bitterness.

''I have so many thanks to give. I want to give it to Ron Kovic for his largeness of heart, and to Tom Cruise for making Ron's dream come true,'' Stone said in accepting the Oscar.

Stone, winner of an Academy Award in 1987 for another Vietnam War movie, ''Platoon,'' said backstage that he was disappointed ''Born on the Fourth'' did not do better. Nominated for eight Oscars, its only other award was for editing.

''It's political and it made a lot of people angry,'' Stone said, adding that ''there was quite a concentration of effort by the right wing against the movie. However, I felt that if you know the truth, you should tell it.''

Denzel Washington became only the fourth black performer to win an acting Oscar when he was named best supporting actor for his role as one of the first black soldiers in the 54th Massachusetts Regiment to fight for the Union in the Civil War in ''Glory.''

''I'd like to pay homage to the 54th, the black soldiers who helped make this country free,'' he said in accepting his award.

''Glory'' won two other awards, for best cinematography, and best sound.

Brenda Fricker was best supporting actress as Christy Brown's mother in the Irish ''My Left Foot.''

''I'd like to thank Mrs. Brown. Anybody who gives birth 22 times deserves one of these,'' she said holding up her Oscar.

Playwright Alfred Uhry won best screenplay written for another medium for ''Driving Miss Daisy,'' his adaptation of his play, and makeup designer Manlio Rocchetti was honored for his work in aging Tandy, Freeman and Dan Aykroyd.

Tom Schulman won the award for best screenplay written directly for the screen for ''Dead Poets Society.''

''Cinema Paradiso,'' an Italian film about a boy who spent his youth in a small theater's projection booth, won the award for best foreign-language film.

The best documentary feature film award went to ''Common Threads: Stories from the Quilt,'' and its producers Robert Epstein and Bill Coutourie.

Best original musical score recognition went to Alan Menken for the animated feature, ''The Little Mermaid.''

The summer blockbuster ''Batman'' took awards in art direction, presented to Anton Furst, and set decoration, which went to Peter Young.

Actor Walter Mathau presented the Jean Hersholt Humanitarian Award to producer Howard W. Koch, a former Academy president and producer of eight past Oscar shows and the movie ''The Odd Couple.''

Legendary Japanese filmmaker Akira Kurosawa, who directed ''Ran,'' ''Seven Samurai'' and dozens of other films, received an honorary Oscar for his life's work.

#90086u0439 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - Movie star Kathleen Turner's husband was the landlord of the ill-fated Happy Land social club and held a 30-year lease on the building where 87 people died in an arson fire, a published report said Tuesday.

Jay Weiss, the real estate agent husband to Turner, who is currently appearing on Broadway in ''Cat on a Hot Tin Roof,'' leased the building from its owner, maverick real estate mogul Alex DiLorenzo III, the Daily News reported.

Weiss's lawyer, Roger Boyle, confirmed his client was a partial owner of the building, but said the corporation Little Peach Realty Inc. was trying to evict the club's operator, Elias Colon, who died in the blaze.

Weiss and Morris Jaffe, his partner, were, ''horrified at the events of this weekend and lament the loss of life which ensued from such events,'' the lawyer said in a statement.

Bronx District Attorney Robert Johnson was investigating the building ownership and lease to determine whether Weiss was liable for allowing the club to continue operating after a city shutdown order.

The fire, which raced through the crowded club early Sunday morning, killing 87 people, was the worst mass slaying in U.S. history and Julio Gonzalez, 36, a Cuban emigre, was charged with 87 homicides.

He has been placed in the Kings County Hospital psychiatric ward in isolation, authorities said.

Turner, who has also starred in ''Body Heat,'' ''Romancing the Stone'' and ''War of the Roses,'' would not comment on her husband's ownership.

She met Weiss while he helped her find an apartment, and they were married in August 1984.

City real estate records show DiLorenzo, who has a checkered past as a landlord, bought the two-story building on Southern Boulevard in 1985 and Weiss signed a 30-year lease on the building on Aug. 1 of that year.

#90086u0502 03/27/1990 ~United Press International

CANBERRA, Australia (MARCH 27) UPI - Nearly 20 percent of Australia's 10.6 million voters rejected the nation's two largest parties in national elections so close the outcome could remain unknown until late next week, election officials reported Tuesday.

With 83 percent of votes counted from Saturday's elections, returns showed nearly one-fifth of the electorate spurned the nation's two major political parties and cast ballots for minority Democrats or independent candidates.

The Electoral Commission said Tuesday the ruling Labor Party had won 73 seats in the 148-seat House of Representatives. The Liberal Party-National Party coalition claimed 68, one independent was voted in and six seats remained undecided.

A second independent, international anti-nuclear campaigner Dr. Helen Caldicott, is given an even chance of capturing a House seat.

A spokesman for the Electoral Commission said the final result, depending on absentee ballots, pre-poll and postal votes, might not be known until the end of next week.

Many of the major party winners owe their victories to second-preference votes passed to them by Democrats, environmentalists and other independent candidates under Australia's complicated preferential voting system.

The Australian Labor Party, led by Prime Minister Bob Hawke, appeared likely to win a record fourth term with a majority margin of three or four seats, down from its 10-seat majority in the previous Parliament.

The major party in the conservative opposition coalition, Andrew Peacock's Liberal Party, appeared to have added seven seats. But its gains were nearly offset by the rout of its junior partner in the alliance, the National Party, which has lost four seats and has been almost wiped out as

a major political force.

If Labor wins, it still will have to deal with a hostile Senate, or upper house, in which the balance of power already is held by the 13-year-old Australian Democratic Party.

The primary message sent by the voters was disenchantment toward the two major parties, which resulted in substantial gains by the Democrats and independents.

The second-preference votes of those who originally voted for minor party candidates will determine who leads the government.

Under the Australian voting system, the second preferences of defeated minor candidates are now being distributed as primary votes to the other candidates designated on their ballots until one candidate exceeds 50 percent of the vote in each seat and is declared elected.

In the period of uncertainty, Hawke has declared himself caretaker prime minister until the election is resolved, leaving the nation's fiscal policy in what one official called a period of ''extreme fragility.''

The election delay means that an expected easing of the 19.5 bank interest rate will have to be delayed at a time when home mortage rates are 17.5 percent and the overseas debt has risen to $100 billion.

#90086u0626 03/27/1990 ~United Press International

SEOUL, South Korea (MARCH 27) UPI - The Supreme Court upheld the death sentence Tuesday for a North Korean woman convicted of placing a time bomb on a Korean Air jetliner that vanished over Southeast Asia in 1987 with 115 people aboard.

However, Kim Hyon-hui, 28, a confessed North Korean agent, was unlikely to face execution. President Roh Tae-woo was expected to grant Kim a pardon so she would be able to tell of alleged North Korean atrocities.

During her trial, Kim often said she would accept execution if it would console the victims' loved ones.

The Supreme Court ruling was terse. As soon as the court session opened, Justice Kim Chu-han said, ''The defendant's appeal is rejected.''

The justice said in a statement accompanying the ruling that the defendant cannot be assumed to have been coerced because she had been trained on how to handle explosives and knowingly participated in the attack.

Defense counsel Ahn Dong-il said following the court session he had no plans to contest the ruling because Kim confessed.

Since her conviction and sentencing, Kim has been living at an apartment under protective custody, prosecution sources said.

Kim has said she placed a time bomb on the airliner on orders from Kim Chong-il, son of North Korean President Kim Il-sung.

She said the president's son ordered the attack hoping to discourage communist bloc and Third World nations from attending the Summer Olympics in Seoul in September 1988.

The bodies of those on board have never been found. Only scattered debris believed to be from the plane has been picked from the sea off Burma.

KAL Flight 858 vanished Nov. 28, 1987, while heading to Bangkok, Thailand, en route to Seoul. Kim boarded the Boeing 707 in Baghdad, Iraq, accompanied by an elderly man. The two were traveling on forged Japanese passports.

They went from Abu Dhabi, United Arab Emirates, to Bahrain, where they were stopped after getting off the flight 858 and trying to catch a plane to Rome.

When Bahrain airport police tried to arrest them, the man killed himself by biting into a poison capsule hidden in a cigarette. Kim tried to do the same, but a policeman snatched the poisonous cigarrette from her mouth.

#90086u0630 03/27/1990 ~United Press International

BEIJING (MARCH 27) UPI - Cambodian resistance leader Prince Norodom Sihanouk charged Tuesday that Vietnam has virtually annexed parts of eastern Cambodia and said he was pessimistic about chances for a quick settlement in the country's 11-year-old guerrilla war.

''Vietnam has swallowed up several parts of Cambodia, has annexed several parts of Cambodia,'' Sihanouk told reporters at a news conference at his residence in Beijing.

Sihanouk, leader of the three-faction exile coalition fighting the Hanoi-backed Cambodian government of Prime Minister Hun Sen, said his allegations were based on reports by resistance agents in territory nominally controlled by Phnom Penh.

He said Vietnam, which borders Cambodia to its east, is administering

Ratanakiri and Mondulkiri provinces, a large chunk of northeastern Cambodia, and had actually moved the frontier into Cambodian territory on a long slice of the country's southeast.

The two northeast provinces are sparsely populated by mountain people, he said, and within their territory, ''Cambodians are becoming an ethnic minority and Vietnamese are becoming a majority.''

The resistance has charged Hanoi is trying to consolidate control of Cambodia despite having officially withdrawn all its troops from the country last fall.

There have been reports in recent months that some Vietnamese military forces have returned. Vietnam has repeatedly denied its combat troops remain in Cambodia.

Vietnam invaded Cambodia in late 1978 and ousted the brutal Khmer Rouge from power, installing a pro-Hanoi government. The resistance has since fought an inconclusive guerrilla war against the Hun Sen regime and the Vietnamese.

Negotiations among the major powers involved and the Cambodian factions had picked up in pace in the past year but have now virtually stalled. China and the United States are key backers of the resistance, while the Soviet Union is Vietnam's major supplier.

''I'm not optimistic'' about the talks, Sihanouk said. ''I don't expect in the near future the problem of Cambodia to be settled.''

''Unless China and Vietnam come to an agreement or compromise, there will be no way for the Cambodians to stop fighting,'' he added.

Hopeful signs had emerged after all sides expressed interest in a proposal for the United Nations to administer Cambodia during a cease-fire and then oversee free elections. But the proposal has snagged on its details.

Vietnam refuses to accept resistance demands that the Hun Sen government be dismantled during the settlement process, and the resistance, backed by China, has rejected Vietnamese demands that the Khmer Rouge be excluded from any future government.

The five permanent members of the U.N. Security Council - the United States, the Soviet Union, China, France and Britain - have been meeting to try to find a solution, but without substantial progress.

Sihanouk also cited another problem, charges that Vietnam has settled 1 million ''illegal immigrants'' in Cambodia.

''We have to send them home before a general election,'' he said. ''We cannot accept that those Vietnamese participate.''

Sihanouk, who has officially moved to a new residence in a resistance-held area of western Cambodia, said he returned to Beijing to be near his 86-year-old mother-in-law and 87-year-old aunt, both seriously ill and in a Beijing hospital.

(MARCH 27) UPI - Witnesses report Soviet military activity in Lithuania... more violence in the ongoing Greyhound strike... and ''Driving Miss Daisy'' wins the Oscar for best picture of 1989. These stories... and more... next from the wires of United Press International.

Moscow once again is moving to quash the nationalist spirit in Lithuania.

A nurse at a hospital in the Baltic republic's capital says Soviet paratoopers stormed into the facility before dawn this morning to drag off Lithuanian young men who had deserted the Red army.

There are NO reports of how many soldiers were arrested, but it is estimated that some 15-hundred Lithuanian soldiers have deserted their units since their homeland declared its independence more than two weeks ago.

A senior Red Army official said last week that the A-WOL troops would be taken into custody without regard of international opinion.

Today's reported action follows yesterday's leafletting of the streets of Vilnius by Soviet helicopters. The leaflets urged Lithuanians to reject the independence call by the Sajudis- dominated parliament.

Lithuanian President Landsbergis says he's hopeful that Massachussetts Democrat Ted Kennedy, who is in Moscow... will act as an intermediary between Lithuania and President Gorbachev .

#90086u0640 03/27/1990 ~United Press International

(MARCH 27) UPI - The Democratic National Committee has announced it will NOT support Illinois Democratic Representative Gus Savage in his bid to retain his seat next November.

D-N-C chairman Ron Brown yesterday declared that the controversial black congressman from Chicago's South Side will NOT receive ''one penny'' from Democratic coffers for alleged racist comments.

His censure from the national committee stems from comments he made last week when he narrowly survived a primary campaign against rival Mel Reynolds.

During the campaign, Savage attacked Reynolds for accepting donations from Jewish groups. After he posted his victory, he resumed discourse on one his favorite topics- how the so-called ''white racist press'' could NOT submarine him.

During the weekend, Brown distance the party from Savage, saying... ''Racism and anti-semitism is disgusting... even more so when it is uttered by someone who chooses to identify himself with a party that has led the fight against bigotry.''

Since being elected representative for the 2nd Congressional District in 1981, Savage repeatedly has inflamed passions of those surrounding him for his reliance on invoking racial invective.

#90086u0645 03/27/1990 ~United Press International

BANGKOK, Thailand (MARCH 27) UPI - Vietnam's Communist Party is burdened by an aging, unrepresentative membership that is often incompetent or corrupt and should be thoroughly purged, the party's monthly journal said.

''Many party organizations and party chapters no longer deserve their name but there is no attempt to reorganize or dissolve them,'' said an unsigned article in the February edition of Tap Chi Cong San, the Review of Communism, according to a translation made available Tuesday.

Vietnam's party leadership has been meeting in Hanoi to set policies intended to improve the party's sagging image and stave off calls for a multi-party system.

The government has moved in the past three years to reform the creaking economy, but the leadership has been far less enthusiastic about making genuine reforms of the one-party system.

The journal said ''bad, opportunistic, degenerate, deviant, divisive, factional and very corrupt people - those who lack combat will and do not deserve the title of party member'' should be expelled from the party.

Groups who are simply ineffective should be ''motivated to forfeit their party membership,'' it said.

The article estimated only 30 percent of the party's nearly 2 million members were performing satisfactorily.

Some 60 percent ''have only cared for their personal interests, (and) have shown no interest in party functions,'' it said.

The remaining 10 percent were ''degenerate and deviant'' leaders who abused power, engaged in corruption and decadent lifestyles.

The article said the percentage of party members who are elderly pensioners has increased to 18.2 percent while those who are workers comprise only 8.8 percent of the party.

''Not a small contingent of party members has become less devoted to the party, indifferent to political issues, pessimistic, discouraged and less confident in the ability of the party and state leadership to solve difficulties and extricate the country from the current crisis,'' it said.

The party journal criticized some local branches for interfering in government administration and economic management and criticized others for abandoning their leadership role.

The article urged party members to participate in the newly liberalized economy by engaging in ''family-based economy work'' - private enterprise and profit-making collectives.

''Party members with capital are authorized to hold shares in those labor collectives ... and to earn interest in accordance with state policies,'' the journal said. ''However, as party members, they must not be exploiters.''

#90086u0698 03/27/1990 ~United Press International

(MARCH 27) UPI - An estimated one-BILLION people around the world tuned in last night to catch the 62nd annual Academy Award ceremony.

The big winner proved to be ''Driving Miss Daisy,'' a simple, earnest drama of the friendship and love that unfolds between two people from different races and classes in the segregated South.

The movie earned the nod as the year's best move... while its star, Jessica Tandy, walked off with her first Oscar.

Compared to the tranquility of ''Miss Daisy'' over several decades... is the rapid-fire changes of the main character in ''Born on the Fourth of July.''

The true-life, epic film about the social and political transformation of Vietnam veteran Ron Kovic, played by Tom Cruise, earned eight nominations.

At last night's presentation, the film earned director Oliver Stone his second best director award as well as an award for editing.

One of the evening's surprises came when Daniel Day-Lewis won the best acting honor for his gripping performance as Irish creative genius Christy Brown.

The audience rushed to its feet to acknowledge the sterling job done by Day-Lewis for bringing to life Brown, a man whose cerebral palsy left him to use his left foot to write and draw.

The award for best supporting actor went to Denzel Washington for ''Glory''... and the best supporting actress Oscar went to Brenda Fricker for ''My Left Foot.''

#90086u0712 03/27/1990 ~United Press International
(MARCH 27) UPI - A United Nations official says the fear is ''justifiable'' that recent changes in Eastern Europe is diverting attention and resources from the world's poorest countries.

Secretary-General of U-N Conference on Trade and Development Kenneth Dadzie made his remarks in a speech yesterday in Geneva. He says that reforms in Eastern Europe may negatively impact poor nations as developing countries send money to prop up weak East Bloc economies.

As Dadzie put it- ''There are justifiable fears that the rising tide of change in Eastern Europe is diverting governmental and corporate attention and resources.''

He also says that the worsened condition of poor nations was caused by policy shortcomings inside the countries themselves... insufficient international support... a growing burden of debt... and the collapse of commodity prices.

Alaska's top environmental official wants to chat with the former captain of the Exxon Valdez for advice about preventing future oil spills.

Alaskan Envrionmental Conservation chief Dennis Kelso said yesterday he met briefly with Joseph Hazelwood after a jury convicted the skipper of negligent discharge of oil in the worst oil spill in U-S history.

Hazelwood was cleared of three more serious charges from the March 24th, 1989 oil spill.

Kelso says that after talking briefly with Hazelwood, it occurred to him that the former Exxon captain might had some good ideas that Alaska could

use in its efforts at improving tanker safety. Kelso plans to pursue the idea with Hazelwood's lawyer.

For now, Hazelwood is back at his Huntington, New York, home to sit out an appeal. The misdemeanor conviction earned him a 90-day jail sentence and a one-thousand-dollar fine... suspended on condition he spend one-thousand hours to help clean-up the oily mess on Alaska's beaches.

#90086u0866 03/27/1990 ~United Press International

CALCUTTA, India (MARCH 27) UPI - A private bus with more than 60 people aboard plunged from a bridge west of Calcutta and struck power lines, igniting the vehicle, killing at least 41 people and injuring 20 others, police said.

The mishap occurred about 11 p.m. Monday near the town of Kharagpura, located about 60 miles west of the West Bengal state capital of Calcutta, police said.

The privately operated bus was carrying more than 60 people from Calcutta to Bhubaneswar, the capital of neighboring Orissa state, when it skidded off a bridge spanning a set of railroad tracks.

The bus snagged on a set of high-voltage power lines and hung from the cables momentarily before crashing to the train tracks, said survivor Madan Das, a trader from the West Bengal town of Ranaghat.

''The bus fell from the bridge and was hanging on the overhead wires. It burst into flame and crashed on the ground, snapping the wires,'' he told reporters.

Police said the massive voltage from the lines caused the vehicle to explode, burning at least 40 people to death at the scene. Twenty-one other passengers were rushed to local hospitals, where at least one more died, police said.

Many of the injured were being treated for serious burns.

A senior police officer said the bodies of the dead were so badly charred that investigators at the scene had been able to identify only one victim.

A firefighting team from a nearby Indian Air Force base was called to extinguish the flames, which took about an hour because of a shortage of water in the area, the senior police official said.

Das claimed the bus plunged from the bridge after the driver lost control of the vehicle when he swerved to avoid a crash with an oncoming truck.

''I was sitting behind the driver and I saw the driver losing control of the vehicle while trying to avoid a collision with a truck coming from the opposite direction,'' Das said.

Das said he escaped from the flaming hulk of the vehicle by kicking out a window and jumping clear.

West Bengal Home Secretary N. Krishnamurthy said senior administrative and police officials were on the scene, trying to determine the cause of the mishap.

The Press Trust of India news agency said firefighting personnel had to have the power in the high-tension lines turned off before they could begin rescue efforts.

Traffic on the Calcutta-Bombay railway route was suspended for three hours while the burned wreckage of the bus was cleared from the tracks, police said.

#90086u0892 03/27/1990 ~United Press International

(MARCH 27) UPI - Investors again shrugged off the dollar's continuing rise against the Japanese yen Tuesday, lifting prices on the Tokyo Stock Exchange from large early declines to a mixed close.

The blue-chip Nikkei Average of 225 selected stocks, which vaulted 1,468.33 points Monday in the second biggest point gain in history, slipped 14.53 points to 31,825.96.

But the broader-based Tokyo Stock Exchange Price Index of all major listed shares climbed 25.45 points to 2,339.08 after rocketing 106.64 points Monday.

Volume was moderate, with an estimated 700 million shares changing hands, compared with 711 million Monday. Advances led declines 631 to 250, with 71 issues unchanged.

Dealers said bargain hunters, expecting the market to surge as the new fiscal year begins, sent a wide range of stocks higher, while others fell on index-linked selling.

The Nikkei Average fell 470 points in early trading before turning higher around midday. The key index lost ground just before the final bell.

Traders said computerized index-linked program sellers battled with individual bargain hunters and corporate investors for control of the

market.

The market disregarded a further strengthening of the dollar which closed at 156.96 yen, up 0.56 from Monday's close on the Tokyo Foreign Exchange.

Leading the advance were machineries, constructions, and electricals, including Sony and TDK.

Losers included real estates, electrical power issues, rubber products and mines, which fell along with the price of gold, traders said.

Hitachi paced the actives, followed by Nippon Steel, Chiyoda Corp., Mitsubishi Heavy Industries and Toyo Engineering.

Elsewhere in Asia, stocks closed mixed in active trading on the Hong Kong Stock Exchange amid some profit taking and consolidation.

The key Hang Seng Index, which climbed 39.86 points Monday, slipped 3.17 points to 3,010.85.

The property sector was the most resilient to the downward trend, rising 31.80 points. Utilities fell 35.36 points, financials lost 8.76 and industrials rose 3.45 points.

Turnover amounted to 1.66 billion shares, compared with 1.73 billion shares Monday.

Analysts said there was some buying interest throughout the day from British and Taiwanese investors but local profit taking pulled the Hang Seng Index lower by the close.

Stock prices closed mixed in light trading on the Singapore Stock Exchange. The Straits Times Industrial Index, which gained 18.66 points Monday, added 3.04 points to 1,607.12. The narrower All Singapore Index dipped 1.79 points to 437.31.

Turnover amounted to 99.9 million shares, compared with 218.5 million shares Monday.

Analysts said market was featureless due to uncertainty in Tokyo. Brokers noted that many large institutional investors stepped to the sidelines. "Cautiousness was the mainstay in the market," one commented.

On the trading floor, Singapore Airlines (foreign shares) paced the advancing issues, followed by Keppel Corp., Insurance Corporation of Singapore, Singmarine and Sembawang Shipyard.

Isetan led the declining issues, followed by Kings Hotel, Cycle and

Carriage, UIC Corp. and Singapore Land.

In Australia, a sell-off in the mining sector following the $21 an ounce drop in gold bullion sent stocks broadly lower in light trading on the Sydney Sharemarket.

Sellers tore into the gold sector, sending the Gold Index plummeting 93.0 points to 1,613.3. The blue-chip All Ordinaries Index, which was unchanged Monday, fell 8.6 points to 1,558.5. Turnover amounted to 77.5 million shares, compared with 68.9 million Monday.

Analysts said speculators sold mining and related issues following Monday's $21 an ounce plunge in the price of gold bullion on global markets.

On the trading floor Western Mining lost 14 cents to$5.08, Homestake Mining fell 20 cents to $1.40, Newmont Mining lost five cents to 95 cents and Placer Pacific fell 12 cents to $3.20.

BHP Gold fell four cents to 54 cents a share and Poseidon Gold lost 15 cents to $2.55, MIM fell three cents to $2.23, CRA Mining lost ten cents to $12.20 and North Broken Hill Mining lost six cents to $2.28. In the banking sector, Westpac Bank, NAB Bank and ANZ Bank all ended lower.

#90086u0927 03/27/1990 ~United Press International
(MARCH 27) UPI - There's word from Lithuania's independent communists that Soviet paratroopers seized a building housing Central Committee offices in Vilnius. An aide to party leader Algirdas Brazauskas says about 40 paratroopers armed with automatic weapons drove up to the building, blocked the entrance and took over the building. Brazauskas himself confirms soldiers now control the building.

South Africa is responding to surge in black and white vigilantism by warning citizens to avoid taking the law into their own hands. The nation's law and order minister issued the warning yesterday- the same day police fired on an estimated 30-thousand anti-government protesters in a black township south of Johannesburg. At least eight people were killed and 350 people were wounded.

It's up to Idaho Governor Cecil Andrus whether to to sign a measure that could become the nation's most restrictive abortion law. Abortion rights advocates vow to boycott Idaho potatoes if Andrus fails to veto the bill. The governor says he is taking the threat seriously and will meet with his advisers before making a decision. The bill is expected to arrive on the governor's desk today.

Oscars were handed out last night. Director Oliver Stone captured one for the film ''Born on the Fourth of July''... but says he wishes the film had achieved greater triumph. It also garnered one other award for best editing. Stone says the movie was- quoting here- ''political and it made a lot of people angry.'' A tale of the soft side of racism, ''Driving Miss Daisy,'' was named best picture.

#90086u0938 03/27/1990 ~United Press International
(MARCH 27) UPI - South Korea's high court upheld the death sentence against a North Korean woman convicted in the 1987 bombing of a Korean Air jet that vanished over Southeast Asia. 115 people died in the crash. Authorites say the confessed North Korean agent is UNlikely to face execution because South Korea's president is expected to grant the woman a pardon so she can tell of alleged North Korean atrocities.

Florida officials say another Greyhound bus apparently was hit by gunfire last night, this time in central Florida. Polk County officials say a Greyhound driver heard what sounded like a firecracker and pulled over to discover a mirror was shot out. Police say it appears that rock salt, and NOT bullets, was used. NO one was hurt. Greyhound holds a Washington D-C news conference to discuss strike-related violence.

California brocoli growers say the president's dislike of the bushy vegetable means increased sales. Barbara Bush yesterday welcomed to the White House a shipment of broccoli from California gorwers, who are doing a brisk business after President Bush remarked that, like new taxes, brocoli will never pass his lips. One grower reports that sales increased 10 percent since last week when Bush made his anti-brocoli remark.

A freeze means extra work for fruit growers and backyard gardeners trying to shield their plants and trees. A cold wave reached across northernmost New England south to West Virginia, with the mercury tumbling below freezing in the mid-Atlantic states. Forecasters say the mostly dry conditions throughout the region would probably prevent widespread crop damage.

-30- 1792
#90086u1017 03/27/1990 ~United Press International
BRUSSELS, BELGIUM (MARCH 27) UPI - The European Commission launched an inquiry Tuesday into whether auto "agents" who buy cars in one country for customers in another are actually illegal "resellers."

Automobile agents thrive in Europe because car prices vary wildly among the 12 nations of the European Community, so the investigation is being closely watched by automakers as well as consumer groups.

Pending the complex review, the Commission ordered Peugeot dealers in Belgium and Luxembourg, where prices are lowest, to supply cars to a French auto agent.

A 1985 EC regulation allowed car manufacturers to establish exclusive distribution networks of authorized dealers, but "agents" are allowed to buy cars from dealers on behalf of specific customers.

The case involves Ecosystem, an auto agent in Rouen, France, which in 1988 imported for its French clients about 4,000 cars, including 1,200 Peugeots mostly from Belgium and Luxembourg.

Peugeot, a French automaker, claimed Ecosystem was actually a "reseller" in violation of the 1985 regulation, and ordered its dealers in Belgium and Luxembourg to stop supplying cars to Ecosystem.

"The key is whether someone is acting as an agent for a customer or buying on 'spec' (speculation)," because the latter would really be a "reseller," said a spokesman for the Commission, the EC executive agency.

He said the Ecosystem case "clearly falls somewhere between," so it is important to clarify the distinction as part of an overall Commission review of auto prices throughout the Community.

To avoid "irreversible" harm to Ecosystem, the Commission ordered Peugeot to allow Ecosystem to buy up to 1,200 cars a year from dealers in Belgium and Luxembourg, under current market conditions, pending the investigation. The Commission said it "attaches considerable importance" to the inquiry as part of a desire to promote price competition in the auto market.

Automobile prices are an area of growing friction among EC countries: a recent study by the European Bureau of Consumers Unions found pre-tax prices to vary by up to 50 percent in different countries, and there is sharp division over whether to retain controls on Japanese imports after the EC's single market takes effect at the end of 1992. France seeks controls for up to ten years to protect its domestic auto industry.

NEW YORK (MARCH 27) UPI - The New York Stock Exchange reported Tuesday these odd lot transactions by principal dealers through NYSE facilities for March 26: Purchases of 328,227 shares and sales of 429,369 shares including 10,783 shares sold short.

-30- 397
#90086u1042 03/27/1990 ~United Press International
CHICAGO (MARCH 27) UPI - A judge's ruling that Sara Lee Corp. copied the packaging for its "Lunch 'N Munch" pre-packaged lunches from a similar product produced by Oscar Mayer will have absolutely no impact, a spokesman for Sara Lee said Tuesday.

U.S. District Judge Barbara B. Crabb issued a preliminary injunction in Madison, Wis., barring Sara Lee Corp. from selling its "Lunch 'N Munch" because of its packaging similarity to Oscar Mayer's "Lunchables."

"The decision has no effect on us since we began selling our product in a new and different package prior to the judge's decision," said Ron Culp, Sara Lee executive director for public relations.

"They (Oscar Mayer) have a package with cellophane. You can see the product inside. It has three windows and is yellow with red lettering. Our new package is white with two windows. "We believe the packaging is sufficiently different." The original "Lunch 'N Munch" package was red cellophane with three windows. "Lunch 'N Munch" is produced by Bryan Foods a division of Sara Lee, which sells its products in the southeastern United States.

Crabb's ruling, released Monday, came as a result of a suit filed Jan. 22 by Oscar Mayer, accusing Sara Lee of infringing on patents, trademarks and

copyrights covering Oscar Mayer's "Lunchables" prepackaged lunches and noting at least six packaging similarities between the two products.

Crabb said she decided to enjoin Sara Lee from selling the similarly packaged product because "many of their common features derive from the novelty of the (Oscar Mayer) '204 patent."

Crabb cited an interoffice memo by a graphics designer for Bryan Foods, saying the "Lunch 'N Munch" package would be "thermoformed by Bryan with minor changes from the Oscar (Mayer) Design." The same memo also noted that the packaging would have only "minor changes" from the Oscar Mayer "Lunchables" package design.

In announcing the court's action, Joel W. Johnson, Oscar Mayer senior vice president for marketing and sales, said the company was "encouraged by Judge Crabb's decision."

"We went to considerable expense to research the Lunchables concept and packaging and brink it to the American Consumer," Johnson said. "We protected Lunchables with all the necessary patents, trademarks and copyrights and are pleased to see that our diligence is recognized," he said.

The Oscar Mayer suit said the packaging of for Sara Lee's "Lunch 'N Munch" imitated the "Lunchables," package, which received Food & Drug Packaging magazine's 1989 Package of the Year Award for excellence.

"Lunchables" is a combination of presliced meat, cheese and crackers separately placed in a package along with a napkin providing consumers with a convenient and easy lunch or snack. The product was introduced in 1988 and has been subsequently introduced very successfully in 70 percent of the U.S. market.

#90086u1060 03/27/1990 ~United Press International

(MARCH 27) UPI - Lithuanian officials say Red Army paratroopers burst in to a hospital in the Baltic republic's capital this morning to arrest 23 army deserters holed up inside. Soviet President Gorbachev has directed K-G-B and Kremlin forces to rein in the freedom-minded state.

Pretoria says it has deployed additional police units to a black township outside Johannesburg where eight anti-government protesters were killed yesterday by security forces. Witnesses say police opened fire into a rally of 30-thousand demonstrators without cause.

''Driving Miss Daisy,'' a subtle tale of racial toleration amid segregation in America's South stole the show at last night's Academy

Award presentation. The film was tabbed best film of 1989, and its star, Jessica Tandy, won best actress. The movie also won for best screenplay and makeup.

Greyhound officials have scheduled a news conference today to announce a strategy of dealing with the acts of violence that have punctuated a three and a half walkout by more than nine-thousand union workers.

Idaho Governor Cecil Andrus says he will confer with several advisers before deciding whether to sign a bill that would become the nation's most restrictive abortion law. His hesitancy follows pro-choice activists vowing to boycott Idaho potatoes if the bill becomes law.

A University of Alabama scientist says American women might lower the chances of developing breast cancer if they switch to soybean-rich diets. Soybean-fed lab rats were seven times less likely to develop breast cancer while Asian women who eat soybean-rich diets are eight times less likely to grow tumors.

WARSAW, Poland (MARCH 27) UPI - Solidarity leader Lech Walesa urged Soviet President Mikhail Gorbachev Tuesday to negotiate with Lithuania and warned the use of force in the dispute would disrupt the new democratic order in Europe.

''I ask you Mr. President to stop using the practice of military pressure and start a political dialogue with the government of Lithuania,'' Walesa said in a statement addressed to Gorbachev.

The statement came hours after Soviet paratroopers dragged Lithuanian army deserters from a pyschiatric hospital in Vilnius and took over the headquarters of Lithuania's independent Communist Party in a forceful reassertion of Moscow's control over the dissident Baltic republic.

Walesa said the use of the military violated the sovereignty of Lithuania, which declared its indepednence from Moscow on March 11.

''The violation of the sovereignty of Lithuania is ... directed against the construction of the new democratic order in Europe,'' he said.

He warned that the history of the Soviet Union and Eastern Europe showed that ''the force and threats used to solve political problems became compromised tools and they were many times condemned by the world public opinion.''

Bronislaw Geremek, chairman of the Solidarity Parliamentary caucus, left for Vilnius Monday to talks with Lithuanian leaders.

The Solidarity newspaper Gazeta Wyborcza said Tuesday that Gorbachev has been under pressure from hard-line forces and ''his field of manuever has been limited.''

The paper said if Moscow used force against Lithuanians it would spark ''a catastrophe not only for Lithuania but also for the process of changes in the Soviet Union.''

Gazeta also said that Lithuania's decision to secede from Moscow put Soviet reformers in a difficult position.

''The decision became an argument for the opponents of not only Lithuania but also against the transformations in the Soviet Union in general,'' Gazeta said.

Also Tuesday, a group called the Federation of Fighting Youth in Warsaw began a national effort to collect signatures on a petition demanding that all governments recognize an independent Lithuania.

BOGOTA, Colombia (MARCH 27) UPI - The government denied charges it has backed down in the war on the country's drug cartels and vowed to uphold ''the defense of the state of law, democracy, and public peace,'' a published report said Tuesday.

A communique signed by the Cabinet of President Virgilio Barco answered allegations made Sunday by resigning Interior Minister Carlos Lemos Simmonds that the government had gone soft on the drug lords.

''We reject the insinuations of ex-minister Carlos Lemos, in which he accuses the rest of the government of a weak and complacent attitude toward organized crime,'' said the communique, which was published in a Bogota newspaper Tuesday.

Lemos Simmonds was forced to resign Sunday after his comments against the leftist Patriotic Union were followed last week by the assassination of the party's presidential candidate, Bernardo Jaramillo.

''We also reject any suggestion that Lemos Simmonds was responsible for the vile assassination of Bernardo Jaramillo Ossa,'' said the Cabinet, which includes the ministers of foreign relations, the interior, defense, and justice among others.

The Patriotic Union, formed five years ago by ex-guerrillas and communist politicians, called for the resignation of Lemos Simmonds after he accused the party of being the political arm of a leftist rebel group waging a guerrilla war on the government.

In recent weeks the press has speculated about possible secret talks between the government and the drug lords, who killed more than 200 people in a bombing and assassination spree last year before calling for peace in January.

There have been no extraditions of wanted drug traffickers to the United States since January. Fourteen Colombians were extradited between September and January, after Barco re-established the policy to battle the warring cartels, and 14 more are in a Bogota jail awaiting extradition.

The Medellin drug cartel has handed over cocaine laboratories, explosives and a helicopter to bring the government to the negotiation table. The Barco administration has so far publicly rejected such talks.

''This is the opportunity to ratify our commitment to the firm and courageous form the president has assumed in the defense of the state of law, democracy, and public peace,'' the Cabinet said.

Horacio Serpa Uribe, a former attorney general, was sworn in Sunday night to replace Lemos Simmonds.

On Monday Serpa Uribe assured reporters presidential elections would take place as scheduled, on May 27, despite a call by opposition parties to postpone the vote because of death threats against the candidates.

Liberal Party presidential candidate Cesar Gaviria is expected to defeat his opponents, the Social Conservative Rodrigo Lloreda and Carlos Pizarro Leongomez of the April 19 Movement, a rebel group that recently signed a peace pact with the government.

#90086u1168 03/27/1990 ~United Press International

BUDAPEST, Hungary (MARCH 27) UPI - The Hungarian airline Malev, which stopped transporting Soviet Jews to Israel because of terrorist threats, suggested Tuesday the Soviet Union play a greater role in resolving the matter.

Airline spokesman Ferenc Urban said negotiations are under way with the Soviet airline Aeroflot and the Israeli airline El Al.

''The shortest distance between two points is a straight line,'' Urban said. ''Now others have to solve the problem of the transportation of Jews to Israel.''

Israel wants direct flights from Moscow to Tel Aviv because it claims there are thousands of would-be immigrants ready to leave but unable to get flights out.

The Hungarian capital of Budapest was one of several European transit points for Soviet Jews leaving Moscow. After Hungary renewed diplomatic relations with Israel last year, Malev began the charter flights to Israel. Regular flights had begun a few months earlier.

But last Wednesday, Malev suspended charter flights carrying Soviet Jewish to Israel through Budapest following threats from a group calling itself the Islamic Jihad for the Liberation of Palestine.

Jihad threatened in a statement released in Beirut to execute three American hostages and warned of attacks on airports and airlines involved in transporting Soviet Jews to Israel. The Americans the group holds are Alann Steen, Jesse Turner and Robert Polhill.

Malev also suspended flights to Beirut in the wake of the threats, officials in the Lebanese capital said.

''Malev felt highly threatened and the threat was directed against all its offices worldwide, not only Budapest airport,'' Hungarian Foreign Minister Gyula Horn said late Monday.

Horn said he hoped conditions would be created so that Malev would feel secure in resuming the charter flights, an allusion to high-level diplomatic negotiations between his ministry and the Israeli counterparts.

Israeli officials estimate as many as 100,000 Soviet Jews will emigrate to Israel in 1990 and up to 500,000 over next five years. The increase in Soviet Jewish imigration to Israel is due to tighter restrictions governing entry of Soviets into the United States and looser Soviet emigration policies.

The Arab League, the Palestine Liberation Organization and many Arab states have expressed concern about the wave of immigration. Palestinians in the territories view any increase in the 70,000 Jewish settlers as a threat.

PITTSBURGH (MARCH 27) UPI - The world's first recipient of a combined heart-liver-kidney transplant died of multi-system failure and infection caused by hepatitis, officials at Presbyterian-University Hospital said Tuesday.

Cindy Martin, 26, of Achbald, Pa., died at 6:04 p.m. Monday, nearly four months after her historic operation, hospital spokeswoman Lisa Rossi said.

John Martin, a draftsman, was with his wife when she died. He planned to return home near Scranton on Tuesday, the hospital said.

Doctors listed the official cause of death as recurrent non-A, non-B hepatitis, resulting in multi-system failure with an overwhelming infection called sepsis, a common post-transplant complication, Rossi said.

''It's a complication that we just aren't able to solve,'' Rossi said. ''It can attack a particular organ and if it's not kept under control it can spread to other organs.''

The hepatitis caused Martin's donor kidney to fail and she also suffered liver failure and problems with her lungs, Rossi said. But there was no sign of rejection to her heart.

''Her heart was fine,'' Rossi said. ''She was a pretty unfortunate person. She was only 26 and this was her second transplant. She was very, very ill.''

Martin underwent the 21-hour, multiple-transplant operation Dec. 3. She had suffered chronic rejection and other complications following an initial heart transplant four years earlier.

Donor organs for Martin's second operation came from a 25-year-old Atlanta woman killed by an automobile. Surgeons initially had predicted the operation would allow Martin, a former secretary, to live normally at least five to 10 years.

Her death is not likely to discourage physicians from attempting a similar operation again in the future, Rossi said.

''If a patient came about whose only second chance for life was to receive these three organs or another combination of organs, and if it seemed like there would be a reasonable prognosis, I'm sure the doctors would try again,'' she said.

But doctors will study Martin's case history closely to ''see what the complications were,'' Rossi said.

Martin's youth was a factor in the optimism initially expressed by her doctors. But following the multiple transplant, her condition continually fluctuated from critical to serious.

Martin had been in serious condition until this past weekend when she weakened and her condition was downgraded to critical, Rossi said.

#90086u1193 03/27/1990 ~United Press International

(MARCH 27) UPI - Fruit farmers and backyard gardeners in the East frantically sought to shield their budding trees and plants from an unseasonable freeze Tuesday while scattered showers swept through Texas and rain dampened the South.

A wave of cold air stretched from northernmost New England as far down as West Virginia, pushing temperatures below freezing in the mid-Atlantic states and near zero by the Canadian border.

Orchardists in the panhandle of eastern West Virginia, where overnight temperatures fell to 26 degrees, used helicopters and huge fans to force warm air down onto crops caught between an early warm spell and then a cold snap.

The early variety of peach trees reached their full bloom as the colder weather returned. ''The closer a tree is to full bloom the more susceptible it is to freezing temperatures,'' said Tara Baugher, extension service specialist at the West Virginia University farm in Kearneysville.

She said there has been spotty damage to peach trees in lower elevations but the fate of the crop will be told in the next several days. ''If the bloom was closer to normal this (weather) would not be a problem,'' she said.

Much the same was done by orchardists in Pennsylvania and western Maryland.

Cold air and clear skies stretched across New England after a day that saw wind gusting into the 50 mph range in some areas. Temperatures remained in the mid 20s to 30s over most of the region.

Thermometers in Concord, N.H., dropped 16 degrees in two hours Monday afternoon as a cold front swept high winds and a snow squall through the city. Visibility was lowered to about 200 yards during the brief squall.

A cold air mass from Canada followed the front through New England. It was expected to keep temperatures around 30 in the day to near zero on the northern borders.

The cold weather also extended to the Midwest, where clear skies prevailed through Wisconsin, Illinois and Missouri, but the weather service reported snow flurries in Sault Ste. Marie, Mich.

Temperatures in Wisconsin were in the upper teens to low 20s, with Milwaukee the warmest at 26 degrees.

A second day of rain began in west Texas, where thunderstorms rumbled through on Monday. Temperatures across the state ranged from 35 degrees at Amarillo to 66 at Brownsville.

A Pacific trough approaching New Mexico brought a widespread cloud cover and a chance of showers in most areas of the state while rain returned to much of Arkansas.

A high-pressure system pushed a rain-bearing cold front out of the South, with light showers and drizzle lingering in Georgia and the Carolinas. Temperatures were chilly but on the rise, ranging from 36 in Knoxville, Tenn., to 69 at Miami Beach.

Sunny skies prevailed in the West, although large patches of morning fog continued along the California coast, and more of the same was expected for the next several days in the Golden State.

Washington enjoyed mostly sunny weather with temperatures above seasonal normals, and Oregon was also sunny and dry except for showers near Eugene.

#90086u1203 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The Commerce Department is considering taking legal action against two chemical companies who have refused to sell an ingredient needed to make poision gas to the Army, administration officials said Tuesday. "The matter is presently under review within the administration. No decision has been made at this time," the Commerce Department said in a statement.

Occidental Chemical Corp., of Dallas, and Mobay Corp., of Pittsburgh, the U.S. subsidiary of the West German firm Bayer A.G., refused to sell the ingredient, thionyl chloride, to the Army because their corporate policies prevented them from assisting in the manufacture of poison gas, officials said.

They are the major American manufacturers of thyionyl chloride, which is used to make Sarin, a lethal nerve agent used in the Army's chemical-filled artillery shells.

The Army needs 160,000 pounds of the ingredient by June to proceed on schedule in the making of new chemical weapons shells, the Pentagon said. The Commerce Department said it has authority under the Defense Production Act of 1950 to legally compel defense-related companies to produce defense materials for the government, and that it is considering taking such action.

President Bush said he wants to ban chemical weapons, but he maintains that the United States must continue to modernize its chemical weapons arsenal until there is a global ban.

#90086u1231 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The Supreme Court ruled Tuesday that the Michigan Chamber of Commerce may not use funds from its general treasury to participate in elections.

The justices, in a 6-3 decision, reversed the 6th U.S. Circuit Court of Appeals, finding that a Michigan law barring such private corporate contributions does not violate the First Amendment.

The corporations can, however, set up separate funds for elections, known as political action committees or PACs, which are subject to record keeping and reporting requirements.

Justice Thurgood Marshall, writing for the majority, said that although the Michigan Campaign Finance Act does ''burden'' the Chamber of Commerce's political expression, the state has an overriding interest in

preventing corporate wealth from unfairly influencing elections.

''Michigan identified as a serious danger the significant possibility that corporate political expenditures will undermine the integrity of the political process,'' Marshall wrote.

He was joined by Chief Justice William Rehnquist and Justices William Brennan, Byron White, Harry Blackmun and John Paul Stevens.

Justices Antonin Scalia, Sandra Day O'Connor and Anthony Kennedy dissented.

Scalia, in a rare and impassioned reading from his dissent from the bench, called the majority's decision ''Orwellian'' and said it ''endorses the principle that too much speech is an evil that the democratic majority can proscribe.''

''Because it is incompatible with the unrepealable political wisdom of our First Amendment, I dissent,'' Scalia wrote.

In other action Tuesday, the Supreme Court ruled the system by which lawyers are paid for handling West Virginia coal miners' black lung benefit claims does not deprive applicants of their due process rights. The decision reverses the West Virginia Supreme Court's ruling that found the scheme unconstitutional.

In the Michigan case, the non-profit Michigan State Chamber of Commerce, formed to promote business interests, accepts corporate monies in the form of dues from its members. The state law, as it applies to such non-profit corporations, prevents them from serving as a conduit for corporate treasury money into Michigan elections.

The Chamber, in 1985, sought to make a direct expenditure through its treasury, in the form of a newspaper advertisement, in an election for a state house seat. State law, however, forbade the expenditure and the Chamber brought suit in federal court charging the law was unconstitutional.

The district court ruled against the Chamber, but the appeals court reversed, ruling the law ''infringes upon speech at the core of the First Amendment.''

Seeking high court review, the state argued that if the ruling were followed, it ''would render unconstitutional as applied to the corporate conduits of business corporations the well-established laws of the United States and at least 20 states barring the expenditure of corporate treasury funds in connection with political elections.''

The federal government, in a friend of the court brief, also sought review.

The government said the decision would ''permit virtually any trade association or other non-profit group established by business corporations to freely spend any funds received from its corporate member to affect candidate elections.''

#90086u1243 03/27/1990 ~United Press International

BOSTON (MARCH 27) UPI - Those who long for longevity might take a page from the book of Mormons, according to a researcher who says their lifestyles make them among the healthiest and longest-lived Americans.

Dr. James Enstrom's study of 10,000 religiously active Mormons in California found their mortality rates from heart disease and cancer - the two leading causes of death - substantially lower than that of the overall white population in the United States.

In addition, the men in the study who had never smoked, and adhered to a regimen of regular exercise and sleep had a life expectancy of 85 - an astounding 14 years beyond that of the average American white male. The women could expect to live to 86, eight years more than other white women.

Enstrom calculated that the 25-year-old Mormon men in that category had only a 5 percent chance of dying before the age of 65, and the women only a 7 percent chance.

Even those Mormons who were not physically active had greatly reduced disease rates, which Enstrom attributed to lifestyles that follow the ''words of wisdom'' of the Church of Jesus Christ of Latter Day Saints.

Mormon teaching calls for abstention from tobacco, alcohol, caffeine, drugs, and sexually promiscuous behavior. It also stresses a strong family life, well-balanced diets and education - all of which seem to result in an unusually healthy population, said Enstrom, of the University of

California-Los Angeles School of Public Health.

Enstrom compiled statistics on the California Mormons throughout the 1980s asking them to fill out detailed questionnaires about their day-to-day lives, diets, occupations, educational achievement and medical histories.

The men in the study were married, high-ranking lay members of the church known as ''high priests.'' They were all 25 years and older, with an average age of 48. Their wives, who made up the female component of the research, averaged 46 years old.

Enstrom said he singled out the priests and their wives because they were most likely to strictly follow Mormon tenets.

Compared to the other white males, the Mormon men as a whole had only 40 percent the mortality rate from all diseases. For the women, the mortality rate was 70 percent that of all white women.

However, it was among the 50 percent of the study subjects who had never smoked, got regular sleep and were physically active that Enstrom came up with his most dramatic findings.

The men in this group had only 14 percent the mortality rate for heart disease of other white males. For cancer, it was 34 percent and 22 percent for overall mortality. The women had 55 percent the rate of cancer mortality, 34 percent the rate of heart disease and 47 percent the overall morality rate of white women.

Enstrom said the cancer and heart disease mortality rates were the lowest ever recorded for any significant subpopulation in the United States.

Although the statistics for the Mormon women were impressive, he said they were not as dramatically different from the rest of the population as those of the men because ''women are healthier then men in general, so it is harder to bring down mortality as much.''

He emphasized the role of never smoking, physical activity and sleep because a number of studies have ''indicated that those three health habits are consistently related to lower mortality rates.''

He said it is harder to judge the effects of other aspects of Mormon lifestyles on mortality. ''My guess is that there is not a really strong role for the absence of alcohol and caffeine,'' he noted.

It is even more difficult to tell how low divorce rates, strong family ties and extensive social and religious networks translate into good health, but Enstrom believes there is a cause and effect.

To establish that healthy lifestyles do not just work for Mormons, Enstrom took a comparitive look at 3,100 non-Mormon residents of Alameda County in California, including 370 who regularly attended church and had ''Mormon-like'' health behaviors

While all of the non-smokers had mortality rates lower than the general population, the men who were Mormon-like and followed Enstrom's three key health habits had only 22 percent the mortality rate of others. For the Mormon-like women, the figure was 48 percent.

Enstrom, whose research was sponsored by the American Cancer Society, says he intends to continue monitoring the California Mormons as they get older. ''My ultimate goal,'' he quipped, ''is to find a group of people who don't die.''

#90086u1255 03/27/1990 ~United Press International

HOLLYWOOD (MARCH 27) UPI - ''Pretty Woman,'' a Pygmalion-meets-Beverly Hills comedy starring Richard Gere and Julia Roberts, sunk ''The Hunt for Red October'' submarine thriller starring Sean Connery at the box office last week.

''Pretty Woman,'' with Gere as a corporate mogul in a free-spending romantic escapade with Roberts as a street-smart Hollywood streetwalker, opened in 1,325 theaters to the profitable tune of $11.2 million.

The comedy put an end to the three-week reign of ''The Hunt for Red October'' at the top of the rankings, according to Entertainment Data Inc.

Taking a short dive to No. 2, ''The Hunt for Red October'' collected $9.1 million on 1,817 screens enroute to post a four-week total of $67.2 million. It dropped 18 percent from the previous week.

Also running into the wind was the Tom Hanks fantasy, ''Joe Versus the Volcano,'' co-starring Meg Ryan, which fell off 25 percent from the previous week on 1,795 screens. It was No. 3 with a gross of $5.2 million and a three-week tally of $26.1 million.

Filmgoers, almost as if anticipating its Academy Award victory for best picture of 1989, flocked to see ''Driving Miss Daisy'' last week as that gentle story of friendship between a deferential black chauffeur and a tart Jewish matron jumped accelerated 28 percent from the previous week.

Moving up from No. 6 to No. 4, ''Driving Miss Daisy'' grossed $3.6 million on 1,652 screens, compared with $2.8 million the previous week. In 15 weeks it has amassed $74.5 million.

Dropping down a tick to No. 5 last week was the comedy, ''House Party,'' which picked up $3.2 million on 700 screens and has now totaled $13.3 million.

''Born on the Fourth of July,'' which took home a disappointing two Oscars for its eight nominations, actually showed a 7-percent gain at the box office.

The Vietnam War political film, which won a best director Oscar for Oliver Stone, was No. 9 with a gross of $1.3 million and a 14-week total of $65.4 million.

Last week's total box-office gross for all 23,000 North American movie screens was $82.5 million. In record-setting 1989 the equivalent week's gross was $83.3 million.

Thus far in 1990 the cumulative turnstile take is $898.9 million versus $909.1 million in 1989.

The top 10, last week's gross, total gross, weeks in release:

1. ''Pretty Woman,'' $11.2 million, 1 week.
2. ''The Hunt for Red October,'' $9.1 million, $67.2 million, 4 weeks.
3. ''Joe Versus the Volcano,'' $5.2 million, $26.1 million, 3 weeks.
4. ''Driving Miss Daisy,'' $3.6 million, $74.5 million, 15 weeks.
5. ''House Party,'' $3.2 million, $13.3 million, 3 weeks.
6. ''Lord of the Flies,'' $2.4 million, $8.3 million, 2 weeks.
7. ''Blue Steel,'' $1.6 million, $5.6 million, 2 weeks.
8. ''Bad Influence,'' $1.4 million, $10 million, 3 weeks.
9. ''Born on the Fourth of July,'' $1.3 million, $65.4 million, 14 weeks.
10. ''Hard to Kill,'' $1.1 million, $41.7 million, 7 weeks.

#90086u1261 03/27/1990 ~United Press International

SAN FRANCISCO (MARCH 27) UPI - Halston, the celebrity fashion designer whose works included gowns for Liza Minnelli and pillbox hats for Jacqueline Kennedy, died Monday night at the Pacific Medical Center, apparently of cancer. He was 57.

Halston, which was the designer's middle name, became one of the best known labels in fashion but he sold the rights to his name in 1973 for $16 million, creating a tangle that diluted his influence.

A hospital spokeswoman said Halston's family issued a statement saying he died of cancer. She said a news conference would be held later.

Halston became a pre-eminent American fashion designer in the 1960s,

numbering first lady Jacqueline Kennedy, Lauren Bacall and Minnelli among his clients. He also became a jet-set figure and regular with Minnelli, Andy Warhol, Bianca Jagger and the rest of the Studio 54 crowd in the 1970s.

''I'm very, very saddened by this loss,'' Minnelli said at her New York apartment. ''I just lost my best friend.''

In the beginning Halston confined his work to women's fashions but in the 1970s he also designed clothing for men, including garments for the 1976 winter and summer Olympic games.

The designer was born Roy Halston Frowick on April 23, 1932, in Des Moines Iowa. He attended Indiana University and the Art Institute of Chicago, where he majored in fine arts.

In 1958 he joined the staff of Lily Dache in New York as a specialist in hat design. From there, Halston moved to Bergdorf Goodman and became a name to reckon with over the years as he originated the scarf hat and some fur headpieces. Halston created the pillbox hat for Kennedy and served as her milliner during her White House years.

It was one of those hats Mrs. Kennedy wore the day her husband was assassinated in Dallas in 1963.

In 1966 Bergdorf Goodman formed the first boutique showcasing designs by Halston, particularly those in the ready-to-wear category.

Halston's designs won him four Coty fashion awards and a niche in the Coty Hall of Fame.

He won his first Coty award in 1962 for his innovations in hats and his second in 1969 for the total look of fashion displayed in his spring collection.

Two years later he won a third Coty for his revival of the sweater set and was applauded for his long matte jersey halter and paillette dresses.

Halston established his own couture salon in 1968 and in 1972 launched a boutique as well as Halston Originals, a division of ready-to-wear clothing that was made available to department stores across the United States. He received his fourth Coty award that year.

In 1973, after the designer had created a new line of luggage for Hartmann Norton Simon Inc. paid the designer $16 million to acquire his business and create a division called Halston Enterprises in a move that started Halston's slide.

Halston was elected to the Coty Hall of Fame, the highest award in American fashion, in 1974.

By 1975 Halston had broadened his work into men's wear and became the designer for the American teams in the 1976 Olympics.

Not to be confined to wearing apparel, Halston began creating essences and carpet designs. In 1978 he opened a cosmetic line for Max Factor, another Norton Simon subsidiary.

In 1980, Halston signed a contract with a Japanese firm to manufacture and distribute Halston sportswear in Japan.

Rumors of drug dependence dogged the designer beginning in 1977 after he became a regular at Studio 54, appearing frequently at the popular discotheque in his trademark black turtleneck sweater.

In 1982 Halston went further with the licensing of his name, signing a contract allowing the J.C. Penney Co. to market a line of budget clothing bearing a version of the famed Halston label. The agreement was lucrative - and costly. Bergdorf Goodman announced the following year it no longer would carry his clothes.

Other factors far removed from Halston's control sped the decline of his influence. Norton Simon in 1983 was bought out by the Esmark conglomerate, which less than a year later was gobbled up by the Beatrice Companies in another corporate battle. Halston's new executive overseers, interested only in the Halston line of fragrances and the contract with J.C. Penney, imposed restrictions on the designer's own business and artistic style. This included his personal headquarters in the Olympic Towers on New York's Fifth Avenue, which he was forced to evacuate.

LONDON (MARCH 27) UPI - Stock prices closed broadly lower in light trading Tuesday on the London International stock exchange as investors reacted nervously to a bout of futures-related selling and a series of worse-than-expected corporate results.

The blue-chip Financial Times 100-stock index, which gained 14.3 points Monday, tumbled 32.0 points to 2,266.2. The narrower top 30 industrial average fell 26.9 points to 1,786.6.

Volume amounted to around 385 million shares, compared with 354 million shares changing hands on Monday. Analysts said lack of buying interest from large institutional investors sent a selected group of issues lower in thin trading.

In what analysts described as an otherwise dull session, British Airways PLC eased a few cents following news that the Department of Trade and Industry referred the airline's purchase of 20 percent of Sabena World Airlines to the Monopolies and Mergers Commission for a review of its impact on service to and from Britain.

The referral, made on the recommendation of the office of Fair Trading, puts at risk a major strategic move by British Airways to structure an additional hub to its European and transatlantic air routes.

British Airways along with KLM Royal Dutch Air Lines last December announced plans to purchase 20 percent each of the Belgium airline with the remainder of the stock going to the new Sabena of Belgium Airline. BA is expected to pay around $54.75 million for its 20 percent interest.

Carlton Communications tumbled $1.17 to $9.57 after the company announced the sale of its Cosworth Holdings unit to Vickers, for what analysts described as a highly disappointing amount.

P&O dropped 40 cents to $9.47 after its financial results failed to meet expectations, while disappointing profits also hit Prudential, which eased eight cents to $3.21.

Bumper profits helped Iceland Frozen Foods shrug off the downward market trend, as the stock climbed 33 cents to reach $4.30.

Elsewhere on the takeover front, acquisition speculation boosted Norex 33 cents to $3.17, while speculative demand helped Monks and Crane gain 19 cents to 88 cents a share.

Among some of the day's other highlights, Metropolitan Radio fell 11 cents to $2.43, Thorn EMI lost 32 cents to $10.68, Amstrad added four cents to $1.03 and British Telecom dipped six cents to $4.57.

#90086u1288 03/27/1990 ~United Press International

EAST BERLIN (MARCH 27) UPI - The Social Democratic Party reversed itself Tuesday and announced it is prepared to hold coalition talks with the leading conservative alliance to form East Gemany's first freely elected government.

SPD chairman Ibrahim Boehme had said shortly after March 18 elections that his party was not interested in a coalition government with the conservative three-party Alliance for Germany, which took 48 percent of the vote.

But at a meeting Tuesday, the Social Democrats announced their willingness to hold initial coalition talks with the conservative Christian Democratic Union, which will hold 163 of the 192 seats won by the conservative alliance.

Observers expect the announcement to help speed the formation of the first freely elected government in the history of East Germany, ruled since World War II along Stalinist lines until last fall's ouster of the hard-line Communist Party leadership.

The formation of a government had also been complicated by claims that Prime Minister-designate Lothar de Maiziere, Boehme and other senior politicians worked for the secret police under the former regime.

Both Maiziere and Boehme rejected the accusations. An official responsible for disbanding the former police unit, known as the Stasi, said Monday night he had no evidence Boehme was involved in the hated organization.

Boehme announced Monday his resignation as SPD chairman and indicated he would resume his party duties once his name was cleared.

But in a statement issued Tuesday to the East German news agency ADN, Boehme denied reports he would give up his parliamentary seat while investigations were under way. He said the reports ''mistakenly reached the media.''

Boehme also warned the new parliament could be undermined if ''one issues such accusations against one deputy after the other'' - an apparent reference to speculation the claims were part of a smear campaign by former Stasi officials.

The 400-seat parliament is expected to convene next week and elect a prime minister, a post the Conservative Democratic Union wants de Maiziere to have.

A CDU spokesman said Tuesday his party agreed the SPD could have the Internal Affairs portfolio in a new government, while CDU would run foreign, economic and social affairs as well as education.

The SPD will hold 88 seats in parliament and a liberal group, likely to be included in a government coalition, will have 21.

#90086u1303 03/27/1990 ~United Press International

ABIDJAN, IVORY COAST (MARCH 27) UPI - Doctors voted to extend their strike Tuesday to protest the arrest of more than 120 people demonstrating over planned salary cuts, sources said.

The doctors voted Monday for a 48-hour strike to protest a looming 14 percent pay cut imposed by the government of the West African country as part of its economic austerity program.

They decided to prolong the walkout following the arrest by police and soldiers of Richard Kodjo, a doctor at Abidjan's university hospital, according to sources representing the striking medical workers.

Police accused Kodjo of organizing the demonstrations but officials of the Synacassi health union insist that at the time of his arrest Monday he was only driving between two areas of the university hospital to ensure that doctors were providing emergency medical care during the strike.

The striking doctors, nurses and other medical personnel say they will not return to work until Kodjo is released.

More than 120 doctors and teachers were arrested Monday afternoon after they defied a nationwide government ban on demonstrations.

Doctors and teachers at the university have presented the most vocal opposition to the planned pay cuts since protests began in Abidjan in February.

Pressure is expected to intensify this week as the March 31 deadline for the imposition of public sector pay cuts of between 8 and 40 percent draws closer.

#90086u1324 03/27/1990 ~United Press International

(MARCH 27) UPI - The Kremlin is abiding by Soviet President Gorbachev's threat to re-assert control over the rebellious Baltic republic of Lithuania Well trained Soviet paratroopers earlier this morning stormed a

psychiatric hospital in Lithuania's capital and arrested about two-dozen Red Army deserters. Later, another group of paratroopers took control of the independent-minded Central Committee building.

Today's action follows statements last week by a Kremlin official that A-WOL soldiers would be retrieved NO matter what impact it had on world perception of Moscow. Massachussetts Democratic Senator Ted Kennedy visited Gorbachev yesterday and discussed the Lithuanian situation. Nationalist Lithuanian President Landsbergis has expressed hope that Kennedy will serve as an intermediary in the standoff.

A published report quotes an F-B-I official saying 21 reputed East Coast mob members indicted yesterday run the risk of being gunned down by fellow organized crime figures. Boston F-B-I director Thomas Hughes says- in his words- ''La Cosa Nostra has hit- murdered- people for much less than allowing the F-B-I to eavesdrop on an induction ceremony for new members.''

According to a poll published today in an influential Japanese economic journal, an overwhelming majority of Japanese surveyed say Tokyo should respond ''positively'' to U-S demands for a looser trade relationship. The survey indicates many Japanese fear the present tense climate between the two economic superpowers will lead to worse bilateral relations.

#90086u1327 03/27/1990 ~United Press International

(MARCH 27) UPI - Police in Athens have increased security around diplomatic missions today following a series of explosions this morning that destroyed more than one-dozen East European and Arab diplomatic cars. NO one was injured in the blasts which an UNidentified caller later credited to the left-wing group Social Resistance. The group has made claims twice before for bombings against Greek political figures.

The Vietnamese Communist Party's monthly journal released a translation today of last month's issue that criticizes the party's aging hierarchy as incompetent and unresponsive to the country's needs. An UNsigned article says it's time for party elders to step aside, but laments the lack of groundswell from party members to bring about such a change.

Emotions are running high in South Africa following the killing of eight anti-government protesters in a black township near Johannesburg yesterday. The government's Law and Order minister is pleading for calm. But his comments fell on deaf ears last night when white extremists walked out of a high-level session because of the presence of blacks. Pretoria says additional troops have been called up to secure peace.

The man who broke the color barrier to attend the University of Mississippi 27 years ago says white liberals devised affirmative action as

a means to satisfy black civil rights leaders. James Meredith, now an adviser to conservative Republican Senator Jesse Helms, argues that the plan is actually a hindrance to blacks trying to get ahead. Meredith's reasoning is that other minorities have made gains without the use of affirmative action.

#90086u1332 03/27/1990 ~United Press International

SAN QUENTIN, CA (MARCH 27) UPI - At 3 a.m. next Tuesday an unseen hand will pull a lever, releasing a packet of cyanide granules that will drop slowly into a vat of acid.

The mixture of cyanide and acid will trigger a deadly cloud of gas that will quickly fill an airtight, green chamber deep in the bowels of San Quentin Prison.

Moments later a doctor monitoring the heartbeat of the man strapped to a metal chair inside the chamber will signal that life has expired.

Thus will end the life of Robert Alton Harris, an abused child who grew up to become a cold-blooded killer - a man who shot two San Diego teenagers July 5, 1978, and later bragged about eating their leftover hamburgers.

Barring last-minute intervention by a judge, Harris will become the first convict in 23 years executed in California's gas chamber. His final moments will be witnessed by a dozen observers sitting behind a thick glass window.

For some, the execution will represent a state crime that can only perpetuate killing, a tragic end to a life that began two months prematurely when Harris's drunken father kicked his mother's stomach in a jealous rage.

''It is an outrageous and cruel practice and contributes to the widening circle of violence and killing which threatens human survival,'' the Rev. Joseph Lowery, president of the Southern Christian Leadership Conference, said of capital punishment.

Others will sigh with relief that finally, after more than a decade of legal wrangling, justice has been done.

''Justice has been denied to the people, not to Harris,'' said Deputy Attorney General Louis Hanoian, the man in charge of seeing that Harris goes to his death. ''This case should be final.''

Harris's death in a cloud of cyanide triggered by an anonymous San Quentin prison guard will be the first since police killer Aaron Mitchell was

dragged screaming into the gas chamber on Apr. 12, 1967.

This latest execution could usher in a grim new era for the state's criminal justice system, which has sentenced over 300 murderers to die since 1977, when capital punishment was reinstated.

There are more than 270 convicts on death row in California. Their path to the gas chamber may have been made easier by the Harris case, which saw several fundamental challenges to the state's death penalty law rejected.

Harris's father, Kenneth A. Harris Sr., was a decorated Army officer. He was also a drunk who was twice jailed for molesting two of his five daughters.

When Harris was in the womb of his mother, Evelyn, the father, thinking the child wasn't his, kicked her abdomen to induce a miscarriage. But Harris survived his violent birth at Ft. Bragg, N.C., and became a terrified and abused child.

At age 2, according to court documents, his father knocked him from a highchair and, as blood spewed from the child's nose and mouth, began strangling him with a tablecloth. Then, he turned to his wife and said: ''Oh lookie, Evelyn, your baby is bleeding to death.''

The late Evelyn Harris, who once robbed a Porterville, Calif., bank in a drunken stupor, testified at her son's trial that her husband was extremely jealous, frustrated with his military life and abused all nine of their children.

After Harris's father retired from the military, the family broke up. Last April, Kenneth A. Harris Sr. committed suicide.

By the time he was 11, Harris was fending for himself and already showing a cruel streak; court documents cite episodes of Harris setting fire to cats.

At age 14 he was wandering around the country and getting into trouble, once stealing a car - a crime that landed him in a Florida jail for four years, during which time he had not one visitor.

With his anticipated death in California's gas chamber, Harris will follow the trail of such notable criminals as rapist Caryl Chessman, Erwin ''Machine Gun'' Walker, Elizabeth ''Ma'' Duncan, and Barbara Graham, whose controversial 1955 execution was immortalized by Susan Hayward in the movie, ''I Want To Live.''

Harris was moved to death row Mar. 14, 1979, after his conviction for the abduction and murders of John Mayeski and Michael Baker, both 16, at

gunpoint from the parking lot of a fast food restaurant where they had stopped before heading out on a fishing trip. He forced them to drive to a remote area in San Diego where he shot them to death.

According to an account by Harris's brother, Danny, who followed in another car, Harris retrieved the boys' leftover hamburgers and ate them before using the car to rob a bank of $3,009. Danny Harris testified against his brother and was sentenced to a six-year term.

Testimony at some of Harris's court appearances brought out that Harris, while incarcerated, bragged about eating the hamburgers to other inmates.

Ironically, Baker's father, Steve Baker, a member of the San Diego Police Department, participated in the Harris capture, not yet aware that his son had been slain.

The murders of Baker and Mayeski came a year after Harris was paroled from prison. He had been jailed after pleading guilty to manslaughter in the 1975 death of a neighbor. He had beaten the man unconscious, doused him with lighter fluid and set him alight. The man died of his injuries.

For the Mayeski and Baker killings, Harris was first set to die July 7, 1981, and has since received three separate execution dates.

Harris's attorneys have been rebuffed by both the state and U.S. Supreme Courts. Gov. George Deukmejian, who as a legislator wrote the state's death penalty law, canceled a clemency hearing in March after Harris wrote him saying he doubted the governor would make a fair decision.

In a last ditch rush to save their client's life, lawyers plan to return to federal court and demand that judges consider new medical evidence about potential brain damage from child abuse and the statements of some inmates and jailers who attest to Harris's good conduct behind bars.

Defense attorney Charles Sevilla planned a last series of appeals to federal district court in San Diego, then to the U.S. Supreme Court if necessary.

Sevilla argued in papers filed Jan. 5 with the California Supreme Court that Harris, apart from his violently induced birth, was constantly beaten dropped on his head and terrorized as a child.

Although child abuse was recognized during the trial, Sevilla said in the new appeal that Dr. Karen Sees at the Veterans Administration Medical Center in San Francisco examined Harris last November and interviewed him and a sister, concluding that his mother drank heavily during pregnancy.

As a result, Sees said in the court documents, Harris appeared to suffer

from fetal alcohol syndrome, post-traumatic stress from the childhood abuse and possibly organic brain damage.

Sevilla argued that the medical information from Sees was not available at the time of the murder trial and was grounds for a new penalty proceeding or a reduced sentence.

Others care less about Harris's background and more about him paying for his crimes.

''Nobody has tried to argue that Harris might be innocent. And he's never expressed remorse to anybody as far as I know,'' said Steve Baker.

The daily discipline of Baker's detective work has helped him handle the pain and anger of the last 11 years. He has taken some satisfaction in the recent groundswell of public opinion favoring capital punishment.

And, as Harris moved closer to the gas chamber, Baker said he moved closer to the day when he can wake up from a long nightmare.

''Every time there's been a new appeal and a new decision, my phone would start ringing and I would go through it all again,'' said Baker, recalling calls from friends, colleagues and reporters.

''It's been an open sore that has not been able to heal.''

#90086u1368 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The government would automatically provide a basic level of crop insurance to farmers under a sweeping reform plan proposed Tuesday by Rep. Glenn English, D-Okla.

The White House has proposed elimination of federally subsidized crop insurance on grounds the system is ineffective and would be too costly to fix. It wants to switch to a permanent disaster-relief program similar to the aid programs enacted in 1988 and 1989.

However, there is interest on Capitol Hill in trying to salvage crop insurance out of a belief the administration plan would pay off only when there is widespread and severe losses.

English, chairman of the House Agriculture credit subcommittee, filed his plan in anticipation of a meeting Wednesday to discuss crop insurance reform.

Under his plan, the government automatically would provide coverage for at least 30 percent of a farmer's normal yield. Coverage would rise as high

as 50 percent for farmers who participated in the federal farm program. The lowest level of coverage would go to farmers who decided not to take part in the farm program.

Farmers could buy additional coverage for up to 75 percent of their normal production, with a government cost-share up to the 65 percent level for farmers enrolled in the farm program or for those who grow crops, such as fruit and vegetables, not covered by the farm program.

Above the 65 percent level, the producer would pay the entire cost of insurance.

An aide said the English plan would cost about $1 billion a year.

The government has been spending $500 million a year to subsidize crop insurance plus the cost of congressionally mandated disaster relief - in total, an average annual cost of $1.4 billion since 1980.

The administration says its plan would not call for additional spending since the cost of disaster payments would be offset by lower spending on crop subsidies.

Agriculture Secretary Clayton Yeutter has offered to work with Congress in trying to revise crop insurance but has said it is unlikely an economical fix can be found.

#90086u1371 03/27/1990 ~United Press International

SAN DIEGO (MARCH 27) UPI - Imperial Corp. of America, which is locked in a legal battle with the federal government over seizure of its savings-and-loan operation, postponed its annual stockholders' meeting Tuesday.

Imperial said in a release that the May 24 gathering would be held sometime in the future, but the board did not set a date nor did it say when a new date might be set.

Imperial filed for protection from creditors under the Chapter 11 of the U.S. Bankruptcy Code shortly after the federal Office of Thrift Supervision seized the San Diego company's Imperial Savings Association subsidiary Feb. 23.

"In light of the Chapter 11 filing, we felt we had no other alternative," said Lyman C. Hamilton, Imperial's chief executive officer. "Our primary obligation now is to conserve ICA's resources and develop a reorganization plan which will be acceptable to both our bondholders and shareholders."

"Holding an annual meeting ... would have substantially interfered with both of those goals," said Lyman, who promised the stockholders and the public would be kept apprised of the company's plans.

The OTS appointed its Resolution Trust Corporation as conservator of the thrift Feb. 23. Imperial filed for Chapter 11 five days later and filed a lawsuit in federal court Mar. 21 seeking to block the RTC's plan to appoint a receiver for the company. A hearing on a preliminary injunction requested by Imperial will be held in U.S. District Court in San Diego Friday.

#90086u1373 03/27/1990 ~United Press International

LYON, FRANCE (MARCH 27) UPI - A court convicted author and socialite Francoise Sagan Tuesday of consuming and transporting cocaine and sentenced her to a six-month suspended prison term.

The Lyon Tribunal also ordered that Sagan, best known for her 1954 novel ''Bonjour Tristesse,'' or ''Good Day Sadness,'' pay a court fine of $1,700 and a further fine to customs officials of $62,000.

Sagan did not attend the trial and was sentenced in absentia. She has admitted publicly to occasional use of cocaine, but denies she was involved in drug trafficking.

Sagan was one of 38 people described by the French press as ''jet setters'' to whom the court Tuesday handed down prison terms ranging from a few months to 15 years.

#90086u1404 03/27/1990 ~United Press International

CAPE CANAVERAL, FL (MARCH 27) UPI - The $1.5 billion Hubble Space Telescope's move into the shuttle Discovery's cargo bay was delayed Tuesday to give technicians time to kill pesky ''no-see-um'' bugs that otherwise might contaminate the sensitive instrument.

High-tech traps were set for the tiny ''midges'' - insects that look like tiny mosquitoes - and monitored hourly to determine the ''body count,'' officials said. In the meantime, the telescope's installation into Discovery's cargo bay was put off until Wednesday.

But with launch processing already running ahead of schedule, NASA managers are considering moving Discovery's launch up two days, from Apr. 12 to Apr. 10. An official launch date is expected to be announced Saturday after a formal two-day flight readiness review.

If the flight is moved up - and managers were leaning that way Tuesday - Discovery's countdown would begin around 2:30 p.m. EST on Apr. 7 leading to a launch attempt at 9:24 a.m. Tuesday, Apr. 10. A launch on Apr. 12 would come at 9:21 a.m.

''We've still got enough contingency in the schedule to make the 10th, even though the telescope is not going in the cargo bay until Wednesday,'' a NASA official said.

The Hubble Space Telescope, considered by many to be the showcase payload of the shuttle era, is one of the most powerful astronomical tools ever built.

The boxcar-sized instrument was mounted in an environmentally controlled canister Sunday, a full day ahead of schedule, and taken to a payload ''clean room'' at launch pad 39B for installation in Discovery's 60-foot cargo bay around noon Tuesday.

But the transfer to the orbiter was delayed a day when engineers discovered that tiny bugs called ''midges'' had found their way into the launch pad clean room.

According to Webster's, a midge is ''any very small gnat or fly, specifically of the family Chironomidae.'' Such bugs are known popularly

as ''punkies'' or ''no-see-ums.''

The telescope and its ultra-clean 94-inch mirror were not in any danger of contamination because the instrument currently is sealed in plastic bags.

But the bags must be removed prior to the telescope's installation in the shuttle cargo bay and technicians had to make sure none of the midges got inside the costly instrument where they could cause damage.

''These are live little critters,'' said NASA spokesman George Diller. ''We had to go vacuum the backs of the payload bay doors. We set traps ... and we caught about 30.''

The 4-foot-high traps, equipped with lights to attract the bugs and fans to suck them inside, were being checked every hour. One official said the telescope would not be moved into Discovery's cargo bay until the ''body count'' was zero after two consecutive trap inspections.

#90086u1411 03/27/1990 ~United Press International

(MARCH 27) UPI - George Balanchine, the Russian-born dance genius who became the most important choreographer of his time, was a man of few words.

He was consumed with music and dance, yet shared little of his philosophy, motivations or inspirations with his dancers, or with the public at large.

Dance was something this very private man did, not something he talked about.

Now, seven years after his death, some fascinating insights into Balanchine's nature are captured in a 90-minute ''Dance in America'' special in the PBS ''Great Performances'' series, to air Friday, Mar. 30 at 9 p.m. EDT (check local listings).

All of the insights in ''Dancing for Mr. B'' come from six ballerinas whose associations with Balanchine span 40 years.

As these gifted dancers think aloud about Balanchine's impact on their dancing and their lives, it is evident - and touching - that some of deepest insights they express are moments of self-realization.

That in itself celebrates the impact of this creator of dance - and dancers - who molded the New York City Ballet into something of his own.

Balanchine's ballerinas all learned from him and developed their own dance personalities. He even selected a distinctive perfume for each of his

favorites. And he demanded an extra amount of precision from them.

Each of the dancers profiled were Balanchine favorites at various points in the 1940s, '50s, '60s, '70s and early '80s, women for whom he created specific ballets. They are Mary Ellen Moylan, the first great Balancine dancer; Maria Tallchief, who was also one of his wives; former New York City Ballet stars Melissa Hayden and Allegra Kent; and two current NYCB principal dancers, Merrill Ashley and Darci Kistler.

Hayden, who now teaches dance at the North Carolina School of the Arts in Winston-Salem, says Balanchine created a distinctive look of movement.

''Mr. Balanchine made me realize that a body could sing,'' she says, ''that it did sing by itself.''

Moylan danced for Balanchine in Ballet Society, the company he formed in 1946.

''Never did he explain anything about any of his ballets,'' Moylan says. ''He showed the steps. The steps explained. Everything was revealed, never explained.''

Balanchine studied at the Imperial Ballet School and joined the State Ballet but left Russia in 1923 to join impresario Serge Diaghilev as ballet master and dancer with the Ballet Russe.

Ten years later, he accepted Lincoln Kirstein's offer to move to the United States and start a ballet school and company, the American Ballet, and staged ballets for Broadway and the Ballet Russe de Monte Carlo.

In 1946, Balanchine and Kirstein formed Ballet Society, building a base for the City Ballet that was born two years later. His strength was in creating neoclassical ballets that celebrated the precision of his dancers' training and temperament.

''He was a poet, and he taught us how to react and become this poetry,'' says Tallchief, who now teaches at the School of Chicago Ballet.

Tallchief first met Balanchine when she was dancing with the Ballet Russe de Monte Carlo, and he was a guest artist. They married in 1946. She was 20, he was 40. The marriage was annulled a few years later.

She passes on to her students the lessons learned from Mr. B. ''I tell my students, 'You treat this art like a religion. This is your life,''' Tallchief says.

Balanchine created the work ''Ballo della Regina,'' filled with a series of demanding hops en pointe, for Ashley. We see snippets of rehearsal and

actual performance of the work. Video of the dancers at practice and in performance, often accompanying their conversation, strengthens the program.

Even a dancer's mistakes stimulated Balanchine's curiosity and opened up new possibilities.

''He just took everything he saw and used it to his advantage to get more from us. It was fun for him,'' Ashley says. ''It was playtime, to see what we were capable of.''

At one point in the program, we see Allegra Kent coaching Kistler, Balanchine's youngest favorite, in the work ''La Sonnambula,'' a romantic duet between a sleepwalker and her poet.

Kent gave the 1946 work an outstanding interpretation in her years with City Ballet, and now she passes its subtleties on to Kistler.

The soft-spoken Kent, who joined the School of American Ballet at 14 and apprenticed with City Ballet at 15, calls Balanchine ''a master psychologist. Mr. B. saw a little and made a lot out of it.''

Kistler, one of City Ballet's most popular principals today, says Balanchine taught her that a dancer can give much more to an audience when she is able to lose herself in a role.

''Mr. Balanchine would say: 'You know, dear, just dance. Just be yourself ''' Kistler says. ''What he gave us was ourselves.''

#90086u1412 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - Forward Lionel Simmons of La Salle was selected as the 16th recipient of the Eastman Award Tuesday, presented annually to the premiere college basketball player as voted by the National Association of Basketball Coaches.

''I feel honored and proud,'' said Simmons. ''I'm elated to be singled out from so many good players.''

Simmons scored over 800 points in his senior year to finish with a career total of 3,217, making him one of only five college players to reach the 3,000 point plateau. He is also the third-leading scorer in NCAA history and is credited with 1,429 rebounds.

Known as ''The L-Train'', the 6-foot-7 Simmons led the Explorers to a 30-2 season, including a 79-63 victory over Southern Mississippi in the first round of the NCAA tournament. That victory was the Explorers' first in

three NCAA apperances during Simmons' era. La Salle lost to Clemson, 79-75 in a second round game after blowing a 19-point lead.

''It was the best moment of my career, something we hadn't done in four years,'' Simmons said of the Southern Mississippi victory. ''It was also my 100th win with La Salle over four years.''

Simmons had several insights into this year's Final Four.

''UNLV is against a good Georgia Tech team, but Stacy Augmon can defend anyone in the country. He'll have his hands full with Dennis Scott, but he can contain him,'' he explained. ''UNLV's big players can take their toll inside over 30 minutes.''

''Duke has two big players and Arkansas has a guard oriented team,'' he continued. ''Duke's 6-foot-11 players can clog the middle and stop Arkansas' guards. I think UNLV will win, though.''

Simmons grew up in the same South Philadelphia neighborhood as the late Hank Gathers and was a good friend of the Loyola Marymount player.

''We had a game the day after Hank's death and it was on my mind,'' he said. ''It bothered me for most of the game but then we had a week off where I was able to get myself together and overcome it. I blocked it out after that.''

Although Simmons had the opportunity to declare himself eligible for the NBA draft after his junior year, he is pleased with his decision to play with La Salle this year and finish his education.

''I was on time to graduate and we had a good team coming up. I won awards this year and set records at La Salle. It was a good decision to come back.''

In his career with La Salle, Simmons became the school's all-time leading scorer, recorded school standards of 248 blocks and 239 steals, started in 131 consecutive games and averaged 24.6 points.

The latter statistic emphasizes Simmons' perseverence and consistency. Rather than building points in large quantities, Simmons scored 20 to 30 points per game regularly, with a game high of 40 against Manhattan on February 10.

His last college game a fond memory, Simmons is now looking forward to the NBA draft.

''I most certainly want to play in the NBA. It will fulfill another dream and open avenues which can carry me for the rest of my life.''

The Eastman Award, sponsored by the Eastman Kodak Company, had been presented to several outstanding athletes since its inception in 1975. Winners include such NBA stars as Larry Bird (1979, Indiana State), Michael Jordan (1984, North Carolina), and Patrick Ewing (1985, Georgetown). Sean Elliot from Arizona garnered last year's award.

In addition to the Eastman Award, Simmons has been named player of the year by UPI and the Metro Atlantic Athletic Conference. He's a finalist for the AP Player of the Year, the John Wooden Award, and the Pete Maravich award.

#90086u1422 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The United States and Mexico are discussing the negotiation of a free-trade agreement that could fulfill long-held visions of a unified North American market, administration officials said Tuesday.

The proposed agreement, similar to one due to eliminate most barriers to trade between the United States and Canada by the end of the decade, has been the subject of high-level meetings within the past month.

While the idea enjoys support from President Bush and Mexican President Carlos Salinas de Gortari and appears to have gained momentum, officials on both sides concede numerous obstacles stand in the way of a decision to press ahead with negotiations.

''We're very interested in it,'' said White House press secretary Marlin Fitzwater. ''We're talking about it, but there are still a lot of details to be worked out.''

While Bush would like to see North America ''dedicated to free trade,'' the spokesman said, the consideration of a formal agreement has resulted in ''no negotiations, no final decisions.''

''We really haven't gotten very far down that road yet,'' he added.

Only last fall, U.S. officials indicated that wide disparities between the U.S. and Mexican economies continued to work against the negotiation of an agreement modeled after the historic U.S.-Canada free-trade pact that went into effect Jan. 1, 1989, and will remove tariffs and other barriers over a 10-year period.

Over the last decade, Mexico has begun to turn away from decades of protectionist trade and investment policies. Salinas, a Harvard-educated political economist, has accelerated moves to open the economy.

However, senior government officials have said on repeated occasions that Mexico, having protected its economy for so long from a torrent of imports and investment from the north, is not yet prepared for a free-trade arrangement.

Nonetheless, Salinas alluded to his interest in a comprehensive trade accord last October during a visit to Washington. Bush echoed President Reagan's earlier call for a free-trade area encompassing the United States Canada and Mexico during the 1988 campaign.

Bilateral trade has increased since Mexico joined the General Agreement on Tariffs and Trade, the multilateral body that sets rules for international trade, in 1986 and, under some U.S. pressure, liberalized its policies.

The two countries agreed in 1987 on a framework to address trade issues and resolve disputes over specific products or services. However, the free-trade pact has been regarded as a very long-term objective with no particular political urgency.

#90086u1428 03/27/1990 ~United Press International

ANN ARBOR, Mich. (MARCH 27) UPI - J.P. Industries Inc., a manufacturer of engines and transmission parts, will be acquired by T&N PLC of the United Kingdom for $17.30 a share, the companies said Tuesday.

The total purchase price of about $375 million includes $185 million of debt, they said.

A U.S. subsidiary of T&N will make a tender offer for all of the outstanding shares of J.P. Industries no later than April 2 under a definitive merger agreement announced by the two companies.

T&N, which supplies materials and parts to the automotive, petrochemical, power generation, aerospace and electrical industries, had 1989 worldwide sales of about $2 billion.

Analysts have said J.P. Industries would be an attractive target for a foreign company looking to crack into the U.S. market because of its distribution network. Takeover rumors began swirling around the company since last year, when Great American Management and Investment Inc. bought nearly 10 percent of J.P. Industries stock.

J.P. Industries and T&N said in a joint statement they plan to maintain J.P. Industries' headquarters in Ann Arbor with John Psarouthakis remaining as chairman.

J.P. Industries has annual sales of more than $400 million and 4,500 employees worldwide, including 718 who work at the headquarters.

DETROIT (MARCH 27) UPI - The Detroit Public Library's weeklong amnesty on fines already has turned up one book overdue for 63 years and another out of circulation for 17 years.

Francis Buckley, the library's assistant associate director of public services, said 93 overdue books were found in public depositories Monday morning - about a third more than usual.

Among long-missing volumes returned were ''Accounting Problems: Intermediate,'' by Charles Rittenouse, which should have been returned on Oct. 29, 1926, and ''Folksingers' Guitar Guide,'' by Pete Seeger, with a due date of Dec. 13, 1972.

Overdue fines normally are 10 cents a day for adults and 5 cents a day for children. The amnesty - only the fourth in the library's 125-year history - ends Mar. 31.

#90086u1434 03/27/1990 ~United Press International

ROSEMOUNT, MI (MARCH 27) UPI - Koch Refining Co.'s carbon dioxide gas is kosher.

Rabbi Asher Zeilingold certified Monday that carbon dioxide produced at the oil refinery meets Jewish dietary laws for consumption during Passover. That means Koch carbon dioxide can be used to put the fizz in 50,000 cases of Passover Pepsi-Cola being bottled in Baltimore.

The Baltimore bottler normally gets its supply of carbon dioxide from Archer Daniels Midland, an agricultural processing company in Decatur, Ill., that supplies soft-drink bottlers with the gas collected as a byproduct of its corn-based ethanol production.

But Jewish dietary law forbids consumption of foods derived from grain during Passover, said Zeilingold, rabbi for the Orthodox congregation at Adath Israel Synagogue in St. Paul.

So Archer Daniels Midland had to come up with 800 to 1,000 tons of nongrain derived carbon dioxide to supply its East Coast customers who produce special kosher soda pop for Passover, which starts the evening of Apr. 9. When it came up short, it turned to Koch for two truckloads.

Koch's carbon dioxide is a byproduct of its hydrogen production pocess, with no grain involved. But the 40 tons of gas could not be used until it was officially approved by a rabbi.

Zeilingold visited the refinery and quizzed company management about the production process. The rabbi said he was satisfied and would fax a letter of certification.

''We can not only say we're kosher with the environmental laws, we're kosher with Jewish laws,'' said Patrick Thompson, a Koch spokesman.

#90086u1436 03/27/1990 ~United Press International

BRUSSELS (MARCH 27) UPI - British butchers want to make sure their beloved ''bangers'' are safe from the Brussels bureaucrats.

Britons beefed that proposed European Community health rules favor continental-style steak tartare over the cured mincemeat used in sausages (''bangers'') and other delicacies north of the English Channel.

''The end of mince as we know it,'' one British newspaper said of the regulations that require meat to be sold within six days of an animal's slaughter.

People in Britain prefer meat that has been hanging up for a couple of weeks to add flavor and tenderness.

''It's a cultural difference that should be recognized in the rules,'' says a British agriculture official. ''The six-day rule might make sense in France, where people like their meat raw in steak tartare, but it doesn't make sense for mince or sausage in Britain that is intended to be cooked.''

Another Fleet Street journal flew 3 pounds of ''best British bangers'' south to Brussels (the newspaper called it a ''mercy mission''), then fried some up at a hotel for the European Community's meat hygiene official.

''It had some toughness to it,'' said Carlo Berlingieri, a native of the Italian province of Calabria. ''It was a taste I was not used to, but it really wasn't too bad.''

The international sausage row was largely defused by Berlingieri's pledge Tuesday that the rules are aimed at large processing plants, not the traditional English butcher shop, so ''there is no danger of those sausages being taken from the market.''

Small butchers in the island homeland of the banger remain unconvinced.

''Those people in Brussels should just let us get on with it,'' said an employee of Moriarty's Butcher Shop near London, who supplied the sausages downed by Berlingieri.

''We don't tell the Germans how to make their frankfurters or the Italians how to make their salamis,'' he said. ''We've been making bangers the same way for hundreds of years.''

FRANKLIN, IN (MARCH 27) UPI - Banjo Shanks won't answer the call to answer the census, despite being mailed a form with his name on it.

Banjo is only 5 years old - and besides, he's a cat.

Steve and Carole Shanks, Banjo's master and mistress, also were listed on the census form. They'll fill it out but census officials have told them to remove Banjo's name.

Census officials think the cat was added to the list of residents at the rural home in 1988, when census workers went door-to-door to identify rural addresses.

#90086u1457 03/27/1990 ~United Press International

DETROIT (MARCH 27) UPI - Jaguar PLC said Tuesday Sir John Egan will step down as chairman of the British carmaker in June and be replaced by William Hayden, vice president of manufacturing for Ford of Europe.

Hayden, 61, was appointed to Jaguar's board with the role of chief executive with immediate effect. Egan, 50, will remain as non-executive chairman for the next three months, after which Hayden will become chairman.

The resignation of Egan had been widely expected following Ford's acquisition of Jaguar late last year at a cost of $2.5 billion, despite Jaguar's being valued by Ford at only one-fifth that amount.

Egan, credited with saving Jaguar from extinction in 1980 and rebuilding it during his decade-long tenure, had indicated previously he would quit after the Ford takeover had been finalized.

''After Ford's complete takeover, it was almost a foregone conclusion that Sir John, who likes to be in control, would relinquish the reins,'' said

one company source who declined to be named.

Egan's resignation and the appointment of Hayden, who managed Ford's transition team at Jaguar, mean Ford managers will hold the two top spots at the British carmaker.

John Grant, 44, who also spent his career at Ford of Europe, will remain as deputy chairman of Jaguar.

Hayden has a 40-year background in manufacturing, something industry analysts say is the key behind his appointment since Ford needs to overhaul Jaguar's operations to make them more efficient.

''For the past year or so ... I have been conscious that if Jaguar was to continue and prosper, it needed the assistance of a large world-class car manufacturer to fully exploit its growth potential,'' Egan said in statement issued through Jaguar's U.S. headquarters in Leonia, N.J. ''I was therefore delighted that Ford acquired Jaguar...''

However, sources say Egan fought Ford's overtures because of its intent to acquire all of Jaguar. He instead favored an offer from top U.S. carmaker General Motors Corp., in which GM would only take a minority interest in Jaguar.

''In the takeover battle days there was a strong effort from Jaguar in Coventry to go with GM's minority interest offer,'' said the source, who added that Egan would probably not just retire ''and plant roses in his garden.''

Last November, Ford of Europe Chairman L. Lindsey Halstead said the key strategy behind Ford's acquisition of Jaguar was to keep it a separate entity while giving Ford a foothold in the high end of the luxury car market.

''We see Jaguar as a completely separate company, a completely separate product line, and a completely separate franchise from what we traditionally recognize as Ford,'' he said.

Company spokesman Bert Serre said Hayden's appointment does not change Ford's position.

''We have always maintained that Jaguar is an autonomous company,'' he said, adding that ''our primary goal is to develop plans for Jaguar's long-term future... and make it an even stronger competitor in the worldwide prestige market.

Serre said a number of things are being looked at to once again overhaul Jaguar, including getting its annual production of 50,000 cars closer to

its 80,000-a-year unit capacity, while increasing manufacturing efficiencies nd quality levels.

#90086u1499 03/27/1990 ~United Press International

FREEPORT, TX (MARCH 27) UPI - A tugboat captain has been charged by the Coast Guard with negligence in a weekend oil spill that dumped nearly 33,000 gallons of light crude into the Intracoastal Waterway.

Arthur Sanders, 32, of Houma, La., was accused of negligence because investigators believe he could have prevented the Sunday night accident, said Lt. Cmdr. Frank Whipple.

A barge being pushed by Sanders' tug struck a partially submerged barge and began spilling oil into the waterway.

Sanders could have avoided the accident by staying in the shipping lane instead of veering too close to shore, Whipple said.

''The current was a factor, but he should have compensated accordingly,'' he said.

A July hearing is planned to determine whether Sanders' operating license should be suspended, Whipple said.

The barge and tug are owned by LeBeouf Brothers Towing Co. of Houma, and company Vice President Jerry Gonsoulin said the firm stands behind Sanders.

''We don't think he was negligent,'' Gonsoulin said.

The Army Corps of Engineers said the sunken barge has been in the waterway for years but never has been moved because it is not considered a navigational hazard. The tug would have had to move out of the shipping lane to strike the barge, said Corps spokesman Ed White.

Containment booms were used to keep the oil from spreading and vacuum trucks and absorbant materials were used to clean up the spill.

One-way traffic on the waterway resumed Monday, but the Coast Guard said it is not known when two-way traffic will be allowed.

The spill occurred near the Surfside Bridge in Freeport, about 40 miles south of Houston.

There have been no reports of dead birds or fish as a result of the spill, but fishermen said they fear the oil may effect shrimping.

#90086u1521 03/27/1990 ~United Press International
(MARCH 27) UPI - It's NOT clear where the orders came from... but Soviet soldiers dragged Lithuanian army deserters from a hospital today and took over the headquarters of Lithuania's independent Communists. The leader of Lithuania's communists... who broke from the official party in Moscow... says he has spoken with a Politburo member in Moscow who says they knew nothing about the occupation.

Hospital administrators in the South African township of Sebokeng say a police attack on protesters yesterday killed nine people and injured 450. They say many of the victims were shot in the back while fleeing police. Police have their own version of what happened. They say they fired on the crowd in self-defense. Police say they killed only five people and injured 130.

Israel's Labor Party hints it may support early elections if it canNOT form a coalition government. Labor Party leader Shimon Peres orchestrated a vote of NO-confidence against Likud Prime Minister Yitzhak Shamir that brought down Shamir's 15-month-old Likud-Labor coalition government two weeks ago. Labor officials are floating the idea of new elections rather than agreeing to another Likud-led coalition if Labor canNOT form a government. But officials say they've NOT given up.

A source at Voice of America says Cuban authorities jammed the first broadcast of T-V Marti early this morning. The broadcast began at 1:30 a-m E-S-T, and the jamming began about a half-hour later. The Cubans had threatened to use their powerful Soviet-built transmitters to block the American broadcast. Last Friday they interrupted U-S stations in Florida with a speech by Cuban leader Fidel Castro.

PARIS (MARCH 27) UPI - The last three sections of the Eiffel Tower still up for sale will be auctioned in Tokyo next Tuesday, according to organizers of the event.

The pieces are part of a stairway architect Gustave Eiffel climbed on his way to raise the French flag to mark the monument's inauguration over 100 years ago on March 31, 1889.

The stairway was dismantled in 1983 in an effort to reduce the famous monument's weight and improve accessibility for the hundreds of thousands of tourists who visit the site every year. Twenty sections of the stairway were auctioned that year.

#90086u1531 03/27/1990 ~United Press International
(MARCH 27) UPI - Strike-bound Greyhound plans to unveil a strategy this morning to deal with the violence that has marred a three-week-old walkout by thousands of its workers. At least two dozen shootings involving Greyhound buses and terminals and numerous picket line skirmishes have been reported. Greyhound says a bus carrying 32 passengers from St. Petersburg, Florida, to Orlando was hit by at least one shot late yesterday about 30 miles west of its destination. A mirror was shattered but NO one was hurt.

New York police say a cocktail waitress at the Happy Land social club... which went up in flames Sunday morning... died trying to warn people about the fire. Police say the woman could have saved herself... but ran deeper into the building in a futile rescue attempt. 87 people died in the fire. The Cuban immigrant charged with starting the deadly fire has been transferred to a psychiatric ward.

Police in India report that at least 41 people died and 20 more were injured after a private bus plunged from a bridge west of Calcutta, struck power lines and burst into flames. One survivor says the bus snagged on a set of high-voltage power lines and hung from the cables momentarily before crashing to the ground, snapping the wires. Police say the massive voltage from the lines caused the vehicle to explode, burning at least 40 people to death at the scene. One passenger died later at a local hospital.

#90086u1547 03/27/1990 ~United Press International
LONDON (MARCH 27) UPI - The government ordered its Monopolies and Mergers Commission Tuesday to investigate the purchase by British Airways of a 20 percent stake in the Belgian carrier Sabena World Airways.

British Airways announced its disappointment at the plan to scrutinize its part ownership of Sabena, of which another 20 percent is held by KLM, the Royal Dutch airline, and the remainder by Belgian interests.

The Belgian carrier had been in financial difficulties until it was relaunched Jan. 1 under the deal reached Dec. 13, 1989. British Airways paid $55 million for its 20 percent share.

British Secretary of State for Trade and Industry Nicholas Ridley said the purchase needed to be scrutinized because the acquisition could affect competition in the market for international air services to and from Britain.

"The decision to make a reference to the commission does not in any way

prejudge the question of whether or not the merger concerned would be against the public interest," a statement said. "It is for the commission to report on this after investigation."

Ridley said only the British carrier and not KLM would be investigated because he was only concerned about specific effects on the United Kingdom. An official said the commission had until June 28 to decide whether the purchase reduced competition and affected choices given to the British public. The commission has the power to order British Airways to sell its share, he said.

British Airways Chairman Lord King said he was disappointed by Ridley's decision. "The new Sabena Airline ... establishes a new hub and spoke airline out of Brussels, massively expanding existing services, increasing customer choice, and producing long-term benefits for the consumer," King said in a statement. "We have every confidence that the MMC will conclude its report in our favor," he said.

British Airways is one of the western world's largest air carriers with 211 planes which service 176 destinations in 66 countries.

#90086u1574 03/27/1990 ~United Press International

JERUSALEM (MARCH 27) UPI - Labor Party leader Shimon Peres on Tuesday dodged suggestions that he will be unable to form Israel's next government but party leaders indicated they would prefer new elections if Peres fails to pull together a new ruling coalition.

Yitzhak Shamir, caretaker prime minister in Israel's transitional government and leader of the Likud Party, criticized the suggestion that new elections be called. Shamir said he has a better chance than Peres of forging a new coalition coalition.

Peres sounded an optimistic note when asked by Israel Radio what would happen if he failed to form a government.

''I do not deal with prophecies. We'll see,'' Peres said. ''The problem today is not the formation of the government but the continuation of the peace process.''

Other Labor officials, however, floated the idea of new elections rather than agreeing to another Likud-led coalition if Labor cannot form a government.

''If there will be a majority for (a Labor-led) government, it will be presented,'' said Haim Ramon, head of the Labor faction in the Knesset, or Parliament. ''We have not given up.

''And if we reach the conclusion that this is impossible, then obviously the option of elections, which is the second realistic option from our point of view, will arise,'' Ramon said.

Only the Knesset can call new elections.

Peres' chances of forming Israel's next government seemed to diminish Monday night when a rabbinical sage criticized the kibbutz movement - a foundation of the Labor Party - for ignoring Jewish religious tenets.

Likud officials and observers said the attack will reduce Labor's ability to gain the support of two ultra-Orthodox political parties guided by the rabbi, Eliezer Schach.

Those two parties, with eight seats in the deeply divided Knesset, hold the power to make or break plans for Israel's next coalition government.

''I think that Mr. Peres and the Labor Party will continue their formation attempts, but without a doubt what happened last night does not support their attempts,'' said Labor's Yitzhak Rabin, Israel's former defense minister.

Three left-wing parties who had committed themselves to supporting a Labor-led coalition, also suspended contacts with Labor Tuesday. Because of the current government crisis, President Chaim Herzog also called for direct elections of a prime minister rather than the present coalition building system.

The 120-member Parliament is equally divided between support for Likud and Labor, Israel's two major parties, both of which must rely on smaller parties for coalition backing.

Peres was given a presidential mandate last week to form Israel's next government and has been negotiating with the smaller parties, trying to gain a parliamentary majority. At the same time, Shamir has lobbied for supporters to block Peres' efforts.

Israel's 15-month-old Likud-Labor coalition collapsed March 13 when Shamir fired Peres because of a disagreement over whether to accept a U.S. plan on how to begin talks between Israelis and Palestinians. Labor's 10 other ministers, including Rabin, resigned. Two days later, Shamir's government fell in a Knesset vote of no confidence on a resolution introduced by Labor.

The coalition formation process in Israel is indefinite, but any Parliament member chosen to form a coalition has an initial period of 21 days that may be extended. If no success is reported, the president may

pick another member of the Knesset to try.

''The only possible conclusion from the speech of Rabbi Eliezer Menachem Schach is that the chances of Shimon Peres to put together a government have decreased a lot,'' political reporter Dan Margalit wrote in a front-page analysis for Ha'aretz. ''Peres' abilities to maneuver have been limited to his ability to convince single (Knesset members) in the Likud to defect and cross the lines toward his party.''

#90086u1584 03/27/1990 ~United Press International

NEWARK, NJ (MARCH 27) UPI - The Prudential Investment Corp. said Tuesday it opened a Tokyo investment management unit in a bid to handle domestic and global bond, equity and money-market portfolios of Japanese institutions.

Prudential Investment Advisory Co. Ltd. proposed to place funds in Japanese, U.S., German, British and other investment instruments for Japanese pension funds, investment funds and similar large institutions.

Prudential said the unit intended to stand out in the Japanese market through high returns and quality service. Prudential said its main global securities unit, PCM International, had the best-performing global equity and bond funds in the U.S. market by total return since its inception.

"We're going to be offering Japanese investors American-style money management," said Wallace P. Wormley, the unit's chief investment officer and former PCM International managing director. "That means actively managing for maximum performance with innovative products, and providing a high level of client service."

The 13-person Japanese investment unit's chairman is Kiyofumi Sakaguchi, president of The Prudential Life Insurance Co. Ltd. of Japan. Its president is William E. Rankin, former managing director and chief investment officer of Prudential's international insurance department.

Prudential Investment Advisory is the U.S. parent's second Tokyo venture. In 1989 Prudential Investment Corp. opened a representative office there to seek U.S. money management business from Japanese institutions.

The Prudential Investment Corp., an investment arm of the Prudential Insurance Co. of America, has over $200 billion under management and invests about $100 million every business day.

#90086u1599 03/27/1990 ~United Press International

BOSTON (MARCH 27) UPI - Four more reputed mobsters surrendered Tuesday following a three-state sweep that authorities claimed left the New England Mafia ''in disarray.''

Twenty-one alleged mobsters, including reputed New England crime boss Raymond ''Junior'' Patriarca, were named in indictments unsealed Monday. A series of pre-dawn raids in Rhode Island, Massachusetts and Connecticut netted more than a dozen suspects Monday and four others surrendered Tuesday in Boston and Hartford, Conn., the FBI said.

''We have in custody all those that were subject to the indictment both here and in the state of Rhode Island. One Vincent Gioacchini surrendered this morning to FBI agents here in the Boston office,'' said Stephen Morrill, an FBI spokesman.

Three other suspects, Gaetano Milano, John Castagna and Jack Johns, surrendered Tuesday to federal authorities in Connecticut. Only one suspect, Salvatore D'Aquila Jr., remained at large, Connecticut authorities said.

Attorney General Richard Thornburgh, in announcing the sweep Monday, said the FBI had driven a ''stake in the heart'' of the crime family reputedly headed by Patriarca.

Morrill agreed Tuesday that the arrests had left the New England Mafia without a leader and scrambling to regroup.

''For a period of time, anyhow until new leadership arises, there will be a state of disarray,'' Morrill said.

But a lawyer representing Gioacchini scoffed at the notion of a New England crime family.

''This is hardly some kind of a big mafiosi. This guy's a nobody, a nothing,'' attorney Joe Oteri said of his client. ''The fact of the matter is the New England mob never existed. This is not a mob like in New York, like 'The Godfather.'''

Among the evidence the FBI believes will win its case against the reputed organized crime figures is the federal agency's first-ever recording of an alleged blood initiation ceremony for new Mafia members.

The alleged induction rite was recorded by an FBI bug Oct. 29 at a house in Medford, Mass., agents said. According to government documents, Patriarca presided over the ceremony, which included drawing blood from the inductees' trigger fingers.

The new members swore an oath of fealty in which the pledged ''to protect

my family and to protect all my friends.''

FBI agents arrested Patriarca at his Lincoln, R.I., home at 6:30 a.m. Monday. Patriarca, 43, was charged with racketeering and conspiracy in a 65-count indictment that spans 15 years and alleges a pattern of murder, robbery, extortion, drug running, obstruction of justice and racketeering, officials said.

The suspected mobsters were named in three separate indictments listing 113 counts, including murder, extortion, kidnapping, illegal gambling and drug running, Thornburgh said.

Patriarca was selected to succeed his late father, Raymond L.S. Patriarca, who died in 1984, the FBI said.

Patriarca was taken to Boston, where he was being held until a detention hearing scheduled for Apr. 6, said Diane Kottmyer, chief of Massachusetts attorney general's organized crime strike force.

#90086u1605 03/27/1990 ~United Press International

DETROIT (MARCH 27) UPI - United Auto Workers President Owen Bieber applauded Tuesday legislation to increase the number of American lobbyists for foreign interests who would be required to register.

Bieber said the proposals, introduced by Pennsylvania Sen. John Heinz, were a good start in attacking the problem of foreign agencies that pay U.S. firms millions of dollars each year to influence government leaders.

The head of the one million-member union, in testimony before the Foreign Relations Committee in Washington, said Japanese interests spent the most last year on lobbying efforts - over $100 million to 113 U.S. firms.

But he said other nations also spend freely because "there is little in the American political system to inhibit their direct involvement in a wide range of activities aimed at influencing our government decision-making." If money is the mother's milk of politics, "foreign influence peddling is the crack cocaine of our policy-making process," he said.

Bieber noted that during the past 15 years, a third of the senior officials at the Office of the U.S. Trade Representative had become "foreign agents," including every former general counsel of the agency.

By contrast, there is no comparable network of lobbyists representing U.S. interests in foreign capitals because both legal restrictions and the political cultures of other nations make such activity unthinkable, the UAW said.

Bieber also suggested that the hiring of key U.S. trade officials be declared an unfair trade practice, since Japan's political "market" is closed to similar influence buying.

"We need a mechanism to deal with this lack of reciprocity to provide a course of action against what I view as a sort of political dumping," Bieber said.

The UAW leader also urged the committee to consider complementing existing restrictions on foreign contributions to political candidates with a spending limit applied to lobbying activity.

"Even with full disclosure of foreign agents ... America will still have the foreign influence-peddling problem unless some limits are imposed," Bieber said.

#90086u1607 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - An unanimous Supreme Court rejected Tuesday a claim that the federal system for paying lawyers handling West Virgina coal miners' black lung claims is unconstitutional.

The court, however, sent the case back to West Virginia courts for further hearings, finding evidence submitted at trial was insufficient.

''The evidence relied upon by the West Virginia Supreme Court did not remotely establish either that black lung claimants are unable to retain qualified counsel or that the cause of such inability is the attorney's fee system administered by the (Labor) department,'' Justice Antonin Scalia wrote for the court.

The West Virginia Supreme Court had ruled the current system of dealing with more than 7,000 applicants a year for black lung benefits was unconstitutional, saying the complexity of the system deprived the applicants their due process rights.

The federal government's claims system imposes restrictions on how and when lawyers representing the miners who suffer from the respiratory disease can be paid, causing some lawyers to reject the cases.

The Labor Department argued that Congress drafted the Black Lung Benefits Act of 1972 to protect claimants from lawyers who might overcharge or otherwise take advantage of them or their survivors.

Labor officials say in most cases applicants do not need attorneys and that they can hire specialists to help miners apply for the monthly

benefits.

Many miners have waited up to six years for resolution of their cases.

The case decided by the court came to light in 1987 after a West Virginia state bar ethics committee found Elkins, W.Va., lawyer George Triplett charged unauthorized contingency fees to 15 black lung claimants between 1978 and 1983.

The committee went to the West Virginia appeals court, seeking enforcement of a six-month suspension for Triplett. The court denied enforcement of the suspension and found the attorney's fees provision unconstitutional.

West Virginia is one of the nation's largest coal producing states.

#90086u1633 03/27/1990 ~United Press International
(MARCH 27) UPI TODAY'S PEOPLE:

GUEST RENTER: Former debutante Cornelia Guest is being sued by her Beverly Hills landlord for not paying the rent. Guest, who was proclaimed ''deb of the decade'' in the '70s before moving from New York to California to pursue a movie career, signed a one-year lease last May to rent a house for $5,000 a month. But landlord Marlene Morris filed suit Monday claiming Guest hasn't paid up for March and she is seeking $25,000 in damages plus punitive damages. Morris contends that she has asked Guest to move out but Guest refused and acted ''willfully, maliciously, intentionally, deliberately and obstinately ... with the intent to vex and harass'' her landlady. Guest's acting career has yet to take off and her strongest claims to fame are a past romance with Sylvester Stallone and sexy billboards in the Los Angeles area that promote a line of hair products.

TURNER'S HUSBAND: Actress Kathleen Turner's husband, real estate man Jay Weiss, holds a 30-year lease on the Bronx building that housed the Happy Land social club where 87 people died in an arson fire during the weekend. Roger Boyle, the attorney for Weiss and partner Morris Jaffe, said they had been trying to evict the illegal club and were ''horrified at the events of this weekend and lament the loss of life which ensued from such events.'' Authorities are trying to determine whether Weiss or Alex DiLorenzo III, who owns the building and leased it to Weiss, have any liability. Turner, who is starring on Broadway in ''Cat on a Hot Tin Roof '' married Weiss in 1984 after a romance that started when he helped her find an apartment in New York. In 1987, state officials accused Weiss and Jaffe of illegally profiting from rent-controlled apartments.

COSBY PART OF MAYOR'S CARDBOARD CABINET: A cardboard Bill Cosby is an unofficial member of the staff of San Francisco Mayor Art Agnos but not

everyone approves of the way Agnos uses the life-size cutout. Agnos keeps the cardboard Cosby in an office closet and drags it out for prominent black visitors. The mayor says the idea is to encourage minorities to invest in their communities like Cosby does. ''He's terrific,'' Agnos says of Cosby, who gave $20 million to Spelman College. ''You know why? Because he's doing what the Greeks are doing, what the Jews are doing, what the Chinese are doing and what everyone else in the world is doing. He says, 'We successful blacks have to invest in our communities and we haven't been doing it. And if we don't do it, we aren't going to succeed.''' Toni Cook, former head of the Bay Area Black United Fund, doesn't like the tactic. ''It floored me,'' she said. ''I thought it was most inappropriate. As a professional, I found it very insulting to be the brunt of his frustration.''

HOMELESS ROCKY: ''Rocky'' still can't find a home. The Philadelphia Art Commission voted 4-3 Monday to ban the larger-than-life bronze likeness of Sylvester Stallone's underdog boxer from the steps of the Philadelphia Art Museum. Stallone originally commissioned the statue for ''Rocky III'' and used it again recently for ''Rocky V.'' He had wanted it permanently placed atop the museum's steps to recreate a scene from the first ''Rocky'' movie but has been overruled. ''The bottom line feeling is that while for many people it has tremendous emotional, spiritual value and has become a city treasure and symbol of Philadelphia, there is also the fact it was created as a movie prop and now has to be examined as an independent work of art,'' said arts commission director Sandy Bressler. There also is opposition to placing the statue at the Spectrum sports arena, its temporary home, and the city's visitors center but a group of merchants and residents is interested in moving Rocky to the Italian Market in South Philadelphia.

SICK LIST: Richard Pryor is back in a Brisbane, Australia, hospital. Pryor 49, was discharged Sunday and had been planning to fly home to Los Angeles but he was re-admitted Tuesday after experiencing further problems. Pryor was vacationing at Sanctuary Cove on Australia's Gold Coast last week when he suffered a heart attack. A hospital spokeswoman said Pryor, who has a history of heart trouble and drug abuse, was in stable and satisfactory condition and his personal physician had flown in from Los Angeles ... Singer Gloria Estefan's recovery from a broken back is going so well that she may be released from a New York hospital this weekend. Estefan, who suffered the injury in a highway crash in Pennsylvania last week, has been walking the halls of the hospital and visiting patients.

#90086u1637 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - John Lehman, who resigned as Navy secretary when he realized his dream of a 600-ship Navy would not come true,

suggested Tuesday that the Navy shift a significant part of its force into ready reserve.

But Lehman insisted at a hearing of the Defense Policy Panel of the House Armed Services Committee that there be no fewer than 14 aircraft carrier battle groups, that the pace of shipbuilding not slacken and that the Navy not retire two of the four World War II-vintage battleships now in service .

''Even if the fleet shrunk to 400 ships I would keep all 14 (carrier battlegroups) and the four battleships,'' said Lehman.

Lehman was instrumental in rebuilding the Navy during the administration of President Ronald Reagan, but left when it became clear he would be held short of buying 600 ships. There are now 562 ships in the fleet.

With a reduced threat from the Soviet Union, Lehman said, the Navy can adapt to lower budgets by reducing ''the wartime pace at which it has operated the fleet throughout the 1980s.'' And, he said, the ''sacred six-month deployment should be dropped'' and ''a significant part of the fleet should be shifted to the ready reserves.''

While he had no estimate of the savings that could be accomplished with a Navy that took fewer, shorter cruises and conducted more training closer to U.S. shores, Lehman said it would be ''enormous.''

Reduced operating tempo, he said, would take the strain off Navy families, and save fuel and flying hours as battlegroups got away from preparing for a cruise for six months, taking the cruise, then taking six months to refit afterwards.

Lehman said the changes in Europe appear irreversible and urged that any force reduction be done in a way that would encourage similar disarmament by the Soviet Union.

He cautioned, however, that the country ''has to maintain the capability to deter and prevent (the Soviet military from waging naval warfare) if there is a coup or a fascist regime emerges from the turmoil that seems ahead in the communist world.''

Putting more of the ships in the reserve forces - and offering officers the option of short active duty service followed by work in the reserves - would allow that force to mobilize relatively quickly if necessary.

Lehman said shipbuilding should not be cut back because half to three quarters of the U.S. shipbuilding and repair yards could be forced to close. If necessary, he said, older ships could be mothballed to keep the yards working.

Also testifying was retired Air Force Gen. Russell Dougherty, a former commander of the Strategic Air Command, who plugged the B-2 bomber and argued for greater joint use of military bases.

He noted that just eight B-2 bombers could deliver the firepower that an air wing on an aircraft carrier could deliver and estimated the cost of two aircraft carrier battle groups would cover the price tag of the proposed purchase of 132 B-2s.

''We still think we're a maritime nation. We are now much more than that. ... We ought to begin to think like it,'' said Dougherty.

#90086u1640 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - Four new series hit the screen last week and the winner was NBC's ''A Family for Joe'' with Robert Mitchum, which did its part in helping NBC again win the ratings race, it was reported Tuesday.

Even more help was ''The Cosby Show,'' which was No. 1 for the 11th time in the 27-week-old season, and ''Ernest Hemingway's The Old Man and The Sea,'' which was the top Sunday movie.

The Mitchum sitcom aired Saturday and ranked in a tie for 31st. It will go into it regular Saturday slot at 8 p.m. Eastern time on Mar. 31, replacing ''Alf.'' ''Alf'' will be on hiatus, and whether it will come back next season remains in question.

Two of the other new series were on CBS - ''Sydney'' in 59th place and ''Normal Life'' tying for 67th, which does not sound as if CBS has solved its young comedy problems.

The fourth newcomer was ''The Outsiders'' on Fox, which came in tied for 62nd with the highest rating ever for a Fox dramatic series.

The Fox comedies were high scorers for the week, with ''Married...With Children'' in 13th place and ''The Simpsons'' tied for 14th.

In the Sunday movie battle, ''The Old Man and The Sea'' was in 22nd place. ABC's ''Dangerous Passion'' was in 47th and the first part of the highly acclaimed CBS two-parter, ''Common Ground,'' was in 50th. Viewers apparently wanted lighter fare.

On a day-by-day basis, NBC was No. 1 on Wednesday, Thursday and Saturday nights, while ABC took Monday, Tuesday and Friday. CBS won Sunday, thanks to ''60 Minutes'' in fourth place and ''Murder, She Wrote'' in 12th.

The NBC win on Saturday night, in which it beat the combined ratings of ABC and CBS by 17 percent, suggests that there aren't enough viewers on that night to support the combined network, Fox and independent station programming.

Compare Saturday night, the least watched night of the week, with Sunday, which has the largest audience. On Saturday, the total television audience was 43,931,700 households, of which the three-network audience measured 27,353,700, according to the Nielsen numbers.

On Sunday, the total audience measured 59,496,600 households, with the networks attracting 35,919,000 of them.

NBC won the ratings race for the 23rd consecutive week, and 91st out of the last 92 weeks. The network took the week ending March 25 with a 14.2 rating and a 24 share, according to the A.C. Nielsen Co. ABC returned to second place with a 12.2 rating and a 21 share, while CBS was third with an 11.2 rating and a 19 share.

The 27-week-old season-to-date ratings show NBC with a 14.7 rating and a 24 share, ABC with a 12.9 rating and a 21 share, and CBS with a 12.2 rating and a 20 share.

In the evening news ratings, ABC's ''World News Tonight'' with Peter Jennings continued its firm grip on first place with a 10.5 rating and a 20 share. The Jennings news has been in sole possession of first place or tied for first for 24 of the last 25 weeks. ''NBC Nightly News'' with Tom Brokaw came in second with a 9.4 rating and a 19 share, and ''CBS Evening News'' with Dan Rather was third with an 8.9 rating and an 18 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 programs for the week ending Sunday, Mar. 25, according to the A.C. Nielsen Co., were:

1. The Cosby Show (NBC)
2. America's Funniest Home Videos (ABC)
3. Roseanne (ABC)
4. 60 Minutes (CBS)
5. A Different World (NBC)
6. Cheers (NBC)
7. Golden Girls (NBC)
8. Empty Nest (NBC)
9. Wonder Years (ABC)
10. L.A. Law (NBC)

#90086u1680 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - Salvatore Martoche, acting director of the Office of Thrift Supervision, defended the agency Tuesday and urged a congressional panel not to alter the administration's thrift bailout plan.

Congressional critics have sought revisions in the $166 billion Financial Institutions Reform, Recovery and Enforcement Act, citing the slow pace of thrift resolutions and the growing number of troubled institutions.

"While FIRREA may not be perfect, it represents a worthwhile and workable piece of legislation," Martoche said. "It will take time to work. And, it should be given a chance to work. "The problems in the thrift industry did not develop overnight - and they will not be solved overnight," he said.

"We urge Congress to weigh carefully the potential for harm that could result from a restructuring at any time in the near future," said Martoche who was appointed by President Bush last month to replace former OTS Director M. Danny Wall.

The appointments of Wall and Martoche were the focus of a lawsuit brought by Olympic Savings and Loan Association of Berwyn, Ill., which claimed the men were illegally named to lead the agency because Wall was never confirmed by the Senate.

Government attorneys won a temporary stay of the decision, which they said could throw the OTS into chaos. Bush subsequently named Timothy Ryan, a former Labor Department attorney, to head the agency. The Senate Banking Committee is scheduled to hold a confirmation hearing Wednesday on Ryan.

Martoche, who testified Tuesday berfore a subcommittee of the House Banking, Finance, and Urban Affairs Committee, said he hoped Ryan's confirmation would come quickly, but added that "we're doing business as usual" at the OTS.

He also said the record $19.2 billion loss posted by the thrift industry last year, and a $6.5 billion fourth-quarter loss, were a "direct and positive result" of the thrift rescue legislation enacted in August.

"It is carving out the cancer that exists in the industry," he said. "Virtually all of the losses are from institutions already under the control of the government."

Many institutions, unable to meet tougher capital standards imposed by the new law, have been placed under government conservatorship and either closed or sold. Martoche said that 59 percent of the fourth-quarter loss was attributed to ten thrifts, which skewed the industry's earnings statistics.

Martoche said the higher capital standards are designed to ensure that growth in savings institutions is soundly financed. "These stronger capital requirements will greatly reduce the potential for losses to the deposit insurance fund," he said. "I understand that there is concern that we are being too callous in rejecting capital plans. Our goal is to be tough, but fair."

Martoche said the thrift plan has greatly enchanced the ability of the OTS to crack down on fraud and insider abuse. Last year, the agency initiated 338 enforcement actions against thrifts, up 20 percent from the year before.

#90086u1706 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - Crew members of an Avianca flight that crashed on Long Island talked among themselves about the jet's low fuel but did not specifically tell the tower of the emergency, a transcript of the cockpit voice recording showed Tuesday.

Avianca Flight 52, en route from Bogota, Colombia, to New York on Jan. 25 with an intermediate stop in Medellin, Colombia, crashed in Cove Neck, N.Y., after apparently running out of fuel. Of the 158 people aboard, 73 were killed, including the three cockpit crew members, and 82 were seriously injured.

In February, the National Transportation Safety Board cited the Avianca crash in recommending that the Federal Aviation Administration insist on better communication between pilots and air traffic controllers.

The board faulted the Avianca crew for not using precise phrases as ''emergency fuel'' or ''minimum fuel'' that would have given controllers a sense of the dire emergency. Such phrases are required in such cases.

The Colombian cockpit crew spoke to each other in Spanish - the transcript has an English translation - but communicated to air traffic controllers in English.

After missing its first approach into John F. Kennedy International Airport, the plane's captain, Laureano Cariedes, said to First Officer Mauricio Klotz at 9:24 p.m., ''Tell them we are in emergency.''

Klotz then told the tower, ''We'll try once again. We're running out of fuel.''

He did not say the word ''emergency'' as the captain had ordered.

Seconds later, the captain said to Klotz, ''Advise him we are emergency.'' Then, ''Did you tell him?''

Klotz told the captain, ''Yes sir, I already advised him.''

At 9:25, Captain Cariedes told Klotz, ''Advise him we don't have fuel.''

Klotz to the tower: ''Climb and maintain 3,000 and ah, we're running out of fuel, sir.''

About 20 seconds later, the captain said to Klotz, ''Did you already advise that we don't have fuel?''

Klotz to captain: ''Yes sir. I already advised him ... and he's going to get us back.''

About a minute later, a controller told Avianca: ''I'm going to bring you about 15 miles Northeast and then turn you back onto the approach. Is that fine with you and your fuel?''

Klotz, not indicating a critical fuel problem, responded, ''I guess so. Thank you very much.''

The captain asked what the controller said, and Klotz said, ''The guy is angry.''

At 9:30, Klotz said to a controller: ''We just running out of fuel.''

At 9:32, flight engineer Matias Rojas informed the cockpit crew the plane lost two engines. Klotz then radioed to the tower, ''We just, ah, lost two engines and ah, we need priority please.''

The plane crashed at 9:34 p.m.

(MARCH 27) UPI - Lithuanian officials have thrown up metal barricades around their parliament building as ethnic Russians mass for a protest outside. A doctor says Soviet soldiers stormed a psychiatric hospital where Lithuanian army deserters sought refuge and beat and kidnapped the deserters. Lithuania's prime minister says Soviet President Gorbachev refuses to take her calls.

Polish Solidarity leader Lech Walesa today asked Gorbachev NOT to use military force against Lithuania. Walesa says use of force by the Kremlin would disrupt the new democratic order emerging in Europe.

South African authorities say the situation is under control in the black township of Sebokeng, where nine blacks were shot and killed by police yesterday during a massive protest against poor living conditions. Reinforced police units are patrolling the township today. Police say officers fired in self-defense yesterday.

Greyhound is upping its reward in a bid to halt violence against its buses in the bitter three-week-old strike by thousands of Greyhound workers. The nation-wide bus line today said it will pay 100-thousand dollars for information leading to the conviction of any person for shooting at a Greyhound bus or terminal.

There have been attacks on 21 Greyhound buses and two terminals since drivers went on strike on March 2nd. The latest incidents occurred last night- including a shotgun blast fired at the Amarillo bus station... and a bus hit by gunfire near Orlando, Florida. NO one was hurt in either incident.

#90086u1729 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - A senior Soviet diplomat said Tuesday that the Kremlin hopes it can ''count on the undertanding of others who support law and order'' as it deals with the situation in Lithuania.

Sergei Chetverikov, deputy chief of the Soviet Embassy, cited a statement by Vice President Dan Quayle in justifying the Soviet decision to break into a hospital in Vilnius, capital of the Baltic republic, and arrest Lithuanian soldiers considered deserters from the Soviet army.

''Even Vice President Quayle admitted there should be discipline in the army,'' Chetverikov told a news conference at the embassy, about four blocks from the White House.

Quayle was quoted in an Arizona newspaper as saying, ''Violence against the Lithuanian people will not be tolerated.'' But he also said some discipline ''is absolutely imperative'' to keep desertion from becoming endemic.

Chetverikov said, ''The Lithuanian leadership's decision (to secede from the Soviet Union) is a clear violation of the Soviet Constitution.''

He said the Lithuanian people have the right of self-determination ''but they can't ignore the rights of other people.''

Lithuanian's withdrawal, he said, would be a violation of Soviet sovereignty since it will involve the takeover of border posts, installations such as atomic power plants, and resources, such as the

Soviet deep-sea fishing fleet.

''We hope we can count on the understanding of others who also stress the importance of law and order,'' Chetverikov said.

Both the Soviet diplomat and a State Department spokeswoman, Margaret Tutwiler, denied there was any ''deal or agreement'' between the United States and the Soviet Union on the situation in Lithuania.

As Chetverikov talked in an ornate salon, the chants of about 100 Lithuanian demonstrators across the street could be heard - ''Tanks out, tanks out'' and ''Nyet, nyet Soviet; da, da Lithuania.''

The Soviet diplomat stressed the need for ''dialogue or discussions'' between Moscow and Lithuanian leaders but there could not be negotiations ''because negotiations take place between the governments of two countries.''

Moscow, he said, would be willing to work out arrangements for eventual independence, ''but we disagree on how and when this should take place.''

''We are trying to find practical ways, if they really want to have independence,'' he said, but added, ''We are not sure if the entire population had an opportunity to express itself.''

#90086u1742 03/27/1990 ~United Press International

SAN JOSE, COSTA RICA (MARCH 27) UPI - A series of earthquake aftershocks, including one Tuesday measuring 4.9 on the Richter scale, have shaken Costa Rica since the weekend.

The latest quake hit Costa Rica at 8:52 a.m and registered 4.9 on the open-ended Richter scale, said Don Finley, a spokesman for U.S. Geological Survey.

Costa Rica's National Seismological Institute said it could not measure Tuesday's quake because its equipment was broken, but reported no material damages or human injuries.

On Sunday, a quake measuring 5.5 on the Richter scale was followed seven minutes later by a significant quake measuring 6.9 on the scale. Those were followed hours later by an aftershock of 5.1. The epicenter for all three was about 60 miles west of San Jose in the Pacific Ocean.

Finley said Tuesday's quake was also felt in the same area, adding that there have also been a lot of other smaller shocks that were not measured in the United States.

He said he had heard there was some damage from the big 6.9 quake on Sunday, ''but not as much as you'd expect, probably because it's offshore.''

Sunday's quakes injured eight people slightly, forced the evacuation of hotel guests in the capital, and damaged over 60 buildings, including schools and hospitals. The cost of material damages from Sundya's quakes is estimated at over $5 million.

Costa Rica's National Emergency Commission, which evaluated the damages, said most damages were reported in the Pacific central zone of the country.

#90086u1751 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - Controversy developed before a single witness

offered testimony Tuesday as a Senate panel began hearings on a bill that prohibits states from restricting abortions.

Sen. Orrin Hatch, R-Utah, criticized Sen. Howard Metzenbaum, D-Ohio, the committee chairman and a co-author of the Freedom of Choice Act of 1990, for stacking the witness list.

The witnesses included rape victims who were forced to resort to crude methods of illegal abortion before the Supreme Court's 1973 Roe vs. Wade decision, the orphaned son of a woman who fatally overdosed on drugs trying to end a pregnancy, and a Romanian nurse who spoke about the abuses of women denied abortions under the deposed Ceaucescu government.

''I am concerned about this hearing because we have only one witness on the side of right to life and the witness cannot show the video she was planning to show,'' Hatch said.

The witness, an ultrasound technician who planned to show a video of young fetuses, was allowed to show the video at the conclusion of the hearing, but Hatch said she should have been allowed to use it as part of her own testimony.

''It's just a question of when it's presented,'' Metzenbaum said, adding that there were not more anti-abortion voices on the list of seven witnesses because none had ''come forward.''

The Freedom of Choice Act is a direct challenge to the Supreme Court's July decision on Webster vs. Reproductive Health Services, which gave states the right to regulate abortion.

The bill says that ''a state may not restrict the right of a woman to choose to terminate a pregancy'' before fetal viability or at any time when it is necessary to protect the life or health of a women.

''This bill is addressed to those states that have already restricted access to abortions,'' Metzenbaum said. ''After Webster, women can no longer trust the court to hold firm against attempts by states to restrict access to abortion.''

In recent weeks, Idaho and the territory of Guam have passed controversial legislation that restricts the cirumstances under which a woman can have an abortion.

Metzenbaum said the legislation is a reaffirmation of the Roe vs. Wade decision.

However, Hatch said the bill is so broadly worded it allows abortions under any circumstances.

''This bill amounts to a sex selection bill,'' Hatch said.

The bill's sponsor, Sen. Alan Cranston, D-Calif., said he hopes to move the measure to the Senate floor this year. But opponents said a vote is unlikely in an election year.

''I think most members would not want to attach themselves to an issue like this,'' said Sen. Gordon Humphrey, R-N.H.

-30- 2889

#90086u1769 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - Vice President Dan Quayle found himself the subject of unwanted attention again Tuesday with weekend remarks on Lithuania cited by a top Soviet as support for actions undertaken by his government.

A Quayle spokesman, however, denied that the vice president meant to condone the Soviet use of force under any circumstance to quell the Baltic state's move for independence.

''The vice president's remarks were in the context of emphasizing that the situation in Lithuania should be negotiated and resolved peacefully without any use of force,'' said spokesman David Beckwith. ''He in no way countenances any violent actions by Soviet forces in Lithuania.''

The flap surfaced Tuesday when the Soviet Union's deputy chief of mission in Washington, Sergei Chetverikov, cited Quayle's remarks at a news conference Saturday in Scottsdale, Ariz., as seeming justification for the action of Soviet soldiers who beat and dragged Lithuanian army deserters from a hospital to reassert Moscow's control over the rebel Baltic republic.

Quayle, who has stirred controversy with previous remarks about foreign affairs, was reported to have said that ''while the Soviet Union should not threaten Lithuania, if the Soviet Union is applying disciplinary measures to people in their own military, that's a different situation.''

Chetverikov, at a news conference to defend the roundup of army deserters as a necessary enforcement of law and order and for the protection of Soviet citizens, said: ''Even the vice president, Quayle, the other day admitted that there should be some discipline within the army. So deserters, have been dealt with harshly in other countries as well. ...''

White House press secretary Marlin Fitzwater declined to support the vice president's remarks, even though President Bush made similar comments last year in regard to unrest in the Soviet republic of Azerbaijani at the

summit meeting with Soviet leader Mikhail Gorbachev in Malta.

Beckwith said Quayle was only suggesting that ''disciplinary measures in the armed forces were a complicated matter that required some distinction, but it was all in the context of stressing the need for Lithuania and the USSR to resolve their differences at the negotiating table.''

Quayle previously was disputed by the White House for hardline comments concerning the threat posed by the Soviet Union, as well as administration support for the a more comprehensive ''Star Wars'' space defense shield.

Bush, however, has said on several occasions that the vice president is free to speak his own mind.

MEXICO CITY (MARCH 27) UPI - Cuba jammed the first trial telecast of TV Marti early Tuesday and warned the attempt by the United States to broadcast television signals to Cuba could bring ''incalcuable consequences.''

''The initiation of tests today by the United States of a television channel in the Spanish language designed against Cuba can have incalculable consequences for almost non-existent bilateral relations,'' said the official Cuban news agency Prensa Latina in a dispatch monitored in Mexico City.

The first of a series of tests of the U.S. telecast of TV Marti to Cuba began at 1:30 a.m. Tuesday from the Florida Keys with a multi-colored test pattern followed by baseball highlights and a sampling of entertainment features.

Cuba jammed the signal beginning at about 2:08 a.m. until the test was concluded at 6:45 a.m., a Voice of America source said.

In Washington, White House spokesman Marlin Fitzwater conceded the TV Marti signal had been jammed but called the test a success all the same.

''The test worked in the sense that we began programming,'' Fitzwater told reporters. ''The programming aspects of it, technically and in terms of content, were successful and that programming was done in full compliance with national and international law but it was jammed by the Cubans.''

Fitzwater said there was little the United States could do to prevent the Cuban government from jamming TV Marti in the future, but the press secretary vowed the telecasts would continue. The United States has broadcast the Spanish-language Radio Marti to Cuba since 1985.

The TV Marti signal, originating in Washington, was relayed to Havana from a blimp tethered in the lower Florida Keys. Cuba jammed the signal, or made it unintelligible, by sending another signal out on the same wavelength.

Prensa Latina said Cuba would block future TV Marti broadcasts.

''With the initiation of transmission of the test, the unfolding of the Cuban interference mechanisms that will gradually adjust to the behavior of the signal of intruder (TV Marti) began,'' Prensa Latina said.

The official news agency said Cuba would not tolerate what it called a violation of its sovereignty and said Cuban authorities believed the United States initiated TV Marti because it was looking for a pretext to launch a military invasion of the communist Caribbean nation, about 90 miles south of Florida.

Cuba was especially insulted because the TV station is named after Cuban national hero Jose Marti, Prensa Latina said.

Despite democratic changes that have swept through the Soviet Union and across Eastern Europe, Cuban President Fidel Castro has vowed to uphold Communism in the island nation of 10 million.

Fitzwater said the United States ''will continue to try to program'' to Cuba and said that the jamming was not ''a big surprise to anybody.''

Cuba, which has threatened to retalliate against TV Marti by jamming other broadcast signals within the United States, turned up their giant Soviet-built transmitters last Friday during a Castro news conference, interrupting broadcasts from at least four Florida stations with the Cuban president's speech.

U.S. broadcasters fear a repeat.

''There is no doubt interference will start up, if not increase, when the balloon goes up,'' said Wayne Vriesman, pesident of the Clear Channel Broadcasting Service, an association of 59 of the largest U.S. radio stations.

The VOA source said Radio Marti, which had been promoting the television test broadcasting, had not been jammed Tuesday. He also said the jamming of the telecast ''was more intense in downtown Havana and less so in the outlying areas of the city.''

Cuba already shows American programs on its own television stations, including cartoons, the mini-series ''Roots,'' and such shows as ''Flipper

'' ''Knight Rider'' and ''The Muppet Show.''

SRINAGAR, INDIA (MARCH 27) UPI - Moslem separatists killed two people in Kashmir Tuesday as the first communal clashes ignited by an independence drive left six wounded in the mostly Hindu city of Jammu and prompted the deployment of troops.

The unrest in Jammu, the winter capital of Jammu and Kashmir state, followed growing tensions stoked by an influx into the city of thousands of Hindus from Kashmir. The tensions forced authorities on Monday evening to declare a curfew in part of the city.

Police said Tuesday's clashes were ignited when the head of a cow, considered sacred by India's majority faith, was found outside a Hindu temple.

The situation was exacerbated by processions of Hindu organizations around the city, 100 miles south of Srinagar, to protest the insurrection against Indian rule of Kashmir staged by Moslem separatist groups.

Hindus and Moslems fought with sticks and rocks and at least six people were injured, police said.

Authorities slapped a curfew on the entire city and deployed troops to help police keep order. Police said paramilitary units were also posted at camps set up by Hindu refugees from Kashmir.

Jammu and Kashmir state consists of the northern Himalayan Kashmir region, which is predominantly Moslem, and the Jammu region, which is mostly Hindu. Moslems, however, constitute a majority of the total population of 6 million. The capital is rotated every six months because of the harsh Himalayan winters in Srinagar.

The 3.2 million Moslems of Kashmir are demanding independence from India, claiming their region has been neglected and abused politically by the Hindu-dominated central government for years.

Tuesday's communal clashes in Jammu were the first instigated by the crisis in Kashmir.

More than 160 people have been killed in the uprising, which has prompted a migration of thousands of members of Kashmir's 100,000-strong Hindu minority.

In the summer capital of Srinagar, meanwhile, Moslem militants stormed a

flour mill owned by a Hindu businessman. They injured him and killed his son, identified by police as Parmit Sahni.

The radicals also killed a suspected police informer and dumped his body on the outskirts of Srinagar, police said.

In a related development, separatists exploded a bomb in a Hindu-owned hotel, police said. There were no casualties.

Home Minister Mufti Mohammad Sayeed, a native of Kashmir, described the situation in his home as ''serious,'' telling the upper house of Parliament that the uprising had acquired a momentum of its own. The minister said the militants between March 1 and March 25 had killed 61 people.

#90086u1779 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - Two U.S. chemical companies have refused to sell the Army an ingredient to make poison gas, but the Pentagon said Tuesday it is seeking to buy the agent from other firms so it can build a new generation of chemical weapons.

The Pentagon refused to comment about whether it is looking to buy the ingredient overseas, where, ironically, it has laid some of the blame for the supply of chemical weapons technology to Libya and other Third World nations.

The Occidental Chemical Corp. of Dallas and the Mobay Corp. of Pittsburgh, an American subsidiary of the West German firm Bayer A.G., refused to sell the ingredient, thyionyl chloride, to the Army.

The companies are the major American manufacturers of the ingredient, which is used to make Sarin, a lethal nerve agent used in the Army's chemical-filled artillery shells.

The Army needs 160,000 pounds of the ingredient by June to proceed on schedule in the making of a new generation of chemical weapons called ''binary,'' the Pentagon said.

These are to replace the current U.S. stockpile of aging chemical weapons and are believed to be safer because, unlike the earlier version, the chemicals in the warhead do not mix and become lethal until the shell is fired.

The Commerce Department said it had ''under review'' the possibility of taking legal action to force Occidental and Mobay to sell the ingredient under the Defense Production Act of 1950, which allegedly can be used to

compel defense-related companies to produce defense materials for the government.

At the same time, ''The Army is attempting to locate thyionyl chloride from other sources,'' Pentagon spokesman Bob Hall said. ''At this point it would be inappropriate to identify the specific companies.

''There are other companies that may be potential sources, I don't want to say where (they are located) though,'' Hall said, refusing even to disclose whether they are in the United States.

Hall said the Defense Department had received no indications yet whether ''these other sources will be forthcoming'' with the ingredient.

President Bush has said he wants to ban chemical weapons. But he also wants to modernize the U.S. chemical weapons arsenal until there is a global ban.

Mobay spokesman Gerd Wilcke said his company refused to sell the ingredient to the Army because, ''We have guidelines. We are not selling the chemicals that may end up in chemical weapons.''

#90086u1780 03/27/1990 ~United Press International

DAYTONA BEACH, FL (MARCH 27) UPI - Heavy beer drinkers are twice as likely to develop cancer of the mouth than those who guzzle hard liquor, but both groups face a far greater cancer risk than non-drinkers, a researcher said Tuesday.

All people who regularly consume large amounts of alcohol face an increased risk of oral cancer. But Dr. Arthur Mashberg said his research found the problem appears to be more severe among beer drinkers.

A study of military veterans showed those who drank 6 ounces or more of hard liquor daily had 10 times greater rates of cancer of the mouth than non-drinkers, Mashberg said.

But among those who drank six or more cans of beer a day, the cancer rate rose to 25 times that of non-drinkers, Mashberg said at an American Cancer Society seminar.

Although the link between alcohol and oral cancer has long been known, Mashberg said research previously has not drawn a distinction between hard liquor and beer.

It is not known why beer seems to be more harmful than hard liquor, said Mashberg, of the Veterans Administration Medical Center in East Orange,

N.J.

He compared the drinking and smoking habits of 181 hospital patients who had mouth cancer and 497 people who did not have mouth cancer.

Of the cancer patients, 82 percent had six or more drinks or cans of beer a day and 76 percent smoked one or more packs of cigarettes.

''It is very difficult to find a non-smoking drinker,'' Mashberg said.

Mashberg emphasized that his work and prevous studies indicate that alcohol is an independent risk factor for cancer of the mouth and esophagus, and smoking simply increases the risk. A recent study of Israelis who smoked but did not drink turned up very few oral cancers, supporting the idea that alcohol alone can predispose people to oral cancer, he said.

There are an estimated 30,500 new cases of oral cancer in the United States annually and 8,350 deaths. Men have twice the oral cancer rate of women.

Mashberg said contact between carcinogens in alcohol and the mouth and tongue may be the reason alchol seems to boost the risk of oral cancer more than than cancers of the pharynx, larynx and other organs of the respiratory and digestive tracts.

As with other cancers, the researcher said, early diagnosis is a key to long-term survival among those with oral cancer. But he said most mouth cancers are not diagnosed until there are persistent, visible sores.

For people at high risk for oral cancer, an experimental screening rinse may offer the best hope for early treatment.

The blue rinse is administered like a mouthwash, Mashberg said. Its chemical action can make visible tiny cancerous and pre-cancerous ''patches'' in the mouth that might otherwise go unnoticed.

Mashberg said, however, that the rinse is not being marketed and thus is not generally available to doctors.

Unless a drug company agrees to produce the rinse, ''an unusual opportunity for diagnosis of cancer of the oral cavity and upper aerodigestive tract will be lost,'' he said.

#90086u1786 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - U.S. executives are expecting weak sales but a stable inflation rate in the second quarter of 1990, a survey by the Dun & Bradstreet Corp. said Tuesday.

''Expectations for higher prices are unchanged from a quarter ago,'' the leading marketer of business information services said. ''This suggests that inflation is not accelerating.''

Business expectations for higher second-quarter sales dipped slightly, said the survey conducted among 1,500 business executives in manufacturing retailing and wholesaling.

''While sales optimism is at the lowest level since 1983, it remains well above the levels generally associated with impending recession,'' said Joseph Duncan, corporate economist and chief statistician at Dun & Bradstreet, which has been conducting the quarterly survey since 1947.

Duncan pointed out that overall expectations have been stable for the past nine months, although there were substantital differences in the nine regions as defined by the U.S. Bureau of Census.

''Sales optimism is strongest in the oil patch states of the West South Central region, while the area with the bleakest outlook is New England,'' Duncan added.

Dun & Bradstreet compiles an Optimism Index which reflects trends among business executives.

The New England's Employment Optimism Index fell to zero, an indication that no employment growth was expected in the coming months in a region which recently recorded the lowest unemployment rate in the United States.

Likewise, the Pacific states which had the best projections only two quarters ago, now have little expectations for higher sales and prices.

''The drop in expectations for increased new orders in the Pacific and New England regions is largely a function of anticipated cut backs in defense spendings,'' Duncan said.

On the corporate front, reactions differed according to the business sector, with manufacturing showing signs of sluggishness, mainly due to higher interests rates and a stronger, less competitive dollar.

Sales outlook among manufacturers deteriorated, while retailers' expectations for higher sales rebounded in the latest survey.

''The shift in retailers' and manufacturers' optimism underscores the fact that consumers now are responsible for most of the current economic growth '' Duncan said.

The Sales Optimism Index slipped two points to 57 from 59 in the first quarter of 1990. Retailers' expectations rose to 61 from 55 while wholesalers' hopes dropped to 57, down from 61. Manufacturers' sales expectations dropped four points to 56.

''Consistent with recent retail statistics, retailers are confident that consumer spending will continue to be strong in the coming months,'' Duncan said.

The Profits Optimism Index rose to 54 points, up one point from the first quarter, with lackluster expectations among retailers unchanged from the previous quarter.

Executives felt that second-quarter inventories would remain unchanged, while new orders remained in the downtrend begun in the third quarter of 1989, dropping to 52 points from 55 in the first quarter.

#90086u1788 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - Joseph J. Hazelwood, the man who captained the oil tanker Exxon Valdez to one of the worst environmental disasters in U.S. history, will be interviewed by Connie Chung this week, CBS announced Tuesday.

The interview, to take place Thursday in the New York area, will be one of three segments on ''Saturday Night with Connie Chung,'' to air on Saturday.

A spokeswoman for the show said that there were no conditions or limitations placed on the interview.

Chung has been chasing the Hazelwood interview since July 1989. She and her producers met with Hazelwood in August and Chung traveled to Alaska to do a special on the Exxon Valdez oil spill. They were unable to land the Hazelwood interview in time for that show, which aired Feb. 17, according to a CBS spokeswoman.

Hazelwood has not granted any television interviews on his role in the 11 million-gallon oil spill in Prince William Sound, nor did he testify at his criminal trial in Anchorage.

He was acquitted on Mar. 22 of three of the four counts on which he was charged and was fined $50,000 and sentenced to 1,000 hours of community service on a fourth count.

#90086u1792 03/27/1990 ~United Press International

CHICAGO (MARCH 27) UPI - Grain futures rallied early, then sold off and were mostly lower at the close Tuesday on the Chicago Board of Trade.

Trading was choppy and the volume was light.

Soybean complex prices were at or near session lows. Trading in the complex was influenced by concern over whether soybean exports from Brazil would begin on schedule. Basis levels were lower, which could indicate a pick-up in Brazilian exports is expected.

Soybean oil and meal were lower on the lack of domestic and foreign demand.

Corn futures were narrowly mixed. Commercial buying was countered by commission house selling in rather quiet trading.

Wheat prices were lower across the board, pressured by liquidation and profit-taking. Limited export business and favorable weather conditions in the Great Plains also depressed the market.

At the close, corn was up 1/2 to off 1, soybeans down 3 1/4 to 4 1/2, wheat off 1 1/4 to 4 and oats down 1 1/4 to 1 1/2.

#90086u1794 03/27/1990 ~United Press International

HOUSTON (MARCH 27) UPI - Soviet energy officials Tuesday provided details about vast reserves of oil and natural gas available and offered joint ventures with U.S. companies in exchange for their technology and capital.

"Oil companies ... could have joint ventures operated by this time next year," said Tom Russell, chairman of Professional Geophysics Inc. The Houston-based geophysical contractor, which is involved in joint ventures with the Soviets, coordinated the Houston meeting with the U.S. oil companies.

Representatives from 75 to 100 energy companies attended the meeting with five officials from the Soviet Ministry of Oil and Gas Industry interested in forming joint ventures to develop Soviet oilfields.

"This is the first meeting in which joint ventures in the Soviet Union are offered, but it is by no means the last one," said Aklim Moukhametzianov, deputy minister of Oil and Gas Industry and member of the Soviet parliament. "This meeting signifies a new stage between numerous

government oil enterprises and world oil companies. As you know, this is all new to us," he said. A similar meeting has been scheduled in London April 3.

"Soviet oil companies are not experienced (in joint ventures) and the ruble is not convertible yet; however, all problems can be worked out given the desire from both sides," he said through an interpreter.

Five specific areas were outlined for joint ventures in exchange for state-of-the-art technology that is necessary to develop those areas. In the past, the Soviets turned to Western companies for petroleum equipment and drilling supplies, but now they want to form partnerships to increase the production of Soviet hydrocarbons. "Most of these areas have certain problems, and we need experienced partners to help develop them," Moukhametzianov said.

The territories available for joint ventures are four areas in the Western Siberian Basin with an estimated 13 billion barrels of oil reserves. The fifth is in the Bashkir region of the Volga-Urals, an older area with deep undiscovered oil and gas potential.

For development of the five areas, the Soviets need help with reservoir modeling, enhanced oil recovery techniques, production management systems and methods of formation stimulation.

U.S. oil company executives such as Pete Silas, chairman of Phillips Petroleum Co., have said the Soviet bureauacracy's red tape made doing business in the Soviet Union too difficult.

But PGI's Russell said, "The time is right. The Soviets are anxious to proceed, and so are we. It took (PGI) less than six months to negotiate and form our first joint venture with the Ministry of Oil and Gas Industry and just over six months for a joint venture with another ministry."

PGI already has joint ventures in Bulgaria and another Eastern Bloc country as well as two joint ventures in the U.S.S.R., which are located in Moscow and central Siberia.

"The Soviets have excellent technical education and theoretical concepts but don't have the instrumentation and hands-on practical experience," Russell said.

Also Tuesday, Platt's Oilgram reported the Soviet Union and Hungary have signed a trade agreement that maintains Soviet 1990 oil exports to the former Soviet bloc nation at 6.5 million tonnes, or 45.5 million barrels.

The respected industry newsletter in a Budapest dispatch said the Soviets also agreed to make up for the 2.1 million barrels of oil Hungary was

forced to import in the first quarter from Iraq because Soviet deliveries fell short.

Platt's quoted Hungary's deputy minister for industry Gyula Czipper as saying Soviet imports would meet his nation's oil needs for 1990. Payment in 1990 will remain in rubles, but starting in 1991 Hungary will pay for Soviet oil in "convertible currencies at the world market price," the newsletter said.

#90086u1802 03/27/1990 ~United Press International

ATHENS, GREECE (MARCH 27) UPI - Three Iranian oil and natural gas wells near the Iran-Iraq cease-fire line, which Iraq set ablaze 19 months ago, are still on fire and Iraq has refused permission to put out the blaze, the official Islamic Republic News Agency said Tuesday.

Quoting from a report by U.N. Secretary General Javier Perez de Cuellar, IRNA said the oil and gas wells were located in the no man's land between Iran and Iraq near Dehloran, some 325 miles southwest of Tehran.

Perez de Cuellar said Iraqi forces started the fires about the time of the Gulf cease-fire in August 1988, and the oil and gas wells have been blazing out of control since, burning some 60 barrels of oil a day.

He said the U.N. Iran-Iraq Military Observers Group, which monitors the cease-fire, tried to persuade the Iraqis to allow the fires to be extinguished, but Iraq refused.

IRNA quoted the U.N. chief as saying in a report that the Iranian and Iraqi forces are in close proximity at several points along the 750-mile cease-fire line.

He said the U.N. observers group proposed to both parties that they should cooperate in moving their forces back from each other, but have had only partial success.

In his report released Monday, Perez de Cuellar also criticized both sides for flooding the no man's land between their forces, but he said there were only a few cases of cease-fire violations, which were settled when the U.N. observers intervened.

Prez de Cuellar also called on the Iraqis to withdraw from Iranian territory and asked both sides to release prisoners of war they still held. Iran is believed to be holding some 70,000 prisoners while Iraq reportedly has 30,000.

Peace talks were stalled a year ago when Iran refused to exchange

prisoners until Iraqi forces withdrew from some 800 square miles of Iranian territory.

NEW YORK (MARCH 27) UPI - A grand jury Tuesday examined evidence in the Bronx social club fire that killed 87 people, including a tearful videotaped confession by a jealous lover accused of the worst mass slaying in U.S. history.

Following threats from family and friends of the victims, police were providing round-the-clock protection to the ex-girlfriend of Cuban immigrant Julio Gonzalez.

Police said it was Gonzalez' fight with Lydia Feliciano at the club that led him to dump gasoline in the doorway of the illegal Happy Land club early Sunday and set it off with a match.

Unable to escape, 87 of the club's patrons were asphyxiated or burned to death.

As the grand jury moved toward an indictment expected to be handed up Friday, the Bronx district attorney's office also was considering whether to seek an indictment against the real estate dealers who owned and

managed the building housing the social club.

Among them was Jay Weiss, the wife of actress Kathleen Turner, and one of the city's real estate moguls.

Authorities charged that Gonzalez, 36, knew he was condemning the building's occupants to death when he torched it, saying he was familiar with the cramped layout of the club, which has been described as a ''firetrap.''

Gonzalez was charged with 87 counts of murder in the second degree by depraved indifference to human life and 87 counts of second-degree felony murder. He was also charged with attempted murder and two counts of arson.

He was transferred Monday from the Rikers Island jail - where he was held without bail following his arraignment - to the psychiatric ward at Kings County Hospital. He was placed in isolation under a suicide watch.

The members of the grand jury were viewing the videotaped confession and hearing testimony from witnesses, including the gas station attendant who sold the gasoline to Gonzalez and witnesses who were inside and outside the social club, said Ed McCarthy, a spokesman for the Bronx district attorney's office.

Officials would not say if Feliciano, the ticket-taker at the club and one of five people who escaped the deadly blaze, would testify before the grand jury, citing the secrecy of the proceedings.

Feliciano showed up Monday at a school near the club which officials had turned into a disaster relief center.

She was accosted by grieving relatives of victims, who demanded to know her role in the fire, asking her how she had escaped while other perished. Police quickly escorted her from the scene.

Weiss's lawyer, Roger Boyle, confirmed his client was a partial owner of the building, but said his corporation, Little Peach Realty Inc. had been trying to evict the club's operator, Elias Colon, who died in the blaze.

Weiss and Morris Jaffe, his partner, were, ''horrified at the events of this weekend and lament the loss of life which ensued from such events,'' the lawyer said in a statement.

The fire was the worst in New York City since flames tore through the Triangle Shirt Waist factory and left 145 dead exactly 79 years earlier.

NEW DELHI, INDIA (MARCH 27) UPI - PLO Chairman Yasser Arafat declared Tuesday that the Palestinian uprising against Israeli rule in the occupied territories would continue in ''wave after wave,'' whatever the outcome of Israel's political stalemate.

In a news conference on the second day of a three-day visit to India, Arafat also condemned the U.S. Senate for approving a resolution calling on the U.S. administration to recognize Jerusalem as the capital of Israel. Arafat said the action would adversely affect the prospects for Middle East peace.

Prior to meeting the press, the pistol-toting leader of the Palestine Liberation Organization held a ''working lunch'' with Prime Minister V.P. Singh in their second meeting in as many days and received an honorary doctorate of science degree from the Jamia Milia Islamia, a leading Islamic university.

Arafat, recognized by India as the president of Palestine, also accepted the 1988 Jawaharlal Nehru Award for International Understanding, an annual award named after India's first prime minister and the founder of the Gandhi-Nehru political dynasty.

In presenting the award before an audience of officials and diplomats in the government's main international conference hall, President Ramaswamy Venkataraman said India was not just honoring Arafat, but ''the valiant and patient Palestinian people.''

Venkataraman reaffirmed India's support for the PLO and an independent Palestinian state and told Arafat: ''May your steadfast journey lead you to total victory.''

At his news conference, Arafat said a resolution of Israel's political leadership stalemate would have no affect on the uprising against Israeli rule in the occupied Gaza Strip and the West Bank.

He charged that Israeli leaders wanted to play out their struggle to form a new government following the collapse March 15 of the Labor Party-Likud coalition in order to gain time in which to crush the ''intifada,'' or uprising.

''They think this will enable them to win time, which would allow them to eliminate the intifada. But this intifada will continue, wave after wave, until the end of the Israeli occupation,'' Arafat said.

#90086u1883 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The National Science Foundation announced Tuesday a grant program of up to $80 million aimed at helping to make American students No. 1 in the world in science and math achievement within 10 years.

Erich Bloch, director of the science foundation, said the new grants are being offered on a competitive basis to states to revamp their science and mathematics programs at any educational level. The only major restriction is that the changes be made on a statewide, not patchwork, basis, Bloch said.

No specific amount of money has been set aside for the grants, foundation officials said, but it is expected four to eight states will receive five-year grants totalling $5 million to $10 million each. That means the cost of the project will run between $20 million and $80 million, they said.

''We intend through this new effort to help move the nation toward the President's goal of making American students the first in the world in science and math achievement by the year 2000,'' Bloch said. Currently, U.S. students perform more poorly on science and math achievement tests than their counterparts in many industrialized nations.

States must submit their preliminary grant proposals to the Statewide Initiatives Program by July 9, Bloch said. Possible projects might include overhauling the recruitment and training of science and math teachers or changing the content of science and math courses.

CHICAGO (MARCH 27) UPI - Mayor Richard M. Daley said Tuesday his top education aide has every right to send her daughter to a private school in the suburbs, but asked her to apologize for sharp criticism of a city high school.

Deputy Mayor for Education Lourdes Monteagudo, a former Chicago grammar school principal, said Monday the Chicago public school system - described by former Education Secretary William Bennett as the worst in the country - is not good enough for her daughter.

Monteagudo, who advises the mayor on education issues and draws up policy statements, was particularly critical of Roberto Clemente High School, the school her daughter would have attended if she had remained in public school.

Daley, whose own children attend private school, said there was nothing wrong with Monteagudo's decision to send her daughter to a school in Winnetka, a well-to-do community in the suburban North Shore area.

''It doesn't send the wrong message,'' Daley said. ''She's a good mother, and if we had more mothers like her, who sacrificed and worked, we'd have a better society.''

Daley said employees of his administration ''can send their kids to Timbuktu if they want to.'' But the mayor said Monteagudo should apologize for her criticism of Clemente High.

''I think she should,'' Daley said. ''It was an unfortunate remark.''

Monteagudo said her daughter is a high school freshman at North Shore Country Day School in Winnetka. She said she sent her daughter there because she has little confidence in the ability of the city school system to provide quality education.

''I am the deputy mayor for education in Chicago, but I also am a mother of three children,'' Monteagudo said. ''And I, as a mom, have to look out for the well-being of my children. As a mom, I don't have very many choices for my children in Chicago.''

Daley named Monteagudo deputy mayor for education last May. She was then the principal of Sabin Elementary School, where her daughter went to school. Her other two children still attend school there.

''Prior to my appointment, I talked to my daughter and she decided to go to school outside of the city. I could not support her staying in Chicago until the system can be reformed, because the system is bad. The quality of education in Chicago is poor,'' Monteagudo said.

Monteagudo said the city offers special education programs for gifted children, but not much for the average student.

''Hopefully, when my son goes to high school, I can advise him with great pride to go to a Chicago public high school. I can't do that now,'' she said. ''Chicago's school system needs a major rehaul, not just a few minor changes.''

#90086u1918 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The experimental air-launched space booster called ''Pegasus'' will be dropped from a B-52 bomber at 40,000 feet and attempt to launch its first payload into orbit April 4, the Pentagon announced Tuesday.

Pegasus, which looks like a long missile, is designed to replace some land launches and to allow for inexpensive but speedy deliveries of satellites and other small space payloads into orbit.

In its three previous flight tests, the three-stage Pegasus booster has remained attached underneath the B-52. But on April 4, Pegasus will detach fire its engines and - if all goes well - zoom into space.

''The Pegasus will be carried aloft from Edwards Air Force Base, Calif., by a National Aeronautics and Space Administration (NASA) B-52, which will then launch it at 40,000 feet over the Western Test Range,'' the Pentagon said in a statement.

''Pegasus' three stages will carry a 422-pound payload into a polar circular orbit of a nominal 320 nautical miles with an inclination of approximately 94 degrees,'' it said.

Included in the first-stage of the booster - Pegasus has a winged first stage - are instruments that will gather hypersonic flight performance data, the Pentagon said.

Its third stage will launch into orbit a payload known as PEGSAT, which was developed by the Defense Advanced Projects Agency and NASA's Goddard Space Flight Center.

PEGSAT will carry instruments to measure variations in launch vehicle and spacecraft attitude, temperature, pressure and vibrations, and release a small experimental communications relay satellite for the Navy.

Once this is complete, NASA will use PEGSAT to conduct two barium chemical release experiments over central Canada during the month following launch.

Officials hope that Pegasus - named for the winged horse of Greek mythology - will be used in the mid to late 1990s to launch seven small communications satellites known as MICROSATs. It was developed in a privately financed joint venture between Orbital Sciences Corp. and Hercules Aerospace Co.

The Pentagon's Defense Advanced Projects Agency is picking up the costs for launch vehicles and the demonstration and test and evaluation part of the program.

#90086u1939 03/27/1990 ~United Press International

OTTAWA (MARCH 27) UPI - Polish Prime Minister Tadeusz Mazowiecki Tuesday repeated calls for the creation of a pan-European council to monitor

political events in Eastern Europe that are no longer served by existing institutions.

Mazowiecki, who was on a nine-hour stopover in the Canadian capital before returning to Poland late Tuesday, said the so-called Council for European Cooperation should be established before the next Helsinki conference later this year.

The idea was first proposed by Mazowiecki last month and similar suggestions have also been made by Soviet and West German officials.

Mazowiecki told reporters after meeting with Prime Minister Brian Mulroney that the acceleration of political events in East and Central Europe ''has been enormous'' and has outstripped established European institutions.

He said a Council for European Cooperation would not replace established institutions but would provide a general European forum for East and West Europe.

The two leaders discussed establishing closer economic ties between Poland and Canada, the question of German reunification and political events in the Soviet Union.

Canada will send a trade mission of politicians and business leaders to Poland on Friday, headed by Deputy Prime Minister Donald Mazankowski.

Mulroney told the Polish leader he was greatly admired in Canada for his ''quite revolutionary initiatives'' underway in Poland.

#90086u1989 03/27/1990 ~United Press International

(MARCH 27) UPI - The Senate today voted 50-47 NOT to kill a bill backed by the Bush administration to give industry more potent legal weapons to fight federal clean-up orders. Senate Democratic leader George Mitchell warned that all the tougher clean-air standards in the Senate bill would become meaningless if the Environmental Protection Agency does NOT have the power to enforce them.

The Commerce Department says it may take legal action against two chemical companies who have refused to sell an ingredient needed to make poison gas to the Army. Occidental Chemical Corporation of Dallas and the Mobay Corporation of Pittsburgh say their corporate policies prevent them from assisting in the manufacture of poison gas and have refused to sell the ingredient, thionyl chloride. The Pentagon says the Army needs 160-thousand pounds of the chemical by June to proceed on schedule in the making of new chemical weapons shells.

In Pittsburgh, hospital officials say the death of the world's first recipient of a combined heart-liver-kidney transplant is NOT likely to discourage physicians from trying the operation again in the future. Officials at Presbyterian-University Hospital say 26-year-old Cindy Martin died late yesterday of multi-system failure and infection caused by hepatitis. Martin survived nearly four months after her historic operation.

#90086u1995 03/27/1990 ~United Press International

PARIS (MARCH 27) UPI - Heavy fighting has broken out along the Chad-Sudan border between troops loyal to Chadian President Hissene Habre and rebel soldiers, according to reports reaching Paris Tuesday.

The rebel troops loyal to dissident Idriss Deby were reported to have captured the towns of Tine and Baha on Chad's eastern border.

The reports, emanating from Chadian opposition forces within the Sudan as well as from the Chadian capital of N'Djamena, said regular Chadian troops had regrouped in Iriba, about 35 miles to the west of the Sudanese frontier.

They said the Chadian army troops may be trying to draw the rebels further into Chadian territory in order to entrap them.

According to the reports, the latest wave of fighting between contending Chadian factions began on Sunday, with the rebels claiming they were the victims of an attack by regular Chadian army troops.

The Chadian government charged that Libya had trained the rebels and that Sudan was supporting them.

The Libyan Foreign Ministry denied the charge, saying Libya was not involved in the conflict in a report by state-owned Tripoli Radio monitored in Cairo, Egypt.

''Libya has nothing to do with the current fighting between the Chad government and Chad rebel forces,'' the radio quoted a ministry spokesman as saying.

Other reports indicated that cash-strapped Sudan, which has been moving toward greater unity recently with its oil-rich neighbor Libya, may have facilitated the movement of rebel troops, Libyan soldiers and military hardware to Chad from Sudan.

But Tripoli radio said Libya had asked the Organization of African Unity to set up an investigation committee to visit the sites of the reported fighting and to confirm that there was no Libyan involvement.

Analysts familiar with the region have been expecting renewed fighting.

In October and November last year, forces loyal to Habre carried out a series of raids against the rebels within Sudanese territory, penetrating up to 120 miles into the Sudanese province of Darfour in an effort to destroy rebel outposts.

The renewed fighting comes also as France reduces its military presence in Chad from 300 men to 100. The French operate an air defense system near Abeche in eastern Chad.

#90086u1998 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - A major shareholder of General Development Corp., which recently pleaded guilty in a $100 million fraud scheme, told federal regulators Tuesday it plans to ask stockholders to remove all members of the company's board of directors.

United Capital Corp., a New York real estate firm that owns 12.6 percent of General Development's common stock, said in a Securities and Exchange

Commission filing that it will submit the proposal May 4 at the Miami company's annual meeting of stockholders.

In a letter to the directors, United Capital said that they "failed to live up to their legal duties and moral obligations to the stockholders" and that the company's fraudulent practice "permeated the entire corporation and was part of its institutional policy."

General Development, one of Florida's oldest and largest real estate developers, along with former president Robert F. Ehrling and former chairman David F. Brown, were indicted March 14 on charges of bilking customers of more than $100 million in a fraud scheme dating back to 1982. The 16-count indictment charged the defendants with mail fraud, interstate transportation of people to commit fraud and conspiracy to commit mail fraud.

In a plea bargain, the defendants each pleaded guilty to one conspiracy count. The company agreed to pay a $500,000 fine and make restitution to its home buyers, which could cost the company as much as $100 million during the next 25 years.

Brown, 49, and Ehrling, 50, each face a maximum of five years in prison and a $250,000 fine when they are sentenced May 22 in U.S. District Court in Miami.

United Capital said it will seek to remove all but one of the directors for failing to meet their "legal duties and moral obligations" to stockholders. The real estate firm will challenge the recent appointment of the remaining director, Charles M. Andolsek, arguing that his selection to fill a vacancy on the board should have been done by stockholder vote.

United Capital said it also intends to include Stephen B. Siegel in its slate of six nominees for election to the General Development board. Siegel is a founder and chief executive officer of Chubb Realty Inc., a national commercial real estate developer. The nominees also include United Capital's chairman and chief executive officer, A.F. Petrocelli.

Shareholders filed three class-action suits March 14 against General Development, alleging that fraud and mismanagement had cost them as much as $64 million in four months. The case is pending.

The federal grand jury indictment charged General Development and the two executives with inflating the value of the company's Florida homes and preventing buyers, many from Northern states, from checking prices on competing properties.

#90086u2014 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The Senate, reversing an earlier vote, Tuesday killed an administration-backed amendment to the clean air bill that would have given industry more potent legal weapons to fight federal cleanup orders.

After first refusing to kill the amendment on a tabling motion, the Senate rejected it by a 50-47 vote in what was considered an obscure but critical battle in the weeks-long consideration of the bill.

The amendment, opponents charged, would have destroyed the ability of the Enviromental Protection Agency to crack down quickly on polluters that discharge excessive emissions.

The key votes were provided by Sen. John Breaux, D-La., who supported the amendment but then voted to kill it; Sen. Christopher Dodd, D-Conn., who was absent on the first vote; and Sen. Dennis DeConcinci, D-Ariz., who voted in favor of the amendment the first time, but paired with the absent Sen. Edward Kennedy, D-Mass., nullifying both their votes.

Senate Republican leader Robert Dole reserved the right to call up the amendment again for another vote before the Senate takes final action on the bill.

The amendments to the Senate clean air bill, proposed by Sens. Don Nickles, R-Okla., and Howell Heflin, D-Ala., would give businesses greater legal rights to challenge EPA enforcement actions before they take effect.

It also would limit the EPA's powers to impose new emission control requirements on a particular factory unless the agency could prove they were needed to prevent "serious" risk to public health.

Senate Democratic leader George Mitchell of Maine charged the Nickles-Heflin amendment would give polluters appeal rights not provided under any other federal environmental statute, enabling them to stall enforcement actions in court for years while harmful pollution continued. "It is a prescription for lack of enforcement of the Clean Air Act," the Maine senator said. "It is a prescription for endless litigation."

Mitchell warned that none of the tougher emission standards in the Senate clean air bill would mean much if the EPA could not effectively enforce them. "Any law is only as meaningful as its enforcement," he said.

Sen. John Chafee, R-R.I., raised specific questions about the proposal to make new emission controls contingent on a showing of "serious" risk to public health. He said that vague legal threshhold seemed tailor-made to give industry lawyers a loophole to exploit in court. "What is a 'serious' risk?" Chafee asked. "I think most senators would agree with me. I feel any effect on my health is a serious effect."

Nickles and Heflin said their legislation was necessary to fix the "unworkable" and "unfair" permitting and enforcement provisions of the clean air bill.

In particular, the two senators complained the bill would not give businesses the right to a formal EPA administrative hearing to challenge cleanup orders. Instead, a businessman could only make his case against a cleanup order in informal conferences with EPA enforcement officials.

"This does not sound very fair," said Heflin, who noted most other federal agencies provide full administrative hearings to private citizens facing enforcement actions.

Nickles said that the EPA's ability to impose new emission limits had to be limited at some point or industry would forever be subject to arbitrary decisions by the agency to tighten pollution controls.

"Businesses will be kept in a state of permanent permit application, never knowing from day to day if their application might be reopened and specifications changed," Nickles said.

Under the bill, every major factory or business that emits air pollution for the first time would be required to apply to the government for a permit spelling out the specific emission limits it would have to meet.

The bill also would expand EPA powers to change permits or issue enforcement orders when it determines a polluter is endangering public health or the environment.

BOISE, ID (MARCH 27) UPI - A bill that would give Idaho the most restrictive state abortion law in the nation arrived Tuesday on Gov. Cecil Andrus' desk amid the growing threat of a possibly ''disastrous'' national boycott of Idaho potatoes.

Gwen Dempsey, a 42-year-old real estate agent from Waterford Mich., and a Republican pro-choice candidate for that state's Legislature, delivered a warning Tuesday to Andrus: a half-empty bag of Idaho potatoes.

''If he does not veto the abortion bill we will start a boycott of Idaho potatoes,'' she said.

Jim Hawkins, director of the Idaho Commerce Department, said the boycott ''could be disastrous,'' adding he heard it could extend to all Idaho products and tourism, the state's third-largest and fastest growing

industry.

''How deep and how disastrous that is, time will only tell,'' Hawkins said.

The bill would prohibit abortion as a means of birth control - banning all abortions except in cases of severe fetal deformity, threat to the life or health of the mother, or in cases of rape and incest with restrictions.

If the Legislature does not adjourn this week, Andrus has until 9:04 a.m. Monday either to sign the bill or veto it before it would go into law without his signature.

If the Legislature adjourns this week - as expected - Andrus will have an additional 10 days from the day of adjournment to act on the bill before it would become law without his signature. It would take effect July 1.

Andrus, a three-term Democrat seeking re-election to an unprecedented fourth term, has consistently said he is against abortion. However, he said he would consult with several advisers before making a decision.

''Anytime someone threatens one of our major cash crops, it becomes significant,'' Andrus said.

Other abortion-rights groups also warned of a boycott.

''There will be a high price to be paid for trying to take away women's rights,'' said Patricia Ireland, executive vice president of the National Organization for Women in Washington, D.C.

''We are poised and ready to say 'no potatoes on our plates,''' Ireland said in a telephone interview. ''It will not be taken lightly by the rest of the country.

''We have a lot of experience in this kind of boycotting,'' she said. ''And I can tell you, this kind of thing catches fire.''

Potatoes are Idaho's No. 1 cash crop. Idaho accounted for 27.2 percent of the nation's potato production in 1988, more than any other state.

Since the Senate gave final legislative approval to the bill last Thursday pro-choice marchers have held candlelight vigils every night outside the Capitol. An estimated 1,000 people turned out Monday night.

Meantime, a drive was growing to place an initiative on the November ballot that would invalidate the anti-abortion bill if it becomes law.

Cally Huttar, organizer of the drive, said 15,000 signatures have been validated; 38,743 signatures are needed by July 1 to put it on the ballot.

Huttar, of Ketchum, said passage of the bill has ''ignited pro-choice people to such an intensity that there is no possible way the initiative won't qualify and very little chance it won't pass.''

WASHINGTON (MARCH 27) UPI - The Pentagon said Tuesday the U.S. Southern Command in Panama is sticking to its estimate of 314 Panamanian soldiers killed in the Dec. 20 U.S. invasion despite reports that only 50 were killed.

''They feel they want to stick with these estimates,'' Pentagon spokesman Bob Hall said of the 314 cited by the Southern Command as the number of enemy forces killed.

''They recognize that there are other figures. They recognize their numbers are only estimates. They recognize that there are duplications (of dead bodies) in them,'' Hall said. ''They can't come up with a harder number than this.''

The U.S. Southern Command also estimated that 202 Panamanian civilians were killed in the invasion, although human rights groups contend the number is much higher and that there was a heavy loss of civilian life in ''Operation Just Cause.''

Twenty-three American soldiers were killed in the assault.

The Los Angeles Times, quoting Southern Command spokeswoman Marj Boggs from Panama, reported Tuesday that the command now believes the actual casualty figure for Panmanian forces was about 50, meaning the civilian death toll exceeded it by a 4 to 1 ratio.

But Hall said he placed a telephone call to the Southern Command afterward and was told by military leaders that they were sticking to their official figure of 314.

A reassessment of the figures was believed to have been undertaken following a report earlier this month from a Boston organization, Physicians for Human Rights, that concluded at least 302 Panamanian civilians had been killed.

Also, the Panamanian government coroner's office, the Institute for Legal Medicine, has said it has positively identified only 50 bodies as having been members of the Panama Defense Forces or the paramilitary ''dignity battalions.''

BEVERLY HILLS, CA (MARCH 27) UPI - Media magnate Ted Turner announced Tuesday that Diana Ross will star in a movie for his Turner Network Television based on the life of entertainer Josephine Baker.

Ross, who in 1973 portrayed jazz great Billie Holliday in the feature film

''Lady Sings the Blues,'' will serve as executive producer on the project, which is scheduled to start production in the fall and air on the TNT cable network next year.

Baker, who died in 1975, was a major star in Europe starting in the 1920s after emigrating from the United States, where she was Harlem nightclub singer and Broadway chorus girl.

Her provocative dance routines, considered scandalous in the United States made her the rage of Paris and she went on to become the highest paid entertainer in Europe in the years before World War II.

''I've always dreamed of playing Josephine Baker,'' Ross, who attended a news conference with Turner at the Four Seasons Hotel. ''I've been researching and developing the project for over 10 years.''

Turner said the planned three-hour movie was the largest commitment his TNT network has made to a film project.

Scott Sassa, TNT executive vice president, said the project would have a budget more than double the typical $4 million allocated for a TNT movie. The cable network has so far produced more than 20 films, including Faye Dunaway's acclaimed ''Cold Sassy Tree.''

Sassa also said the Baker movie may be released theatrically overseas.

The Turner project is the second feature on Baker's life produced for cable. Home Box Office recently announced an $8 million production, with Robert Halmi and David Puttnam as executive producers.

Turner said he was not concerned about the HBO project. ''The competition does not worry us,'' he said. ''I don't know much about Josephine Baker, but I do know about Diana Ross.''

Ross, who owns two scripts for the project, said she plans to cover Baker's entire life in the movie, including her adoption of a dozen orphans of various nationalities during the 1950s. Baker also was decorated by the French government for her activities as an entertainer and ambulance driver during World War II and her work with refugees at the end of the war.

''I think she was one of a kind,'' Ross said. ''She believed in America and she believed in racial equality.''

Ross, who received an Academy Award nomination for ''Lady Sings the Blues '' said that she has made no decisions yet on casting or a director but that she would not direct the movie herself.

Ross will produce the project through her Anaid Film Productions Inc., which has produced her last five television specials. She previously performed as Baker in a special in the 1970s.

Baker, she said, was ''a spectacular woman with a full life.''

''I just think America and young black women should know the story,'' Ross said.

#90086u2105 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The Senate Finance Committee greeted cooly Tuesday the Bush administration's plan to boost sagging U.S. savings by

giving a tax break to investors who save their money for up to seven years.

Committee Chairman Lloyd Bentsen, D-Texas, pushing his proposed expansion of the Individual Retirement Account, disagreed with the administration's view that its ''Family Savings Account'' offers a greater incentive to save.

Kenneth Gideon, assistant treasury secretary for tax policy, said the proposed expansion of the IRA program would be ''significantly more expensive'' to taxpayers while providing lower benefit levels.

''The Family Savings Account, because it is complete and permanent tax avoidance, costs big bucks down the road,'' Bentsen countered. ''With the IRA, though, everybody still pays their fair share.''

Bentsen said he wants to bring IRAs ''out of retirement'' and expand the savings vehicle to help people with two of their most important investments - buying a first home and paying for a college education.

''The American people understand the IRA,'' Bentsen said. ''They know how it works. It's a proven winner at increasing savings.''

Despite the disagreements, Bentsen said the goals of both proposals are the same - to increase the national savings rate.

Increased domestic consumption, fueled in part by the steady popularity of credit cards, has brought the United States to a savings crisis, with domestic savings down significantly from levels maintained between 1950 to 1979, said Laurence Kotlikoff, a Boston University economics professor.

Between 1980 and 1985, the U.S. savings rate averaged 5 percent. Since 1985, Americans have saved at an average rate of 3.6 percent, Kotlikoff said.

''There is a clear, positive relationship between a nation's savings rate and its productivity growth,'' said David Silver, president of the Investment Company Institute.

Increased productivity would enable the United States to be more competitive in the world economy and is the ''principal determinant'' of maintaining or improving the nation's standard of living, he said.

Gideon said the administration's proposed family savings account offers a more flexible savings vehicle than would an expansion of the IRA plan.

''After careful study of the various alternatives, the administration has concluded that the (family savings account) proposal would serve a broader range of savings needs than an expansion of the IRA program,'' Gideon said.

The family savings account would allow single taxpayers earning less than $60,000 annually to contribute up to $2,500 a year and joint filers earning less than $120,000 annually to contribute up to $5,000 a year to the savings plan.

The contributions would not be tax-deductible, but the earnings would be tax-free as they accrue. The paln also would allow a penalty-free withdrawal of up to $10,000 for the purchase of a first home.

The Council of Economic Advisers has estimated that the family savings account plan will increase personal savings by about $40 billion between 1990 and 1994, said Sidney Jones, the Treasury's assistant secretary for economic policy.

''How Americans should save money is less important than the fact that they should save money. I believe it is the responsibility to Congress to make the job of saving as attractive as possible for the American family '' said Sen. William Roth, R-Del.

#90086u2121 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The State Department criticized the national airline of Hungary on Tuesday for canceling flights for Jewish emigres to Israel after threats from terrorists.

State Department spokeswoman Margaret Tutwiler described as ''outrageous '' the threats by terrorist groups who said they were trying to disrupt the flights of Soviet Jews going to Israel.

Because of pressure from Arab countries, the Soviet government had refused to allow direct flights from Moscow to Tel Aviv, but the Hungarian airline Malev, announced that it would make direct flights to Israel for the Soviet Jews.

Those flights were canceled last week because of the terrorist threats. The Soviet government then said it would not allow the Soviet Jews to fly to Budapest, a decision that brought a sharp American diplomatic protest. Since then Polish authorities said they would try to find a way to use Poland as a transit point for the Soviet Jews.

''We deplore any action which has the effect of limiting the right of emigration. We have been in touch with all parties involved and have made our views quite clear. We deplore the terrorist threats which have led to these decisions,'' Tutwiler said.

''We believe a more appropriate course of action would be to take the necessary steps to provide the required levels of security. International terrorism cannot be combated by permitting threats to achieve the goals of the terrorists,'' she said.

Tutwiler noted that the Hungarian government also issued a statement regretting the decision by Malev to cancel the flights, and the Hungarian authorities are now trying to find a way to resolve the problem.

''We are very pleased to see that Poland has indicated a willingness to act as a transit point for Soviet Jews,'' Tutwiler said. ''They are acting responsibly and we hope others will as well.''

Since the Soviets opened up emigration to Soviet Jews and other minorities Western embassies have been flooded with requests for visas.

The Israeli government encouraged the first flights of emigres to Israel, but that became an explosive political issue when some of them settled in the occupied territories, or in East Jerusalem, which was annexed by Israel in 1967.

At the time the direct flights from Moscow to Israel were cut off, the Jewish emigres were arriving in Israel at the rate of about 10,000 per month.

BONN, WEST GERMANY (MARCH 27) UPI - West German officials, including Chancellor Helmut Kohl, Tuesday joined a heated debate over claims that some newly elected East German officials worked for the secret police of the former hard-line Communist government.

Kohl said the former members and informers of the State Security police - known as Stasi - could not be condemned outright because 40 years of Stalinist rule ''have left deep scars'' on East Germany. But he said anyone who committed crimes while working for the Stasi should be brought to justice.

He said that at least 100,000 people had been employed by the hated police unit.

Addressing a meeting of his conservative party in Bonn, Kohl spoke of ''a

great tragedy'' that should be dealt with ''in the spirit of internal reconciliation.''

Continuing controversy over claims that leading politicians had worked for the once-feared Stasi, flared up again this week when a West German weekly newspaper printed allegations that Social-Democratic Party Chairman Ibrahim Boehme was a former secret police informer.

Boehme denied the accusations, but said he had suspended himself from his party job until he is cleared of the charges.

Lothar de Maiziere, who is likely to become the first non-communist prime minister after leading a conservative group to electoral victory, March 18 also denied similar accusations leveled against him.

Several pro-democracy groups and citizens' associations called for demonstrations in East Berlin, Leipzig and Erfurt to back demands for the screening of all deputies to the new, 400-seat Parliament likely to convene next week.

The New Forum group, which played a major role in last fall's popular uprising that ended 40 years of Stalinist-style rule, said the rallies will be held under the slogans ''We're demonstrating again'' and ''No Stasi factions in Parliament.''

West German Interior Minister Wolfgang Schaeuble criticized the demands, saying that if deputies had to be screened, ''Parliament will never hold its first session.''

He called for amnesty for former Stasi officials.

Ingrid Matthaeus-Maier, a senior official of West Germany's opposition Social-Democrats rejected the suggestion, which she called ''unbearable.''

Meanwhile, Werner Fischer, one of three East German government officials responsible for disbanding the Stasi said Tuesday his life had been threatened - possibly by former secret police members.

He said one man working on a citizens' group helping with the disolution of the police unit was ''rammed by another car while sitting in his own and forced off the street.'' He said other officials had received anonymous threats.

BANGKOK, THAILAND (MARCH 27) UPI - Vietnam's population, growing at what officials called an alarming rate, has topped 64 million, and could reach 80 million by the end of the decade, a preliminary sample of the national census showed.

The Vietnam News Agency said that a preliminary population report based on a 5 percent sample of census information gathered last year showed that Vietnam's population was 64.4 million on April 1, 1989, an increase of 11.7 million in 10 years.

''Compared to the world's average rate, Vietnam's population growth has been quite rapid, mainly due to high fertility rate,'' the agency said.

The average woman between that ages of 15 and 49 has four children, the report said, a rate it found ''alarming.'' The annual rate of population increase was 2.3 percent, it said.

The state has set a population growth rate of 1.7 percent as its target, but most family planning measures have proven ineffective so far.

''If no active and effective measures are taken in the family planning program to bring down the birthrate, Vietnam's population could swell to 80 million by the year 2000,'' the agency said.

Vietnam already suffers from a shortage of arable land and an unemployment rate estimated at nearly 20 percent.

Measures to slow the birthrate have been largely ignored outside of major cities.

Diplomatic sources in Hanoi have said the failure of family planning represents the population's distrust of government social security measures.

Many people in the countryside believe the only insurance for their old age is to have many children to look after them, one diplomat said.

#90086u2192 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The Federal Aviation Administration, in a major shift of enforcement policy, will start waiving penalties for air carriers who find, report and fix safety problems, FAA Administrator James Busey said Tuesday.

Busey, who outlined the changed stance at a lunch of the Aero Club of Washington, also detailed a proposed new FAA crackdown on pilots who drink a program aimed at refusing flying certificates to pilots with alcohol-related driving offenses.

Busey, a retired admiral, said he wanted to create a ''new relationship'' between air carriers and the FAA, which regulates safety issues, and get away from a strict enforcement program that, he said, has hindered the FAA in enhancing safety.

''If a carrier discovers an inadvertant violation, corrects the problem, reports it promptly to the FAA and puts in place a permanent fix that's acceptable to all of us to be sure it will not happen again, the FAFA will not penalize the carrier, period,'' said Busey.

''We want to encourage carriers to shift their resources from contesting punitive enforcement actions to making their operations safer,'' he said.

''This new policy ... recognizes the fundamental reality that the FAA with its relatively small corps of inspectors cannot police every aspect of the industry, cannot crawl through the belly of every aircraft out there, cannot look over the shoulder of every pilot or personally screen every passenger or piuece of luggage. The system was never designed to work that way,'' he said.

Busey said that many of the details of the new program have yet to be worked out but that by fall he hopes to have model self-auditing programs available for airlines to use. He said some firms already have developed their own safety audit teams.

The new approach, he said, will apply both to the larger carriers and to the smaller regional carriers.

He said that although the focus of enforcement will shift to self policing FAA inspectors still will be in the field making their own checks for safety violations ''and will continue to demand 100 percent compliance.''

And, Busey left open the question of what will become of the estimated 4,000 to 5,000 pending enforcement cases, most of them involving security breeches.

On the question of drinking pilots, brought to the spotlight earlier in the month with the firing of three Northwestern Airlines pilots who flew a

Midwest run while drunk, Busey said the FAA is moving to tighten its rules. Current regulations prohibit flying within eight hours of having a drink, and from having a blood-alcohol level greater than .04 percent while flying.

''We are moving ahead with a rule-making action that would allow the FAA to deny applications or suspend or revoke an airman's certificate for certain alcohol or drug-related motor vehicle offenses. This proposed rule will supplement, not replace current stringent regulations covering alcohol and drug use by crew members. It will give us another important tool to help us rid aviation of a threat to safety we cannot ignore,'' he said.

BY VERNON SCOTT

HOLLYWOOD (MARCH 27) UPI - With this year's Oscar awards comfortably behind us, it's time for a few ruminations.

Did you notice, for instance, that for the second year running there were no ''winners?'' The stars who presented the awards were admonished to say, ''And the Oscar goes to ...'' instead of ''And the winner is ...''

Then there was the child-like delight on the part of the show's producers in the techno-gimmick of cutting to segments from London, Moscow, Sydney and Buenos Aires by satellite.

The only glitch was the triple echo from Moscow, which Jack Lemmon handled with the aplomb of a true professional.

Steve Martin's comment on the satellite Ping-Pong was acerbic: ''We were going live from Malaysia, but the TV crew was hanged at the airport,'' he told a worldwide audience of an estimated 1 billion.

It was delightful when Melanie Griffith giggled after making her brief speech as a presenter. She looked at co-presenter Tom Hanks with relief, as if she'd won a bet that she could get through it without a fluff.

Everyone seemed happy that the requisite musical production number was cut from the opening of the show after the wretched excess of producer Allan Carr's gaudy Snow White number last year.

Yes, Kevin Kline, last year's winner of best supporting actor, is really the nephew of the show's producer, Gil Cates. Thus his, ''Thank you, Uncle Gil.''

Robert De Niro was finally inveigled into making an appearance on the show then he hardly said a word as co-presenter Martin Scorsese did all the talking. One of America's greatest actors stood looking as if he would rather be out getting mugged in a New York subway.

You just knew that ''Driving Miss Daisy'' was going to win when stars Morgan Freeman and Jessica Tandy received extended ovations when they came on stage to present the award for best film editing.

And, by the way, why didn't Tandy mention Freeman in her thank-you speech?

Did anyone notice the lack of old-time glamour on the show - with the exceptions of Griffith, Jane Fonda and Candice Bergen?

For whatever reason the gowns, hairdos and jewelry looked more Main Street than Rodeo Drive. Beauties like Jessica Lange, Kim Basinger, Michelle Pfeiffer, Daryl Hannah, Julia Roberts and Elizabeth McGovern didn't come across with much zing.

Was anyone surprised that recluses Marlon Brando and Woody Allen did not attend the big bash?

Almost as if to verify its international impartiality and objectivity in judging a truly great performance, the academy's biggest ovation for the night's winners went to Daniel Day-Lewis for his astonishing portrayal of Christy Brown in the Irish film ''My Left Foot.''

Did non-Hollywoodites enjoy emcee Billy Crystal's gag about Jack Nicholson's wealth when he said ''Morgan Freeman drove him here and Jon Peters still does his hair?''

Peters, a former hairdresser, is now in partnership with Peter Guber, among the most successful producers in Hollywood.

Last year's best actress winner, Jodie Foster, presented Day-Lewis with his Oscar, but why did the academy break with tradition by not having last year's best actor, Dustin Hoffman, present Jessica Tandy with her Oscar?

Paramount's executives didn't laugh much when Crystal commented on a reel of past film highlights: ''There were 330 films in that montage and not one of them has yet gone into profit, according to Paramount,'' Crystal said.

The reference, of course, was to the creative bookkeeping at major studios involving profits following the recent Art Buchwald court case against Paramount.

The funniest improvisational bits were Chevy Chase's asides to Dan Aykroyd

during their presentation segment. Chase zapped Aykroyd about losing the best supporting actor award to Denzel Washington.

Did you get the feeling you'd like to see more of Natalya Negoda, the Russian beauty who appeared with Jack Lemmon on the Moscow segment?

Basinger gratuitously needled the academy for not voting more nominations to Spike Lee's ''Do the Right Thing,'' expressing her opinion as if it held more weight than the academy membership's.

If the membership is any reflection of public taste, heavy-handed message pictures are not in vogue right now.

This year's nominations went a long way to prove the general mood is more passive than confrontational.

''Driving Miss Daisy'' won and it was a soft, gentle story of friendship. ''Field of Dreams'' was a lovely fantasy. ''Dead Poets Society'' was an uplifting schoolboy drama with comedy. ''My Left Foot'' was brilliantly inspirational.

Of films nominated for best picture, only ''Born on the Fourth of July'' was violent and politically exploitive.

Backstage, an embittered Oliver Stone, who won for best director, blamed a nebulous right-wing media's negative campaign for hurting his film, a claim that appeared to baffle most of the media covering the event.

#90086u2201 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - Eastern Airlines, facing lower-than-expected revenues, cannot hold up its end of a tentative agreement to pay unsecured creditors 50 cents on the dollar, the embattled carrier said Tuesday.

Eastern upped its projected 1990 loss to $330 million, from the $185 million loss the carrier projected in January, representatives of the embattled Texas Air Corp. subsidiary said at a creditors meeting in New York.

The revised projection is based on a first-quarter revenue shortfall, the carrier said. The meeting was held to present Eastern's proposed revisions to its plan to emerge from Chapter 11 bankruptcy protection.

The airline, which filed for protection from creditors last March, also said it could no longer project making a profit in 1991.

Nor does Eastern expect to emerge from bankruptcy protection by July 1, as the airline had previously projected.

''The negative and disruptive public perception surrounding Eastern's reorganization process'' has slowed the efforts to recapture the business travel market, said Phil Bakes, Eastern's president and chief executive officer, in a statement.

Eastern and its unsecured creditors, who are owed an estimated $980 million, reached a tentative agreement last month that would have paid the creditors $490 million. Of that, $300 million was to be paid in cash by Eastern and $190 million was to have been in secured notes, half of which would have been issued by Eastern and the remainder by another Texas Air unit, Continental Airlines.

Eastern has not yet reached agreements with its other creditors, which it must do before submitting a business plan to the bankruptcy court for approval.

Eastern told creditors it is considering reducing flights after July 1 by 12 percent from previous projections to focus on the most profitable routes and also proposed reducing the size of its fleet to 148 from 160 aircraft to generate revenue.

The carrier said it also is considering asking the U.S. Bankruptcy Court for permission to withdraw approximately $80 million from escrow accounts to support operations through mid-year.

The court granted Eastern approval to withdraw $60 million in March and $50 million a month earlier to meet expenses.

Also, Eastern said it may ask the court's permission to impose work rules on its pilots' and flight attendants unions in an effort to save some $80 million in annual labor costs.

#90086u2231 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - The dollar was mostly higher against the main currencies in quiet New York trading Monday as participants pressured the steadily falling Japanese yen but snapped up a newly attractive British pound.

The yen's declining movement was simply more of the same, said corporate dealer David Jaques of Barclays Bank. Central bank intervention has not been able to prop up the unit and no other relief is in sight.

"It almost looks like a one-way street now with the yen," said John Nalesnik, senior vice president and international treasury desk manager for Connecticut National Bank in Hartford, Conn.

Britain's pound gained again after a big move Monday, when proceeds of a massive gold bullion sale by a Mideast investor - probably the Saudi Monetary Agency - poured into the currency to invigorate it.

"This morning there was sentiment that there was more to be done, that there was more of the (gold-to-sterling) order to be executed," Jaques said. So participants continued to purchase the British unit.

Jaques said the market has a "far more positive view" of sterling, which slid last week on political and economic worries. Players, wary of German and Japanese financial uncertainties, have focused on high British interest rates now pulling mobile global capital into the pound.

"As a short-term parking place (for funds), it's not such a bad deal," said Nalesnik, noting British political strife has subsided.

At the end of the New York session the dollar was quoted at 1.7130 West German marks, up from 1.7075 late Monday. Against the Japanese currency the dollar was changing hands at 157.65 yen, also up from 156.70.

Other dollar rates: 1.5185 Swiss francs, off from 1.5210; 5.7615 French francs, up from 5.7470; and 1,259 Italian lire, up from 1,255.75. The British pound rose to $1.6240 from $1.6185.

In Europe the dollar closed mixed. In Frankfurt it fell to 1.7130 marks from 1.7135 Monday. It eased in Zurich to 1.5220 Swiss francs from 1.5235.

In London, the pound rose to $1.6230 against $1.6135. Dealers said the pound gained on expectations of continued high British interest rates.

The dollar rose in Paris and Milan, to 5.7730 French francs against 5.7680 and to 1,259.90 Italian lire against 1,259. It was unchanged in Brussels at 35.45 Belgian francs.

In Tokyo, the dollar closed at 156.96 yen, up from 156.40, despite Bank of Japan intervention. Finance Minister Ryutaro Hashimoto said he was "worried" by the yen's five percent decline this month.

Republic National Bank in New York closed cash gold at $369.50 an ounce, up from $366 Monday. The New York Commodity Exchange settled gold at $368.70 an ounce, ahead from $365.80. In Zurich, gold rose to $368.50 an ounce from $366.50 the day before. London gold rose to $370 an ounce from $367.75.

Republic closed cash silver at $4.985 an ounce, off from $5.07 an ounce. Comex spot silver declined to $4.954 from $4.955. Zurich silver rose to $5 an ounce from $4.95. London silver climbed to $4.99 from $4.96.

#90086u2246 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - John Poindexter's lawyers, who battled the prosecution's portrayal of their client as a mastermind of the Iran-Contra scandal, rested their case Tuesday without calling the retired rear admiral to the stand.

The defense tried to show that Poindexter was caught in a political battle between Congress and the White House, although U.S. District Judge Harold Greene repeatedly forbade testimony on that subject.

Greene set closing arguments for Friday and ordered the lawyers to appear in court Wednesday to discuss instructions to the jury.

Poindexter, 53, the highest-ranking member of the Reagan administration to face criminal charges in the scandal, is accused of five counts of lying to Congress, attempting to obstruct a congressional investigation and destroying documents.

As the defense rested, former hostage David Jacobsen sat in the front row, with Poindexter's wife and one their five sons. Jacobsen was kidnapped in Beirut in May 1985 and freed in November 1986 because of the secret American arms sales to Iran.

Greene refused to permit Jacobsen to testify, ruling that his appearance would improperly inflame the jury.

Poindexter's lead attorney, Richard Beckler, rested his case after presenting a series of character witnesses - including Sen. John Chafee, R-R.I., an Episcopal priest, a neighbor of Poindexter and retired Admiral James Holloway, a former member of the Joint Chiefs of Staff.

Asked why Poindexter did not take the stand, Beckler said, ''We don't believe the government proved its case.''

Jury selection began March 5. The prosecution presented 10 witnesses,

including four days of testimony by Lt. Col. Oliver North, Poindexter's former aide at the National Security Council. The defense presented 15 witnesses, including some eight hours of Ronald Reagan on videotape.

The prosecution tried to show that Poindexter was a mastermind of the scandal involving secret U.S. arms sales to Iran and the diversion of some of the profits to the Nicaraguan Contra rebels when Congress had banned such aid.

North was the star prosecution witness - even though he tried hard not to implicate his former boss. But under four days of relentless questioning by prosecutor Dan Webb, North provided potentially damaging evidence against Poindexter.

North said he always advised Poindexter of his activities in Iran and Central America, and everything he did was authorized by the retired Navy rear admiral.

The prosecution also presented evidence that more than 5,000 computer messages were erased from Poindexter's White House files in late November 1986, as the Iran-Contra scandal became unglued and Poindexter resigned.

The prosecution argued that Poindexter tacitly encouraged North to lie to a group of congressmen who came to the White House to learn about North's connections to the Contras, then sent North a ''well done'' message after receiving a report showing that North lied.

Reagan was the star defense witness. He appeared on nine videotapes that were played for two days. But it was unclear if Reagan helped Poindexter, because the former president could rarely remember key details of the worst scandal of his administration.

Reagan said it was his policy to support the Contras but added that he always told his aides to obey the law and never told Poindexter to lie to Congress.

The defense suggested that Reagan set overall policy to aid the Contras and Poindexter loyally carried it out - that he was a trusted aide and family man.

The defense also argued that Poindexter tried to tell the truth as he knew it at the time and, in fact, did inform Congress about some facts about secret U.S. arms sales to Iran.

The defense tried to portray North as a hard-to-control renegade and worked to shift much of the blame for the scandal to Robert McFarlane, Poindexter's predecessor as national security adviser.

McFarlane already has pleaded guilty to four counts of withholding information from Congress. North was convicted of three felonies last year.

The defense also tried to paint Poindexter as the victim of an eternal political power struggle between Congress and the White House. The judge, however, repeatedly blocked such lines of inquiry.

Beckler said that Poindexter was one of many Reagan administration officials with knowledge of arms sales to Iran. The jury was read a statement of facts about the extent of high-level U.S. government knowledge of secret arms sales to Iran in November 1985.

Intelligence reports in 1986 also revealed that the United States was overcharging the Iranians for the missiles, according to a stipulation read in open court. A stipulation is a statement of facts that both sides accept as true.

''The people who received these intelligence reports in November 1985 could have determined from reading the reports that the United States government was participating in a shipment of weapons to Iran in late November 1985,'' the stipulation said.

Those officials were all high-ranking government officials - none were in Congress.

WASHINGTON (MARCH 27) UPI - Former President Jimmy Carter discussed his latest trip to the Middle East with President Bush on Tuesday and said he is more encouraged about the prospects for peace in the region than he has been in a decade.

''I believe that a comprehensive peace is both necessary and, I think, is inevitable,'' Carter told reporters while visiting Bush in the Oval Office which he occupied from 1977 until 1981. ''When it will come, remains to be seen.''

Carter, the architect of the historic peace agreement between Egypt and Israel in 1979, visited the principal nations of the Middle East earlier this month as a private individual, not as a representative of the U.S.

government. It was Carter's third visit to the region since he left office.

''I was encouraged by this trip more than any other I've had in the last 10 years,'' Carter said later at the Center for International and Strategic Studies.

''I am obviously frustrated. It is distressing to see so very little movement (toward peace).''

Carter met with Bush, Secretary of State James Baker and national security adviser Brent Scowcroft and complimented their efforts to encourage the Israelis and Palestinians to negotiate peace.

''I think our government should use maximum influence, not pressure, in Isreal and other countries as well to go to the bargaining table,'' Carter said.

Carter said he met for more than seven hours with Syrian President Hafez Assad and said he now welcomes direct talks with Israel on claims to the Golan Heights and the prospects for peace between the two adversaries.

Assad broke diplomatic relations with Egyptian President Anwar Sadat because of the peace treaty that grew out of his direct talks with Israel's Menachem Begin, but has since restored ties with the successor to the assassinated leader, Hosni Mubarak.

''He made clear that he didn't object to the format of an international peace conference,'' Carter said. Such as conference might lead to direct talks with Israel, and Carter said that ''this can be worked out.''

Israel has annexed the Golan Heights, which it seized in the 1967 Middle East war, and has is opposed to their return to Syrian control. Syria shelled Israeli farms and settlements from the Heights.

The Israeli coalition government of Prime Minister Yitzhak Shamir and Labor leader Shimon Peres collapsed during Carter's trip over differences in moving toward preliminary talks with Palestinian leaders concerning the future of the occupied West Bank and Gaza Strip.

Carter said there can be ''no resolution of Palestinian rights'' until negotiations can be set up with Israel, initially through an international conference sponsored by the United States or the United Nations.

#90086u2291 03/27/1990 ~United Press International

(MARCH 27) UPI - Greyhound Lines offered a $100,000 reward Tuesday for information on the two dozen shootings that have marred a 3-week-old strike by drivers and company officials vowed not to return to negotiations until the violence ends.

''The terrorism must stop,'' P. Anthony Lannie, executive vice president and chief labor negotiator for the company said at a Washington news conference. ''We hope the rewards will bring an end to the violence and help lead to arrests and convictions.''

The union has said it opposes the violence but Lannie blamed the union for

not putting a stop to shootings. He said at least five union officials have been arrested or are under investigation for alleged violent activity.

''There can be no meaningful negotiations while a gun is pointed at us,'' Lannie said.

After the news conference, a union spokesman repeated its condemnation of violence and reiterated its willingness to ''cooperate with local law enforcement authorities when asked'' to aid in an investigation.

But the union noted that 59 people had been hurt on the picket lines, including one person killed by a bus driven by a replacement driver.

''One way you deal with violence is to allow law enforcement to do its job. We think the company is using the violence as a subterfuge not to go back to the bargaining table. It is a smokescreen to avoid bargaining,'' the spokesman said.

''We're prepared to be at the bargaining table in an hour's notice,'' the spokesman said.

Union and company officials last met Mar. 18 and Lannie said there are no further sessions planned nor is the company meeting with federal mediators seeking to resolve the dispute.

Lannie did not say what the unions must do to end the violence or provide any kind of time period that would indicate the violence had ended but suggested union officials play a more active role in turning over to authorities those responsible for the shootings.

The company released a report which said there had been 23 shooting incidents, 71 bomb threats and 123 other incidents of violence. The union has released its own set of figures on injuries received on the picket line in which it charged there had been some 50 incidents of violence directed against strikers and supporters.

Lannie said the company is spending $112,000 daily on security measures.

He also said the company plans to have 3,200 full-time drivers and operate its full, regularly scheduled service by Easter. Currently the company has hired 1,700 replacement drivers and about 400 drivers are crossing their union's picket line. The company is providing about 50 percent of its service, he said.

In the latest incidence of violence, a bus carrying 32 passengers from St. Petersburg, Fla., to Orlando was hit by at least one shot late Monday as it was about 30 miles west of its destination, Jeanne Fry, a company spokeswoman said.

A mirror was shattered but no injuries were reported, officials said.

Police in Amarillo, Texas, were investigating reports of a drive-by shooting early Monday at a bus station owned by the bus line. No injuries were reported in the incident in which a shotgun was fired into a canopy, police said.

''The window had seven or eight holes in it,'' Fry said. ''It was first thought to be from a pellet gun, but police found a cartridge from a 20-gauge shotgun.''

Police also investigated a scuffle Sunday between replacement employees and union workers in Columbus, Ohio. A union official said a striker was hit in the face by a bus security guard using brass knuckles. The striker was admitted to a hospital for facial cuts, the union official said.

Fry said non-union workers and picket line crossovers had replaced about one-third of the 9,300 striking full and part-time Greyhound employees.

The Amalgamated Council of Greyhound Local Unions has questioned the company's work force figures and maintains the hiring of replacement workers is illegal.

The National Labor Relations Board is reviewing a complaint by the union that Greyhound was bargaining in bad faith before the strike, and was trying to break the union.

The company has accused drivers, who now average $24,700 a year, of asking for wage hikes that could only be financed through fare increases. Each side has accused the other of distorting its positions.

Talks between management and the union were suspended Mar. 18 in Tuscon. A federal mediator met separately with both sides last week but no progress was reported.

Greyhound, based in Dallas, is the nation's largest intercity bus company. It carried 22 million passengers last year and is crucial to low-income travelers who live in smaller communities that have no bus lines.

The strike is the first since Greyhound was sold in March 1987, officials said. A 1983 strike under the company's previous management lasted for 47 days.

#90086u2296 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The House approved a bill Tuesday to prohibit

the hauling of garbage, chemicals and hazardous wastes in the same trucks and railroad cars used to carry food, beverages and grains.

The legislation, approved on a 416-15 vote and sent to the Senate, is the result of a series of congressional hearings and news reports that revealed the widespread practice of alternating cargoes.

The bill directs the Transportation Department to issue regulations prohibiting the hauling of food in trucks or rail cars that also carry non-food products that pose health risks.

Under the proposed rules, some extremely dangerous cargoes, such as asbestos or infectious wastes, could be shipped only in vehicles designated exclusively for that purpose.

Rep. Bill Clinger, R-Pa., a sponsor of the measure, said current law does not bar the so-called backhauling practice.

''Hauling garbage in trucks that also carry food is disgusting and dangerous, but also, unfortunately, legal in many states,'' Clinger said.

Rep. Norman Mineta, D-Calif., said the bill is ''an important step to ensure that consumers receive safe and untainted food products.''

#90086u2298 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - The stock market closed sharply higher Tuesday after a late wave of computerized program buying shook the market out of the directionless stupor that characterized most of the session.

The Dow Jones industrial average, which rose 3.38 Monday, jumped 29.28 to close at 2736.94 after drifting at little-changed levels for much of the day.

Among broader market gauges, the New York Stock Exchange composite index rose 1.80 to 187.40 and Standard & Poor's 500-stock index rose 3.87 to 341.50. The price of an average share gained 33 cents.

Advances led declines 908-543 among the 1,952 issues crossing the NYSE tape. Big Board volume was 131,610,000 shares, compared with 116,110,000 shares traded Monday.

Computerized program trading, used to profit on price spreads between stocks and stock-index futures, was able to push the market up and down slightly all day on the very light volume. Stock prices meandered until late afternoon, when a strong wave of program buying came into the market.

"The buy programs kicked in around two-thirty or three o'clock, accounting for most of the gains," said Newton Zinder, market analyst at Shearson Lehman Hutton. "They came almost out of the blue." However, "the broad market lagged and we had very light volume," Zinder noted, criticizing the quality of the rally.

As for window dressing by institutional investors at the end of the quarter, Zinder said the buy programs may have been part of that."But in individual stocks, I didn't see it really," he said.

Analysts said they expected the market to remain lackluster until investors get a look at some first-quarter earnings reports. Many are staying out of the market until then, they said.

Disappointment with fourth-quarter earnings sent the Dow industrials plummeting more than 250 points from the Jan. 2 high of 2810.15 to the Jan. 30 low of 2543.24.

On the trading floor, American Express was the most active issue, down 1/4 to 26 5/8 after agreeing to buy all the shares of Shearson Lehman Hutton Holdings that it does not already own, in a sweetened bid, and to inject another $750 million in the ailing company. Shearson was up 1 1/4 to 12 1/2. The company is expected to take a one-time charge of several hundred million dollars in the current quarter to cover costs of the massive reorganization.

Alliance New Europe Fund followed, unchanged at 12 in its debut on the Big Board. Geneva Steel was third, closing at ten, its offering price, also on the stock's first day of trading.

Among the other blue chips, AT&T added 1/2 to 42 1/4, IBM gained 3/8 to 104 1/2 and Alcoa gained 3/8 to 65 7/8.

Strength in airline issues boosted the Dow transportation average 16.72 to 1192.57. UAL, parent of United Airlines, jumped four to 162; AMR, owner of American Airlines, added 1 1/2 to 67; USAir gained 1 1/8 to 31 1/2, and Delta Air Lines rose 1 3/8 to 74 3/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 154,324,630 shares, compared with 143,137,190 shares traded in the previous session.

Prices closed higher in moderate trading on the American Stock Exchange. The Amex Market Value index rose 0.57 to close at 361.88. Advances led declines 279-240 among the 803 issues traded. The price of an average share added two cents. Composite volume totaled 15,396,300 shares, compared with 15,022,860 shares traded Monday.

Texas Air led the Amex issues, plummeting 1 1/4 to 7 7/8 on news that subsidiary Eastern Airlines, which is in the process of reorganization, told creditors it could not go ahead with its plan to pay them 50 cents on the dollar, raised the estimate of its 1990 loss to $330 million and could no longer forecast a profit for 1991.

The National Association of Securities Dealers composite index rose 0.66 to 439.50.

#90086u2300 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - After being reminded of problems that led to the Challenger disaster, NASA officials acknowledged Tuesday a communications breakdown had occurred over a study of the maintenance needs of the planned space station.

But the officials said the breakdown had occurred because of a poor choice of words and a misunderstanding and steps would be taken to prevent such problems in the future.

''We at NASA are seriously concerned and troubled by the course of events over the last week and a half,'' said William Lenoir, NASA's associate administrator for space flight.

''I'm glad we've surfaced our communication concern here. You can bet your boots that we will be working on that and that we will have this solved and we will deal the situation that set up the environment,'' he said.

Lenoir made his statements at a special hearing called by a House subcommittee reviewing the National Aeronautics and Space Administration's proposed budget to review concerns about plans for space station Freedom.

The concerns were raised by published reports last week that the preliminary findings of a study on the station's maintenance needs found it would require too many dangerous spacewalks for repairs.

Although the early findings indicate more than three risky spacewalks may be necessary each week, NASA officials told congressmen the final results of the study may improve the results, and that any such problems could be overcome.

Near the end of the hearing, Rep. Bill Green, R-N.Y., reminded NASA officials that problems with a booster seal that caused the 1986 Challenger disaster were overlooked because of poor communications within the space agency.

''I'm troubled that you would have this kind of communication problem,''

added Rep. Jim Chapman, D-Texas. ''I hope that this is the last congressional hearing we have to hold (about) this kind of communications problem.''

Astronaut and veteran spacewalker William Fisher, co-chairman of the committee studying the space station's maintenance needs, said he became alarmed after NASA criticized the study as ''not considered credible,'' and was worried the work was being ignored.

''After the Challenger accident .... I made a personal commitment that if I found myself in that position at some time in the future I would not be shy. I would not hesitate. I would make my concerns known publicly if I felt they were not getting through privately.

''I personally felt that that had happened at this juncture. I disagreed strongly with the characterization that I interpreted to question the credibility and the forthrightness of our report,'' he said.

''I felt that if this kind of statement could come out of NASA, and so diametrically oppose what we had found, and prejudice what I thought to be the integrity of the committee, that I had two choices: I could resign from the committee or I could go public. I chose to try and do something that ... would be constructive for the agency.''

Fisher decided to send a written statement to The New York Times defending the study.

Lenoir attributed Fisher's reaction to ''a terribly unfortunate choice of words'' that he - Lenoir - made when he used the phrase ''not considered credible'' in response to the initial story in the Times about the study.

''Unfortunately the response to potential questions that we ... put together ... were subject to misinterpretation. ... Looking at the words, I would agree that we didn't very carefully pick our words,'' he said.

''I'm troubled that our system is such that he did not feel comfortable with the routes that we felt we had open and readily available,'' he said. ''We admit we have what I hope is a minor problem and we must resolve that.''

Fisher said he accepted Lenoir's explanation and thought the problem had been resolved. ''I think the problem has been fixed,'' he said.

#90086u2304 03/27/1990 ~United Press International

PHILADELPHIA (MARCH 27) UPI - Major league umpires Tuesday agreed to return to work this week and end a boycott of spring training games in

exchange for binding arbitration in their dispute with baseball owners.

The agreement was announced by U.S. District Judge Norma Shapiro, who dismissed a request by the American and National leagues to order the umpires back to work.

''This is an absolute win for the umpires' association,'' said American League umpire Al Clark.

Arbitration will begin Wednesday morning before retired Pennsylvania Judge Stanley Greenburg, and the umps are to return to work Friday. Minor league umpires have been working spring training games.

The agreement to submit the dispute over season schedule changes came after several hours hours of closed-door negotiations overseen by Shapiro. The judge had Monday rejected a request from the leagues for a temporary restraining order in the case.

''I'm not happy nor sad - just disappointed all this had to occur,'' said American League President Bobby Brown. National League President Bill White had no comment.

The Major League Umpires' Association called for the boycott after owners failed to consult umps before making changes in the spring training and regular season schedule after a 33-day players lockout.

The union had argued that the changes would give umpires fewer days off during the season, and reduce their spring training income. About 326 spring training games were canceled due to the lockout.

''When the owners and players choose to have a fight, this should not impact the umpires,'' said union attorney Richard Philllips.

Phillips said Greenburg could make a decision by Thursday.

Greenburg is charged with deciding whether umpires should be compensated for spring training games canceled due to the lockout, whether they should recover hotel deposits and other expenses, and the impact the season rescheduling will have on umpires.

Umpire Eric Gregg said the dispute involved respect as much as it involved money.

''We know we're not the game,'' Gregg said. ''We don't want to get paid as much as the players. But we are an important part of the game.

''If they (the owners) are going to pay $4 million to some of these players, they ought to give some attention to the guys who call these guys

out,'' Gregg said.

-30- 2536
#90086u2320 03/27/1990 ~United Press International
(MARCH 27) UPI - Oil prices ended mixed Tuesday in light technical trading, as products providing support against a fall in prices and crude provided a resistance to a rise.

Many traders were still absent from the pits attending a National Petroleum Refiners Association conference in San Antonio.

''There was nothing really significant'' on the news front that would affect prices, said Tom Bentz, director of trading at United Energy Inc. in New York.

He described the day as ''a technical correction, or consolidation,'' of the market's recent downward move.

The May contracts for unleaded gasoline and home heating oil, the month of the most product trading activity, found support at 63 cents and 52.70 cents a gallon, respectively, the analyst said.

''They held these support levels in the early going and then crept up. It was a slow, steady climb all day,'' Bentz said.

The upward price movement was held in check by crude, which failed to break through the $20.65-a-barrel resistance level before backing off, the analyst said. The same mechanism dominated Monday's crude trading.

The benchmark West Texas Intermediate crude for May delivery ended the day at $20.48 a barrel on the New York Mercantile Exchange, up 2 cents, after trading as high as $20.58 and as low as $20.26 a barrel.

Trading volume was a light 50,929 contracts. Bentz said there would probably be more action Wednesday and Thursday as traders return from San Antonio.

On the U.S. Gulf Coast spot market, where crude is bought and sold for cash, WTI was quoted at $20.50 a barrel, a gain of 5 cents.

Unleaded gasoline for April delivery, which has had poor demand as a result of stricter air-pollution standards that are to take effect May 1 in the Northeast, fell 0.47 cent to 57.23 cents a gallon on the Merc.

The May delivery contract gained 0.35 cent to 64.12 cents a gallon, after trading as low as 63.10 cents a gallon.

On the New York Harbor cash market, unleaded gasoline for prompt delivery edged up 0.30 cent to 57 cents a gallon.

Home heating oil for April delivery rose 0.65 cent to 55.33 cents a gallon on the Merc, while the May contract gained the same amount to 53.71 cents a gallon.

It gained 0.15 cent to 57.10 cents a gallon on the New York Harbor cash market.

Bentz expected the American Petroleum Institute's weekly survey to show a crude-inventory buildup of 1 to 3 million barrels and a comparable decline in gasoline stocks because of refineries being in their maintenance turnarounds from heating oil to gasoline production.

''Oil prices could be pushed downward if the crude buildup outweighs the product drawdown,'' he said.

The analyst also anticipated the API refinery utilization rate would drop by a percentage point and heating oil supplies would decline by about a million barrels.

Released after the Merc closing, the API report showed gasoline stocks plunged 5.8 million barrels last week while crude supplies shot up 7.5 million barrels.

On the European spot market, Britain's widely traded North Sea Brent crude lost 5 cents to $18.25 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - gained 2 cents to $15.65 a barrel.

#90086u2376 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - Transportation Secretary Samuel Skinner Tuesday sent a letter to House Speaker Thomas Foley urging Congress to refuse to authorize special funding for completion of the Washington Metrorail system.

The move comes a week after the House District committee approved a bill that would provide $2.16 billion in federal dollars to pay for 80 percent of the cost to complete the final 13.5 miles of the subway system. Local governments would pay the remaining 20 percent.

Municipal governments in other parts of the country generally pay for at least 50 percent of the cost of mass transit facilities, said Skinner.

Skinner said the federal government paid $7.7 billion to complete the first 89.5 miles of the proposed 103-mile subway system, which connects the nation's capital with suburban Maryland and Northern Virginia.

In his letter, Skinner said $2.16 billion in special funding is ''simply not justified.''

Federal funds already handed out to Metrorail account for 60 percent of all federal funds for new transit systems nationwide in the last 22 years, Skinner said.

In an information sheet accompanying Skinner's letter, the Transportation Department said Metro's claim that it be considered a special case because of its location in the nation's capital ''is not persuasive because Metrorail is nevertheless a local transit system serving overwhelmingly local needs.''

Skinner said if Congress passes the funding bill, he will ask President Bush to veto it.

Metro spokeswoman Marilyn Dicus said Skinner's opposition was expected and Metro would have no comment.

#90086u2385 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - American Express Co. announced Tuesday it has reached a definitive agreement to buy all outstanding shares of its financially ailing securities subsidiary, Shearson Lehman Hutton Holdings Inc.

The deal is estimated to be worth $370 million to Shearson, which has been trying for months to complete a recapitalization program to stave off a downgrading of the firm's credit rating.

American Express will acquire the outstanding Shearson stock through a tax-free merger of an American Express subsidiary into the brokerage firm.

The parent also made available to Shearson Tuesday a previously announced capital infusion of $750 million in equity.

''Without American Express, Shearson's credit rating would be likely to be lowered,'' said Jeffrey Bowman, a vice president of Standard & Poor's Corp., which recently conducted an internal analysis of Shearson.

''American Express is pretty much increasing the firm's capital position '' Bowman said.

The S&P analysis indicated Shearson should take a charge of $700 million to $800 million against first-quarter results, Bowman said. Such a charge would be the largest in Wall Street history.

Shearson has said it expects a ''significant'' charge to cover severance payments to about 2,000 employees laid off earlier this year, costs of closing about 50 branch offices nationwide and losses in its troubled real estate unit.

Perrin Long Jr., an analyst with Lipper Analytical Services, said he expects Shearson to take a charge in the $400 million-$500 million range.

''They can't affort any more than that,'' Long said.

Shearson has launched a strategic review of its core businesses in hopes of increasing profitability. The review is expected to result in further layoffs.

''If anything, Shearson is in a better position than last year to operate in a very down market,'' Bowman said of Shearson's cost-cutting steps.

Howard L. Clark Jr., Shearson chairman and chief executive officer, said in a statement that the $750 million infusion ''represents a significant benefit for the SLH balance sheet.''

''Together with the merger, it will enable us to position SLH for the 1990s,'' he said.

Analysts said taking Shearson private will enable American Express to more easily reduce Shearson's overcapacity and streamline the firm to cope with the slowdown on Wall Street with less resistance.

Shearson is likely to exit the corporate finance, municipal finance, money management and real estate-related businesses and concentrate on its retail business, analysts said.

''It's going to be a completely different company in eight to 12 months,'' said Gary Hovis, an analyst with Argus Research. ''Primarily, it will be a brokerage firm and it will be scaled down.

''I think there will be at least another couple thousand laid off before this is all said and done,'' he added.

Analysts attribute Shearson's troubles to a drop in individual investor business following the 1987 stock market crash, problems in its real estate unit and the acquisition of E.F. Hutton & Co.

The merger and capital infusion marked a change in strategy for Amercian Express, which said earlier it wanted to reduce its stake in the troubled subsidiary. Analysts said the parent's change of heart represented an attempt to boost confidence in Shearson after the collapse of Drexel Burnham Lambert Group Inc.

Both the merger and capital infusion were approved by the Shearson board of directors, but the merger remains conditioned on approval by a majority of Shearson stockholders. American Express currently owns about 60 percent of the securities subsidiary.

A meeting of Shearson stockholders is expected to be held in late May or early June.

Nippon Life Insurance Co. will continue to own all the oustanding shares of Series A preferred stock of Shearson, a 13 percent stake.

American Express said it has reached an agreement in principle with Shearson common stockholders who filed lawsuits opposing the merger. The settlement would result in the dismissal with prejudice of the shareholders' claims.

Under terms of the stock purchase agreement, each share of Shearson stock will be swapped for 0.48 of a share of American Express, an increase from the 0.426 ratio proposed when the arrangement was first announced earlier this month.

#90086u2393 03/27/1990 ~United Press International

ROCKVILLE, MD (MARCH 27) UPI - A pair of California murder suspects walked into a suburban Washington, D.C., police station and surrendered Tuesday, two days after their case was portrayed on a national television program.

Michael Berry, 34, and Jessie Morrison, 22, were sought by Los Angeles police on charges of murder, attempted murder, robbery and burglary in the May 11, 1989, shooting of three people.

Berry, Morrison and two accomplices allegedly broke into a home in Wilmington, Calif., a suburb of Los Angeles, robbing and shooting the three. One of the victims, Cesar Cardenas, 22, died.

The crime was depicted Sunday on the Fox television network's weekly program, ''America's Most Wanted.''

''The pair saw themselves on 'America's Most Wanted' Sunday and seriously considered giving themselves up,'' said Rockville police Capt. Larry Yates who arrested the pair.

Detailed descriptions of Berry and Morrison were given on the air. They were thought to be near Mobile, Ala., or Suffolk County, N.Y., and not believed to be in the Washington area, where ''America's Most Wanted'' is produced.

John Morrison, a Rockville city employee, told police he encouraged his brother and Berry to surrender after their arrival at his Gaithersburg home Saturday.

Berry and Jessie Morrison arrived at the police station in nearby Rockville at 9 a.m. Tuesday, accompanied by John Morrison. An hour later, the pair was turned over to the FBI.

''Obviously we feel a sense of satisfaction that we were able to bring justice to the (Cardenas) family,'' said Jack Breslin, program director for ''America's Most Wanted.''

Breslin said the program was first approached by Los Angeles police about the case but made the decision to air it after an impassioned letter from Cardenas' boxing coach signed by 1,000 friends and admirers of the young

man, who was training for the 1992 Olympics when he died.

The surrenders of Berry and Morrison brought to 105 the number of fugitives arrested since the 30-minute weekly show began broadcasting in February 1988, Breslin said. They also became the ninth and 10th fugitives to surrender to police.

An arraignment was scheduled for late Tuesday, and the two were expected to be extradited to California, police said.

The alleged accomplices of Berry and Morrison surrendered to police soon after the crime and are currently serving prison sentences for murder and burglary.

#90086u2404 03/27/1990 ~United Press International
(MARCH 27) UPI - World reaction to the volatile crisis in the Soviet republic of Lithuania was marked with diplomatic tiptoeing Tuesday, and foreign leaders avoided taking sides in the strife simmering inside the nation whose reforms have caused friction from Warsaw to Vilnius.

British Prime Minister Margaret Thatcher called on Moscow and Lithuania to negotiate without bloodshed an end to their deadlock over Lithuania's drive for independence, but sidestepped a request in the House of Commons that she personally appeal to Soviet leader Mikhail Gorbachev not to use force.

''It calls for great restraint on both sides,'' she said. ''Force is not an appropriate way to settle this position.

Soviet soldiers beat and dragged Lithuanian army deserters from a hospital Tuesday and seized the headquarters of Lithuania's independent communists to reassert Moscow's control over the rebellious Baltic republic.

The actions were the most concrete signs of a crackdown by Soviet President Mikhail Gorbachev since Lithuania's new nationalist parliament declared independence from the Soviet Union March 11.

Thatcher, replying to questions in the House of Commons, said the Lithuanian people had clearly stated their wish to determine their own future, and reiterated that London's longstanding position had been never to recognize Moscow's annexation of the Baltic republic in 1940.

In Israel, Foreign Minister Moshe Arens sidestepped a plea from Lithuania's president Tuesday urging Israel to open diplomatic relations. Arens said the country would not interfere in internal Soviet affairs.

Lithuanian President Vytautas Landsbergis told Israel's Army Radio in an interview that his country needed the help of the Western world and called on Israel to open diplomatic relations with Lithuania.

''I think there is a lot of support in Israel for Lithuania's standpoint to become independent,'' said Arens, who was born in Lithuania but left the country as a toddler. ''Still it has not yet been translated into something substantial. These are the processes which need to be solved within the framework of the Soviet Union.''

In Ottawa, External Affairs Minister Joe Clark told reporters he strongly

underlined points set out in a formal letter to Soviet Foreign Minister Eduard Shevardnadze.

In the letter, Clark stated Canadians had been following events in Lithuania with ''growing apprehension.'' He emphasized the government was extremely concerned by the increase in military activity over the past few days.

Polish Solidarity leader Lech Walesa was more direct in his remarks about the crisis. He urged Gorbachev to negotiate with Lithuania and warned against the use of force.

''I ask you, Mr. President, to stop using the practice of military pressure and start a political dialogue with the government of Lithuania '' Walesa said in a statement addressed to Gorbachev.

''The violation of the sovereignty of Lithuania is ... directed against the construction of the new democratic order in Europe,'' he said.

The Bush administration took pains to avoid provoking Gorbachev and risking damage to superpower relations.

In Washington, State Department spokeswoman Margaret Tutwiler said, ''This is a very complex, delicate diplomatic situation. I don't intend to comment on specific conflicts.''

White House press secretary Marlin Fitzwater warned that further steps by Moscow ''could be counterproductive to U.S.-Soviet relations.'' But he acknowledged the conflict presents the United States with ''a delicate balance of concerns,'' backing self-determination for Lithuania while committed to Gorbachev's political survival and domestic reforms.

''This is a very serious issue that we are watching,'' he said, ''and we have tried to be cautious in our approach to all of these changes and the Soviet actions in Eastern Europe and we continue to want to take that approach.''

#90086u2411 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - The nation's gasoline supplies plunged 5.8 million barrels last week while crude stocks rose 7.5 million barrels, the American Petroleum Institute reported Tuesday.

Analysts had expected gasoline stocks to fall and those of crude oil to risebut by much smaller amounts.

For the week ended Mar. 23, gasoline supplies plummeted to 235.4 million

barrels from 241.2 million barrels in the prior week and moved below year-ago levels of 236.4 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also declined, to 177.8 million barrels from 182.8 million barrels a week earlier. But the latest amount remained higher than year-ago levels of 162.5 million barrels.

First Boston Corp. oil analyst William Randol worried about downward pressure on gasoline prices earlier this month, when U.S. gasoline stocks rose above the 245 million-barrel level.

In his latest issue of Key Petroleum Refining Indicators, Randol said refinery maintenance turnarounds fromn heating oil to gasoline production ''should trim gasoline stocks significantly.''

He said, ''We remain positive about prices, but the coming weeks' gasoline stock figures will be critical.''

Gasoline production edged up to 6.5 million barrels daily from the previous week's 6.4 million barrels, the same level as in the year-ago week.

Gasoline imports dropped substantially to 229,000 barrels daily from 346,000 barrels daily in the previous week and were well below year-ago imports of 419,000 barrels daily.

U.S. refineries operated at 83.7 percent of capacity last week, the same percentage as a week earlier, but this was higher than the 81.3 percent of a year ago.

Crude oil inventories rose to 358.5 million barrels from 351.0 million barrels in the prior week and remained above year-ago levels of 337.4 million barrels, API reported.

Crude oil imports climbed to 6.1 million barrels a day from 5.7 million barrels a day in the previous week and were substantially higher than year-ago imports of 4.8 million barrels a day.

Imports of refined products slipped to 1.8 million barrels daily from 2.4 million barrels daily in the preceding week and were less than year-ago imports of 2.3 million barrels daily.

Inventories of distillate - used for home-heating oil and diesel fuel - fell to 103.6 million barrels from 105.9 million barrels a week earlier but remained above year-ago levels of 96.2 million barrels.

Distillate production edged up to 2.6 million barrels daily from 2.5

million barrels daily in the preceding week, but this was less than year-ago output of 2.7 million barrels daily.

Distillate imports rose to 311,000 barrels a day from 183,000 barrels a day in the previous week but were much lower than year-ago imports of 456,000 barrels a day.

#90086u2428 03/27/1990 ~United Press International

NEWARK, NJ (MARCH 27) UPI - Four former owners of F.D. Roberts Securities Inc., a brokerage closed down by federal regulators, were charged Tuesday with bilking investors out of millions of dollars in what investigators described as the largest criminal case involving the troubled penny-stock industry.

A federal grand jury handed up an indictment against a total of eight defendants following a year-long string of guilty pleas by 17 former F.D. Roberts brokers and executives. All had agreed to cooperate with the investigation.

''This is not a collection of technical allegations but hard-core fraud,'' First Assistant U.S. Attorney Michael Chertoff said at a news conference.

Federal prosecutors asked for forfeiture under the Racketeer Influenced and Corrupt Organizations Act of $12 million in salary and commissions paid to seven of the eight defendants.

The SEC shut F.D. Roberts down in February 1989. The firm, which had branches in Florida, California and Georgia, was also the target of an investigation by the New Jersey Bureau of Securities.

Investigators charge that F.D. Roberts used a variety of boiler-room tactics to fleece investors, including executing unauthorized trades, churning accounts to boost commissions and stalling clients who wanted to sell their shares.

Former employees during court appearances have described the use of nominee accounts - known in the company as ''dirt-bag'' accounts - to hide the firm's interest in companies they handled and said they were told they could get ''filthy, stinking rich.''

Gary Penrith, acting head of the Newark FBI office, said the company employed as many as 300 people at a time, making 100 to 200 calls a day and generating $200 million in fraudulent profits. He said that in terms of the number of victims and the amount of money involved, F.D. Roberts is the largest penny-stock company to become the target of a federal investigation.

''The pigs got fat, and the hogs got killed in that market,'' Penrith said.

Named in the indictment were former F.D. Roberts board chairmen Leonard Tucker, 30, of Boca Raton, Fla., and Fred Galiardo, 45, of Daytona Beach, Fla. Also charged were co-owners John Perfetti, 44, of Bayville, N.Y., who served as executive vice president of F.D. Roberts, and Alan Lieb, 37, of Pine Brook, N.J., vice president in charge of trading.

Three of Tucker's relatives were also indicted. His brother, Daniel, 27, of Boca Raton, allegedly held collusive positions at another firm, while another brother, Gary, 25, of New York, and his step-father, Richard Thaw, 54, of Boca Raton, worked for F.D. Roberts.

The eighth defendant was John Montondo, 29, of Boca Raton, assistant manager of the office there.

Among those who have pleaded guilty are Sheldon Kanoff, who joined F.D. Roberts after serving as the SEC's chief compliance officer in New York, and other top executives. All are awaiting sentencing.

#90086u2470 03/27/1990 ~United Press International

HOUSTON (MARCH 27) UPI - Soviet energy officials offered Tuesday to create joint ventures with U.S. companies to exploit vast Soviet reserves of oil and natural gas.

In exchange for their technology and capital, oil companies ''could have joint ventures (with the Soviets) operating by this time next year,'' said Tom Russell, chairman of Professional Geophysics Inc., the company that coordinated a Houston meeting between Soviet officials and U.S. oil companies.

''The time is right,'' Russell said. ''The Soviets are anxious to proceed, and so are we. It took (PGI) less than six months to negotiate and form our first joint venture with the Ministry of Oil and Gas Industry and just over six months for a joint venture with another ministry.''

Representatives of 75 to 100 companies met Tuesday with five officials of the Soviet Ministry of Oil and Gas Industry. A similar meeting has been scheduled in London next Tuesday (April 3).

''This is the first meeting in which joint ventures in the Soviet Union are offered, but it is by no means the last one,'' said Aklim Moukhametzianov, a deputy minister and member of the Soviet parliament.

''Soviet oil companies are not experienced (in joint ventures) and the

ruble is not convertible yet; however, all problems can be worked out given the desire from both sides,'' he said through an interpreter.

The five territories available for joint ventures include four in the Western Siberian Basin with an estimated 13 billion barrels of oil reserves. The fifth is in the Bashkir region of the Volga-Urals, an area believed to have undiscovered oil and gas far below the surface.

#90086u2494 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The Soviet Union supplied three Eastern European nations with SS-23 missiles, a weapon that was supposed to be abolished by the 1987 INF treaty, a State Department spokeswoman said Tuesday.

The countries were identified by State Department spokeswoman Margaret Tutwiler as East Germany, Czechoslovakia and Bulgaria.

Although not a technical violation of the Intermediate Nuclear Forces Treaty signed in 1987 by President Ronald Reagan and Soviet leader Mikhail Gorbachev, the existence of the weapons casts doubt on statements by Soviet and U.S. leaders that the entire class of intermediate-range nuclear force weapons were being destroyed under the accord.

The SS-23 has a range of about 500 kilometers, placing it in the intermediate-range nuclear force category, a class of weapons that were supposed to be destroyed under the 1987 pact.

Czechoslovak President Vaclev Havel has said his country received 72 missiles from Moscow, but it is not clear whether all 72 were SS-23s

If the weapons were supplied after the treaty signing, Tutwiler said, it would be a Soviet violation of the INF treaty. Other officials said preliminary information suggests most of the weapons were given to the three countries in 1985 or earlier. At the time, all three countries were actively cooperating with the Warsaw Pact military alliance and one official described them as a ''military-to-military'' exchange that might not be known to the political leadership.

Tutwiler said the United States has asked the Soviet Union for information about the transfer of the missiles, and a check is being made of the computerized American record of the INF negotiations to see if the issue arose in the talks.

One participant in the negotiation process said that SS-23s were not included in the early stages of the negotiations, which began in 1978. The missiles were only included in the final stages of the talks when

Gorbachev offered to include them if the United States and West Germany were willing to scrap the Pershing 1As, a roughly similar weapon stationed in West Germany.

A deal was finally worked out, in which both sides agreed to scrap the Pershings and the SS-23s. In statements by both sides, after the signing of the INF treaty, the United States and the Soviet Union talked of the ''destruction of an entire class of weapons.'' The weapons in the hands of the other Warsaw Pact nations would suggest that those government claims were exaggerated, or at least premature.

The highly accurate missiles were designed, according to the Pentagon's annual ''Soviet Military Power'' to hit NATO nuclear missile sites, airfields and air defense sites.

The SS-23 can be equipped with nuclear warheads, but in the hands of the other Warsaw Pact nations they were generally equipped with high-explosive or chemical weapon warheads.

#90086u2504 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The House began work Tuesday on a bill to elevate the EPA to Cabinet status with its sponsors seeking a compromise with the White House to avert a threatened veto.

House action stalled last week after the White House raised strong objections to provisions creating a Bureau of Environmental Statistics as an independent, non-partisan agency within the new department.

Those measures are designed to insulate the bureau from administration control and to ensure it operates as an objective, unbiased source of information about the state of America's environment.

A White House policy statement issued March 22 strongly endorsed elevation of the Environmental Protection Agency from an independent agency to a Department of Environmental Protection. It would become the 14th Cabinet department.

But the memo said the portions of the bill dealing with the statistics branch ''raise serious constitutional concerns and severely restrict executive branch oversight of the new bureau.''

The statement warned senior advisers would recommend President Bush veto the bill unless the offending provisions are ''deleted or modified satisfactorily.''

Supporters of the bill say the EPA deserves Cabinet status and cite

mounting concern about the environment.

''When decisions are being made at the president's Cabinet table, the environment cannot be left out,'' Rep. David Bonoir, D-Mich., said as the House began procedural work for the legislation.

The lawmakers were expected to consider amendments and vote on the bill Wednesday.

The chief sponsors, Reps. John Conyers, D-Mich., and Frank Horton, R-N.Y., have drafted an amendment to make the bill more platable to the White House.

But Conyers, chairman of the Government Operations Committee, will only offer the changes if the White House agrees in writing to support them, an aide to Conyers said. Otherwise, Conyers will press for passage of the bill as written.

The administration objected most vehemently to provisions that would severely limit the president's power to fire the director of the environmental statistics bureau.

The White House also strongly opposes language giving the bureau virtually exclusive responsibility for collecting, analyzing and publicly releasing environmental information without review by other executive branch agencies, such as the White House budget office, which now can effectively censor any executive branch report.

The Conyers-Horton amendment would allow for the removal of the bureau director for any reason, provided Congress is notified. It also would exclude from administration review only environmental reports and information that are technical or statistical in nature, Conyers' aide said.

Some Democrats urged the House to resist efforts to ''water down'' the bill.

''The president wants to be able to pick and choose the facts that Americans get about their environment,'' said Rep. Larry Smith, D-Fla. ''Americans deserve to see all the facts.''

Earlier in the day, Conyers told reporters he doubts Bush would veto the bill, saying, ''We're arguing about fine print now.''

A White House spokesman said the administration has not taken a position on the amendment, but prefers a proposal by Rep. Dennis Hastert, R-Ill., to organize the Environmental Protection Department the same as other Cabinet department.

An aide to Horton, the ranking Republican on Conyers' committee, said, ''All three parties are trying to reach some kind of compromise. The White House is not unwilling to move on it.''

The Horton staffer said EPA Administrator William Reilly spoke by telephone with both Conyers and Horton Tuesday.

#90086u2512 03/27/1990 ~United Press International

NEW YORK (MARCH 27) UPI - A jury of seven women and five women was completed Tuesday for the trial of former Philippines first lady Imelda Marcos and Saudi arms dealer Adnan Khashoggi.

While it took 4 1/2 days to obtain a pool of 50 prospective jurors, it took less than half a day to whittle that number down to 12 jurors. Six alternates were also seated.

Among the dozen on the panel were three postal workers, two utility workers, and two transit workers.

U.S. District Judge John Keenan scheduled opening arguments to begin next Tuesday in the trial that is expected to last into the summer.

Marcos, 60, is accused of plotting a $345 million racketeering scheme with her husband, Ferdinand, to siphon money from the Philippine's treasury while he served as the nation's president. Prosecutors say Marcos, with Khashoggi's help, transferred more than $160 million from the Philippines and invested it in Manhattan real estate.

Mrs. Marcos, clad in black while mourning her husband's death, has attended every session of jury selection, usually doodling in her notepad.

Khashoggi usually arrives at the day's session by subway from his midtown Manhattan apartment. Amiable and close-mouthed, he has watched the long jury selection process, occasionally smiling and telling a droll joke.

#90086u2515 03/27/1990 ~United Press International

(MARCH 27) UPI - Soviet officials in Moscow have banned all foreigners from Lithuania and ordered all foreign correspondents to leave the break-away republic when their permits expire. An anti-independence rally by ethnic Russians in the Lithuanian capital fizzled today. Many ethnic Russians say they want to leave Lithuania.

The union representing striking Greyhound bus employees says management is

using violence associated with the strike as a ''subterfuge'' NOT to return to the bargaining table. The company today offered a 100-thousand-dollar reward for information leading to the conviction of people shooting at the buses.

In Washington today, both sides in the trial of former national security adviser John Poindexter agreed that intelligence reports of government involvement in secret arms shipments to Iran were given to high-ranking government officials in 1985. They also were made aware of the fact that the United States was over-charging for the weapons.

Things are going well enough at Cape Canaveral for scientists to predict that they will launch the space shuttle Discovery two days ahead of schedule on April 10th. The only problem is small bugs that are crawling on bags covering the one-point-five-BILLION-dollar Hubble Space Telescope. They will have to be removed before the telescope is loaded into Discovery.

Senator Robert Dole and other lawmakers wore ''I Like Ike'' buttons today as Congress paid tribute to Former President Dwight Eisenhower. The nearly two-hour tribute in the House chamber is part of a year-long celebration marking the centennial of Eisenhower's birth on October 14th, 1890.

-30- 1813

#90086u2545 03/27/1990 ~United Press International

ORLANDO, FL (MARCH 27) UPI - Tammy Faye Bakker has stopped holding local worship services because of a zoning dispute over her converted warehouse-church, a follower said Tuesday.

Bakker and about 150 followers held one Sunday morning service in the building in a warehouse district just south of Orlando before county building officials ordered them out, saying the area was zoned for commercial buildings,not churches.

Since that March 11 service, Bakker has held no local worship services.

A Bakker follower who declined to give her name said Tuesday Bakker could not afford to move the church to another location, which would be its fourth in less than a year.

''We will not have services until further notice,'' she said. ''When you're paying on a lease at one place, you don't go out and get another place.''

County officials say New Covenant Church moved into the old Tupperware building without seeking rezoning or submitting the necessary paperwork to show the building was suitable for a large number of people.

Joanne McMurray, the county's assistant zoning director, said Tuesday that her department had asked the church to send a letter outlining how it intends to use the building so officials can determine whether it is being used appropriately.

She said a letter had arrived from the church, but officials had not yet reviewed it.

She said she expected the county to decided whether the building is suitable for church uses in about two weeks.

''If there are any problems, we will provide them with whatever mechanism they can use to obtain administrative relief,'' she said.

Jim and Tammy Faye Bakker moved to Orlando last May after their PTL ministry in Fort Mill, S.C., collapsed amid charges of fraud and sexual impropriety.

They originally moved into an abandoned shopping center, but were evicted. The church then began holding services in a piano store but was forced out in February when the store's manager lost his lease.

The church leased the Tupperware building and held services on March 11. But when members showed up the next Sunday, they were barred from entering the building by county order and held a brief meeting in the parking lot.

Jim Bakker was convicted in October of defrauding PTL contributors and is serving a 45-year prison term in Rochester, Minn.

NEW YORK (MARCH 27) UPI - A 14-year-old black student was shot and slightly wounded Tuesday during a locker room fight at a high school in a racially tense white neighborhood. Police said the attack by three white students was racially motivated.

The shooting in the Bensonhurst section of Brooklyn occurred just blocks from the scene of the Aug. 9 slaying of Yusuf Hawkins, the black teenager who was chased by a mob of bat-wielding white men and shot dead by one of the attackers.

That killing ignited racial tensions and sparked a host of sometimes violent marches.

The student wounded in Tuesday's attack, a 14-year-old who was not identified, was shot once in the wrist about 8:15 a.m. during a dispute with the three youths in a basement locker room of New Utrecht High School

Board of Education spokesman Bob Terte said.

The police department's Bias Incident Investigating Unit was investigating the incident as bias-related because the white youths shouted racial epithets at the student, authorities said.

The teenager, who informed the school's principal about the shooting, was taken to the Coney Island Hospital, where he was treated and released, Terte said.

The bullet passed cleanly through the student's wrist without hitting and nerves or bones, said spokesman Daniel Armstrong hospital. ''It entered and exited without doing any real damage,'' he said.

New Utrecht High School has no history of racial problems, Terte said, and he noted that the student body has a large black, Hispanic and Asian population.

''New Utrecht as far as I know has not been a particularly troubled school in recent memory,'' the education spokesman said.

#90086u2618 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The Federal Aviation Administration said Tuesday it has revoked the pilot licenses of the captain of a USAir 737 that crashed and killed two people at New York's LaGuardia Airport in September.

The agency said the captain's failure to fully complete the pre-takeoff checklist and perform other required actions during the takeoff run caused the airplane to roll off the end of the runway into the East River.

Two passengers on USAir Flight 2020 were killed and several were injured in the Sept. 20 accident.

No one at the Washington airline could be reached for comment about the FAA action.

The FAA, citing federal law, said it could not disclose the name of the captain. But at the time of the crash, the captain was identified as Michael Martin.

The co-pilot was identified as Constantine Kleissas, who apparently was flying a 737-400 for the first time.

''The lack of professionalism and dedication to safety exhibited by this captain cannot, and will not, be tolerated on an airline flight deck,''

said FAA Administrator James Busey.

The FAA said that information received shortly after the accident cast doubt on the qualifications of the captain and the co-pilot - both of whom initially failed to cooperate with the investigation - to hold pilot licenses. The agency issued emergency orders suspending the licenses, pending a successful demonstration of their flying skills.

The investigation was completed, the FAA said, and Busey determined that the captain did not have the care, skill, judgment and responsibility required to hold an airline transport pilot license or a commercial pilot license.

The agency, in an emergency order dated March 19, said the captain was responsible for performing the pre-takeoff checklist while taxiing to the runway. The checklist calls for a check of various trim settings, including the rudder trim.

But, the order said, during the taxi ''you failed to correct the rudder trim which was in the full left position.''

The FAA said the full left setting of the trim pulled the aircraft to the left during the takeoff run and contributed to the decision to abort the takeoff at an unsafe speed.

Contributing to the decision was that more power was generated by the right engine than by the left engine, which intensified the movement to the left, the FAA said.

The difference in the plane's thrust resulted from the captain's failure to monitor the power levels in both engines and correct any differences as called for by the USAir flight manual, the FAA said.

The captain has 20 days from receipt of the order to appeal it to an administrative law judge of the National Transportation Safety Board.

#90086u2660 03/27/1990 ~United Press International

WASHINGTON (MARCH 27) UPI - The House Appropriations Committee approved a $2.4 billion supplemental spending bill Tuesday that cut defense spending by $1.8 billion and provided emergency aid of $720 million to Panama and Nicaragua and $100 million to help refugees.

In approving the measure, the panel gave President Bush the $300 million he requested for Nicaraguan assistance after the country's election Feb. 25 that threw out the Marxist-led Sandinistas and replaced them with a U.S.-backed government committed to democratic principles.

But the committee cut Bush's $500 million request for emergency funding for Panama by $80 million and increased Bush's request of $70 million for various refugee programs by $30 million.

The administration request of $70 million was to fund processing, transportation and initial resettlement for 27,000 refugee admissions beyond what had been budgeted for. Of that total, 24,000 are Soviets coming to the United States.

Of that additional $30 million approved by the committee, $25 million would go to worldwide refugee assistance programs and $5 million would be used to help Soviet Jews resettle in Israel.

The committee's version of the bill would also increase current year foreign aid spending by $30 million for Africa and by $30 million for islands in the Eastern Caribbean, with $5 million of that to help with cleanup from the devastation from Hurricane Hugo last year.

The bill, providing emergency funding for the current fiscal year that ends Sept. 30, must still be approved by the full House and the Senate before being sent to the White House for Bush's signature. Bush had asked Congress to complete action on his Nicaragua and Panama aid requests by April 5.

To help fund the $870 million in Central American and refugee aid programs sought by Bush, and to fund the $1.5 billion in additional spending added by the committee, the panel approved $1.790 billion in defense spending cutbacks, called recissions.

The single biggest Pentagon cut was $238 million to scrap construction of an Army ammunition production plant.

Other big Pentagon cuts included $212 million in reduced spare parts purchases, $100 million to slash the costs of transferring personnel, $83 million in lower personnel costs and $100 million for what was listed only as a ''classified project.''

The bill added $111 million in additional disaster assistance, including $50 million for the Federal Emergency Management Agency to help several Southern states recover from disastrous floods and tonadoes earlier this year and $20 million to bolster the nearly depleted Army Corps of Engineers flood control and coastal emergency account.

#90086u2710 03/27/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - A British hotel and catering giant reached a

tentative agreement to buy the Watergate Hotel, part of the complex where the Democratic National Committee was housed during the infamous 1972 break-in, a published report said Tuesday.

Trusthouse Forte PLC planned to buy the hotel - but not the rest of the complex - from the British pension fund that has owned the complex since 1979.

No purchase price was disclosed, but analysts valued the hotel at about $237 million, The Washington Post reported.

Trusthouse will buy only the hotel, leaving the remainder of the 10-acre Watergate complex for sale, a Trusthouse official said.

The complex includes a shopping mall, two office buildings and three apartment buildings. In 1972, the Democratic National Committee headquarters in the office adjacent to the hotel was broken into, leading to the Watergate scandal and the eventual resignation of President Richard Nixon.

Trusthouse operates about 800 hotels in 40 countries, including such luxury hotels as the King Edward in Toronto, the Plaza of the Americas Hotel in Dallas and the Ritz in Madrid.

Ibrahim Fahmy, executive vice president of U.S. operations for Trusthouse, said the hotel will be renovated so it can better compete with the most posh hotels in the nation's capital.

The Watergate rented 62 percent of its rooms last year, 7 percent below the city-wide average, Fahmy said.

#90086u2772 03/27/1990 ~United Press International

BOSTON (MARCH 27) UPI - The day after a congressional hearing on how to police the $33 billion-a-year weight-loss industry, one diet company executive called Tuesday for federal guidelines to protect obese customers.

''The race to grab market share is accelerating out of control at the expense of people who need serious medical treatment for obesity,'' said Lawrence Stifler, president of Health Management Resources.

Stifler, who said many advertisements from diet companies include testimony from people claiming to have lost more than 100 pounds, said federal guidelines should require medical superivision for the patients and nutritional information about the weight-loss programs.

''Anyone who has 40 or more pounds to lose is putting their health at risk

if they aren't getting some medical supervision on a diet,'' Stifler said. ''Don't be fooled by people wearing white lab coats. These people may be diet counselors, not medical personnel.''

Stifler, who said his company provides training on weight-loss and smoking-cessation programs to more than 600 hospitals and medical clinics, also called for laws requiring diet programs to provide data on their success rates.

At a hearing on Capitol Hill Monday into weight-loss programs, Rep. Ron Wyden, D-Ore., chairman of a House Small Business subcommittee, said a recent survey found about 20 percent of American adults are ''constantly dieting,'' making them prime targets of the ''largely unregulated'' diet industry.

Wyden acknowledged that pound-shedding potions have been around for generations. But he said, ''A new mix of questionable products, untrained providers and deceptive advertising is exposing our citizens to unexpected and unnecessary health risks.''

#90086u2831 03/27/1990 ~United Press International

(MARCH 27) UPI - Soviets tighten the screws in Lithuania... Greyhound ups reward for information on strike-related shootings... today's Supreme Court action... and fashion designer Halston dead of AIDS-related cancer. U-P-I has it all, next:

Moscow took more steps today to re-assert control over rebellious Lithuania, and the Baltic republic's government calls the steps ''inexcusable aggression.''

Soviet soldiers moved in on a hospital where Lithuanian army deserters took refuge and took up to 23 of the deserters into custody. Hospital officials say some were beaten.

Hours later, Soviet soldiers armed with automatic weapons took over the Lithuanian Communist Party's Central Committee building in Vilnius .

Lithuania protested the Soviet actions and demanded the return of the deserters, who it says were kidnapped. Lithuania is demanding immediate talks with Moscow in ''neutral territory.''

In Washington, the Bush administration's comments were decidedly cautious... in an apparent effort NOT to increase U-S-Soviet tension. White House spokesman Marlin Fitzwater refused to criticize the Soviet Union, calling events in Lithuania ''a very complex and delicate diplomatic situation.''

-30- 1380

#90086u2863 03/27/1990 ~United Press International

(MARCH 27) UPI - Greyhound bus lines is offering 100-thousand dollars for information leading to the convictions of those responsible for shooting at two dozen buses and terminals since the strike began.

The company says there had been 23 shooting incidents in the three-week strike, along with 71 bomb threats and 123 other incidents of violence. A company spokesman in Washington says Greyhound is NOT going back to the bargaining table until the violence ends.

The union says the company is using the violence as a subterfuge NOT to go back to the bargaining table. The union says it's ready to return to the talks on an hour's notice.

The union released its own set of figures on injuries received on the picket line. It says there have been 50 incidents of violence directed against strikers and supporters... including one person killed by a bus driven by a replacement driver.

The Supreme Court heard arguments today about Minnesota's push to give states more of a say in where their National Guard units train.

The case stems from a suit filed by Minnesota in 1987 when its Guardsmen were ordered to Honduras for training. Governors opposed to the Reagan administration's Central America policy had said they wouldn't allow state National Guard units to be trained in the war-torn region.

The federal government says National Guardsmen wear ''two hats'' as members of both state and federal forces. It argues that Minnesota is trying to play a role in U-S foreign policy.

Lawyers for Minnesota say the states have the power to train the militia, and that includes a say in where they train in peacetime.

In another case, the court ruled, 6-3, today that the Michigan Chamber of Commerce canNOT use funds from its general treasury to participate in elections. Justices cited the need to prevent corporate wealth from unfairly influencing elections.

-30- 2058

#90086u2923 03/27/1990 ~United Press International

(MARCH 27) UPI - Lawyers for former national security adviser John Poindexter rested their case today. But first they agreed with prosecutors that high-ranking government officials in 1985 had seen reports of secret arms shipments to Iran.

Both sides at the Washington trial stipulated that intelligence reports in 1986 also revealed that the United States was over-charging the Iranians for U-S missiles.

Kenneth Kodama... a former aide at the super-secret National Security Agency... said that when investigators from the House and Senate intelligence panels reviewed documents at the N-S-A in 1986... there was a shopping cart full of intelligence reports on the arms shipments.

Poindexter is trying to prove that Congress had plenty of information

about the arms shipments to blunt charges that he concealed the information from Congress.

Asked why Poindexter did NOT take the stand, attorney Richard Beckler told reporters- ''We don't believe the government proved its case.''

Final arguments set for are Friday morning.

Celebrities including Liza Minnelli and dancer Martha Graham today mourned the loss of Halston, the fashion designer who changed the way women dressed in the 1960's.

He died last night at the Pacific Medical Center in San Francisco of AIDS-related lung cancer. He was 57.

Minnelli says she's ''very, very saddened,'' and says she's lost her ''best friend.'' The 95-year-old Graham said Halston ''had an absolute genius for design that changed the way American women dressed'' and ''thought about themselves.''

Halston became one of the best-known labels in fashion and created gowns for Minnelli and pillbox hats for Jacqueline Kennedy. But he sold the rights to this name in 1973 for 16-Million dollars, creating a legal tangle that diluted his influence.

He was born Roy Halston Frowick on April 23rd, 1932, in Des Moines, Iowa. He attended Indiana University and the Art Institute of Chicago, where he majored in fine arts.

#90086u2934 03/27/1990 ~United Press International

(MARCH 27) UPI - Israel's government crisis continues. And some, including President Chaim Herzog, are calling for direct elections of a prime minister instead of the current coalition-building system.

Herzog last week picked Labor Party leader Shimon Peres to form a new government after Prime Minister Shamir's government fell in a NO-confidence vote. But Labor's chance of success dimmed last night when Peres failed to win support from a key religious party leader.

Some Labor Party leaders say they haven't given up hope that Peres can form a new government. But they say that if he can't, then they would rather have elections than agree on another coalition led by Shamir's Likud party.

Shamir himself criticizes the idea of new elections and says he has a better chance than Peres of forming a new coalition.

The acting director of the federal Office of Thrift Supervision is defending his agency and urging a congressional panel NOT to change the administration's thrift bailout plan.

Congressional critics want changes in the 166-BILLION-dollar Financial Institutions Reform, Recovery and Enforcement Act. They say thrift problems are NOT being resolved and the number of troubled institutions is growing.

Salvatore Martoche warned Congress today to consider the potential for harm that could result from a restructuring of the plan.

Martoche... appointed by President Bush last month... is the focus of a lawsuit brought by Olympic Savings and Loan Association of Berwyn, Illinois. The suit claims that he and former director M. Danny Wall were illegally named to lead the agency because Wall was NEVER confirmed by the Senate.

-30- 1840

#90086u2960 03/27/1990 ~United Press International

(MARCH 27) UPI - 100 years ago... President Dwight D. Eisenhower was born in Denison, Texas. A joint meeting of Congress today honored Eisenhower as someone his son said wanted to be remembered only as ''the good soldier.''

Former World War Two correspondent Walter Cronkite called Ike ''the greatest hero of the greatest war in history.''

Eisenhower rose from poverty in Abilene, Kansas, to become a West Point graduate and Supreme Allied Commander of the forces that began liberating Europe from Nazi tyranny on D-Day, June 6th, 1944. He was elected president in 1952 and again in 1956. He died on March 28th, 1969, at age 78.

Republican Senate leader Bob Dole praised his fellow Kansan, saying ''NO man did more to rid our planet of the Nazi scourge.''

Winston S. Churchill... a member of the British Parliament and grandson of Britain's great war-time leader... recalled that ''without the United States, there would have been NO liberation'' from Nazi Germany.

-30- 1135

#90086u3067 03/27/1990 ~United Press International

(MARCH 28) UPI - Little did Jimmy Wood, the second baseman of the Chicago White Stockings, realize when he ''invented'' spring training back in 1870, that its evolution would lead to a preseason as bedeviled as that of 1990.

First, spring training was delayed by a 32-day owners' lockout, then came the umpires' boycott of the spring training games.

Finally, on Tuesday, the umpires agreed to return to work this Friday, in exchange for binding arbitration with the owners.

The Major League Umpires' Association called for the boycott because the owners failed to consult the umps before making changes in the spring training and regular season schedules after the lockout.

The union had argued that the changes would give umpires fewer days off during the season, and reduce their spring training income. About 326 spring training games were canceled due to the lockout.

Umpire Eric Gregg said the dispute involved respect as much as it involved money.

''We know we're not the game,'' Gregg said. ''But we are an important part of the game. If they (the owners) are going to pay $4 million to some of these players, they ought to give some attention to the guys who call these guys out.''

At Winter Haven, Fla., Tim Naehring hit a home run in his first official spring training at-bat and Roger Clemens pitched three shutout innings, leading the Boston Red Sox to a 3-1 split-squad victory over the Houston Astros.

At Orlando, Fla., Minnesota Twin's Kirby Puckett lined a two-run homer in the third inning against the Houston Astros to give the Twins a 3-2 victory.

At Dunedin, Fla., Bret Saberhagen threw four scoreless innings and Gerald Perry and Danny Tartabull both homered to lead the Kansas City Royals to a 6-3 victory over the Toronto Blue Jays.

At Clearwater, Fla., the Philadelphia Phillies, aided by a dropped fly ball, scored six runs in the fourth inning to post a 9-7 victory over a Boston Red Sox split squad.

At West Palm Beach, Fla., Ben McDonald pitched three scoreless innings in his exhibition debut, a 5-4 victory over the Atlanta Braves. He allowed just one hit, struck out two and walked one over three innings.

At Phoenix, Dann Howitt hit a grand slam and Darren Lewis an inside-the-park homer to highlight an eight-run seventh inning as the Oakland Athletics defeated the San Francisco Giants 16-3.

At Yuma, Ariz., rookie Dan Grunhard capped a four-run seventh inning with a three-run homer to lift the California Angels to an 8-6 Cactus League triumph over the San Diego Padres.

At Tucson, Ariz., Cleveland Indians President Hank Peters said that catcher Andy Allanson's future with the club ''is in the past.'' Allanson, 28, was released by the Indians Tuesday.

#90086u3628 03/27/1990 ~United Press International

(MARCH 27) UPI - The judge in John Poindexter's Iran-Contra trial set Friday for final arguments. The order came today after defense attorneys rested their case... without calling Poindexter to testify in his own defense. His lead lawyer, Richard Beckler, says that's because the defense did NOT believe the government proved its case. Prosecutors say Poindexter was a mastermind of the scandal, but the defense tried to show that he was carrying out orders from higher up.

Mikhail Gorbachev addressed the Soviet Union today and spoke about the first session of his new presidential council, but he made NO mention of Lithuania. Earlier today, Soviet soldiers dragged Lithuanian deserters from a hospital where they had taken refuge. Moscow also took control of the headquarters of Lithuania's independent communist party in Vilnius . The moves are the latest in the Kremlin's attempt to tighten control over the rebellious Baltic republic.

P-L-O Chairman Yasser Arafat says a resolution of Israel's leadership problems will have NO affect on the Palestinian uprising in the occupied territories. Arafat says the revolt will continue in ''wave after wave'' whatever the outcome of the political stalemate now snarling the Israeli government. Arafat spoke at a news conference on the second day of a three-day visit to India, where he accepted the Nehru Award for International Understanding.

A New Jersey researcher says heavy beer drinkers are twice as likely to develop cancer of the mouth as those who drink hard liquor. But Dr. Arthur Mashberg says both groups face a far greater cancer risk than non-drinkers. He says a study of military veterans shows that those who drank six or more cans of beer a day had cancer rates 25 times that of non-drinkers. Those who drank six ounces or more of hard liquor a day had cancer rates 10 times that of non-drinkers.

-30- 2053

#90086u3644 03/27/1990 ~United Press International

(MARCH 27) UPI - The U-S Southern Command in Panama still maintains 314 enemy soldiers were killed in the December 20th U-S invasion. The Pentagon admits the figures are estimates and contrast sharply with other reports saying only 50 Panamanian troops were killed. The military also estimates 202 Panamanian civilians died, although human rights groups contend the number is much higher.

The Pentagon has set an April 4th launch date for the experimental air-launched space booster called ''Pegasus.'' The three-stage booster is designed to replace some land launches and allow for inexpensive but speedy deliveries of satellites and other small space payloads into orbit. Officials say the missile-like Pegasus will be dropped from a Bthousand feet, fire its engines and- if all goes well- zoom into space.

A Senate panel today began hearings on a bill prohibiting states from restricting abortions. But even before testimony began, Utah Republican Orrin Hatch fired a salvo at Ohio Democrat Howard Metzenbaum, the committee chairman and co-author of The Freedom of Choice Act. Hatch criticized Metzenbaum for stacking the witness list, including rape victims and the orphaned son of a woman who fatally overdosed trying to end a pregnancy.

A consumer group today criticized the beef and pork checkoff programs, saying they help finance misleading advertising. Robert Parrish of the Center for Science in the Public Interest says the ads try- quote- ''to convince Americans that beef and pork are more healthy than they are.'' He told a House panel the money would be better spent on developing low-fat meat. Checkoff programs assess farmers to pay for research, market development and promotion.

-30- 1887

#90086u3888 03/27/1990 ~United Press International

(MARCH 27) UPI - Foreign leaders were cautious today in their reactions to the situation in Lithuania. British Prime Minister Thatcher called for Moscow and Lithuania to negotiate an end to their dispute over the Baltic republic's push for independence. But she sidestepped a request in the House of Commons that she personally appeal to Soviet President Gorbachev NOT to use force.

In Washington, D-C, the defense rested its case today in the Iran-Contra trial of John Poindexter without calling him to the stand. The former national security adviser is the highest-ranking member of the Reagan administration to face criminal charges in the case and has been portrayed by the prosection as the mastermind of the scandal. When asked why Poindexter did NOT testify, lead attorney Richard Beckler said- quote- ''We don't believe the government proved its case.'' Closing arguments are set for Friday.

Lawyers representing the man accused in Sunday's deadly fire at a social club in New York City say their client ''is NOT happy.'' Bernard Segal, a member of Julio Gonzalez's defense team, says- ''This entire experience is most negative to him emotionally.'' Gonzalez is charged in the fire that left 87 people dead, which makes it the worst mass killing in U-S history. A grand jury indictment is expected by week's end.

The Greyhound bus line is stepping up efforts to end violence that has marred the three-week-old strike by more than nine-thousand employees. The company today offered a 100-thousand-dollar reward for information about two dozen shootings at buses since the walkout began. Greyhound officials also say they won't return to the bargaining table until the violence ends. A spokesman says meaningful talks can't take place- quote- ''while a gun is pointed at us.''

-30- 1969

#90086u3930 03/27/1990 ~United Press International

(MARCH 27) UPI - The House took steps today to halt a practice that one member calls ''disgusting and dangerous.'' It approved a bill to prohibit the hauling of garbage, chemicals and hazardous wastes in the same trucks and railroad cars that are used to carry food. The measure... approved by a 416-15 vote and sent to the Senate... is the result of a series of hearings and news reports that revealed the widespread practice of alternating cargoes.

The Romanian news agency says the wife of former Romanian dictator Nicolae Ceaucescu could have escaped the firing squad by entering a plea of insanity... but refused. Officials also say the couple could have delayed their executions by simply asking for an appeal, but they ''violently and indignantly'' rejected such a move. The Ceausescus were summarily tried and executed on December 25th, two days after the fall of their hard-line communist government.

The F-B-I says four more reputed mobsters surrendered today in Boston and Hartford, Connecticut. A series of pre-dawn raids in Rhode Island, Massachusetts and Connecticut yesterday netted more than a dozen suspects, including reputed New England crime boss Raymond ''Junior'' Patriarca. Authorities claim the sweep leaves the New England Mafia ''in disarray.'' The suspects were named in three separate indictments listing 113 counts... including murder, extortion and kidnapping.

Two murder suspects who saw their case portrayed on a national television program Sunday turned themselves in to police in suburban Washington, D-C, today. The pair was being sought by Los Angeles police on charges of murder, attempted murder, robbery and burglary in the 1989 shooting of three people. The surrender brings to 105 the number of fugitives arrested since the weekly show began airing in February 1988.

-30- 1985

#90086u4129 03/27/1990 ~United Press International

(MARCH 27) UPI - Greyhound officials offer a reward... the defense rests in Poindexter's Iran-Contra trial... more alleged mobsters are collared in

New England... tension grows in Lithuania... U-P+I has those stories and more, next.

Saying ''the terrorism must stop,'' Greyhound officials today offered a 100-thousand-dollar reward for information on the shootings that have marred a three-week-old strike by more than nine-thousand employees.

The bus company vows NOT to return to negotiations until the violence ends.

The company released a report of 23 shooting incidents, 71 bomb threats and 123 other incidents. Speaking at a Washington news conference, Greyhound's executive vice president and chief negotiator Anthony Lannie blamed the union for NOT putting a stop to shootings.

The union says it opposes the violence but believes the company is using the issue as ''a smokescreen to avoid bargaining.'' The union also released its own set of figures... pointing to 50 incidents of violence directed against strikers and supporters.

Talks between management and the union were suspended March 18th. A federal mediator met separately with both sides last week, but NO progress was reported.

#90086u4138 03/27/1990 ~United Press International

(MARCH 27) UPI - The Soviet Union pushed ahead today with its crackdown in Lithuania.

Soviet soldiers moved in on a hospital where Lithuanian army deserters took refuge and took several into custody. Hospital officials say some were beaten. One doctor says the beatings left ''blood on the steps.''

Soldiers also took control of the headquarters of Lithuania's independent communist party in Vilnius.

Lithuania protested the moves, calling them ''inexcusable aggression.'' The Baltic republic also demanded the return of the deserters, who it says were kidnapped. Lithuania wants immediate talks with Moscow in ''neutral territory.''

Today's moves are the latest in Mikhail Gorbachev's crackdown on Lithuania which declared its independence earlier this month.

In Washington, U-S officials gave a cautious response, saying- ''this is a very complex, delicate diplomatic situation.''

-30- 1056
#90086u4153 03/27/1990 ~United Press International
(MARCH 27) UPI - John Poindexter's Iran-Contra trial now moves into its closing phase, with final arguments set for Friday.

Earlier today, defense attorneys rested their case without calling the former national security adviser to the stand. Poindexter's lead lawyer, Richard Beckler, says that's because the defense does NOT believe the government proved its case.

During the trial, prosecutors tried to show that Poindexter was a mastermind of the scandal that involved secret arms sales to Iran and illegal diversion of profits to Nicaragua's Contra rebels.

The defense tried to show that Poindexter carried out policy to aid the Contras that was established by former President Reagan.

Poindexter is the highest-ranking member of the Reagan administration to face charges in the scandal. He's charged with lying to Congress, trying to obstruct a congressional investigation, and destroying documents.

Two U-S chemical companies are refusing to sell the Army an ingredient used to make poison gas, and the government apparently is NOT happy about it.

The companies are Occidental Chemical Corporation of Dallas and the Mobay Corporation of Pittsburgh, an American subsidiary of a West German firm. They're the major American manufacturers of the ingredient, which is used to make Sarin, a lethal nerve agent used in the Army's chemical-filled artillery shells.

Spokesmen for both companies say it's their policy NOT to sell chemicals that are used to make chemical weapons.

The Commerce Department says it's considering the possibility of legal action to force the companies to sell the ingredient, which the Army needs to start manufacture of a new generation of chemical weapons.

A Pentagon spokesman says the Army also is looking at the possibility of getting the ingredient from other companies.

(MARCH 27) UPI - Chalk up another victory for the ''America's Most Wanted'' t-v series.

Police in Rockville, Maryland, say a pair of California murder suspects

walked into the suburban Washington, D-C, police station today and surrendered... two days after their case was portrayed on the national t-v program.

Michael Berry and Jessie Morrison had been sought by Los Angeles police on charges stemming from a 1989 burglary in which three people were shot. One of the victims died.

The incident occurred on May 11th, 1989, when Berry, Morrison and two accomplices allegedly broke into a home in Wilmington, California.

Rockville police Captain Larry Yates says Berry and Morrison- ''saw themselves on 'America's Most Wanted' Sunday and seriously considered giving themselves up.''

Their alleged accomplices surrendered to police soon after the crime and are serving prison sentences.

The World Health Organization today presented an ominous report on tropical disease.

The W-H-O says almost one-half-BILLION people suffer from one or more tropical diseases. In other words, nearly one person in 10 throughout the world is infected and the W-H-O claims the situation is getting worse.

The report says most of the afflicted live in poor countries with less than a 400-dollar annual per capita income.

Africa is the hardest hit with nearly 400-Million people, or nearly 80 percent of the population, at risk from malaria and other rampant diseases.

Most of the diseases are caused by tiny, complex parasites and cause tremendous pain and suffering. The consequences include ulcers, organ damage, gross deformities of face and limb, blindness, brain damage and death.

The W-H-O also lists Asia, Central and South America and even Europe as target areas.

#90086u4298 03/27/1990 ~United Press International

(MARCH 27) UPI - The Senate agreed today to hold a final vote on the clean air bill by next Tuesday. That's more than two months after senators first took up the massive and complex legislation.

Earlier, lawmakers rejected an administration-backed amendment that would've given industry stronger legal weapons to fight federal cleanup

orders. Opponents of the measure said it would've crippled enforcement efforts.

The House Appropriations Committee today approved a two-point-four-BILLION-dollar supplemental spending bill. The measure cuts defense spending by one-point-eight-BILLION and provides 720-Million dollars in emergency aid to Panama and Nicaragua and 100-Million to help refugees.

Most world leaders sidestepped the Lithuanian question today. But Poland's Lech Walesa was more direct. He urged Soviet President Gorbachev to negotiate with the independence-minded Baltic republic and warned against the use of force.

In a possible violation of 1987 Intermediate Nuclear Forces treaty, the State Department says the Soviet Union supplied East Germany, Czechoslovakia and Bulgaria with S-S-23 missiles. The weapons were supposed to have been abolished under the accord.

In what New York police call a racially motivated attack, a 14-year-old black student was shot and slightly injured today by three white students in a high school locker room fight in Brooklyn's racially tense Bensonhurst section.

The union representing striking Greyhound workers accuses the company of using the violence that's marred the walkout as a ''smokescreen'' to avoid negotiations. Earlier, Greyhound vowed NOT to return to the bargaining table until the violence ends. It also offered a reward for information on the shootings that've occurred during the strike.

#90086u4432 03/27/1990 ~United Press International

(MARCH 27) UPI - Lithuanian President Landsbergis says Moscow apparently has changed its mind about NOT using force against the rebellious Baltic republic. He was referring to the takeover today by Soviet soldiers of the headquarters of Lithuania's independent communist party. Soldiers also beat and dragged Lithuanian army deserters from a hospital where they took refuge. The Landsbergis government protested the moves, calling them ''inexcusable aggression.''

The State Department says Moscow supplied three East European countries with missiles that were supposed to have been abolished by the 1987 I-N-F treaty. A spokeswoman says the countries receiving the S-S-23 missiles were East Germany, Czechoslovakia and Bulgaria. Technically, it's NOT a violation of the Intermediate Nuclear Forces treaty unless the weapons were supplied after the signing of the accord.

The House Appropriations Committee took action today on President Bush's request for emergency aid for Panama and Nicaragua. The panel O-K'd a supplemental spending bill that cuts defense spending by one-point-eight-BILLION dollars and provides 720-Million dollars in emergency aid to Panama and Nicaragua. 100-Million dollars also is provided to help refugees. Parts of the measure offer more than Bush requested, and other parts offer less. It still must be approved by the full House and the Senate.

Polish Prime Minister Mazowiecki says his nation is trying to convert to a market-driven economy but is seriously hampered by an estimated 40-BILLION-dollar foreign debt. Mazowiecki predicts the experimental shift from a centrally planned economy is doomed unless Western countries help reduce Poland's flow of red ink. The Polish leader made his remarks today before returning home from Ottawa, Canada.

#90086u4440 03/27/1990 ~United Press International
(MARCH 27) UPI - A 14-year-old black student suffered a gunshot wound to the wrist during a high school fight in the Bensonhurst section of Brooklyn. Police say the attack was racially motivated. However, a Board of Education spokesman says the school has NO history of racial problems. Today's shooting occurred just blocks from the scene of last August's attack on black teen-ager Yusuf Hawkins, who was chased by a mob of white men and shot to death.

The Federal Aviation Administration has revoked the pilot licenses of a U-S-Air captain whose 737 rolled off the end of the runway at New York's LaGuardia Airport last September. The plane fell into the East River, killing two passengers. An F-A-A spokesman today said the agency took action because of the captain's failure to fully complete the pre-takeoff checklist and perform other required actions during the takeoff run.

A diet company executive is calling for federal guidelines to protect obese customers. Lawrence Stifler says the race among diet companies ''to grab market share is accelerating out of control... at the expense of people who need serious medical treatment for obesity.'' Stifler says medical supervision for patients should be required. His comments come one day after a congressional hearing on how to police the weight-loss industry.

A wave of cold air stretched from northern New England to West Virginia today, pushing temperatures below freezing as far south as the mid-Atlantic states. Caribou, Maine, topped the nation's low list with a reading of two below zero. And while New Hampshire foresters say the early spring freeze is revitalizing maple syrup production, an apple and peach grower in Pennsylvania says- quote- ''Things don't look good.''

NEW YORK (MARCH 28) BUSINESS WIRE - Quantum Chemical Corp. announced Wednesday that its Morris, Ill., ethylene unit has resumed operation.

This unit had been shut down since June 7, 1989 as a result of a fire in the propylene purification section. An unrelated equipment failure and fire occurred in the ethylene unit on September 12, 1989.

All repairs to the damaged section of the ethylene unit have been completed. An extensive Process Hazard Review of the entire ethylene unit was also completed, resulting in improvements to the plant.

With the production of ethylene and propylene now available from the ethylene unit, the Morris polyethylene, polypropylene, and ethylene oxide/glycol units have also begun operation.

#90087b0045 03/28/1990 ~Business Wire
ATLANTA (MARCH 28) BUSINESS WIRE - Former President Jimmy Carter announced Wednesday that American Cyanamid Company has made a major donation with the aim of eradicating the Guinea worm disease worldwide by 1995.

The donation was made to the Carter Center's Global 2000 Guinea Worm Eradication Program.

At a press conference at The Carter Center in Atlanta, President Carter accepted Cyanamid's donation of Abate larvicide (temephos), which destroys the host of the Guinea worm larvae in rural water supplies, yet leaves the water suitable for drinking. The donated Abate, valued at more than $2 million, is estimated to be sufficient for the entire five year eradication campaign. UNICEF has agreed to assist in shipping and distributing the chemical in Africa.

In pleding the donation of Abate, Albert J. Costello, executive vice president of American Cyanamid Company, said, ''As a life-sciences corporation dedicated to the development of agricultural and medical products, it is very satisfying to know that Cyanamid's donation of Abate larvicide will enable men, women and children to live without fear of the water they drink to survive. In donating Abate to the Carter Center, we are helping to insure that it will reach the wells and water holes of West Africa where it is needed.''

Guinea worm maims and cripples approximately 10 million people each year in India, Pakistan, and 18 African countries. Over 100 million people are at risk for the infection. In 1986, the World Health Organization (WHO) targeted Guinea worm as only the second disease to be eradicated worldwide since the successful smallpox eradication campaign of the 1960's and 1970's.

The immature Guinea worm is ingested through contaminated drinking water and emerges a year later as a two to three foot long worm, causing extreme pain and disability. Any part of the body may be infected. In addition to impairing the health of the victims, the disease is a serious impediment to farming and to education.

MONTEREY PARK, CA (MARCH 28) BUSINESS WIRE - Ameron (NYSE:AMN) Wednesday reported slightly improved sales, but a loss equaling 25 cents per share in its first quarter of fiscal 1990, compared with earnings of 9 cents per share in 1989.

Sales for the quarter totaled $88.8 million, compared with $86 million in 1989.

L. R. Tollenaere, chairman and chief executive officer, said Ameron's first quarters are historically the weakest of the year, but greater impact was felt this year because of inclement weather delays that slowed its construction products operations in Hawaii and project scheduling

delays that lowered results of domestic concrete and steel pipe operations.

Also, equity earnings from jointly owned companies were down in the quarter. Tollenaere said that heavy order backlogs in most of Ameron's businesses suggest first-quarter results will not severely impact the year's results.

LOS ANGELES (MARCH 28) BUSINESS WIRE - Stars To Go Inc. (NASDAQ:STAR) Wednesday reported 1989 revenues of $17.7 million and net income of $351,000.

This compares with 1988 revenues of $50 million and a net loss of $19.8 million, or $2.34 per share. Fourth quarter 1989 revenues totaled $3.6 million with net income, after an extraordinary gain, described below, of $209,000.

The results for 1989 are not comparable with 1988 due to the significant decrease in the scale of the company's operations between the two periods and the company's debt restructure completed in April 1989.

The results for 1989 include a $1 million settlement of a contract dispute recorded in the first quarter and an extraordinary gain of $835,000, relating to the company's debt restructure recorded in the fourth quarter.

Stars To Go Inc. provides video management services to the retail industry. In additon to its core base of convenience store chains, the company is pursuing new business in the supermarket and hotel industries. At February 28, the company was providing video management services at approximately 1,600 retail locations.

SANTA CLARA, CA. (MARCH 28) BUSINESS WIRE - Siliconix Inc. (NASDAQ:SILI) announced that its president/chief executive officer and board chairman, Dr. Richard E. Lee, would start his retirement sometime next year and that he had decided to concentrate his time this year on the chairman's job.

Therefore, effective immediately, the Siliconix board elected Richard J. Kulle to be president/chief executive officer and director. Kulle joined the company almost three years ago, after a successful 22-year career in semiconductor manufacturing and operations with the General Electric Co.

Starting from vice president manufacturing, Kulle was promoted to Siliconix' executive vice president worldwide operations early last year.

Lee said that he was satisfied the company would soon return to profitable operations and this change was timed to ensure that a younger, more energetic man was in place to lead the company on an improved profitability and revenue growth plan.

Siliconix develops, manufactures and markets semiconductor products -- both discretes and ICs. The company is a leading supplier of MOSPower transistors, multichip modules and SMARTPOWER ICs. Also, it holds dominant marketing positions in small-signal FETs and analog switch/multiplexer ICs.

SANTA CLARA, CA (MARCH 28) BUSINESS WIRE - Robert P. Gionfriddo has joined Silicon Valley Bank (NASDAQ/NMS:SIVB) as executive vice president, announced Roger V. Smith, president and chief executive officer.

Gionfriddo, 44, was with Plaza Bank of Commerce for nine years where he was executive vice president and director of corporate marketing. At Plaza, Gionfriddo was a member of Plaza's executive committee and had primary responsibility for business development.

He was a significant contributor to Plaza's success in deposit growth and loan production and was instrumental in negotiating a mortgage banking function with a major insurance company. Before joining Plaza Bank, Gionfriddo was Union Bank's top marketing officer based in their Santa

Clara Valley regional head office.

''Bob's extensive knowledge of the dynamic Santa Clara County business marketplace will contribute to the growth of our bank. Bob, a top marketing executive, will thrive in our sales culture,'' said Smith.

Gionfriddo will be working in Silicon Valley Bank's downtown San Jose regional office. This summer, the bank will be moving this office to its new location on the ground floor of 10 Almaden Blvd.

The downtown San Jose office is the headquarters of the bank's commercial division. The vital downtown San Jose region is undergoing a renaissance attracting new companies and increasing business activity in the area. This growth has provided a solid step for expansion of the bank's core relationships.

Gionfriddo is a director of the Children's Discovery Museum, a member of the San Jose Downtown Rotary Club and has been active with the YMCA Central and Metropolitan divisions, American Cancer Society Downtown League, Civic Club of San Jose and the Italian American Heritage Foundation. He is a member of St. Mary's Parish, in Los Gatos.

Gionfriddo is a long-time resident of Los Gatos, where he lives with his wife and family. He graduated in 1968 from Fairfield University, in Connecticut, with a bachelor of arts degree in history, and attended Loyola University of Chicago.

Silicon Valley Bancshares, parent company of Silicon Valley Bank, reported net income for the year ended Dec. 31, 1989, of $7,098,000, or $2.52 per share, up from $3,505,000, a 103 percent increase. Total assets grew by $165 million to $440 million at Dec. 31, 1989.

Silicon Valley Bank is the only independent bank with offices in the major financial centers of Santa Clara County: Santa Clara, Palo Alto, San Jose and Downtown San Jose. The office at 3000 Sand Hill Road, Menlo Park, is the bank's first office in San Mateo County.

PLAINFIELD, IN. (MARCH 28) BUSINESS WIRE - Public Service Indiana Wednesday replaced $10 million of maturing debt with lower-cost bonds and issued $14.25 million of new long-term debt.

The company issued a $10 million, 7-3/8 percent first mortgage bond,

series TT, due March 15, 2012, to the city of Princeton, Ind. The bond will serve as collateral for $10 million in pollution control refunding revenue bonds being issued by Princeton at the same interest rate and maturity. Princeton's bonds are insured and carry a credit rating of AAA.

Proceeds from the Princeton bonds will be used to retire maturing 12-3/8 percent, series A, pollution control revenue bonds on April 1.

Also today, PSI issued a $14.25 million, 7-1/2 percent first mortgage bond series UU, due March 15, 2015, to the Indiana Employment Development Commission. The bond serves as collateral for $14.25 million in environmental revenue bonds sold by the IEDC at the same interest rate and maturity. The IEDC bonds are insured and carry a credit rating of AAA.

Proceeds from PSI's issue will be used to fund solid waste and sewage disposal projects at six of the company's generating stations.

SOLANA BEACH, CA. (MARCH 28) BUSINESS WIRE - Chart House Enterprises Inc. (NYSE:CHT) announced the opening of its newest Chart House restaurant in Vero Beach, Fla.

The Vero Beach restaurant is the second new Chart House to open in 1990, following the opening of the company's Haleiwa, Hawaii, restaurant in January.

The company also announced Wednesday that it has completed the purchase of a restaurant property in Cohasset, Mass. The restaurant property, previously operated as ''Hugo's Lighthouse,'' will be refurbished and should re-open as a Chart House in early summer of this year.

This acquisition increases the company's scheduled 1990 Chart House openings from six to seven restaurants, including the two that have opened already.

Chart House Enterprises operates 76 restaurants, including 61 Chart House, one Peohe's and 14 Paradise Bakery restaurants. The company's Chart House restaurants are located in 17 states, Puerto Rico and the U.S. Virgin Islands; Peohe's is located in California; and the company's Paradise Bakery restaurants are located in California, Hawaii and Texas.

In addition, the company's franchisees operate 12 Paradise Bakery restaurants in Northern California, Colorado, Arizona and Oklahoma.

DENVER (MARCH 28) BUSINESS WIRE - Tele-Communications Inc. (TCI) Wednesday reported results for the year ended Dec. 31, 1989.

Revenues were $3,026 million for 1989 compared to $2,282 million for 1988. Operating income was $569 million, an increase of $78 million over 1988. These increases resulted from internal growth of its subscriber base and theatre operations as well as the consolidation of United Cable Television Corp. beginning May 25, 1989, and inclusion in 1989 of the full 12-month results of WestMarc Communications Inc. following the acquisition of a majority interest on May 31, 1988.

The company's net loss for the year was $257, or a loss of 73 cents per share, in 1989 compared to net earnings of $56 million, or 15 cents per share in 1988.

The decrease of $313 million was primarily due to decreased gain on sales of assets, increased interest expense incurred to finance certain acquisitions, the increase in depreciation and amortization resulting from those acquisitions, and TCI's increased pro rata share of losses of affiliates.

At year end 1989, TCI and consolidated subsidiaries served approximately 7.8 million basic subscribers and 5.8 million pay TV subscribers and operated through its United Artists Entertainment subsidiary 2,695 theatre screens in 628 theatres or complexes.

Tele-Communications Inc. is traded over-the-counter with Class A common stock and Class B common stock trading separately under symbols of TCOMA and TCOMB, respectively.

Also, certain rights are traded in the over-the-counter markets under the symbol of TCOMR. The company's 11-1/8 percent senior subordinated debentures and 7 percent convertible subordinated debentures are traded in the over-the-counter markets, the latter under the symbol of TCOMH.

IRVINE, CA (MARCH 28) BUSINESS WIRE - Denny's Restaurants has implemented an innovative rideshare incentive program that provides cash awards to participating employees.

The program, which went into effect this month and is available to the 500 Denny's employees working at the company's home office in Irvine, is in accordance with air pollution control guidelines set by the South Coast Air Quality Management District.

''By creating this rideshare plan, Denny's is showing its concern for Southern California's air quality and traffic congestion problems,'' said Sam H. Maw, president and chief operating officer of Denny's Restaurants. ''This new program is a benefit to employes in that it compensates them for ridesharing. And, at the same time, it benefits everyone in the Southland by lessening the amount of pollutants in the air we breathe.''

Flexible yet effective, the Denny's Ridesharing Plan enables employees to choose from any of three modes of ridesharing: carpooling, vanpooling or bus riding. Each employee who shares rides receives cash, with the amount of compensation depending upon the mode of transportation selected and the number of days he or she rideshares over the course of a month.

According to Luis Imperial Jr., facilities manager and transportation coordinator for Denny's, more than a third of employees at the home office actively participate in the rideshare plan.

''Everyone is very enthusiastic about the program, and we expect the level of participation to increase in the coming months,'' he said.

''The initial success of this program is due in large part to the encouragement and support of management, who have put together a compensation package that generously awards the employees.''

Denny's Restaurants is the corporate entity that includes a chain of 1,268 Denny's restaurants, which rank first among family restaurants with systemwide sales of $1.1 billion for 1989. It also includes 198 El Pollo Loco fast food restaurants; Proficient Food Co., a food warehouser and distributor; and Portion-Trol Foods Inc., a food processing plant. Denny's is a subsidiary of TW Services Inc., one of the largest food conglomerates in the country.

SAN JOSE, CA. (MARCH 28) BUSINESS WIREM - CHIPS and Technologies Inc. (NASDAQ, NMS:CHPS) Wednesday announced it expects revenue and earnings for the third fiscal quarter ending March 31 to be significantly below the company's operating results for its second fiscal quarter ended Dec. 31, 1989.

CHIPS expects to report complete financial results for the third quarter on or about April 24, consistent with normal reporting practices.

CHIPS and Technologies President and Chief Executive Officer Gordon A. Campbell, stated, ''Third quarter results will be adversely affected because of a number of factors. First, shipments of high-end chipsets for 80386-based machines to Asia have been impacted because of the shortage of Intel Corp. 386DX and 386SX microprocessors in Taiwan.

''In addition, our customers are on allocation with respect to some of our products as demand has exceeded short term supply. We expect the bulk of our product constraints to be remedied during our fourth fiscal quarter.''

Campbell continued, ''The other ongoing factor which has affected current operating results is continued price pressures on some of our older product offerings. We expect some of these pressures to decrease as we begin shipping some of our new generations products during the fourth fiscal quarter.''

CHIPS also announced that the board of directors has authorized a $10 million stock buyback program effective immediately. The buyback period is effective indefinitely.

CHIPS and Technologies Inc. is the world's leading supplier of VLSI proprietary hardware and software solutions for the microcomputer industry based on evolving industry standards.

#90087b0176 03/28/1990 ~Business Wire

NOVATO, CA. - (MARCH 28) BUSINESS WIRE - Fireman's Fund Insurance Co. and Allstate Insurance Co. have filed a suit in San Diego federal court seeking $25 million in damages from a group of Southern California attorneys, clients and law firm personnel who allegedly conspired to defraud their insurance companies through a series of lawsuits during the 1980s.

The civil lawsuit for treble damages is being lodged under the Racketeer Influenced and Corrupt Organizations Act (RICO), Title 18 of the U.S. Code.

''This conspiracy of attorneys and their associates was known as The Alliance,'' said Gary Black, executive vice president of claims for Fireman's Fund.

''The Alliance profited by abusing a provision of California state law that forced the insurance companies to pay for Alliance attorneys in cases representing the companies' insureds. Then the attorneys conducted hundreds of needless depositions, filed specious pleadings and generally churned the cases, running up billing fees well into the millions of dollars.''

The RICO suit centers on an area of law known as ''Cumis counsel,'' so-called for a 1984 California Appellate Court decision that in certain situations permits insureds' attorneys unlimited sway in conducting defense litigation. The RICO suit defines abuses of the

Cumis counsel provisions by The Alliance. This type of fraud has cost the insurance industry an estimated $200 million.

''We feel responsible for fighting fraud on behalf of our customers and consumers in general, particularly when it is as blatant and costly as this,'' said Dan Kummer, vice president, Allstate Insurance. Fireman's Fund and Allstate are encouraging other victimized insurance carriers to join in the suit. But no matter what other carriers do, Fireman's Fund and Allstate want to send a message to all attorneys who engage in abusive or fraudulent billing practices that they are aggressively investigating all suspicious cases, and, where appropriate, will file more RICO actions.

''Too often the insurance industry is reluctant to take an aggressive role for fear of prompting bad faith lawsuits,'' Black said.

''By filing this RICO action, Fireman's Fund is also making a statement

that we will not be cowed by threats of legal reprisal. The cost of needless and fraudulent litigation is staggering to the judicial system, to the consumer and to the insurance industry.

''We are committed to eliminating legal abuses that clog the court calendar, that raise insurance premiums and that delay the day in court for truly injured parties.''

Several defendants in the RICO suit have already pled guilty to fraud in related criminal actions. And one attorney was arrested for perjury before a federal grand jury investigating fraudulent litigation.

This RICO suit culminates a two-year investigation headed by Jim Schratz, assistant vice president of litigation for Fireman's Fund, who then assembled a team of lawyers including Rich Edwards (of the San Diego office of Barger & Wolen), Neil Getnick (a New York RICO specialist) and Bob Blakey (Notre Dame law professor and author of the RICO statute).

Representing Allstate in the investigation and litigation is attorney David Bocan (of the San Francisco office of Denenberg, Tuffley, Bocan, Jamieson, Black, Hopkins and Ewald). In addition, Fireman's Fund has retained the legal auditing firm of Stuart, Maue, Mitchell & James located in St. Louis.

SEATTLE (MARCH 28) BUSINESS WIRE - Effective immediately, Seafirst Bank is implementing a buyers'-protection plan for all its checking account and market-rate savings customers in Washington and Oregon, making it the first major bank in the Pacific Northwest to provide this service.

According to Seafirst President Luke Helms, the program consists of two parts: 1) an extended protection feature that automatically doubles a manufacturer's warranty for up to one year on items like home appliances, video equipment, computers, toys and sports equipment, and 2) a purchase security feature that insures most items, including gifts, for a full 90 days from the date of purchase. Both features apply to most purchases made using a Seafirst personal checking account -- at no cost to the customer.

''We're thrilled our customers will be the first in our market to take advantage of this terrific service,'' said Helms. ''It's a great

enhancement that's sure to save hundreds of dollars in repair or replacement costs for many of our customers.''

According to Helms, Seafirst's new buyers'-protection plan is another extension of ''Excel Service,'' the bank's customer service program announced last year that resulted in extended weekday banking hours, 24-hour telephone banking, Saturday banking, and $5 payments to customers who have to wait more than five minutes for teller service.

SCOTTSDALE, AZ (MARCH 28) BUSINESS WIRE - Panasonic A/V Systems Group, a division of Matsushita Electric's Panasonic Communications & Systems Co., Secauscus, N.J., and Interactive Media Technologies Inc. (NASDAQ:IMTX) of Scottsdale, have announced plans to conduct a joint field test of several multimedia applications.

Together, Panasonic and IMT will test and evaluate desktop video systems utilizing Panasonic's professional video products combined with IMT's new IMTX 8000 desktop media integration system and software developed by IMT's software subsidiary.

IMT intends to unveil the IMTX 8000 at the San Francisco MacWorld Exposition Apr. 10-13, where they will show the IMTX 8000 controlling a wide variety of video formats from a single Macintosh computer. The Panasonic-IMT joint field test of IMTX 8000 applications will commence following the MacWorld Exposition. According to R. Glenn Williamson, chairman, chief executive officer and president of IMT, ''We are very excited to have Panasonic, a leading supplier of video equipment, join us in conducting this extensive field test and making it a success.''

Panasonic and IMT will conduct a field test program for several months following the MacWorld Expo, with Panasonic supplying video editing decks and IMT supplying IMTX 8000s, software, and field support. Both companies will conduct research for the development of future multimedia and desktop video products.

IMT is a full-spectrum communications corporation specializing in computer-based interactive video products which include proprietary hardware and software systems. IMT's first product, the IMTX 8000, is scheduled for shipment in the fourth quarter of 1990. The IMTX 8000 is the first multimedia product to integrate complete audio, video and multiple device control into a single package that can be easily controlled by a personal computer.

SAN DIEGO (MARCH 28) BUSINESS WIRE - Ted Owen has been named president of TCS Publishing, a subsidiary of TCS Enterprises Inc. (ASE:TCS), a publicly held financial and business services firm with headquarters in San Diego.

The announcement was made by Tom C. Stickel, chairman and chief executive officer of TCS Enterprises, who said: ''We are honored to welcome one of San Diego's most outstanding business leaders to the TCS team.''

Owen joins TCS on Apr. 6 from the San Diego Business Journal, where he served as president and publisher since 1987. During his tenure there, the weekly business newspaper moved from a $1 million annual deficit to annual earnings of over $1 million; from 28 pages per week to 60; plus 12 special magazines per year.

Since 1987, the paper has earned over 20 awards for editorial excellence from the San Diego Press Club.

As president of TCS Publishing, Owen will oversee the production of annual magazines for city and association clients, as well as the company's existing bank and savings and loan publications. The company intends to merge with Protocol Publishing of San Diego to facilitate additional corporate expansion.

Owen said he is leaving the San Diego Business Journal for a new entrepreneurial challenge.

TCS Publishing is a wholly owned subsidiary of TCS Enterprises and thus operates as an autonomous company with the other TCS subsidiaries, which include TCS Insurance, TCS Mortgage Banking, TCS Real Estate, TCS Governmental Relations and Mortgage Capital Company of America.

TCS Enterprises was founded by Stickel in May 1983. The firm went public in 1985 and now trades on the American Stock Exchange.

TCS Publishing is located within the corporate headquarters at 10525 Vista Sorrento Parkway, San Diego.

NEW YORK (MARCH 28) BUSINESS WIRE - Finmeccanica's board of directors met in Rome Wednesday to approve the 1989 results of the group.

Finmeccanica, a company of the IRI group in Italy, is a high technology manufacturing group operating in aerospace, energy and environment, defense electronics, transportation and industrial automation.

Group revenues reached $6.5 billion (an increase of 22 percent over 1988), new orders increased by 21 percent to $8.1 billion and net income climbed to $75 million.

Last year was important to the group's expansion and increased worldwide presence. Its technological and product base was expanded with the acquisition of the Selenia and Elsag groups in Italy and the Bailey Controls Co. in the United States.

Foreign sales of the group represented 44 percent of total revenues, one of the highest levels in recent years, and one of the highest absolute levels of any large industrial group in Italy. Foreign employment, mostly in North America and in other European countries, now represents approximately 10 percent of the total.

In 1989 Finmeccanica stepped up its efforts to increase investments in technology development. Research and development activities employed more than 6,000 people out of a total of 51,000 employees and total expenditures reached $950 million, or 14 percent of revenues.

HONOLULU (MARCH 29) BUSINESS WIRE - The board of directors of Bancorp Hawaii Inc. Wednesday declared a special 10 percent stock dividend, payable on May 4, 1990, to shareholders of record as of the close of business on April 12, 1990.

This stock dividend will bring Bancorp Hawaii's outstanding shares to approximately 16,544,000.

Bancorp Chairman and Chief Executive Officer Howard Stephenson, said confidence in Bancorp's future due to the vitality of the marketplaces in which it operates warranted offering the stock dividend.

''We believe the 10 percent stock dividend will enhance shareholder value '' added Stephenson.

Bancorp Hawaii is the largest Hawaii-based financial organization in Hawaii with more than $8 billion in assets. Its princiapl subsidiaries are Bank of Hawaii, First National Bank of Arizona, Bancorp Finance of Hawaii and Bancorp Finance of Hawaii-Guam. Bank of Hawaii has nearly 80 offices in Hawaii, the Pacific Basin, Hong Kong, Tokyo, Seoul, Singapore, Manila, New York and Nassau.

HARTFORD, CT (MARCH 28) BUSINESS WIRE - Capitol Light & Supply Co., one of Connecticut's oldest and largest distributors of lighting and electrical products, stays on top of its multi-million-dollar, three-warehouse-location inventory with a sophisticated applications software system, developed for electrical distributors by Ultimate Data Systems, a subsidiary of East Hanover, N.J.-based The Ultimate Corp. (NYSE:ULT).

Known as SHIMS (Supply House Information Management System), the system manages Capitol's order entry, sales, customer records, inventory, warehouse, distribution, management reporting, accounts receivable, and general accounting functions according to Capitol Light & Supply Vice President and Controller Barry M. Robbin.

Capitol Light & Supply had been using a timesharing service bureau for over ten years before installing their Ultimate SHIMS system in November 1985. While the service bureau had served Capitol Light well in certain areas of their operation, Capitol was not able to implement the order entry function or respond effectively to the growth and changes in their business with a service bureau-based system.

Capitol's Ultimate SHIMS system supports the operations of its main warehouse and executive office location in Hartford, Conn., as well as the operations of its two branch locations in Waterford and Bridgeport, Conn. The system installed in the Hartford, Conn., location includes the complete SHIMS software package for electrical distributors and a Honeywell BULL-based Ultimate computer system supporting 80 users.

The system is equipped with 515MB of high-performance disk storage, a 1/2-inch reel-to-reel magnetic tape drive and a high-speed line printer. There are nine serial printers attached to the system including a point-of-purchase printer at the sales counter; a laser printer; and

printers located in the sales department, the office, shipping, receiving, purchasing and the Waterford and Bridgeport, Conn., branch offices.

In addition, there are four eight-channel multiplexors and the necessary modems and communications equipment to support the terminals and printers installed in each of the branch locations. Ultimate maintains the systems under a maintenance service agreement.

Capitol Light and Supply Co. has furnished lighting and electrical products to contractors, manufacturers, building owners and managers and utility companies since 1926.

#90087b0614 03/28/1990 ~Business Wire

SUNNYVALE, CA (MARCH 28) BUSINESS WIRE - ZyMOS Corp. (NASDAQ:ZMOS) and Renaissance GRX Inc. Wednesday announced that the companies have entered into an agreement in principle providing for the acquisition of Renaissance by ZyMOS.

Under the agreement which is subject to the signing of a definitive acquisition agreement, the approval of the boards of the two corporations and approval of the Renaissance shareholders, the holder of a share of Renaissance common stock will receive approximately 0.75 of a share of ZyMOS common stock, subject to certain limitations.

ZyMOS plans to file a registration statement with the Securities and Exchange Commission covering the shares to be issued and to complete the acquisition in June.

ZyMOS designs, develops and markets personal computer logic chip sets, graphics chips, and custom integrated circuits for personal computers and other microprocessor-based systems. Renaissance GRX is a microcomputer graphics systems company which designs, develops and markets both hardware and software aimed at improving the speed and quality of graphics on IBM-PC compatible personal computers.

Both Renaissance and ZyMOS market their products to the personal computer industry where low cost manufacturing and state-of-the-art technology are critical and where the ability to integrate more and more functions on a single chip is a driving factor. This business combination strengthens certain key elements of each company, making the combined entity stronger

than each company was separately.

Commenting on the announcement, David A. Handorf, president and chief executive officer of ZyMOS said: ''Renaissance has an outstanding capability in graphics software with its add-on boards. We have strength in being able to integrate more and more of the PC system into chip sets for PC motherboards.

Renaissance is recognized for its industry leading graphics hardware and especially graphics systems software. Historically, however, Renaissance has had weak gross margins, to a great extent associated with costly low volume subcontractor manufacturing.

ZyMOS has demonstrated low-cost, high-volume production expertise with its motherboard products, and has begun to broaden its product line into the graphics field and develop technological leadership in integrating high performance graphics onto motherboard chip sets.

Renaissance adds the graphics expertise at both the operating system and board level, now and in the future, which will substantially strengthen ZyMOS' overall ability to be a dominant player in the PC chip set industry.

The synergistic benefits of this combination will afford a definite opportunity to develop future products that will represent a technological step forward and dramatically increase the new company's market potential.

Through consolidation, ZyMOS believes Renaissance should be a source of profitable revenue to the new entity and the combined business could show improved gross margins as a result of increased production and operating efficiencies.

#90087b0615 03/28/1990 ~Business Wire

LONDON (MARCH 28) BUSINESS WIRE - NetFRAME Systems Inc., the leading company delivering high-performance network servers for personal computer-based local area network (LAN) environments, Wednesday announced that Businessland U.K. Ltd. will begin selling the company's systems to corporate customers, effective immediately.

NetFRAME's ''network mainframe'' systems, a family of high-reliability, high-capacity network file and application servers designed to run all

industry-standard network operating systems including NetWare 386, OS/2 LAN Manager and Unix, were introduced in the United States and have been shipping to customers since late 1989.

By taking a fresh architectural approach, NetFRAME has developed a true server platform by combining the high reliability, data integrity and capacity of mainframes with the simplicity, flexibility and cost advantages of personal computers.

The NF-100, NF-300, and NF-400 offer a wide range of scalable performance and expandability from approximately 20 to 1,000 users, enabling customers to cost-effectively extend their initial investments in server technology. Additionally, NetFRAME servers are easy to administer, support and maintain.

A built-in Server Activated Maintenance system (SAM) isolates, tracks, logs, stores and reports instances of error corrections. SAM also permits remote diagnostic and corrective action over a touch-tone phone.

Businessland U.K., comprising 10 centers throughout the country, will sell NetFRAME systems through each center location. Initial training for Businessland systems engineers and marketing representatives was completed in early March.

Founded in 1982, Businessland Inc. is an international microcomputer systems integration company and connectivity specialist. The company integrates microcomputer products from selected manufacturers to create systems tailored to specific customer needs and provides high-level service and support to maximize their productivity. Businessland operates centers and branch offices in 50 major U.S. metropolitan areas, seven metropolitan areas in Great Britain and one in Canada. It reported sales of $1.2 billion in fiscal 1989.

#90087b0617 03/28/1990 ~Business Wire

SAN DIEGO (MARCH 28) BUSINESS WIRE - NeXT Inc. Wednesday announced that its NextStep development team has won the prestigious Andrew Fluegelman Award, sponsored by PC World, Macworld and the Software Publishers Association (SPA).

The award, which carries a $5,000 cash prize, honors software programmers

for their innovative contributions to the personal computer community. The award was given at the SPA's annual black-tie awards ceremony at the Hotel Del Coronado.

Past winners include the developers of Adobe's PostScript page description language, HyperCard, FidoNet and Aldus' PageMaker. This year, 40 nominations were pared down to five finalists. Besides NeXT, the finalists were the developers of FrameMaker 2.0, Lotus Notes, Interactive Physics and THINK C.

''This award means a great deal to NeXT because it signals recognition from our peers,'' said Guy L. (Bud) Tribble, NeXT's vice president, software engineering, who accepted the award on behalf of the 36-person NextStep team.

''It also emphasizes that NextStep is working in the marketplace: it is the reason that NeXT, only six months after the 1.0 software for the NeXT computer began shipping, already has a wealth of application software from third-party developers. And more products are in the pipeline than would be possible with a less innovative development environment.''

NextStep is a user interface and application software development environment that makes complex, powerful operating systems manageable for both users and programmers.

Users can take advantage of powerful UNIX-compatible operating systems without learning arcane UNIX commands. At the same time, developers who want to create easy-to-use applications can avoid spending the inordinate amount of time previously necessary to program the user interface.

Already, developers are finding that NextStep is accelerating their product development time. For instance, according to Jeffrey Bork, vice president of marketing at Informix Corp.: ''Our development under NextStep cut our time in half. I know of no other development environment that would allow us to achieve that kind of productivity and to end up with a product that looks as good as Wingz does on NeXT.''

Already, 18 products from third-party software developers are available for NextStep, ranging from document layout and sophisticated graphics programs, to office automation, relational database management and communications packages.

Most of the major software development companies, such as Lotus, Ashton-Tate, WordPerfect and Informix, as well as those who make peripheral products, have announced products or development plans for NextStep.

NeXT of Redwood City, was founded in 1985 to develop innovative, personal

and affordable computing solutions for the 1990s and beyond. The privately held company began shipping the NeXT Computer with 1.0 system software in September 1989 to customers in a wide range of business, government and academic environments. The computer is available from Businessland throughout North America and the United Kingdom, from Canon Inc. in Asia and directly from NeXT for selected university and federal customers and authorized developers.

WILTON, CT (MARCH 28) BUSINESS WIRE - Senior Service Corp. (NASDAQ:SENR; BSE:SNR), the only public company devoted exclusively to providing products and services for Americans over 65, announced Wednesday the appointment of Richard D. Malloy, 49, as vice president and chief financial officer, a new position.

Today's announcement was made by Donald L. Luke, president and chief executive officer, who said, ''Richard Malloy's financial leadership record, particularly in cost control forecasting and acquisition financing brings important new management strength as Senior Service accelerates the growth of its core adult day care and home health services

businesses.''

Prior to joining Senior Service, Malloy served as vice president, chief financial officer of Cuisinarts Inc., Greenwich, Conn., where he was responsible for all financial affairs of the company which has sales of $60 million.

At Cabot Corp. (NYSE), from 1971 until 1987, he held positions of increasing responsibility in internal audit, division controllership and managed the financial aspects of an over $600 million divestiture program. Earlier he was an audit manager for SCM Corp. and was an auditor at Ernst & Young, the ''Big 8''public accounting firm.

Malloy earned a B.S. in accounting from Boston University and is a past president of the New England Chapter of the Institute of Internal Auditors and a member of the Financial Executives Institute.

LOS ANGELES (MARCH 28) BUSINESS WIRE - It was announced Wednesday that the Thermador/Waste King division of Masco Corp. will be separated into two stand-alone businesses -- Thermador and Waste King.

Waste King is a market leader in residential and commercial food waste disposers. Thermador is the preeminent brand of high-end cooking appliances.

Masco has named Ray L. Finkle as president and general manager of the Waste King unit. He has been president of American Metal Products, another Los Angeles-based Masco division, since 1978. American Metal Products is a leader in the heating, ventilating and air conditioning accessories market.

Finkle will retain his responsibilities at that division along with his new Waste King assignment. Charles F. Farrell, formerly president of the combined division, will continue as president of the Thermador unit.

In a joint statement, Finkle and Farrell said: ''For several months we have been laying the foundation to establish Thermador and Waste King as stand-alone business units. These two businesses have very little synergy in operations or marketing. Focused senior management attention can now be applied to each business based on its unique requirements.''

They also emphasized that Waste King was not being absorbed into American Metal Products. Although Finkle will be president of both American Metal Products and Waste King, the two units will remain totally separate.

To head up the Waste King sales and marketing effort, Finkle announced the promotion of Daniel M. Graves III to the position of vice president, sales and marketing, Waste King. Graves joined Thermador/Waste King in September 1989 as national sales manager for specialty products. In that position, he was responsible for all Waste King sales activities.

Prior to joining Waste King, Graves held executive sales positions with Litton Microwave and Frigidare.

SPARTA, NJ (MARCH 28) BUSINESS WIRE - Laser Recording Systems, Inc. (''LRS'') 1/8NASDAQ:LRSI (common stock), LRSIW (warrants) LRSIU (units); Boston Stock Exchange:LRSU3/8 Wednesday announced that it has signed an additional contract with The UpJohn Company to provide computer hardware, software and consulting services.

The company also announced that it has signed an agreement to provide consulting services for Parke-Davis on their Compound Document/Optical Disk System project. Both contracts should begin to contribute to revenues during the first quarter of fiscal 1991 which ends April 30, 1990.

Carver Washburn, President of Laser Recording Systems commented, ''A key element of LRS' strategy for growth is to expand the services we supply to our customers. Of particular interest is that we have recently sold our first 'jukebox system' which holds 50 5 1/4'' optical disks, or the equivalent of 200 file drawers of paper documents. This purchase indicates our customers' commitment to optical technology and the expansion of these systems. In addition, applications are expanding into clinical data management which is often the largest share of the R&D budget.''

Laser Recording Systems, Inc. offers an integrated optical disk-based systems solution to the pharmaceutical industry and other market niches through the application of proprietary software, data base management, local area networking and optical disk technologies.

#90087b0639 03/28/1990 ~Business Wire
FOSTER CITY, CA (MARCH 28) BUSINESS WIRE - J. Samuel Huey, vice president of the Ziff-Davis Publishing Co. and head of its Macintosh group, announced Wednesday that Paul Somerson has been promoted to the position of publisher and editorial director at MacUser.

The editor-in-chief slot he leaves vacant will be filled by David Ushijima a five-year veteran of Macworld, who joins the magazine April 2.

''Paul Somerson's promotion and David Ushijima's arrival will further enhance MacUser's deep reservoir of talent and its position as the leading Macintosh magazine,'' said Huey.

Somerson, 40, joined Ziff-Davis in 1983, holding executive editor and editorial director posts at PC Magazine and launching PC Computing magazine as editorial director before moving to MacUser a little over a year ago.

Author of several popular computer books, including the best-selling ''PC Magazine DOS Power Tools'' (1988, Bantam Books, New York), which will be released in a revised second edition in June, Somerson's career includes a two-year stint at the New York Times Co. He is a graduate of Reed College, Portland, Ore.

Ushijima, 37, most recently executive editor at Macworld, brings a wealth of technical experience to MacUser. Hired originally as a technical editor at Macworld, Ushijima previously spent four years at Osborne/McGraw-Hill as technical editor of the then-fledgling computer book publishing company.

A designer of computer hardware, including a mainframe clone of the IBM 370, Ushijima collaborated on the engineering and design of the Imsai personal computer from 1975 through 1978.

David Ushijima holds degrees in electrical engineering and computer science from the University of California at Berkeley.

Since its launch in 1985 and acquisition by Ziff-Davis in 1987, MacUser magazine has experienced rapid growth in both paid circulation and advertising revenues. MacUser has the largest paid circulation of any Macintosh-specific publication: over 300,000.

Its product-intensive editorial content focuses on the needs of serious

Macintosh business buyers, featuring laboratory-based product reviews and information on enhancing productivity through the use of Macintosh products.

SAN JUAN, PUERTO RICO (MARCH 28) BUSINESS WIRE - The annual production history of Ashton-Tate PR Ltd. in Gurabo, Puerto Rico has gone from 477,000 to 800,000 software packages of various product lines since operations started up on the island in January 1988.

That means going five million diskettes to about nine million. Now Ashton-Tate is increasing software diskette and package production at its Gurabo, Puerto Rico, duplicating facility, according to General Manager Wayne Sutherlin.

''Our production capability for a single shift with 75 employees is approximately one million packages, or say, 25 million individual diskettes,'' says Sutherlin.

''This compares very favorably with the rule-of-thumb estimated average of about 65 diskettes per labor/hour in the mailand U.S.

''Currently, our plant here in the east central highlands of Puerto Rico is supplying 95 percent of Ashton-Tate's U.S./Canada software market,'' Sutherlin pointed out.

''Customer satisfaction, based on our last client quality response reports a low five diskettes reject per million.

''That's a powerful statement about the quality control performance of our Puerto Rican workers,'' he said.

Ashton-Tate's island operation is located in a 35,000 sq. ft. factory building leased from the Puerto Rico Industrial Development Co. PRIDCO is the physical facility and financial support arm of the Economic Development Administration of Puerto Rico.

DENVER (MARCH 28) BUSINESS WIRE - Random Access Inc. (NASDAQ:RNDM), one of the Rocky Mountain region's fastest-growing microcomputer resellers, Wednesday announced it has signed a contract to become the primary supplier of microcomputer hardware and peripherals to US WEST's 14-state region.

The new contract calls for Random to supply IBM, Apple and COMPAQ hardware to US WEST. Random will also provide local area networks, a variety of software products and ongoing training, service and support.

''We are extremely pleased that US WEST has selected Random Access as its primary vendor of hardware and peripherals,''said Bruce Milliken, Random's chairman and chief executive officer. ''We are looking forward to a long and productive relationship for both companies.''

US WEST is a $25 billion diversified company headquartered in Englewood, Colo. Its major subsidiary, US WEST Communications, serves the communications needs of 12 million customers in 14 western states. US WEST owns other companies involved in communications, data solutions, marketing services and financial services.

Random Access recently announced record results for its first quarter ended Nov. 30, 1989. The company reported net income of $149,980, or 3 cents per share, on revenue of $8,375,887 for the quarter. Over the past four years Random has achieved an average revenue growth rate of 235 percent.

RANCHO CUCAMONGA, CA (MARCH 28) BUSINESS WIRE - Curaflex Health Services has changed its name to Curaflex Infusion Services, reflecting the company's concentration on home infusion therapy services, the fastest growing sector of the health care field, Charles Laverty, the company's president, announced Wednesday.

With headquarters in Rancho Cucamonga, Curaflex Infusion Services is one of the country's fastest growing home infusion therapy companies. In the past 12 months, Curaflex Infusion Services has grown from nine to 21 home infusion centers throughout the United States, providing patients home infusion therapy at a savings of 30 to 70 percent of the cost if

administered in a hospital.

Home infusion services is projected to reach $2.6 billion in revenues this year, compared with $1.6 billion in 1988, according to Biomedical Business International, a marketing research firm which projects an annual growth rate for home infusion of 26 percent through 1993.

Home infusion includes nutritional, antibiotic, pain management, chemotherapy and other infusion therapies. AIDS experts predict home health care could reduce much of the $5 billion annual cost for treatment of the disease.

MIDDLETOWN, RI (MARCH 28) BUSINESS WIRE - Eastern Utilities Associates (EUA) has completed the acquisition of Newport Electric Corp., it was announced Wednesday by Donald G. Pardus, EUA's president and chief executive officer.

Newport Electric was purchased from NECO Enterprises Inc., for 540,000 EUA common shares after final regulatory and shareholder approvals were received. The purchase was worth approximately $17.9 million.

''Newport Electric is a welcome addition to the EUA System,'' Pardus said. ''We believe EUA brings added value to Newport's customers at the same time Newport brings added value to EUA's shareholders.''

He cited improved operating efficiencies, financial stability and broader energy resources as benefits inherent in the acquisition.

Pardus also announced that Robert G. Powderly, a 12-year veteran of Eastern Utilities, had been elected president of Newport Electric. Powderly joined the EUA System in 1978 as an audit supervisor and has been vice president of EUA Service Corp. the past three years. EUA Service Corp. provides centralized technical and management services to all EUA System companies.

Pardus called attention to Newport Electric's ''fine record of customer service. We plan to build on that record,'' he said, ''looking to the years of expertise offered by Newport employees to expand upon existing programs and implement new ones brought to the area by EUA.''

EUA, a Boston-based holding company, and NECO Enterprises agreed, in principle, to the acquisition last September. Approvals were required

from the Rhode Island Public Utilities Commission, the federal Securities and Exchange Commission and from NECO shareholders.

Newport Electric provides electric service to approximately 30,000 customers in the Rhode Island communities of Newport, Jamestown, Middletown and Portsmouth. It becomes one of three retail operating electric utilities owned by EUA. Other EUA subsidiaries are Blackstone Valley Electric, Eastern Edison, Montaup Electric, EUA Cogenex, EUA Energy Investment, EUA Ocean State, EUA Power and EUA Service Corp.

SAN FRANCISCO (MARCH 28) BUSINESS WIRE - Homestake Mining Co.'s McLaughlin mine in Northern California on Tuesday poured the one-millionth ounce of gold since it began production in 1985.

The McLaughlin open-pit gold mine is located about 70 miles northeast of San Francisco at the convergence of Lake, Napa and Yolo counties.

Discovered in 1978 in a remote area of old mercury mine diggings near the community of Lower Lake, McLaughlin was the site of the largest California gold strike of the 20th century. It is expected to yield about 3 million ounces of gold over an estimated lifetime of 20 years.

The mine was developed by Homestake Mining at an initial cost of around $280 million and produced its first gold -- 84,000 ounces -- in 1985. Production was 283,843 ounces in 1989.

The McLaughlin is one of the most innovative gold mines in North America, utilizing both autoclave and conventional oxide processing. The facility was designed and is operated with state-of-the-art environmental controls and monitoring systems.

The mine is named for the late Dr. Donald H. McLaughlin, a former chairman and chief executive officer of Homestake Mining and a noted geologist and educator who served as a regent of the University of California and dean of its College of Mining Engineering in the 1970s.

Harry M. Conger, chairman and chief executive officer of Homestake Mining, congratulated McLaughlin's management and employees on reaching what he described as ''a significant milestone'' in the mine's development.

''Their efforts and those of our nearly 2,100 other dedicated workers enabled Homestake Mining to reach a major milestone of its own in 1989 --

an annual production rate of more than 1 million ounces of gold,'' he said.

Ronald D. Parker, general manager of the McLaughlin mine, said a ''Millionth Ounce Celebration'' will be held in May for the mine's employees and friends.

Homestake Mining Co. owns and operates the McLaughlin mine and the historic Homestake gold mine in Lead, S.D., and has other gold mining interests in Montana and Nevada in the United States and abroad in Australia, Canada and Chile.

VANCOUNVER, BRITISH COLUMBIA (MARCH 28) BUSINESS WIRE - Coral Gold Corp. announced Wednesday that the C$1.9 million private placement financing announced earlier in the year has been successfully concluded.

Six European financial institutions purchased a total of 950,000 common shares of the company at a price of $2.05 per share. A finder's fee of $129,875 was paid to Gaston, Coblentz & Co. Ltd., a European financial institution acting as agent.

G. Martin Greer, Coral's chairman & CEO, said that a portion of the net proceeds of $1,817,625 will be used to continue exploration of the company's Nevada gold properties, located primarily on the Battle Mountain and Carlin gold trends. The balance will be added to the company's general working capital.

The financing was originally structured as a $3 million package with the European participants contributing two-thirds of the proceeds and Amax Gold Inc. one-third. However, it was subsequently agreed that Amax Gold would direct, over a period of five to eight months, its $1 million portion into Phase One of its exploration program on Coral's 11,000-acre Robertson gold property in northern Nevada.

Phase One, consisting primarily of deep drilling to test the property's potential for hosting deep gold deposits, commenced in early March and drilling is currently underway on a round-the-clock schedule. Amax Gold is the project operator.

Coral Gold Corp. explores and develops gold properties in Nevada, holding interests in a substantial number of mineral claims and leases in northern Nevada located primarily on the Battle Mountain and Carlin gold belts.

HARRISON, AK (MARCH 28) BUSINESS WIRE - Arkansas Freightways Corp. (NASDAQ/NMS:AFWY) Wednesday announced that it is experiencing positive earnings and revenue impact sooner than anticipated from its new Texas locations opened on Jan. 22, 1990.

This, in combination with unseasonably mild weather and the stabilization of fuel prices, results in anticipated earnings per common share in the first quarter of 1990 between 14 cents and 18 cents on approximately 5.6 million shares.

Earnings per common share for thr first quarter of 1989 were 9 cents on 4.2 million shares. These anticipated results for the three months ended March 31, 1990, are not necessarily indicative of the results AFWY may achieve in any subsequent period.

Arkansas Freightways Corp. is a scheduled, for hire, common and contract motor carrier transporting primarily less-than-truckload shipments of general commodities, serving all points in Arkansas, Kansas, Louisiana, Missisippi, Missouri, Oklahoma, Texas, western Tennessee and the Chicago metropolitan area. Arkansas Freightways operates a fleet of 3,685 pieces of revenue equipment from 99 terminals.

BOSTON (MARCH 28) BUSINESS WIRE - Affiliated Publications Inc. announced Wednesday that it expects income per share from continuing operations for the first quarter of 1990 to be between 8 cents and 10 cents compared to 13 cents in 1989.

Final results which are expected to be reported in mid-April, will depend primarily on advertising revenues at The Boston Globe.

Income from continuing operations in 1989 excludes charges related to the company's share of losses from its investment in McCaw Cellular Communications Inc.

Affiliated also announced that it was planning to ask its stockholders at their annual meeting scheduled for May 16, 1990, to amend the company's By-Laws to increase the percentage from 10 percent to 51 percent of the voting power of the company's outstanding common stock that could require the holding of a special meeting of stockholders.

Affiliated's announcements were made in connection with the filing by the company of a registration statement with the Securities and Exchange Commission for an offering of 2,856,550 shares of its Series A Common Stock to be sold by the trustees of a trust established by Eben D. Jordan, one of the founders of The Boston Globe.

The registration statement relating to these securities have not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statements become effective. This shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Written prospectuses with respect to the Affiliated Series A Common Stock may be obtained from The First Boston Corp., Park Avenue Plaza, 55 East 52nd Street, New York, NY 10055, Attention: Prospectus Department, 212/322-1633.

Affiliated Publications Inc. is the parent company of Globe Newspaper Company (publisher of The Boston Globe) and BPI Communications Inc., a leading publisher of specialty magazines, books and electronic data bases for the entertainment, arts and design markets.

#90087b0676 03/28/1990 ~Business Wire

HOUSTON (MARCH 28) BUSINESS WIRE - American General Corp. (NYSE:AGC) announced Wednesday that it has received an unsolicited acquisition proposal from Torchmark Corp.

The proposal specifies a price of $50 per share cash for about one-half of the American General shares and a $50 of Torchmark common stock for each of the remaining shares.

While the proposal makes no mention of how Torchmark would finance the approximately $3.2 billion cash portion of the payment, it suggests no limit on the number of Torchmark common shares which might be issued to

fulfill the stock portion of the payment.

Torchmark also said that all aspects of its proposal are negotiable. At the end of 1989 American General's total assets were $32.1 billion and common shareholders' equity was $4.1 billion. Total revenues last year were $4.2 billion, and net income available to common shareholders was $462 million.

American General had 126.7 million shares outstanding, assuming conversion of all outstanding convertible securities.

Torchmark reported total assets at Dec. 31, 1989, of $4.9 billion and common shareholders' equity of $795 million. The company's total 1989 revenues were $1.6 billion and net income available to common shareholders was $204 million. At Dec. 31, 1989, Torchmark had 52.9 million shares outstanding.

Harold S. Hook, American General's chairman and chief executive officer, said that American General's board of directors ''will consider the proposal at the next regularly scheduled board meeting, May 2, 1990.''

In the letter communicating the proposal Monday evening, Torchmark gave American General 48 hours to respond -- until the close of business Wednesday, March 28.

American General is an insurance and financial services organization with headquarters in Houston and subisidiaries that operate in 50 states and Canada. American General's common stock is listed on the New York, Pacific, London, and Swiss stock exchanges.

VALENCIA, CA (MARCH 28) BUSINESS WIRE - 3-D Systems Inc. (NASDAQ:TDSSF and Vancouver:TDS.V) announced Wednesday management changes in its subsidiary, 3D Systems Inc.

Edwin J. Kaftal has been appointed executive vice president and will continue to be the company's chief financial officer, Ralph A. Schubert has been reassigned to the position of vice president of New Business Opportunities, and Dennis K. Medler will return to the company as vice president of sales and marketing. In addition, Jerry Janson has been appointed National Sales Manager.

In his new position Schubert will be responsible for developing technical liaison with the medical and foundry industries, as well as other areas where the company's patented technology, known as StereoLithography, can be applied.

Medler was formerly with 3D from June, 1987 until August, 1988 as vice president for sales and marketing. He was most recently with DTM Corp. of Austin, Texas. As Medler was with 3D from its early inception, he is highly knowledgeable about the company, its products and the overall market for StereoLithography.

Janson, who will continue to be based in Detroit, has developed a direct sales program in the midwest and will have responsibility for expanding this program nationally.

WOODBURY, NY (MARCH 28) BUSINESS WIRE - Barry Feldstein, Chairman and Chief Executive Officer of Millfeld Trading Co. Inc., (OTC:SHOE, SHOE.U, SHOE.W) announced Wednesday that for the fiscal year ended January 31, 1990 net earnings increased to $809,000, or $.43 per share compared to a loss of ($327,000) for the fiscal year ended January 31, 1989.

The company also reported an increase of 11 percent in sales for the year to $26,085,000 compared to $23,389,000 for the year ended January 31, 1989.

Gross margins increased 33 percent to $5,691,000 in 1990 compared to $4,253,000 in 1989.

For the fourth quarter ended January 31, 1990 Millfeld reported sales of $6,480,000 compared to $6,171,000, for the fourth quarter a year ago. Earnings were $172,000, or $.09 per share compared to a loss of ($292,000) a year ago.

In making the earnings announcement, Feldstein said, ''Millfeld's growth came predominantly frrom its traditional areas and the late 1989 launch of Team Sports Footwear was so encouraging that we are confident that our results for the fiscal year ending Jan. 31, 1991 will benefit significantly from its national launch.''

Millfeld Trading Co. Inc. designs, markets and distributes a wide variety of footwear, including product bearing the ''No Excuses'' label and the recently introduced Team Sports Footwear line of products bearing logos of professional sports teams and colleges.

WESTBOROUGH, MA (MARCH 28) BUSINESS WIRE - ASA Tire Systems Group, a division of ASA International Ltd. (NASDAQ:ASAA), Westborough, Mass., and Computers Northwest Inc. (CNW) Wednesday jointly announced an agreement in principle for ASA to acquire the Bellevue, Wash.-based CNW.

In the announcement, both companies acknowledged the venture is expected to strengthen the ASA Tire Systems Group's position as the largest supplier of computer systems solutions to the independent tire dealer, retreader and wholesaler marketplace. Terms of the pending sale were not disclosed.

''The acquisition, when complete, will increase the ASA Tire Systems Group client base to more than 1,000 tire dealers, and improve our ability to provide quality products, services and support to independent tire dealers coast-to-coast,'' said Eli Szklanka, ASA corporate vice president and general manager of the ASA Tire Systems Group.

''ASA is committed to continue support of CNW's clients and products. CNW brings additional depth and breadth to our market offering,'' he added. ''ASA now has the most comprehensive set of products to meet the full range of systems needs of tire dealers.''

Michael Rooney, president of CNW, commented, ''The two companies complement each other nicely. Both CNW and ASA market computer systems based on Digital Equipment Corp. hardware, and we approach the independent tire dealer marketplace with similar marketing and support strategies.

The ASA Tire Systems Group was formed in September 1988 when ASA acquired ASCO Inc., Atlanta, the then-largest provider of computer systems to the tire dealer marketplace. The July 1989 acquisition of Snyder Computing Systems Inc., Pittsburgh, consolidated ASA's leadership position in the marketplace.

In addition to independent tire dealers, ASA International Ltd. markets multi-user computer systems to manufacturing, distribution and international trade companies.

ASA was founded in 1969 and went public in 1986. Computers Northwest Inc.

incorporated in 1979, is a privately owned company that has achieved a long standing reputation for providing quality products and services to the tire dealer marketplace.

FRAMINGHAM, MA (MARCH 28) BUSINESS WIRE - Perini Corp. announces the promotion of Robert Band to the newly created position of vice president, Special Group Projects.

This position signals the company's strong interest in the area of privatization of public works within the U.S., and will provide Perini's Construction Group with the ability to respond to the ever-increasing market opportunity created by the current trend in public works agencies to award work on a design-build-finance-operate basis.

In addition, Band will pursue program management and mega-project opportunities which may not exactly coincide with any one of the company's four heavy and four building construction units in the U.S.

Band has served in several management positions since joining the company in 1973. He was deputy project manager on a major air base project in the Middle East from 1979 to 1982, returning to Framingham to become vice president, Finance and assistant general manager of Perini International Corp. Since 1988, he has been serving as Treasurer of the corporation.

He holds a bachelor of Business Administration degree from the University of Massachusetts and is a Certified Public Accountant.

BOSTON (MARCH 28) BUSINESS WIRE - The Trustees of the Jordan Trust Wednesday announced proposed offerings of 2,400,000 shares of Class A Common Stock by McCaw Cellular Communications Inc. and 2,856,550 shares of Series A Common Stock by Affiliated Publications Inc.

The shares are being sold by the Jordan Trust. McCaw and Affiliated have today each filed registration statements with the Securities and Exchange Commission relating to the offerings of the securities.

The Jordan Trust was established in 1895 under the will of Eben D. Jordan, one of the founders of The Boston Globe. The Trust terminates in 1996. The purpose of the sales is to diversity the holdings of the Trust, the principal assets of which are shares of the Class A Common Stock of McCaw acquired by the Trust in connection with the May 1989 reorganization of Affiliated and shares of Affiliated Series A and Series B Common Stock.

Under the terms of a ruling obtained by Affiliated from the Internal Revenue Service at the time of the Affiliated reorganization, such as dispositions by the Jordan Trust of either its McCaw or Affiliated shares require a concurrent sale of pro rata portion of its ownership position in the other company.

McCaw is engaged in the acquisition, construction and operation of cellular telephone systems and radio common carrier (''RCC'') systems throughout the United States. McCaw is the largest cellular telephone company in the United States based on subscribers and the number of United States persons (or ''pops'') represented by the interests which it either owns or has the right or obligation to acquire, and the sixth largest RCC operator in the United States based on year-end subscribers.

The number of pops should not be confused with the current number of users of cellular service and is not necessarily indicative of the number of users of cellular service in the future.

Affiliated publishes The Boston Globe, a daily and Sunday newspaper, through its principal subsidiary, Globe Newspaper Co., Affiliated is also engaged in the publication of specialty magazines, including Billboard and The Hollywood Reporter, and books through its subsidiary, BPI Communications Inc.

The First Boston Corp. is the manager for the McCaw and Affiliated offerings.

Registration statements relating to the McCaw Class A Common Stock and the

Affiliated Series A Common Stock have been filed with the Securities and Exchange Commission but have not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statements become effective.

This shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Written prospectuses with respect to the McCaw Class A Common Stock and the Affiliated Series A Common Stock may be obtained from The First Boston Corp., Park Avenue Plaza, 55 East 52nd Street, New York, NY 10055, Attention: Prospectus Department, 212/322-1633.

CONCORD, NH (MARCH 28) BUSINESS WIRE - New Hampshire Savings Bank Corp. (NASDAQ:NHSB) announced Wednesday that Joseph J. Butare Jr. has been elected chairman of the board with chief executive responsibiliites.

Butare replaces Robert L. Gable, a member of its board of directors who had been serving as chairman while the search for a full-time chairman was being conducted.

Outgoing Chairman Gable said ''The board is delighted to be able to attract someone of Joe Butare's caliber. His background and experience are well suited for the challenges facing the company today.''

As chairman, Butare will work closely with David H. Rogers, who is continuing to serve as the company's president, and as president and chief executive officer of the company's principal affiliate, New Hampshire Savings Bank.

Butare, a graduate of Harvard College and the Harvard Business School Advanced Management Program, is former president and chief executive officer of Guaranty Bank and Trust Co., Worcester, Mass.

Guaranty was a wholly owned subsidiary of the Conifer Group of which Butare was also a director. Prior to that, Butare had been president and chief executive officer of Mechanics Bank, also in Worcester. With 11 years as president and chief executive officer with the Worcester banks, and his previous experience in commercial lending at Chase Manhattan Bank in New York City and State Street Bank and United States Trust Co. in

Boston, Butare brings many years of banking experience to his new responsibilities.

Butare, who is married and has three children, has had a number of community responsibilities including president of the Worcester Area Chamber of Commerce, director of the Worcester Business Development Corp., trustee of the Worcester Memorial Hospital, trustee of the Worcester Foundation for Experimental Biology, trustee of the Greater Worcester Community Foundation, and chairman of several United Way committees. He and his wife, Patricia, will soon relocate to New Hampshire.

The board of directors also announced that the seventh annual meeting of shareholders of New Hampshire Savings Bank Corp. will be held at 10 a.m. on Wednesday, June 13, 1990, at the Hilton Hotel (Exit 11 on the Everett Turnpike) in Merrimack, N.H.

New Hampshire Savings Bank Corp., headquartered in Concord, the capital of New Hampshire, is the fourth largest bank holding company in the state with assets of $1.4 billion divided among four banking affiliates and four nonbanking subsidiaries which together serve individuals, corporations and municipalities throughout central and southern New Hampshire.

#90087b0715 03/28/1990 ~Business Wire

MIAMI (MARCH 28) BUSINESS WIRE - IVAX Corp. (AMEX:IVAX) Wednesday announced its results of operations for the year and three months ended Dec. 31, 1989.

IVAX CORP.

The results of operations are as follows:

	Year Ended Dec. 31,	
	1989	1988
Sales	$ 63,048,000	$ 60,890,000
Net (loss)	$ (8,212,000)	$ (2,811,000)
Net (loss) per share	$ (48 cents)	$ (18 cents)
Average shares outstanding	17,282,000	16,073,000

	Three months ended Dec. 31,	
	1989	1988
Sales	$ 15,909,000	$ 15,513,000
Net (loss)	$ (2,919,000)	$ (2,814,000)
Net (loss) per share	$ (17 cents)	$ (17 cents)
Average shares outstanding	17,379,000	16,777,000

The company noted that the loss for the year and three months ended Dec. 31, 1989 was principally due to an increase in expenses associated with the launch of new pharmaceutical products by Baker Cummins Pharmaceuticals Inc. which include the establishment of a sales and distribution network for these products.

The loss also reflects increased research and development costs incurred by Baker Cummins Pharmaceuticals Inc. and a decrease in gross profits for Best Generics Inc.

IVAX Corp. is a holding company consisting of four operating divisions: IVAX Industries Inc., a chemical specialties business, Baker Cummins Pharmaceuticals Inc., a pharmaceutical company, Best Generics Inc., a distributor of generic pharmaceuticals, and Diamedix Corp., a medical diagnostic company.

BOSTON (MARCH 28) BUSINESS WIRE - Bradley Real Estate Trust (AMEX:BTR) and a committee of shareholders of the trust led by Thomas J. Flatley and Irwin J. Barkan (the ''committee'') announced Wednesday that the trust's board of trustees has expanded the board to seven trustees from its current size of five, effective at the trust's annual meeting of shareholders on May 23, 1990, pursuant to an agreement with the committee.

The board of trustees has nominated a slate of three individuals for election as trustees at the annual meeting. The slate, which was developed jointly by the board and the committee, consists of Stephen G. Kasnet, an incumbent trustee nominated for re-election, as well as Don L. Foote, a private investor, and William L. Brown, former chairman of Bank of Boston.

The committee has agreed to support the election of Messrs. Kasnet, Foote and Brown. The boad of trustees and the committee have agreed that the expansion of the board and the addition of Messrs. Brown and Foote to the board serve the interests of all of the trust's shareholders.

BATON ROUGE, LA (MARCH 28) BUSINESS WIRE - MMR Holding Corp. (NASDAQ:MMRH) announced Wednesday that it and certain of its subsidiaries (''MMR'') had filed a petition for relief under Chapter 11 of the Bankruptcy Code.

The petition was filed at approximately 10:45 a.m., Central Standard Time, in the United States Bankruptcy Court in Baton Rouge.

Today's filing did not include certain of MMR's subsidiaries, including the HRI group of subsidiaries that constitute MMR's engineering division. MMR is actively exploring the sale or other disposition of such subsidiaries.

MMR and its surety, The Aetna Casualty & Surety Co., have reached an agreement in prinicple, subject to bankruptcy court approval, by which Aetna will furnish to MMR limited interim financing to cover certain of its operating and payroll expenses.

As previously disclosed, MMR has been experiencing cash flow difficulties and several senior members of its management group have resigned during the past few weeks. As its cash flow difficulties have continued, certain MMR clients have begun terminating contracts with MMR.

In addition, although MMR has been engaged in intensive discussions with its lending banks, its surety company and other interested parties, the discussions did not result in the provision of sufficient funds to permit MMR to overcome its cash flow difficulties and cure resulting defaults under additional contracts that MMR clients were threatening to terminate.

By reason of today's bankruptcy filing, all persons (including MMR's lenders, surety company and clients) are temporarily stayed from taking action to enforce claims against, or to terminate contracts with, MMR.

MMR also announced that James B. Rutland, MMR's former chairman and chief

executive officer, has today resigned as a director of MMR and that Daniel L. Finan, MMR's treasurer, has been today elected chief financial officer.

WASHINGTON (MARCH 28) BUSINESS WIRE - The directors of Washington Gas Light Company Wednesday voted to increase the annual dividend rate to $2.04 per share of common stock, an increase of 8 cents over the previous annual dividend rate.

The change increases the quarterly dividend to 51 cents from 49 cents. This marks the 14th consecutive year for which the directors have authorized a dividend increase and the 139th consecutive year for which dividends have been paid.

The company's dividend record is among the longest on the New York Stock Exchange.

''The outlook for the company is very positive: demand is strong, supply is plentiful, and the increasing attention to environmental issues continues to favor natural gas,'' said Chairman Donald J. Heim. ''The dividend increase demonstrates the directors' continued confidence in the company's performance.''

The new dividend rate is payable May 1, 1990, to stockholders of record April 10, 1990.

BIRMINGHAM, AL. (MARCH 28) BUSINESS WIRE - Torchmark Corp. confirmed Wednesday that on March 26, R.K. Richey, Torchmark's chairman and chief executive officer, sent a letter to Harold Hook, chairman of American General Corporation, in which Torchmark made a proposal to combine with American General.

Torchmark proposed a merger of the two companies in a transaction in which

American General shareholders would receive a combination of cash and stock valued at $50 per share.

Torchmark offered to negotiate all aspects of its proposal, including an all cash offer. Torchmark said in the letter that it was confident that financing for such a transaction would be available.

Jon Rotenstreich, president of Torchmark, stated, ''We believe that the combination of American General and Torchmark would result in substantial benefits to American General's shareholders, employees, policyholders, and the communities where it operates.''

#90087b0776 03/28/1990 ~Business Wire

BEVERLY HILLS, CA (MARCH 28) BUSINESS WIRE - International Lease Finance Corp.(NASDAQ: ILFC) Wednesday announced record results for its fiscal fourth quarter of 1990 ended Feb. 28.

For the period, ILFC posted its highest fourth-quarter revenues ever -- reaching $92.7 million, a gain of 58 percent versus the 1989 first-quarter level of $58.8 million. The increase was due to strong year-over-year gains in each component of the company's revenue mix. Income before taxes for the first three months of 1990 was $25.5 million, up 180 percent versus the $9.1 million recorded in 1989.

Net income of $16.4 million for the 1990 period rose 188 percent from 1989's $5.7 million. After giving effect to the preferred dividend requirements and the greater number of shares outstanding, primary and fully diluted earnings per share were 41 cents and 40 cents, respectively, versus 12 cents for each in the year-earlier quarter, gains of 242 and 233 percent, respectively.

Average shares outstanding for the quarter were 36,025,749 on a primary basis and 38,607,178 on a fully diluted basis versus 32,458,457 and 35,032,993, respectively, for the similar 1989 period. This was a gain of 11 percent (primary) and 10 percent (fully diluted). The effective tax rate for the 1990 fourth quarter declined to 35.8 percent from 37 percent in the first three months of 1989.

For the fourth quarter of 1990, rentals of flight equipment -- from the company's primary operating lease segment -- continued their steady growth

and achieved their highest quarter ever, increasing 43 percent to $70.6 million compared with $49.5 million in the 1989 period. The gain was due to the strong 27-percent addition to the operating lease fleet from 63 to 80 planes as well as to increased margins.

Comparing the two first quarters, flight equipment marketing was $14.9 million in 1990 versus $2.5 million the prior year, a jump of 496 percent. Interest and other revenues of $7.2 million during the 1990 first three months were ahead of the 1989 level of $6.8 million by 6 percent.

On the expense side, ILFC's composite interest rate in the first three months dropped for the third consecutive quarter reaching 8.7 percent -- down 55 basis points year to year (and 10 basis points versus 1989's first quarter). This helped offset the higher level of debt financing which rose 23 percent year to year (but only 5 percent versus fourth quarter 1989) to $1.89 billion.

At quarter end, 66.5 percent of ILFC's total debt was at fixed rates. The company elected to take a $4.5 million pretax charge in this quarter in selling, general and administrative expenses, related to the entry into receivership of one of the company's lessees.

As of Feb. 28, shareholders' equity for the company reached $514.2 million compared with the year-earlier level of $354.1 million, a rise of 45 percent. Book value per share rose 41 percent from $7.84 to $10.64. Total assets reached $2.8 billion, a year-to-year gain of 33 percent.

During the quarter, the company increased its total leased fleet by 6 percent from 78 to 83 with the addition of seven planes and the disposal of two. Added were one Boeing 737-300, one Boeing 757-200, one McDonnell Douglas MD-83 and four BAC-111s. Sold were one Boeing 737-300 and one McDonnell Douglas DC-9-31.

Commenting in the first-quarter results, ILFC Chairman and Chief Executive Officer Leslie L. Gonda said, ''We are most gratified by our performance during the quarter. It starts 1990 well on its way on its way to being another year of records and growth in line with our historic trend.

''During the quarter we announced new aircraft orders and options which will keep us strategically well positioned throughout the decade to serve our broadening customer base. In addition, our marketing efforts have continued to pay off handsomely with 100 percent of our 1990 and 1991 manufacturer deliveries, 90 percent of 1992, 75 percent of 1993 and 25 percent of 1994, already committed to existing and new lessees.''

Added Steven F. Udvar-Hazy, ILFC president, ''The quarter's numbers are even stronger than the bottom line suggests since they include the $4.5 million charge we took related to the premature termination of four MD-83

leases. We believe the charge we recorded is our maximum liability.

''The first two aircraft have been leased to a U.S. carrier, the third has been leased to a foreign carrier, and the fourth is being remarketed. This reflects very favorably on the remarketing capabillities of ILFC and the attractiveness of our very young aircraft. We have no similar exposure with our other lessees and unlikely to enter into any. Overall, the creditworthiness of our lessee base if very healthy and, in fact, probably the strongest in the industry.''

Based in Beverly Hills, Calif., International Lease Finance Corp. (ILFC) is the world's premier operating lessor and remarketer of advanced-technology commercial jet aircraft with a current fleet of 86 planes under ownership valued at more than $3 billion.

#90087b0785 03/28/1990 ~Business Wire

ATLANTA (MARCH 28) BUSINESS WIRE - AT&T (NYSE:T) said Wednesday it plans to establish two national centers in metro Atlanta involved in the engineering and control of the company's worldwide intelligent network.

The two centers could add over 2,500 employees to AT&T's workforce in the metro area over the next few years, bringing its total Atlanta area employment to almost 20,000.

Atlanta already has the second largest concentration of AT&T employees outside the company's New Jersey headquarters location, and is the area's second largest private employer.

Network design and engineering of AT&T's worldwide long-distance network will be consolidated over time from nine locations throughout the country into four national centers, and ultimately into a single facility in the company's regional headquarters at the Promenade complex in Midtown Atlanta.

Atlanta will be the center for any long-term growth as the consolidation is completed over the next two to three years. The National Engineering Center in Atlanta will employ up to 2,000 people by late 1992.

In addition, the metro area will become home to one of two national Network Control Centers which constantly monitor, manage and control AT&T's long-distance network. The Atlanta center, which will be located in suburban Conyers, Ga., will employ between 500 and 800 people by the

end of this year.

''The new AT&T network centers in Atlanta are part of an $18 billion program to modernize the technology and expand the capabilities of the worldwide intelligent network,'' said Joe Gilliam, AT&T's network vice president for the Eastern United States.

''The company is restructuring the way it manages and maintains network service as it nears completion of an investment program aimed, in part, at replacing older technologies with all-digital equipment,'' Gilliam said.

Gilliam said the new center in Conyers will provide long-distance network surveillance and management for the Eastern United States. It will work with the second new center in Denver to oversee the smooth operation of the entire AT&T global network.

Each of the new Network Control Centers will provide full back-up capabilities for the other, according to Gilliam. AT&T will also retain the Network Operations Center in Bedminster, N.J.

''AT&T already has a substantial investment in Atlanta,'' said Gilliam. ''Our announcement today is an indication of our continuing commitment to metro Atlanta and our confidence in its future.

''While there were a number of factors in our decision to locate these centers in Atlanta, the fact is Atlanta has a lot going for it. Not only does it offer our employees and their families a pleasant and affordable place to live, but it also offers all the recreational, cultural and educational opportunities of a truly world-class city,'' Gilliam said.

AT&T said its network management restructuring is a result of efforts to better serve customers and reduce operating costs.

This restructuring, which enables AT&T to consolidate its centers in Atlanta, is part of a 10,500-employee force reduction announced by AT&T's Network Operations Group, now called the Network Services Division (NSD), on Dec. 1, 1988.

The majority of the NSD's force reductions to date have been management employees. Last year, 2,400 NSD managers left the payroll in response to an enhanced pension package. Most of the positions affected by Wednesday's announcement are non-management employees. Discussions are currently underway on how to handle non-managment force reductions.

#90087b0789 03/28/1990 ~Business Wire

FORT WAYNE, IN. (MARCH 28) BUSINESS WIRE - At the board of directors' meeting following the Tokheim Corp. (NYSE:TOK) annual meeting of stockholders, Thomas E. Walsh was elected president, Tokheim North America with responsibilities for that division's petroleum marketing equipment sales and manufacturing in the United States and Canada.

In making the announcement, John E. Overmyer, chairman of the board and president, indicated that with the company's growth and in order to take advantage of market opportunities, it is necessary to focus the resources required to serve their customers in the North American marketplace.

Walsh joined Tokheim in August 1989 as chief financial officer and group vice president. Walsh was instrumental in restructuring the company's process control operations and in forming Tokheim Automation Corp., a wholly owned subsidiary which provides automation measurement and control systems for the natural gas and process industries. A graduate of the University of Illinois, Walsh received his MBA degree from DePaul University in 1972.

Roger B. Stackhouse was elected vice president, chief financial officer and secretary of the corporation. Stackhouse comes from BP America Inc. in Cleveland, and previously held senior financial positions at the Carborundum Co. and Flint & Walling Inc. He has a BBA degree in accounting from Marshall University and is a CPA.

Also, Jess B. Ford was elected vice president, corporate finance. Ford has held several positions with the corporation, the most recent being corporate controller. He holds a BS degree in business administration from Indiana University and is a CPA.

Re-elected at the same meeting were the following officers: John E. Overmyer, chairman of the board and president; Norman D. Hottman, vice president, petroleum marketing systems; Myron L. Marsh, vice president, human resources; Donald E. Rhodes, senior vice president, manufacturing; Randolph J. Straka, vice president, international division; and Dr. Philip R. Taylor, vice president, design and development.

The company declared a second quarter dividend of 14 cents per share payable May 25 to stockholders of record May 4. This is the 71st consecutive year in which Tokheim has paid dividends.

Tokheim Corp. is principally engaged in the design and manufacture of electronic petroleum marketing and monitoring systems, including service station equipment, point-of-sale control systems, card-activated transaction systems, and underground tank monitoring equipment. Through a

subsidiary, it is engaged in the design and manufacture of solid-state time delay and time and temperature control devices for the fast-food and other industries domestically. The company also designs and produces process control automation systems for the natural gas, oil, petrochemical water and agriculture industries.

SECAUCUS, NJ (MARCH 28) BUSINESS WIRE - ILIO, INC. (NASDAQ/NMS Symbols: ILIO, ILIOW, ILIOU) Wednesday announced its board of directors has authorized a split of all outstanding common stock on a 4 for 3 basis.

The split will be effected in the form of a stock dividend.

Currently, there are 1,819,999 Shares of Common Stock and 345,000 Common Stock Purchase Warrants outstanding. Fractional shares will be rounded to the nearest whole share amount. On the exercise of the warrants, cash equal to the market value of the fractional interest will be paid.

Following the split, there will be approximately 2,426,665 shares of common stock outstanding. The number of shares issuable on the common stock purchase warrants will be proportionately increased to 460,000 common shares. Each warrant will be exercisable at $6.00 for 1.33 Common Shares until October 31, 1992. Units outstanding will also be proportionately adjusted. The board has fixed the record date and effective date at May 1, 1990, and anticipates that the shares will be distributed on or about May 15, 1990.

ILIO, Inc. designs, markets, sells and distributes women's cotton sportswear and apparel primarily under the Ilio trademark and through private label arrangements. The company markets its lines of sportswear, which retail for under $30, to moderately priced department stores, specialty stores, specialty chains and mass merchants. ILIO completed its initial public offering in November 1989.

POMPANO BEACH, FL (MARCH 28) BUSINESS WIRE - Andrew Horn, president and chief executive officer of Rock-A-Bye Baby Inc., a manufacturer and marketer of infant care products, announced Wednesday the signing of an agreement with Burlington Coat to test the sales of Rock-A-Bye Baby's patented Comfy Wipe Warmer in 25 of Burlington's 155 stores nationwide.

''Burlington is a respected retailer of infant and juvenile products, and we are extremely pleased to have this opportunity,'' said Horn in announcing the test.

''Satisfactory results from the test should lead to the sale of Comfy Wipe Warmer in all of Burlington's infant departments, and based on the success of this product to date, we are confident of the outcome,'' he added.

Horn concluded by indicating that there were several other well-known national chains considering the company's products on a similar basis.

Rock-A-Bye Baby Inc. is a publicly traded company based in Pompano Beach, Fla., which acquired the world-wide rights to the patented Comfy Wipe Warmer in December of 1989.

The product warms moist baby wipes to body temperature while allowing them to remain in their original container.

Rock-A-Bye Baby Inc. sells the Comfy Wipe Warmer and its highly-regarded signature product, the Rock-A-Bye Bear, to nearly 700 retailers and juvenile products mail order houses nationwide.

Horn indicated that sales were on track to reach the company's goal of $200,000 for the current quarter ending March 31, more than doubling the sales of the prior quarter. Sales for the next quarter are projected to be approximately $400,000. The company's shares are traded over the counter.

CAMBRIDGE, MA (MARCH 28) BUSINESS WIRE - Lotus Development Corp. Wednesday announced it has begun shipments of Lotus 1-2-3 for Sun, the company's first family of spreadsheets for the UNIX operating system.

Lotus 1-2-3 for Sun is based on Lotus 1-2-3 Release 3 and optimized for Sun's three computing platforms: the SPARC-based workstations, including the SPARCstation 1; the Motorola-based Sun-3 line; and the Intel-based Sun 386i. The products were announced in January and are shipping ahead of schedule.

Lotus 1-2-3 for Sun provides users with advanced 1-2-3 spreadsheet functionality combined with powerful Sun workstation capabilities, including distributed network services, multiple window support, multi-tasking, and support for large memory.

''We are extremely pleased that our first products for UNIX are shipping early,'' said Frank Moss, vice president of Lotus' new Consulting Services Group and acting vice president of the Networked Applications and Systems Division. ''1-2-3 for Sun is the critical first step in Lotus' long-term strategy to provide superior applications software for UNIX users.''

''With popular applications like 1-2-3 moving onto Sun, business users get the performance advantages of a UNIX workstation along with the familiar software they use every day,'' said Ed Zander, Sun vice president of corporate marketing.

Comprehensive Service and Support Program

Lotus also announced today a comprehensive service and support program for Lotus 1-2-3 for Sun users called The Lotus Service Plan. This program supplements the three free months of premium telephone support available to all registered 1-2-3 for Sun users.

Under the Lotus Service Plan, 1-2-3 for Sun users can elect to purchase one of three levels of support: Gold, Silver or Bronze. Gold support provides users with 1-2-3 for Sun Tech Notes, a quarterly publication addressing technical issues and questions; Prompt, one year of premium toll-free telephone support; and Upgrades, automatic notification and free shipment of new product line releases and revisions.

Silver support provides users with 1-2-3 for Sun Tech Notes and Prompt premium telephone support. Bronze support provides users with 1-2-3 for Sun Tech Notes.

Pricing, Availability and System Requirements

Lotus 1-2-3 for Sun is priced at $695 for a Standard Edition, $995 for a Server Edition and $495 for a Node Edition. The Server Edition is designed for installation on a network server, providing an efficient way for users to share software.

This edition contains the complete Standard Edition, plus network documentation and administration software, which allows the administrator to determine the number of licenses available on the network. A single Server Edition supports users on all three Sun architectures. The Node Edition provides networked users with an additional license and documentation.

Gold, Silver and Bronze Lotus Service Plans are priced separately for Standard, Node and Server Editions of 1-2-3 for Sun. Node Edition support must be purchased at the same level as that of the Server; for example, users with Gold Server Edition support must purchase Gold Node Edition support. Lotus Service Plan prices range from $75 to $450 for one year of support.

Lotus 1-2-3 for Sun will be available through selected Lotus Authorized Resellers, including Corporate Software, Corsoft, Ingram Micro D, MicroAge Softmart, Softsel Worldwide and Univar. Lotus 1-2-3 for Sun will also be available through Electro Rep, a leading UNIX reseller, and Government Technology Services Inc. (GTSI), a major government reseller.

The Standard Edition of Lotus 1-2-3 for Sun requires a Sun-3, Sun-4 (including the SPARCstation) or a Sun386i workstation running SunOS 4.0 or higher, 4 megabytes of RAM and 5 megabytes of available hard disk space.

Lotus Development Corp. is the leading developer of application software for personal computers and information services delivered on CD-ROM, and a worldwide supplier of applications software for workstation, minicomputer and mainframe computing environments.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating systems and productivity software.

ATLANTA (MARCH 28) BUSINESS WIRE - AT&T Network Systems and BellSouth said Wednesday that they will work together to provide telephone company business customers with integrated network management capabilities.

The companies announced an agreement under which BellSouth will purchase AT&T's NetPartner Network Management System (NMS), which allows customers

to use information from telephone company operations systems to monitor networks and isolate trouble.

The BellSouth operating companies, Southern Bell and South Central Bell, will market the services in the BellSouth region as Performance and Fualt Management Service (PFMS) under its family of Customer Network Management (CNM) services.

The NetPartner System uses AT&T computers and the DATAKIT Virtual Circuit Switch to give business customer access to information from telephone company operations systems.

Customers can use NetPartner NMS to monitor and receive network alarms and surveillance messages, generate metallic loop tests on analog facilities and generate digital subscriber loop tests on certain ISDN lines.

Access, through NetPartner NMS, to other BellSouth Customer Network Management services give customers simultaneous, single terminal access to such functions as ESSX station moves and changes, trouble reporting, billing and alarm messages from central office switches and certain digital cross-connect devices.

With NetPartner NMS, telephone companies can serve multiple customer with one system, thus reducing operating costs. It also enables the telephone company to offer a secure, flexible service that will grow and change according to customer needs.

Business customer who purchase the service receive centalized control of multiple customer network management capabilities, an easy-to-use system and secure access to their network information.

Outside the BellSouth region, such services are available through other local operating companies that choose to purchase NetPartner NMS from AT&T Network Systems.

#90087b0854 03/28/1990 ~Business Wire

STAMFORD, CT. (MARCH 28) BUSINESS WIRE - CUC International Inc. (NYSE:CU) Wednesday announced fourth quarter and year-end results for the year ending Jan. 31, 1990.

Revenues grew 35 percent for the year, to a record $367.5 million, compared to $271.8 million a year ago.

Pretax operating income increased to $13.7 million from a pretax loss of $14.6 million a year ago. The year-ago loss was the result of a change in the company's accounting method of amortizing membership acquisition costs from a three year period to the initial membership period, generally 12 months.

Net income for fiscal year 1990 was $8.1 million, or 37 cents per share, compared to an after-tax loss of $11.3 million or a loss of 58 cents per share for fiscal year 1989, based on 22 million and 19.6 million weighted average shares outstanding, respectively.

Revenues for the quarter ended Jan. 31, 1990 were $98.9 million, compared to $77.5 million a year ago. Fourth quarter earnings before taxes, interest and recapitalization expenses for fiscal year 1990 were $10 million compared to $5 million a year ago, exclusive of the change in the accounting method, an increase of 100 percent.

Earnings per share were 11 cents, or $2.5 million, compared to a loss of $1.55, or $30.7 million in fiscal year 1989's fourth quarter.

Walter A. Forbes, chairman and CEO of CUC International, said, ''This past

year was one of the most significant in CUC's history. Demand for our services remains strong. We now have six major consumer services to offer our financial and retail clients. All have had new features or enhancements added, bringing additional value to our members. The result was that each service showed increases in net membership growth. Total membership for CUC's services grew from, 12.2 million a year ago to 13.8 million at year end.

''It's also important to note that growth was company-wide. Our checking account enhancement and AD&D insurance products continue their long history of consumer acceptance, maintaining high renewal rates. Today, more than 5,000 community banks and 900 credit unions look to CUC to bring these services to their customers and members.

''A 35 percent growth in year-to-year revenues, a 100 percent growth in the fourth quarter earnings before taxes, interest, and recapitalization costs and a 110 percent growth in free cash flow (cash flow from operating activities less capital expenditures) for the year confirm the success of the company's strategy. The combination of growth in all three financial areas should make the coming years the most successful in CUC's history.''

CUC International is a leading membership services company, presently providing more than 13.5 million consumers with access to a variety of services including home shopping, travel, insurance, auto, dining, checking account enhancements, and extended warranties.

#90087b0855 03/28/1990 ~Business Wire

ROCHESTER, NY (MARCH 28) BUSINESS WIRE - Voit Corporation (NASDAQ:VOIT) Wednesday announced results for the fifty two week period ended December 29, 1989.

For the fifty two week period ended December 29, 1989 revenues were $29,651,958 as compared to $31,760,403 reported in the comparable fifty three weeks of fiscal 1988. Earnings from continuing operations were $823,029 in 1989.

Earnings applicable to common stock totalled $370,494 or 13 cents per share after a preferred stock dividend of $372,535 and a pre-payment penalty of $80,000 for the early extinguishment of debt. Earnings from continuing operations in the prior fiscal year were $1,421,763.

Earnings applicable to common stock in 1988 were $1,045,426 after a preferred stock dividend of $376,337, or 38 cents per share.

In 1989, Voit experienced the continued acceptance of the Company's product line, particularly home exercise equipment, in the sporting goods market. In addition, Voit realized royalty revenues of over $600,000 from its successful licensing agreement for athletic shoes and sportswear.

However, a sluggish retail environment contributed to a 7 percent decline in sales as compared to the prior year.

Net income in fiscal 1989 declined as selling, general and administrative expenses increased due to higher costs for advertising and insurance, while Voit was experiencing comparatively lower net sales.

David Goldman, president, commented, ''Although business in 1989 was impacted by several factors, sales and earnings levels improved in the fourth quarter. We are particularly enthusiastic about the outlook for our new line of 22 home exercise products, which was well received by sporting goods buyers nationwide.

''In addition, our licensed product lines are proving to be very successful. In the first contract year, our athletic shoe licensee shipped nearly $20,000,000 of Voit athletic shoes. We expect this contract to have a continuing positive impact on our operating results in 1990 and beyond.

''We are also proud of our association with Patrick Ewing, New York Knicks' basketball superstar, whom we recently signed for an additional five-year period as the spokesperson for our popular Shooting Star basketball line.''

Voit is a national distributor of sporting goods equipment located in Fairport, New York.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

EDWARD N BAROL OWNS 248,670 SHARES (9.20%) OF FIRST PEOPLES FINANCIAL CORP (TICKER: FPNJ) OF WESTMONT (HADDON TOWNSHIP), NJ.

ANNOUNCEMENT:

Barol and Lewis Katz entered into an agreement whereby Barol purchased the 123,785 shares on Dec. 20, 1989 because of the length of time involved in acquiring regulatory approval for the ownership of more than 10 percent by a single shareholder of a bank holding company.

Katz intends to apply for regulatory approval to acquire First Peoples.

The shares were acquired upon the death of William Rohrer, at which time Barol was granted in option to purchase the shares pursuant to an agreement with the deceased made on Nov. 20, 1987.

PURPOSE:

Trust agreement.

-30- 459
#90087c0060 03/28/1990 ~Comtex
SCHEDULE 13D

SEC - AMENDMENT NUMBER: 12

GROUP LED BY UNITED CAPITAL CORP OWNS 1,070,000 SHARES (12.64%) OF GENERAL

DEVELOPMENT CORP (TICKER: GDV) OF MIAMI, FL.

ANNOUNCEMENT:

General Development has pled guilty to one count of fraud and agreed to pay restitution in an amount estimated to be $80 million to $100 million.

On Mar. 23, 1990, United notified General of its intention to nominate Mr. Stephen B. Siegel for election as director of General at the 1990 annual meeting, instead of Mr. Howard M. Lorber.

United Capital currently intend to solicit proxies in favor of the election of their six nominees for the seats on General's board to be elected by stockholders at the next annual meeting and in favor of their stockholder proposals to remove for cause all current directors, other than Mr. Andolsek, and that the stockholders request that the board terminate the stockholder rights issued under the rights agreement dated as of Feb. 17, 1989 and to eliminate General's classified board.

Also, filer A.F. Petrocelli rejected an offer from General Development Corp. for a seat on the Miami home builder's board, saying he also wanted to be appointed chief executive officer and to change the composition of the entire panel.

General Development made the offer for a board seat March 15, but Petrocelli said he did not believe he would be able to restore the integrity and financial condition of General unless he was also appointed CEO.

#90087c0062 03/28/1990 ~Comtex
SCHEDULE 13D

SEC - AMENDMENT NUMBER: 29

ANNOUNCEMENT:

In a letter dated Mar. 26, 1990, reference is made to the commitment letter dated Nov. 9, 1989 between Creditanstalt - Bankvrein and Sutton Holding Corp., as amended, to provide that the term "Expiry Date" shall mean April 8, 1990.

The commitment fee of 1/2 or 1 percent per annum, payable as provided Annex I of the commitment letter, shall continue to accrue until the Expiry Date.

Purchaser shall continue to have the right to extend the Expiry Date, at

its option, for four additional 30-day periods upon payment of the additional fees specified in Annex I to the commitment letter.

Also, Section 3 of the commitment letter is hereby amended to extend the date by which definitive financing agreements must be delivered, to April 8, 1990.

This 8-k Filing was submitted to the Securities and Exchange Commission on MARCH 27, 1990

-30- 536

#90087c0237 03/28/1990 ~Comtex

STAMFORD, CT (MARCH 28) COMTEX - During the first nine months of 1989, accounting personnel for Tampa, FL-based Larry's Ice Cream Inc. recorded several errors concerning the gain on the writedown of accounts payable resulting from settlements between the company and various vendors.

As a result, Larry's will be required to increase the net loss recorded for the nine months ended Sept. 30, 1989, by $225,286, according to a filing with the Securities and Exchange Commission.

The company believes that new systems and procedures implemented during the fourth quarter of 1989 will prevent similar errors in the future.

It is currently exploring several alternatives to increase its equity

capital in order to maintain the minimum capital listing requirements for the NASDAQ.

This 8-k Filing was submitted to the Securities and Exchange Commission on MARCH 27, 1990

-30- 1024

#90087c0238 03/28/1990 ~Comtex

STAMFORD, CT (MARCH 28) COMTEX - Newark, NJ-based Agrolife Corp. has agreed to buy two operating plants in Israel that recycle organic waste into animal feed from Candar Investments Inc. in a stock swap.

In addition, Agrolife has agreed to finance the construction of two U.S. recycling plants at a cost of $2 million, according to a filing with the Securities and Exchange Commission.

Agrolife, which was formerly known as Franchiseit Corp., will also acquire the exclusive rights to the commercial utilization of the technology in the United States, and will make royalty payments of $10 million for the rights.

This 8-k Filing was submitted to the Securities and Exchange Commission on MARCH 27, 1990

#90087c0282 03/28/1990 ~Comtex
WASHINGTON (MARCH 28) COMTEX - Economists agreed that now is the time to act on a House resolution directing the Federal Reserve to target zero inflation over the next five years. However, they cautioned in order to be successful, there must be no wavering and the economy will incur transitional costs before reaping the benefits from this change in monetary policy.

The economists compared 10-year economic models forecasting the impact of such a resolution on the economy with alternatives that included no special assumptions about inflationary expectations.

"In the zero inflation simulations, various components of real economic

activity all suffered in one way or another during the transition period and recovered materially during the second five years," Donald H. Straszheim, chief economist and first vice president of Merrill Lynch Capital Markets, told a House Banking subcommittee.

Michael W. Keran, the vice president and chief economist of The Prudential Insurance Company of America, forecast that a zero inflation policy would not cause a recession although unemployment would rise from its current level of 5.25 percent to about 6.5 percent by 1992 before declining towards 5.5 percent by 1995.

The economists unanimously agreed that enactment of this legislation would cause a temporary increase in unemployment and decline in real output but the economy would reap long-term gains.

"This resolution is like saving for our children's education," said Clopper Almon, a professor of economics at the University of Maryland. "In the long run, we are glad we did it. In the short run, it is not without pain."

Straszheim cautioned that no matter how complicated the economic models are, they are dramatically more simple than the real world. "I believe these models are just exercises," he said. "I'm not prepared to defend these numbers."

Straszheim added that even if Congress directed the Fed to eliminate inflation and President Bush signed off on it, that would not guarantee success. "A lot of people don't believe what has come out of Washington," he said, referring to Gramm-Rudman legislation to reduce the federal deficit and the constant adjustments to the federal debt ceiling. "Even with the passage of the resolution, I am skeptical that the public would believe that it actually heralds a new inflation regime."

Rep. Stephen L. Neal (D-N.C.), the author of the legislation, agreed that in order to successfully wrestle inflation from the economy, Congress and the administration must provide the Fed a clear mandate to act even if the economy temporarily weakens as a result of the monetary strategy.

"On the fiscal side we have policies of short run benefits but long-term costs," Neal said. "On the monetary side, we must look to short-term costs and long-term gains."

BUDAPEST (MARCH 28) - The Hungarian airline Malev is resuming its flights of Soviet Jews to Israel, after suspending them last week because of pro-Palestinian terrorist threats, Hungarian television reported late Wednesday.

The Hungarian and Israeli governments had criticised the suspension of the charter flights to Tel Aviv as encouraging international terrorism.

Malev had justified its move by saying it was taken out of concern for the safety of its aircraft, staff and passengers in the face of threats made in the name of "Islamic Jihad for the Liberation of Palestine".

That body warned on March 15 that it would attack airports and airlines helping the exodus of Soviet Jews, which Palestinians and their supporters fear will be settled in the Israeli-occupied Arab territories.

But Foreign Minister Gyula Horn called on the airline to go back on its decision. "The suspension of flights is not the answer to such terrorist threats, which would be followed by other threats of this kind," he said.

The television earlier Wednesday announced that Malev director-general Kajos Jahoda had been dismissed from his post by Communications Minister Andras Dersi over the affair.

JERUSALEM (MARCH 28) - The Israeli army will slap an indefinite curfew on the occupied Gaza Strip from 4.00 a.m. (0100 GMT) Thursday ahead of Palestinian Land Day, military sources said Wednesday.

An order declaring Gaza a "closed military zone" will accompany the curfew

to keep non-residents and the press out, unless they have special authorisation to visit the territory, the sources said.

They said the army expected the possible outbreak of violence in Gaza, where Palestinians Friday will mark Land Day.

Land Day commemorates the killing by Israeli forces on March 30, 1976 of six Israeli Arabs as they protested in Galilee, northern Israel, against the appropriation of their land.

The underground leaders of the 27-month-old anti-Israeli uprising in Gaza and the occupied West Bank have urged Palestinians to observe a strike to mark Land Day.

Israeli Arab leaders have urged their 700,000 community also to observe a work stoppage.

Elsewhere, Israeli troops Wednesday shot and wounded eight Palestinians during separate clashes in the Jabalya and Shati refugee camps of Gaza, Arab sources said.

#90087d0300 03/28/1990 ~French/German News Agency

WASHINGTON (MARCH 28) - The United States Wednesday voiced concern over the danger of nuclear proliferation in the Middle East following the arrests in London of an Iraqi national and four others suspected of smuggling parts used to make nuclear detonators.

A British customs spokesman said the group was apprehended while trying to smuggle 40 capacitors, described by the spokesman as "common electronic parts used in making detonators," aboard an Iraqi Airlines flight bound for Baghdad.

"This issue raises once again our concern for the nuclear poliferation in the Middle East," said White House spokesman Marlin Fitzwater, who confirmed that five people had been arrested.

"It continues to pose a serious risk to the U.S. interests and it continues to exacerbate regional problems," Fitzwater added.

He said Washington has long asked nuclear materials suppliers to use "special restraint in providing material to the region. We continue to urge that all states adhere to the non-proliferation treaty to which Iraq is a signatory."

Justice Department spokesman Dan Eramian added that the equipment seized were "military nuclear capacitors," which are used to detonate nuclear

devices.

Iraqi Ambassador to the United States Mohamed Al-Mashat however categorically denied that Baghdad had tried to acquire the nuclear capacitors.

"I deny that. We're against it...We are against manufacturing nuclear bombs," the ambassador told the Cable News Network.

"We call for a freeze and a ban on nuclear weapons in the area (Middle East) and we hope Israel will abide by it," he added. Israel is believed by experts to have nuclear weapons.

Two of the suspects were arrested at London's Heathrow airport while attempting to board the Iraqi Airlines flight while the three others were arrested at addresses in London and Surrey, officials said.

The Iraqi national, who was not named, was being expelled from Britain while, Britain's Home Office said.

The other four suspects are three Britons, including a woman and a naturalized Iraqi-born man as well as one Lebanese national. The four were being held for questioning in the London area, the officials said.

Fitzwater declined to give more details on the incident, citing secret intelligence reasons. He added that British and U.S. authorities were conferring to determine what information could be released.

U.S. Customs Service spokesman, Ed Kittredge, said the arrests resulted from an 18-month investigation by U.S. and British customs officials.

Kittredge said the United States was limiting comment out of deference to the British Government. "They're sensitive about Iraq and the number of British citizens there."

Iraq has denied possessing nuclear weapons but several recent reports have claimed that the country is nearing completion of a nuclear weapons program.

According to one Israeli report, a small amount of enriched uranium -- originally destined for the Osiraq research reactor near Baghdad which was destroyed by Israeli forces in 1981 -- was currently being used to produce small nuclear warheads.

#90087d0320 03/28/1990 ~French/German News Agency

JERUSALEM, MARCH 28 - A senior Israeli official denied Wednesday that a

murdered U.S. missionary was trying to set up Jewish settlements in southern Lebanon.

Uri Lubrani, coordinator of Israeli activity in southern Lebanon, also denounced the murder there Tuesday of William Bell Robinson as a "hateful crime."

Robinson, aged in his fifties, was shot dead by gunmen at his home in Rashaya al-Foukhar in the Israeli-patrolled zone in southern Lebanon. His home also serves as a center for handicapped children.

"The assassination of a man who gave his life to helping the local population is a particularly hateful crime," said Lubrani.

He dismissed as "pure fantasy" accusations by local people that Robinson had been preparing to set up Jewish settlements in southern Lebanon.

"It is totally absurd. Israel has never created settlements in southern Lebanon and has no intention of doing so," he told Agence France Presse.

Lubrani said he did not know why Robinson was killed.

An anti-Israeli Lebanese group has claimed responsibility for the murder.

BOGOTA (MARCH 28) - Justice Minister Roberto Salazar acknowledged Wednesday that the government had held indirect talks with a group of drug traffickers for the release of the kidnapped son of a top presidential adviser in January.

Alvaro Diego Montoya was released January 22 by The Extraditables, a group allegedly formed by drug traffickers sought by U.S. authorities, in a bid to persuade the government to call off its crackdown on the cocaine cartels.

Mr. Salazar told a private radio station here that two businessmen served as intermediaries.

But he denied that the government was pursuing any kind of negotiation with the drug cartels.

Mr. Salazar said presidential adviser German Montoya, the father of the kidnap victim, asked the two businessmen to contact the kidnappers.

The minister said he had attended a meeting in which the businessmen briefed the National Security Council on their effort and stressed that

both men had acted on "humanitarian grounds."

"We merely acted as witnesses," said Mr. Salazar.

The secret contacts between the government and the drug barons were disclosed by Carlos Lemos, who last Sunday resigned as interior minister complaining of waning support from President Virgilio Barco for the war on drugs.

In his letter of resignation, Mr. Lemos pointed to the secret negotiations that led to Mr. Montoya's release as proof that the government had "softened (its stance) on drug trafficking."

National Police Chief, General Miguel Gomez, Wednesday emphatically denied these charges and said that the authorities "have not dropped their guard" in their anti-drug war.

President Virgilio Barco declared an all-out war on drug traffickers after the murder of presidential candidate Luis Carlos Galan last August.

PIETERMARITZBURG, SOUTH AFRICA (MARCH 28) - Open warfare between thousands-strong black gangs left 11 people dead in the black townships surrounding the Natal province capital Pietermaritzburg on Wednesday, police said.

Major Piet Kitching said police came under fire "sporadically" from automatic weapons, adding that one policeman had been wounded when police retaliated after a burst of firing.

Police had found eight bodies in Kwashangwe, two in Ashdown and one in Gezayuzo, he said.

Hospital sources around the town said five people had died in hospital on Wednesday, figures which almost certainly did not include the 11 police said they had found.

As police had reported two dead Tuesday and a further three had died in hospital, a provisional death toll for the two days of fighting climbed to 21.

Warring factions set up burning barricades around the hospital at Edendale, at the centre of the fighting Wednesday, hemming in ambulances and forcing relatives to carry the injured in on foot.

A hospital spokesman at Edendale told the South African Press Association

surgeons had operated on 32 people with very serious gunshot wounds during the day, some of them caused by police birdshot.

President Frederik de Klerk was urged Wednesday to come to Natal to comfort people who had nowhere to turn amid unfettered Zulu in-fighting.

Natal parliamentarian Pierre Cronje, who represents the white liberal Democratic Party in Greytown, north-east of Pietermaritzburg, told parliament the police had lost control.

When he visited the Pietermaritzburg area on Tuesday he had seen some 6,000 Zulu impi, supporters of chief Mangosuthu Buthelezi's Inkatha movement, launching an open attack on the urban areas of the Edendale Valley.

"The police are not able to control the situation and even tell the people to flee," he said.

Natal community leaders who had tried to see De Klerk had always been referred to Law and Order Minister Adriaan Vlok, "who keeps on telling us that he is in control," Cronje said.

He also attacked police in the area for simply "scolding" Inkatha vigilantes instead of disarming them.

State-run television news showed palls of smoke rising from six residential areas in the hills around Pietermaritzburg on Wednesday.

Footage from a helicopter flying over the area showed cars abandoned and crowds milling through shack settlements, roads scorched by burning barricades.

Reporters in a second helicopter counted 120 homes burning in the Henley area, which was cloaked in smoke.

Armed gangs were stopping people from going to work and pressing them into vast vigilante mobs, correspondents said.

Rallying broadly around Inkatha or the socialist United Democratic Front, the gangs encompassed a myriad of petty allegiances, reporters said, many with scores to settle, vendettas to conduct, and simply crimes to commit.

Chief Buthelezi told the KwaZulu tribal homeland's legislature in the capital Ulundi on Wednesday that African National Congress Deputy President Nelson Mandela would meet him at his home in Mahlabathini to discuss the violence, as they were "old family friends".

The chief told a rally in the King's Park rugby stadium in Durban on Sunday about the planned meeting, and repeated an invitation by Zulu King Goodwill

Zwelathini to the ANC to come to Ulundi for talks on the violence in Natal, which has left at least 2,800 people dead since late 1986.

The dramatic escalation in tension in the province this week was sparked by the stoning of busloads of Inkatha supporters returning from the rally, some observers believe.

Tracing his friendship with Mandela back to the time when they were in the ANC Youth League together in the late 1940s, he said: "We will meet at my home as we have arranged from the outset and we will meet whenever Dr. Mandela's very busy itinerary makes it possible to do so."

TOKYO (MARCH 28) - Housing starts in Japan rose 5.6 percent in February from a year earlier to 122,241 units for the sixth straight monthly rise, the Construction Ministry said on Wednesday.

The February rise followed a 6.3 percent increase in January, it said.

Ministry officials said growth was recorded in all housing starts, including single-family houses, rental housing and houses built for sale.

Tokyo (MARCH 28) - Toyota Motor Corp. officials said Wednesday the carmaker plans to produce 1.6-litre passenger cars in Turkey jointly with the Turkish firm Haci Omer Sabanci Holding A.S.

Haci Omer Sabanchi has already applied to Ankara for approval of starting the planned project.

Toyota plans to begin the production in 1993 at an annual pace of 20,000 cars. The annual output scale is to be boosted to around 100,000 cars later, the officials said.

A toyota official said the project was requested by the Turkish government to meet growing car demand in that country.

Toyota expects the Turkish passenger car market to grow to some 300,000 to 400,000 cars a year by the late 1990s from the present level of 120,000, he said.

Kuala Lumpur (MARCH 28) - Malaysia, which in January raised its oil production by 30,000 barrels per day (bpd), plans to hike its daily oil output by the same amount to bring production to 620,000 bpd by early next year, officials said Wednesday.

Tan Sri Azizan Zainul Abidin, chairman of Petronas, Malaysia's national oil company, said a higher production level was necessary in the coming years to promote the development of new oil fields, especially as the Dulang oil field, offshore the east state of Trengganu, goes on stream next year.

The increases in production are also expected to meet the rising medium and long-term demand for oil in the Asia-Pacific region, Tan Sri Azizan told reporters.

''I do not rule out the possibility of Malaysia increasing its oil output further if there are new offshore or onshore discoveries,'' he said.

Malaysia currently produces oil from 30 fields, using 42 offshore platforms. Natural gas production amounts to 1.5 billion cubic feet per day from six fields.

LIVERPOOL, England (MARCH 28) - Ford UK is to cut the workforce of its auto assembly factory at Halewood in northwest England by 2,800 people, the company announced on Tuesday.

Ford said it intended to cut the workforce of 8,500 by one third within five years as part of a programme to improve the productivity of its European factories in the face of competition from the Japanese, the company said.

By means of voluntary departure and retirement, 400 jobs will be cut this year, and no forced redundancies are planned, the company said.

The Halewood plant was closed for seven weeks at the beginning of the year because of a strike by mechanics. It is one of two Ford assembly plants in Britain. The second is at Dagenham, east of London.

The Halewood plant produces about 1,260 Escort and Orion models per day, or more than 300,000 per year.

TOKYO (MARCH 28) - Japan's industrial output fell for the first time in five months in February, shrinking 0.5 percent from January, the International Trade and Industry Ministry said in a preliminary report Wednesday.

The seasonally adjusted figure reversed a growth rate of 0.1 percent in January and compared with zero growth in December.

Ministry officials said the decline was temporary, reflecting unexpected and seasonal factors such as factory accidents and annual plant overhauls.

Industrial output is still on a firm uptrend as illustrated by output projections by major companies for March and April, they said.

Among the sectors worst hit by lower production were chemicals, where output shrank 3.2 percent from the previous month, and steel which was down 2.4 per cent, the ministry said. Transport machinery production rose 2.3 percent from January, however, and largely offset declines in other sectors.

Shipments by manufacturers fell 0.8 percent in February, the first decline in four months and compared with an increase of 0.2 percent in January. Inventories meanwhile climbed 0.3 percent, up from 0.1 percent previously.

Industrial output grew 3.2 percent from a year earlier compared with 1.9 percent in January. Shipments by manufacturers were up 3.9 percent from February last year while inventories rose 6.1 percent, the ministry said.

TOKYO (MARCH 28) - Japan's vehicle exports fell 3.1 percent in February over the January level to 483,850 for the sixth straight monthly decline, the Japan Automobile Manufacturers Association reported Wednesday.

The February exports were also down 6.9 percent from a year earlier.

The association attributed the fall to reduced shipments to the United States and Europe.

Exports to the United States fell 11.0 percent from a year before to 185,300 vehicles and those to Europe dropped 8.2 percent to 146,600.

Passenger cars accounted for 379,600 of the February total, down 3.1 per-

cent, trucks 101,400, down 19.2 percent, and buses 2,800, up 33.3 percent.

BEIJING (MARCH 28) - China will reverse legislation allowing the nationalistation of joint-venture companies in a bid to attract more foreign investment, the New China News Agency (NCNA) said Wednesday.

Statutes banning foreigners from heading joint ventures will also be revoked, the official agency added.

Revisions to the 1979 law governing joint ventures are expected to be ratified during the current National People's Congress annual meeting here which ends on April 4, it added.

Presenting the revisions to congress delegates, China's Foreign Trade Minister Zheng Tuobin was Wednesday quoted as saying they "better reflect China's effort to open itself wider to the outside world and attract more foreign investment and promote China's economic development."

The measures were intended to reverse the flight of foreign capital which followed the adoption of economic sanctions by Western nations in response to last June's crackdown on pro-democracy unrest, observers said.

Quoting the draft amendment to the law Mr. Zheng said, "The state shall not nationalize or requisition any equity joint venture.

"Under special circumstances, when public interest requires, equity joint ventures may be requisitioned by legal procedures and appropriate compensation shall be made," he said.

Mr. Zheng said such moves would be "in accordance with the international practice and the agreements on investment protection that China has signed with foreign governments."

ZAANDAM, Netherlands (MARCH 28) - British group United Biscuits is to launch a friendly takeover offer for Dutch biscuit maker Verkade, the two companies said here Wednesday.

The 400 guilder a share bid is worth some 265 million guilder (133 million dollars), the two told a joint conference at the Dutch firm's headquarters.

Verkade shares were suspended in Amsterdam Wednesday morning pending the announcement, after closing Tuesday at 276 guilder. It has been as high as

289 this year.

Verkade, a market leader in biscuits and chocolate, saw its net profit fall 17.7 percent last year to 12.1 million guilder (6.3 million dollars), with turnover unchanged at 266 million (34.7 million dollars).

The British group, which makes biscuits and frozen foods, had a net profit last year of 109 million pounds (174 million dollars) on turnover of 2.7 billion (4.3 billion dollars).

MANILA (MARCH 28) - The Philippines' economic growth is unlikely to reach five percent in 1990 following the latest military coup attempt, a usually optimistic think tank said in a report issued here Wednesday.

Manila's Center for Research and Communication (CRC) forecast growth for this year at 3.5 to 4.9 percent, in contrast to government expectations of five to six percent.

The Roman Catholic Church-sponsored CRC said the bloody December putsch, the sixth against President Corazon Aquino, was believed to have shattered foreign investors' confidence.

"With its political institutions in place and its economy steadily growing, the Philippines, under Aquino, was slowly winning over the confidence of elusive foreign investors. Until the December debacle, that is," CRC said.

The economy recovered after Mrs. Aquino came to power in 1986, growing about six per cent yearly from 1987 to 1989 after a recession under her deposed predecessor Ferdinand Marcos, but inflation has reached double digits, the trade deficit is mounting, and income distribution remains uneven.

CRC senior vice president Bernardo Villegas, known as the country's "prophet of boom," said that after the coup, 1990 could be a "period of consolidation" that would see slower growth due to inflation, high interest rates, inadequate energy supply, and other problems.

#90087d6860 03/28/1990 ~French/German News Agency

KUALA LUMPUR (MARCH 28) - Malaysia produced 2,958 tons of tin-in-concentrates in January, up 4.7 percent from 2,824 tons in the same month last year, the statistics department said Wednesday.

This was an increase of 8.2 percent from 2,733 tons in December.

Malaysia exported 3,663 tons of tin metal in January compared to 4,196 tons in December and 5,165 tons in January 1989.

The metal was mainly exported to the Netherlands (1,455 tons), Japan (578 tons), the United States (440 tons) and South Korea (230 tons).

Malaysia imported 1,930 tons of tin-in-concentrates in January, mainly from China (542 tons) and Australia (429 tons). Imports amounted to 2,116 tons in December and 2,080 tons in January last year.

Total tin stocks at the end of January stood at 20,902 tons, compared to in 20,811 tons in December and 20,703 tons in January last year.

Paris (MARCH 28) - Four European air carriers - Sas, Swissair, Austrian Airlines and Finnair - have asked McDonnell-Douglas and Airbus Industrie to submit bids for a several-billion-dollar joint order for 240 airplanes, it was reported here Wednesday.

The Paris-based International Herald Tribune newspaper said the four airlines have asked the two manufacturers to bid on the order by April 15.

The order would entail either the Airbus planes A320 and A321 or the McDonnell-Douglas Md90-30 or Md90-40 planes, all for delivery between 1995 and 2005, the newspaper said.

Depending on the per-unit sales price, the order could range between nine and 12 billion dollars, the paper said.

The breakdown would include 126 planes for Sas, 52 for Swissair, 35 for Finnair and 26 for Austrian Airlines.

''By ordering together, we hope to have the same purchasing power as the big American airlines,'' Swissair's chief engineer, Konrad Wittorf told the paper. ''A small operator has less power and leverage.''

In Toulouse, a spokesman for Airbus Industrie declined to comment specifically on the newspaper report, saying only that the West European consortium was ''constantly engaged in sales negotiations with all its customers''.

He added that it would be good if the four European airlines would decide in favour of ''a European plane''.

#90087d6910 03/28/1990 ~French/German News Agency
LONDON (MARCH 28) - British mechanical and electrical construction group Hawker Siddeley said Wednesday pre-tax profits rose 10 percent last year over 1988 to 202.1 million pounds (336.8 million dollars).

Turnover was up 19.4 percent at 2.15 billion pounds (3.58 billion dollars) and the final dividend was fixed at 15 pence, giving a total for the year of 25 pence, up from 22.5 in 1988.

The results were below the least optimistic market forecasts of profit of around 209 million pounds, and Hawker Siddeley shares were down seven pence at 633 in mid-session trading in London.

#90087d7460 03/28/1990 ~French/German News Agency
MONROVIA (MARCH 28) - The U.S. embassy in Liberia has "strongly advised" all U.S. citizens residing in northeastern Nimba County, except those in Yekepa, to "immediately depart" from the area because of fresh clashes between rebels and troops.

A U.S. embassy statement said the decision was taken because of increased fighting near Ganta, Bahn, Saclepea and Kawein.

"While most of the country remains unaffected, the Liberian military continue to conduct operations in Nimba County," the statement said.

Yekepa, a mining town near the border with Guinea, is said to be the safest place in Nimba County.

A U.S. Embassy official told Agence France-Presse Wednesday that the statement was first read on embassy radio network on Sunday and is being repeated each night.

Unconfirmed reports say there were fresh clashes in Tappita and Bahn on Tuesday.

On Tuesday, Ivory Coast missionary sources reported in Abidjan that two protestant missionaries were killed "very recently" in Nimba County. The sources said the bodies of Tom Jackson from the United States and his British wife June were found near the village of Bahn some 300 kilometers (190 miles) from the Liberian capital, Monrovia.

LONDON (MARCH 28) - Britain's inflation rate will reach an annualised

nine percent by the beginning of the summer, its highest in eight years, and could go even higher, Bank of England governor Robin Leigh-Pemberton said Wednesday.

Several factors such as next month's introduction of a controversial new local tax, the poll tax, higher cigarette and alcohol prices and rent increases will push inflation up in the next few months, Mr. Leigh-Pemberton told the Treasury and Civil Service Select Committee.

Chancellor of the Exchequer John Major said when presenting his 1990-91 budget last week that the poll tax alone would put one per cent on the inflation rate.

Mr. Leigh-Pemberton said he did not foresee a rapid fall in interest rates, currently running at 15 percent, and said that forecasts of a three to four percent reduction by the end of the year were "extremely optimistic."

Mr. Major had admitted last week that inflation would remain high "for some time," and that it would rise further before dropping back to seven per cent in the final quarter of the year.

#90087d7540 03/28/1990 ~French/German News Agency

BERLIN (MARCH 28) - The former Communist leader of East Germany, Erich Honecker, and his close aides, are unlikely to face trial because they are in poor health, East Germany's assistant public prosecutor Lothar Reuter said here on Wednesday.

Stressing that this was his "personal view", he told the East German ADN agency that a team of independent doctors was studying whether Mr. Honecker and six other former members of the politburo of the Communist party were able to face trial. Their findings were not expected before the end of April.

In addition to the 77-year-old former head of state and party leader, those concerned are the former head of the Stasi secret police Erich Mielke, 82, former Prime Minister Willi Stoph and the former head of the economy Gunter Mittag, 63.

The others are the former President of the Parliament Horst Sindermann, 74, the former head of international relations Hermann Axen, 74, and the former head of agriculture Werner Krolikowski, 66, ADN said.

Mr. Reuter said that case preparations were continuing for the time being even though they were complicated in several cases by senility, confused memories, and refusal to answer questions.

The East German prosecutor on Monday announced that he was dropping charges of high treason and anti-constitutional conspiracy against Mr. Honecker, Mr. Mielke, Mr. Mittag and Mr. Hermann who risked life imprisonment.

#90087d7840 03/28/1990 ~French/German News Agency

THE HAGUE (MARCH 28) - The Dutch balance of payments surplus rose 37.1 per cent last year over the 1988 level to 15.3 billion guilder (eight billion dollars), the finance ministry said here Wednesday.

The balance of payments showed a surplus of 11.2 billion guilder in 1988.

The improvement in the surplus last year was largely due to a fall in the invisibles deficit from 5.6 billion guilder to 1.5 billion, while the trade surplus was virtually unchanged from the 1988 level at 16.8 billion guilder.

#90087d8090 03/28/1990 ~French/German News Agency

BONN (MARCH 28) - West German trading house Kloeckner und Co, saved from bankruptcy in late 1988, said Wednesday it had a record year last year, with net profit of more than 250 million Deutsche marks (147 million dollars).

Kloeckner made a loss of 387 million Deutsche marks in 1988, largely due to risky transactions on the oil futures market.

It was rescued by Deutsche Bank, which ceded it a few months later to a consortium formed by energy groups VIAG and Bayernwerk.

Deutsche Bank's financial overhaul and a good economic situation had made a decisive contribution to Kloeckner's turnaround, the West German news agency quoted board chairman Joerg Henle as saying.

The favourable situation had continued into the first two months of this year, he added.

Turnover shrank 3.3 percent last year to 11.5 billion Deutsche marks, but Kloeckner had shed its oil trading activities as part of a restructuring.

Some 59 percent of last year's sales came from steel, with sales up to 8.6 million tons from 8.1 million in 1988.

#90087d9070 03/28/1990 ~French/German News Agency

BONN (MARCH 28) - West German Chancellor Helmut Kohl and Irish Prime Minister Charles Haughey called here Wednesday for the 12 European Economic Community (EEC) governments to hold a conference on EEC political union.

The conference should be held in December, during Italy's tenure of the EEC's rotating presidency. That presidency is currently held by Ireland.

A decision to hold the conference should be taken during a special EEC summit devoted to German reunification, slated for April 28 in Dublin, the two leaders said.

The conference should be held in parallel with a separate conference already scheduled on monetary union in the EEC, they added.

#90087d9110 03/28/1990 ~French/German News Agency

CAPE TOWN (MARCH 28) - President Frederik de Klerk announced Wednesday that he is to travel to "a number of European countries in May or June" with Foreign Minister Pik Botha.

His office said details of his itinerary were not yet available.

British Foreign Secretary Douglas Hurd had said in Cape Town on March 19 that officials were putting the finishing touches to plans for Mr. De Klerk to visit Britain in May.

In a separate statement, Mr. De Klerk said he would hold talks in Cape Town with the leaders of South Africa's tribal homelands ahead of talks-about-talks opening April 11 with the African National Congress (ANC) of Nelson Mandela.

Mr. De Klerk said he had invited the chief ministers of KwaZulu, KwaNdebele,

KaNgwane, Qwa-Qwa, Lebowa and Gazankulu to "exploratory talks" on April 5 on "the structuring of the process of negotiation and related matters."

Those talks at the president's official residence will come six days ahead of his meeting with a delegation led by Mr. Mandela, the ANC's deputy president, on obstacles to talks on bringing the voteless black majority into what Mr. De Klerk has called "full, class A citizenship."

Leaders "working within existing government structures" had already had talks with the president "on a bilateral basis", and had asked the government to "get constitutional negotiations off the ground", Mr. De Klerk said.

"The process of negotiation is a wide-ranging one in which all interested parties should participate," he said. "The discussions next Thursday acknowledge the position of these leaders in this process."

Observers said the timing of the talks with the homeland leaders seemed designed to dispel the impression created by the announcement of the April 11 encounter that the ANC would be the government's sole negotiating partner.

RASHAYA, Lebanon (MARCH 28) - Israeli troops seized a Lebanese magistrate and another man during a raid into southern Lebanon on Wednesday, police said.

Samih Maddah, 38 was taken from his home in Mimes, a village three kilometers (two miles) north of the Israeli-imposed "security zone" in southern Lebanon. His relative Fouad Maddah was also seized.

The two men were led to an unspecified destination by a joint unit of Israeli troops and militiamen of the Israeli-trained and financed South Lebanon Army (SLA) for "no apparent motive", police said.

They said Israeli security officers questioned two other men in Mimes, but released them afterwards.

The Israeli troops and SLA, who jointly patrol the "security zone", searched several houses in Mimes before returning to the buffer strip along the Lebanon-Israel border, police added.

The Lebanese Foreign Ministry contacted the United Nations Interim Forces in south Lebanon (UNIFIL), which has a Norweigian contingent deployed near Mimes, in a bid to secure the release of the two men.

#90087e0002 03/28/1990 ~Latin America New Agency

BOGOTA (MARCH 28) - Colombian Interior Minister Horacio Serpa Uribe has turned down calls to postpone May 27 presidential elections after last week's murder of leading leftist candidate Bernardo Jaramillo by a suspected rightist paramilitary squad.

"I believe that it would be very difficult legally and constitutionally to postpone the elections," Serpa Uribe said after meeting opposition leaders Tuesday.

The leftist Pariotic Union (U.P.) party had joined with 14 other

opposition groups to call on President Virgilio Barco to put back polling day until safety guarantees for candidates could be given.

Jaramillo, the U.P.'s presidential candidate, was shot dead Thursday at Bogota airport by a 15-year-old assailant who was captured and admitted to having been paid dlrs 700 to kill him.

The U.P., Colombia's third largest political grouping, said immediately after the murder that it was pulling out of the elections but the party was to hold a national congress Wednesday to decide whether to keep up the boycott.

U.P. President Diego Montana said Sunday's resignation of ex-interior minister Carlos Lemos Simmonds removed one of the obstacles to participation in the poll.

The U.P. had blamed Jaramillo's murder on statements made two days before by Lemos, linking the U.P. to the leftist FARC guerrilla group.

U.P. official Julio Santana said the party would decide Wednesday "whether we are going to the elections or not and whether we will present a new candidate or ask for a symbolic vote for Bernardo Jaramillo".

Jaramillo's widow, Mariela Barragan, said Tuesday that she might take up suggestions from some U.P. members that she run for president in her late husband's place.

"I have never been politically active except to support my husband's ideas but if we are to move on they (U.P. members) know that they can count on me," Barragan, who was present when her husband was gunned down, said.

"Bernardo is irreplaceable and I have never wanted to be his shadow but there must have been some reason why I survived the attack," she added.

More than 1,000 U.P. members have been killed by suspected right-wing death squads since the party was founded in 1985 when Communists merged with former leftist guerrillas.

#90087e0003 03/28/1990 ~Latin America New Agency

LIMA (MARCH 28) - Suspected Maoist "Shining Path" guerrillas exploded a car bomb outside a U.S.-owned shoe factory and attacked an Air Force technical center on the eve of an "armed strike" they called for Wednesday in Lima, Peruvian police said.

A woman passerby was reported seriously wounded in the crossfire as troops late Tuesday repelled an attack by the rebels on the Air Force

installation in the center of the capital.

Simultaneously, a car bomb went off outside the U.S.-owned Bata shoe factory, causing serious damage but no injuries, police said.

A state of emergency has been in force in Lima and its port city Callao since Friday, as Shining Path and another leftist guerrilla group, the Tupac Amaru Revolutionary Movement (MRTA), stepped up their attacks in the run-up to April 8 general elections.

Shining Path has called an "armed strike" Wednesday in Lima, threatening to kill anyone who tries to work or do business as usual.

Also Tuesday, another car bomb exploded in front of the main court building in Callao without causing any injuries, and a 500 square km area north of the capital was blacked out when guerrillas dynamited power pylons.

Police, meanwhile, continued a massive round-up of suspects that began over the weekend, and said 20 suspected terrorists had been detained.

A dozen candidates for local office are among the more than 700 people killed in political violence since the beginning of the year, bringing to 19,000 the number of such deaths since Shining Path took up arms in 1980.

-30- 1738

#90087e0008 03/28/1990 ~Latin America New Agency

SANTIAGO (MARCH 28) - Suspected leftist extremists have seriously wounded a paramilitary policeman in the second terrorist attack since President Patricio Aylwin took office just over two weeks ago, authorities said Wednesday.

Presumed members of the Lautaro Youth Popular Armed Forces rebel group wounded Marco Ruiz Figuera, 26, Tuesday while he was guarding a police barracks in Talcahuano, 530 km south of the capital.

The gunmen shot Ruiz three times and stole his machinegun and revolver before fleeing in a taxi driven by an accomplice.

The Lautaro group, which emerged last year, vowed to continue its attacks when Aylwin took office March 11 from military dictator Gen. Augusto Pinochet, ending more than 16 years of military rule.

Tuesday's attack was the second since Aylwin was sworn in. Police have arrested a suspect in connection with the shooting last week of former air force chief Gustavo Leigh.

Leigh and a business associate were wounded in the attack which has been claimed by both the leftist Manuel Rodriguez Patriotic Front, Chile's most prominent rebel group, and by a previously unknown right-wing guerrilla group.

#90087e0009 03/28/1990 ~Latin America New Agency

BUENOS AIRES (MARCH 28) - Britain is to lift its military exclusion zone around the Falkland Islands Saturday, almost eight years to the day after Argentine troops invaded the British-held South Atlantic archipelago.

At the same time, direct communication links are to be set up between the British garrison on the Falklands and Argentine military units on the mainland, while cooperation in maritime search and rescue is to begin Monday.

Britain has maintained the exclusion zone around the islands since winning the 74-day Falklands war, which cost the lives of almost 1,000 British and Argentine troops.

Both sides agreed at a meeting in Madrid last month to restore full diplomatic relations, broken off when the war began with the invasion on April 2, 1982. Britian also agreed to lift the exclusion zone.

London's agreement to the deal depended on Argentine representatives not bringing up sovereignty claims on the islands.

Argentine Foreign Minister Domingo Cavallo is to meet British Foreign Secretary Douglas Hurd in London next month to try to improve trade and fix a date for President Carlos Menem to visit Britain for talks with Prime Minister Margaret Thatcher.

On the agenda could also be the relaxing of travel visa requirements, Argentine officials have said.

Cavallo may press for the reintroduction of a special card, bearing only the name, place of birth and date of arrival, for Falklanders to travel to Argentina, the officials said.

The system had been in operation from 1971 until the war, because Argentina refused to accept the British passport as a valid document for "kelpers", as the Falklanders are known to Argentines.

Menem took office in July promising to improve relations with Britain, while at the same time maintaining its sovereignty claims over the islands.

BOGOTA (MARCH 28) EFE - Colombian police said Wednesday they had arrested an opposition deputy wanted in the U.S. commonwealth of Puerto Rico on marijuana-trafficking charges.

Jacobo Mariano Mendez Campo, 42, Social Conservative Party representative for the northern department of Magdalena, was arrested Monday and was being held in Bogota pending extradition proceedings, the police said.

Mendez Campo said he was surprised by his arrest, and said he had only visited Puerto Rico once, in 1982, when he spent a five-day stopover there with his wife on the way to New York.

President Virgilio Barco has sent alleged cocaine traffickers to face trial in the United States since declaring a clampdown on the powerful cocaine barons last August.

But none have been extradited since +The Extraditables+, a group representing the biggest cocaine cartel, handed back the kidnapped son of a top government official in December and offered to surrender in return for escaping extradition.

The government has officially rejected the offer.

Twelve Colombians wanted by Washington for smuggling cocaine are being held in Bogota pending a decision by the administration on whether to send them to face trial in the United States.

#90087e0014 03/28/1990 ~Latin America New Agency

CARACAS (MARCH 28) EFE - The Venezuelan senate has voted narrowly in favor of a parliamentary investigation into alleged corruption by former president Jaime Lusinchi.

The marathon session, which ended late Tuesday, heard accusations that Lusinchi, president from 1984-89, was involved in a billion-dollar foreign exchange scandal known as the +Recadi Affair+ which surfaced in July.

The Recadi, or Differential Exchange Regime Office, authorizes the purchase of dollars at a preferential rate by importers.

The senate vote was carried 25-24, with the support of former president Rafael Caldera of the Social Christian Party, who abstained in an earlier vote last October that was tied 24-24.

Lusinchi was also charged with buying all-terrain vehicles with government

funds and using them in the election campaign of his successor, President Carlos Andres Perez.

Lusinchi, who as a former president is a senator for life, said the investigation was unconstitutional.

If the parliament finds Lusinchi guilty, he is likely to be expelled from the ruling Democratic Action (AD) party, stripped of his seat in the senate and may face criminal charges.

#90087e0018 03/28/1990 ~Latin America New Agency

SANTIAGO (MARCH 28) EFE - The British Aerospace company hopes to sell some 20 +Hawks 200+ fighter jets to Chile and open a spare parts factory in the country, a Chilean daily reported Wednesday.

The daily La Epoca reported that British Aerospace was negotiating a deal to sell the jets at some dlrs 12 million each to Chile's Armed Forces, which, it said, needs to renew its nearly outdated fleet of +Hawker Hunter+ and +Canberra+ jets.

Meanwhile, the company's negotiations were said to be at an advanced stage regarding the setting up of a spare parts factory for the +Hawks 200+ and the +Tornado+ model in installations belonging to Chile's National Aeronautics Company (ENAER).

British Aeropsace spokesman Robert Gardner Wednesday said the level of technology at ENAER was similar to that in British Aerospace's plants.

TOKYO (MARCH 28) KYODO - INTERNATIONAL TRADE AND INDUSTRY MINISTER KABUN MUTO HINTED WEDNESDAY THE GOVERNMENT IS CONSIDERING REVISING JAPAN'S LARGE-SCALE RETAIL STORES LAW IN THE FACE OF CONTINUED U.S. DEMANDS THAT IT BE SCRAPPED, GOVERNMENT OFFICIALS SAID.

AT A MEETING WITH REPRESENTATIVES OF INDUSTRY ORGANIZATIONS GROUPING SMALL TO MEDIUM-SIZED COMPANIES, MUTO QUESTONED WHETHER MERELY LIBERALIZING THE WAY THE LAW IS ACTUALLY IMPLEMENTED WOULD BE ENOUGH TO SATISFY THE UNITED STATES, THE OFFICIALS SAID.

''THE U.S. IS QUITE ADAMANT ON THE ISSUE. I AM QUITE WORRIED THAT OUR PROPOSAL FOR ONLY IMPROVING ENFORCEMENT (OF THE LAW) MAY NOT GET US OFF THE HOOK,'' MUTO WAS QUOTED AS SAYING.

THE LAW, WHICH RESTRICTS THE OPENING OF LARGE RETAIL OUTLETS, IS THE MAIN

BONE OF CONTENTION IN THE ONGOING TRADE TALKS WITH THE U.S AIMED AT REMOVING STRUCTURAL IMPEDIMENTS TO TRADE AND INVESTMENT.

THE U.S. HAS BEEN URGING JAPAN TO REPEAL THE LAW, CLAIMING THAT IT IS HAMPERING THE FOREIGN ACCESS TO THE JAPANESE MARKET BY RESTRICTING LARGE STORES THAT ARE THE PRIMARY SELLERS OF FOREIGN GOODS.

THE MEETING WAS ATTENDED BY THE REPRESENTATIVES OF FOUR INDUSTRY ORGANIZATIONS, INCLUDING THE JAPAN CHAMBER OF COMMERCE AND INDUSTRY.

ROKURO ISHIKAWA, PRESIDENT OF THE CHAMBER, SAID THE GOVERNMENT SHOULD FIRST TRY A MORE COMPETITION-ORIENTED IMPLEMENTATION OF THE LAW BEFORE CONSIDERING REVISING IT, ACCORDING TO THE OFFICIALS.

THE REPRESENTATIVES OF THE OTHER THREE GROUPS MADE IT CLEAR THEY ARE OPPOSED OUTRIGHT TO ANY CHANGE, LET ALONE REPEAL OF THE LAW.

MUTO PROMISED NOT TO FORESAKE SMALL RETAILERS, BUT EMPHASIZED THAT THE INTERESTS OF CONSUMERS AND RELATIONS WITH THE U.S. ALSO NEED TO BE GIVEN CONSIDERATION.

HE DESCRIBED HIMSELF AS BEING IN AN IMPOSSIBLE POSITION.

MEANWHILE, MUTO VISITED FORMER FINANCE MINISTER KIICHI MIYAZAWA AT HIS OFFICE, AND SOUGHT HIS ASSISTANCE IN THE SO-CALLED STRUCTURAL IMPEDIMENTS INITIATIVE (SII) TALKS WITH THE U.S.

THE FOURTH ROUND OF THE TALKS IS SCHEDULED FOR APRIL 2 AND 3 IN WASHINGTON. PRIME MINISTER TOSHIKI KAIFU'S GOVERNMENT IS MAKING LAST-DITCH EFFORTS TO FORGE A CONSENSUS IN THE GOVERNMENT AND IN THE RULING LIBERAL DEMOCRATIC PARTY (LDP) ON WHAT PROPOSALS TO PUT ON THE NEGOTIATING TABLE AT THE MEETINGS.

IN THE MEETING WITH MIYAZAWA, MUTO EXPLAINED THAT THERE IS STRONG OPPOSITION FROM ''MON AND POP'' SHOP OWNERS TO REVISING THE RETAIL STORE LAW, GOVERNMENT SOURCES SAID.

SMALL SHOP OWNERS CONSTITUTE ONE OF THE MOST LOYAL GROUPS OF SUPPORTERS FOR THE LDP.

MIYAZAWA TOLD MUTO THAT THE LAW AND THE ISSUE OF BOOSTING PUBLIC WORKS SPENDING ARE THE MAJOR PROBLEMS.

''MINISTRIES CANNOT BE EXPECTED TO TAKE THE INITIATIVE ON SUCH ISSUES SINCE THEY TEND TO PAY THE GREATEST ATTENTION TO THE MOVES OF OTHER MINISTRIES,'' MIYAZAWA WAS QUOTED AS SAYING.

MIYAZAWA ADVISED MUTO NOT TO MAKE ANY PREMATURE DECISION. MUTO ON TUESDAY

MET ANOTHER SENIOR LDP MEMBER, FORMER SECRETARY GENERAL SHINTARO ABE, TO ASK FOR COOPERATION ON THE SII TALKS.

TOKYO (MARCH 28) KYODO - A TOTAL OF 246 FORMER BUREAUCRATS, LED BY 56 FROM THE FINANCE MINISTRY, ENTERED THE PRIVATE SECTOR IN 1989, THE NATIONAL PERSONNEL AUTHORITY (NPA) REPORTED WEDNESDAY IN AN ANNUAL WHITE PAPER ON ''AMAKUDARI.''

IN THE PRACTICE OF ''AMAKUDARI,'' LITERALLY ''DESCENT FROM HEAVEN,'' RETIRED JAPANESE BUREAUCRATS PARACHUTE INTO POSITIONS AS ADVISERS AND EXECUTIVES IN PRIVATE AND SEMIPUBLIC FIRMS AND ORGANIZATIONS.

IN WEDNESDAY'S REPORT DELIVERED TO THE PRIME MINISTER'S OFFICE AND THE DIET, THE NPA NOTED A SUDDEN INCREASE LAST YEAR IN THE NUMBER OF OFFICIALS FINDING POSITIONS IN RESEARCH- AND TECHNOLOGY-RELATED BUSINESSES TO 142.

THIS EASILY OUTNUMBERED THE 104 FORMER BUREAUCRATS WHO LANDED ADMINISTRATIVE POSTS.

FIFTY-FIVE OF THE NEWLY REEMPLOYED RETIREES FOUND POSITIONS AS BOARD MEMBERS IN SOME OF THE FIRMS.

THE NPA SUGGESTED THAT THE INCREASE REFLECTS A DESIRE BY NEWLY ESTABLISHED COMPANIES FOR PEOPLE WITH TECHNOLOGICAL BACKGROUNDS AND A RAPID INCREASE IN THE NUMBER OF MULTIFACETED FIRMS, ESPECIALLY IN MANUFACTURING, WHICH REFLECTS THE CONTINUED EXPANSION OF THE JAPANESE ECONOMY.

ACCORDING TO THE REPORT, ABOUT 3,000 GOVERNMENT OFFICIALS WHO HAD REACHED THE LEVEL OF SECTION CHIEF OR HIGHER DURING THEIR CAREERS IN JAPAN'S PUBLIC AGENCIES AND MINISTRIES RETIRED LAST YEAR.

THE AVERAGE AGE OF THE 246 WHO FOUND NEW POSITIONS WAS 55.6 YEARS, THE WHITE PAPER NOTED.

SHINJI FUKUKAWA, FORMER ADMINISTRATIVE VICE MINISTER IN THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI), TOOK A POST AS ADVISER WITH THE NOMURA RESEARCH INSTITUTE TO LEAD 25 FORMER MITI OFFICIALS INTO THE PRIVATE SECTOR.

TOPPING THAT FIGURE WERE THE 56 FORMER FINANCE MINISTRY BUREAUCRATS WHO LANDED NEW POSITIONS TO LEAD ALL MINISTRIES IN THE ''AMAKUDARI'' REPORTS. THE MINISTRY OF AGRICULTURE, FORESTRY AND FISHERIES CAME IN SECOND WITH 31 AND THE TRANSPORT MINISTRY FOLLOWED MITI WITH 23 FORMER OFFICIALS LANDING NEW POSITIONS.

THE FOREIGN MINISTRY WAS NOT LISTED IN THE NPA REPORT. MANUFACTURING FIRMS CLAIMED 76 OF THOSE ''DECENDING FROM HEAVEN,'' WHILE ANOTHER 39 LANDED IN TRANSPORT, COMMUNICATIONS, FINANCIAL, AND INSURANCE POSITIONS AND 30 MOVED INTO SERVICE INDUSTRIES.

THE NATIONAL CIVIL SERVICE LAW PROHIBITS PUBLIC OFFICIALS FROM ACCEPTING POSITIONS FOR TWO YEARS AFTER THEIR RETIREMENT WITH FIRMS THEY HAVE DEALT WITH IN AN OFFICIAL CAPACITY IN THE PREVIOUS FIVE YEARS, IN ORDER TO PREVENT ABUSES BY THE BUREAUCRATS OF THEIR POSITION AND OFFICIAL AUTHORITY.

THE RETIRED OFFICIALS, HOWEVER, CAN PETITION THE NPA TO PERMIT THEIR REEMPLOYMENT BEFORE THE TWO-YEAR PERIOD HAS ELAPSED.

#90087k0033 03/28/1990 ~Japanese News Agency

TOKYO (MARCH 28) KYODO - MAJOR INDUSTRIAL NATIONS WILL DISCUSS FOREIGN EXCHANGE PROBLEMS AT A MEETING OF THE GROUP OF SEVEN (G-7) INDUSTRIAL NATIONS TO BE HELD IN PARIS ON APRIL 7, BANK OF JAPAN GOVERNOR YASUSHI MIENO SAID WEDNESDAY.

THE FINANCE MINISTERS AND CENTRAL BANKERS FROM THE G-7 NATIONS WILL ALSO EXCHANGE VIEWS ON THE CURRENT STATE OF THE GLOBAL ECONOMY AND ITS OUTLOOK, MIENO TOLD A REGULAR PRESS CONFERENCE.

AS REGARDS THE YEN-DOLLAR RATE, HE SAID HE CANNOT UNDERSTAND THE YEN'S WEAKNESS AND THERE IS A GREAT POSSIBILITY OF THE YEN REBOUNDING IN DUE COURSE. HE ALSO SAID THERE IS NO SPECIAL REASON FOR THE DOLLAR TO STRENGTHEN.

THE G-7 NATIONS -- JAPAN, THE U.S., CANADA, WEST GERMANY, FRANCE, BRITAIN, AND ITALY -- WILL CONTINUE CONCERTED MARKET INTERVENTION TO STABILIZE THE FOREIGN EXCHANGE MARKET, MIENO SAID.

BUT IT WILL TAKE TIME FOR THE MARKET TO REGAIN STABILITY, HE ADDED. ON THE DOMESTIC FRONT, THE CENTRAL BANK CHIEF SAID THERE HAS BEEN NO CHANGE IN THE BASIC TREND OF THE JAPANESE ECONOMY, ADDING THAT PRESENT PRICE TRENDS WILL CONTINUE FOR THE TIME BEING.

#90087k0035 03/28/1990 ~Japanese News Agency

TOKYO (MARCH 28) KYODO - SATSUKI EDA, LEADER OF A JAPAN SOCIALIST PARTY SPLINTER PARTY, SAID WEDNESDAY HE HAS LAUNCHED INFORMAL TALKS WITH THE JSP ON FORGING A NEW OPPOSITION PARTY.

EDA, LEADER OF THE FIVE-MEMBER UNITED SOCIAL DEMOCRATIC PARTY (USDP), SAID THAT SPECIAL ENVOYS FROM THE TWO PARTIES ARE PROBING FORMING A NEW PARTY

THAT WOULD HAVE BROADER APPEAL TO OTHER OPPOSITION PARTIES AND TO THE PUBLIC AT LARGE.

''THESE ARE NOT CONCRETE CONSULTATIONS, BUT THE PARTICIPANTS HAVE A COMMON TARGET IN MIND,'' EDA SAID IN AN INTERVIEW WITH KYODO NEWS SERVICE.

''IF WE LAUNCH A SOCIAL DEMOCRATIC PARTY IN JAPAN, IT MIGHT BE A CHANGE OF NAME FOR THE SOCIALIST PARTY, BUT FROM OUR SIDE IT MIGHT BE FORMING A NEW PARTY,'' EDA SAID.

ON MONDAY EDA PROPOSED AT A NATIONAL MEETING OF USDP OFFICIALS THAT A NEW OPPOSITION PARTY BE LAUNCHED TO BREAK A DEADLOCK THAT HAS DIMINISHED PROSPECTS OF A COALITION AMONG FOUR MAJOR OPPOSITION PARTIES -- THE LEADING OPPOSITION JSP, THE USDP, AND TWO CENTRIST PARTIES, THE BUDDHIST-AFFILIATED KOMEITO AND THE DEMOCRATIC SOCIALIST PARTY.

THE FOUR OPPOSITION PARTIES ENTERED DISCUSSIONS LAST APRIL AIMED AT FORGING A COALITION GOVERNMENT, AND WERE ENCOURAGED BY THEIR VICTORY IN HOUSE OF COUNCILLORS ELECTIONS IN JULY, THEIR FIRST WIN SINCE THE LDP CAME TO POWER 35 YEARS AGO.

BUT THE TWO CENTRIST PARTIES HAVE BECOME INCREASINGLY COOL TOWARD THE OTHER PARTIES FOLLOWING THEIR POOR SHOWING IN HOUSE OF REPRESENTATIVES ELECTIONS IN FEBRUARY. THE JSP, MEANWHILE, BOOSTED ITS NUMBER OF SEATS IN THE POLL FROM 83 TO 141.

EDA SAID HIS PROPOSAL WAS MADE IN PART TO BLOCK POSSIBLE COOPERATION BETWEEN THE RULING LIBERAL DEMOCRATIC PARTY (LDP) AND THE KOMEITO AND DSP.

EDA SAID THAT LDP-CENTRIST PARTY COOPERATION WOULD DAMAGE THE OPPOSITION PARTIES' ABILITY TO OFFER A VIABLE ALTERNATIVE TO THE LDP.

''THE CONSEQUENCE WOULD BE A COMPLETE DEFEAT IN NEXT GENERAL ELECTION (FOR THE KOMEITO AND DSP,) AND REVERSION OF THE JSP TO ITS POSITION OF STUBBORN OPPOSITION PARTY THAT DOES NOT WANT TO GAIN POWER,'' HE SAID.

THE OPPOSITION PARTIES REMAIN AT ODDS OVER POLICIES ON DEFENSE PACT WITH THE UNITED STATES, NATIONAL SECURITY, NUCLEAR POWER PLANTS, AND RELATIONS WITH NORTH AND SOUTH KOREA.

TOKYO (MARCH 28) KYODO - AUSTRIAN CHANCELLOR FRANZ VRANITSKY ASKED PRIME MINISTER TOSHIKI KAIFU WEDNESDAY TO SUPPORT HIS INVITATION TO LOCATE THE HEADQUARTERS OF THE PLANNED EUROPEAN BANK FOR RECONSTRUCTION OF EASTERN EUROPE IN VIENNA.

VRANITSKY MADE THE REQUEST IN A LETTER DELIVERED TO KAIFU BY FINANCE MINISTER FERDINAND LACINA, A GOVERNMENT OFFICIAL SAID.

IN THE LETTER VRANITSKY INVITED KAIFU TO VISIT AUSTRIA, THE OFFICIAL SAID. KAIFU WAS QUOTED AS SAYING HE WILL STUDY THE POSSIBILITY OF HIS VISIT.

LACINA TOLD KAIFU HE IS OPTOMISTIC THAT THE GERMAN MARK WILL STABILIZE AFTER MONETARY UNION BETWEEN WEST AND EAST GERMANYS IS REALIZED.

THE FINANCE MINISTER SAID THAT WESTERN SUPPORT WILL BE IMPORTANT TO ASSIST REFORM OF EAST EUROPEAN ECONOMIES.

#90087k0038 03/28/1990 ~Japanese News Agency

PRAGUE (MARCH 28) KYODO - A TOTAL OF NINE AUTOMAKERS FROM AROUND THE WORLD ARE SOUNDING OUT POSSIBILITIES FOR JOINT VENTURES WITH CZECH AUTOMAKER SKODA, ACCORDING TO A SENIOR OFFICIAL OF THE STATE-RUN COMPANY.

THE MOVES FOLLOWS ECONOMIC LIBERALIZATION IN EAST EUROPE, SAID ZDENEK PATOCKA, VICE PRESIDENT OF SHODA, IN AN INTERVIEW WITH KYODO NEWS SERVICE HERE.

AMONG COMPANIES MAKING OVERTURES ARE JAPAN'S NISSAN MOTOR CO., ISUZU MOTORS LTD., AND FUJI HEAVY INDUSTRIES LTD., BUT NEGOTIATIONS WITH THESE FIRMS ARE FAR FROM GETTING INTO FULL SWING, HE SAID.

PATOCKA SAID SHODA IS CONSIDERING JOINT VENTURES WITH SUCH COMPANIES AS BAYERISHE MOTOREN WERKE AG (BMW) OF WEST GERMANY AND GENERAL MOTORS CORP. BECAUSE THEIR PROPOSALS ARE MORE CONCRETE THAN THOSE OF JAPANESE MAKERS.

JAPANESE MAKERS ARE ATTRACTIVE IN TERMS OF TECHNOLOGY AND FUNDS, BUT THEY SET DETAILED CONDITIONS FROM THE FIRST AND THERE IS LITTLE SCOPE FOR NEGOTIATIONS, HE SAID.

THE JAPANESE MAKERS SEEM TO BE DISSATISFIED THAT SHODA IS NEGOTIATING WITH THE NINE MAKERS SIMULTANEOUSLY, HE ALSO SAID.

SHODA HOPES TO TIE UP WITH FOREIGN FIRMS AS SOON AS POSSIBLE, HE SAID, ADDING THAT THE COMPANY WILL HOPEFULLY DECIDE ON A FEW PARTNERS BEFORE THE COUNTRY'S FREE ELECTION IN JUNE.

MANILA (MARCH 28) KYODO - ARMED FORCES CHIEF GEN. RENATO DE VILLA ON WEDNESDAY ORDERED THE FILING OF CHARGES AGAINST TWO GENERALS AND 19 OTHER OFFICERS ACCUSED OF PARTICIPATING IN THE FAILED DECEMBER COUP BEFORE A

MILITARY COURT MARTIAL.

MILITARY PROBERS EARLIER REPORTED TO DE VILLA THAT THERE WAS ''PRIMA FACIE'' EVIDENCE TO PROSECUTE THE 21 OFFICERS FOR MUTINY, MURDER, AND CONDUCT UNBECOMING AN OFFICER AND A GENTLEMAN, COL. JUANITO RIMANDO TOLD REPORTERS.

THE TRIAL WOULD BE THE FIRST INVOLVING OFFICERS WHO TOOK PART IN THE SIXTH ATTEMPT BY MUTINOUS SOLDIERS TO OUST PRESIDENT CORAZON AQUINO SINCE 1986. AT LEAST 80 OTHER OFFICERS ARE BEING INVESTIGATED FOR THEIR ALLEGED PARTICIPATION IN THE PUTSCH.

THOSE CHARGED INCLUDE ARMY BRIG. GEN. MARCELO BLANDO AND AIR FORCE BRIG. GEN. JOSE COMMENDADOR. ALSO FACING COURT MARTIAL PROCEEDINGS ARE THREE COLONELS, SEVEN LIEUTENANT COLONELS, THREE MAJORS, FIVE CAPTAINS, AND A FIRST LIEUTENANT.

BLANDO LED AN ARMY BATTALION FROM A MILITARY CAMP IN THE CENTRAL LUZON PROVINCE OF NUEVA ECIJA, BUT DID NOT ENGAGE LOYALIST TROOPS DURING THE NINE-DAY PUTSCH.

COMMENDADOR LED MUTINOUS SOLDIERS IN OCCUPYING A MAJOR AIRBASE AND INTERNATIONAL AIRPORT IN CEBU, 560 KILOMETERS SOUTH OF MANILA. HIS SURRENDER ENDED THE SIXTH ATTEMPT BY RIGHTWING SOLDIERS TO OUST THE GOVERNMENT OF PRESIDENT CORAZON AQUINO.

MORE THAN 100 PEOPLED WERE KILLED AND 600 OTHERS HURT IN THE MUTINY, WHICH ALMOST TOPPLED AQUINO'S FOUR-YEAR-OLD ADMINISTRATION.

TOKYO (MARCH 28) KYODO - FORMER PRIME MINISTER NOBORU TAKESHITA SAID WEDNESDAY HE PLANS TO VISIT SEOUL ON APRIL 15-17.

TAKESHITA TOLD SOUTH KOREA'S RULING DEMOCRATIC LIBERAL PARTY CO-LEADER KIM YOUNG SAM IN A MEETING AT TAKESHITA'S OFFICE IN TOKYO THAT HE INTENDS TO MEET SOUTH KOREAN COUNTERPARTS FOLLOWING HIS INSTALLATION AS CHAIRMAN OF THE JAPAN-SOUTH KOREA PARLIAMENTARIANS LEAGUE, SOURCES CLOSE TO TAKESHITA SAID.

TAKESHITA IS EXPECTED TO MEET SOUTH KOREAN PRESIDENT ROH TAE WOO DURING HIS PLANNED VISIT, THE SOURCES SAID.

DURING THE MEETING, KIM TOLD TAKESHITA THAT HE HOPED A VISIT BY ROH TO JAPAN EXPECTED IN LATE MAY WILL YIELD CONCRETE RESULTS, THE SOURCES SAID.

TAKESHITA WAS QUOTED AS SAYING, ''IF (ROH'S) VISIT IS REALIZED, IT IS

IMPORTANT TO DO ALL IN OUR POWER TO MAKE IT FRUITFUL.''

IN A STOPOVER IN JAPAN LAST WEEK, KIM URGED TOKYO TO HELP MAKE A SUITABLE CLIMATE FOR ROH'S VISIT BY RESOLVING ISSUES SUCH AS THE LEGAL STATUS OF THIRD-GENERATION KOREAN RESIDENTS IN JAPAN.

#90087k0084 03/28/1990 ~Japanese News Agency

TOKYO (MARCH 28) KYODO - THE CONSTRUCTION MINISTRY DECIDED WEDNESDAY TO OBLIGE ABOUT 100 JAPANESE COMPANIES TO REPORT TWICE A YEAR ON ANY OVERSEAS REAL ESTATE INVESTMENT WORTH MORE THAN 50 MILLION DOLLARS, BEGINNING IN APRIL.

THE MINISTRY SAID CONSTRUCTION, REAL ESTATE, AND TRADING CONCERNS WILL BE REQUIRED TO REPORT IN DETAIL ON ANY SUCH OVERSEAS REAL ESTATE INVESTMENT, SUCH AS PURCHASES OF HOTELS AND OFFICES, RESORT DEVELOPMENT, AND REDEVELOPMENT OF AREAS SURROUNDING THE PROPERTIES.

THE MOVE CAME AMID MOUNTING CONCERN ABROAD OVER JAPANESE COMPANIES' AGGRESSIVE REAL ESTATE PURCHASES, WHICH ARE CURRENTLY ESTIMATED AT MORE THAN 10 BILLION DOLLARS ANNUALLY.

THE MINISTRY CONDUCTED A SURVEY OF 1,800 JAPANESE COMPANIES IN EARLY FEBRUARY ASKING THEM ABOUT THEIR OVERSEAS INVESTMENTS IN REAL ESTATE DURING THE THREE-YEAR PERIOD TO THE END OF MARCH.

THE SURVEY SHOWED THAT THE 100 COMPANIES TO COME UNDER THE NEW ORDER ARE THE MOST ACTIVE INVESTORS.

KATHMANDU (MARCH 28) KYODO - DOCTORS IN KATHMANDU RETURNED TO WORK A FEW HOURS AFTER THEY BEGAN THEIR STRIKE WEDNESDAY AS THE GOVERNMENT RELEASED THE MEDICOS HELD IN CONNECTION WITH THE CURRENT PRO-MULTIPARTY DEMOCRACY CAMPAIGN.

EARLIER, HEALTH MINISTER SHUSILA THAPA URGED THE DOCTORS AT THE LOCAL BIR HOSPITAL TO CALL OFF THEIR STRIKE, SAYING THEIR DEMANDS WOULD BE MET.

THE DOCTORS DEMANDED THAT THEIR COLLEAGUES BE SET FREE, AND THE GOVERNMENT OBLIGED THEM.

THE HEALTH MINISTER ALSO PROMISED TO RELEASE TWO DOCTORS HELD IN OTHER PARTS OF THE KINGDOM BY WEDNESDAY EVENING, A DOCTOR AT THE HOSPITAL, WHO REQUESTED ANONIMITY, SAID.

THE STRIKE WAS CALLED BY THE NEPAL MEDICAL ASSOCIATION TO DEMAND RELEASE OF THE MEDICOS.

THE ASSOCIATION HAD ALSO OBJECTED STRONGLY TO THE ARRESTS BY POLICE OF THE PROFESSIONALS ASSEMBLED FOR A SYMPOSIUM AT TRIBHUVAN UNIVERSITY ON MARCH 20.

IN ITS CALL FOR THE STRIKE, THE ASSOCIATION HAD SAID ALL MEDICAL SERVICES, EXCEPT EMERGENCIES, WILL BE CLOSED AT HOSPITALS AND PRIVATE CLINICS IN KATHMANDU VALLEY WEDNESDAY IF THE DETAINED DOCTORS AND NURSES WERE NOT RELEASED.

MEANWHILE, STUDENTS BATTLED RIOT POLICE IN AT LEAST TWO EDUCATIONAL INSTITUTIONS IN THE NEPALESE CAPITAL WEDNESDAY.

#90087k0091 03/28/1990 ~Japanese News Agency

TOKYO (MARCH 28) KYODO - A HIGH-LEVEL SOVIET ECONOMIC OFFICIAL WILL VISIT JAPAN FROM THURSDAY THROUGH SUNDAY TO SOLICIT JAPAN'S SUPPORT FOR THE SOVIET BID FOR OBSERVER STATUS IN THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT), FOREIGN MINISTRY OFFICIALS SAID WEDNESDAY.

OFFICIALS SAID THAT IVAN IVANOV, VICE CHAIRMAN OF THE STATE COMMITTEE ON EXTERNAL ECONOMIC AFFAIRS, WILL HOLD ''IN-DEPTH'' TALKS ON THE ISSUE FRIDAY WITH HIS JAPANESE COUNTERPART MINORU ENDO, JAPAN'S AMBASSADOR FOR INTERNATIONAL ECONOMIC AFFAIRS.

THE SOVIET UNION SENT A FORMAL APPLICATION FOR OBSERVER STATUS TO THE 98-NATION WORLD TRADE BODY IN GENEVA ON MARCH 7, AN OFFICIAL SAID, ADDING THAT THE MATTER IS LIKELY TO BE TAKEN UP WHEN THE GATT POLICY-MAKING COUNCIL RECONVENES SOMETIME IN EARLY APRIL.

JAPAN, WHICH HAS CURTAILED ECONOMIC TIES WITH MOSCOW PENDING RESOLUTION OF A TERRITORIAL DISPUTE, IS THE ONLY MAJOR INDUSTRIALIZED COUNTRY IN GATT WHICH HAS NOT YET PUBLICALLY ENDORSED THE SOVIET BID.

U.S. PRESIDENT GEORGE BUSH SURPRISED JAPAN BY ISSUING HIS COUNTRY'S SUPPORT FOR THE SOVIET GOAL IN HIS SUMMIT MEETING WITH SOVIET PRESIDENT MIKHAIL GORBACHEV IN MALTA LAST DECEMBER.

THE CONCILIATORY U.S. MOVE WAS FOLLOWED SHORTLY AFTERWARD BY CANADA AND THE MEMBERS OF THE EUROPEAN COMMUNITY (EC).

JAPAN AND ITS WESTERN ALLIES HAD PREVIOUSLY OPPOSED SOVIET OBSERVER STATUS IN GATT ON THE GROUNDS THAT ITS PLANNED ECONOMY SYSTEM WAS INCOMPATIBLE WITH THE INTERNATIONAL TRADE RULES SET BY GATT, WHICH REGULATES FOUR-FIFTHS OF WORLD TRADE.

ONE OF GATT'S PRIMARY AIMS IS TO TRANSFORM TRADE BARRIERS INTO TARIFFS, WHICH ARE SET AS PERCENTAGES OF PRICES.

PRICES IN THE SOVIET UNION, HOWEVER, REMAIN SET BY PLANNERS INSTEAD OF BY THE MARKET.

JAPANESE OFFICIALS SAID THEY EXPECT IVANOV TO CLARIFY THE SOVIET UNION'S ''INTENTIONS'' WITH REGARD TO GATT, INCLUDING WHETHER MOSCOW EVENTUALLY AIMS AT ATTAINING FULL MEMBERSHIP.

IVANOV IS ALSO EXPECTED TO EXPLAIN MOSCOW'S EFFORTS TO COMPLY WITH GATT'S STRINGENT NORMS AND PRINCIPLES BY RESTRUCTURING CERTAIN MECHANISMS FOR FOREIGN ECONOMIC TRADE.

AMONG THE TASKS TO BE COMPLETED ARE IMPROVEMENTS IN NONTARIFF REGULATORY MEASURES AND THE INTRODUCTION OF AN EFFICIENT CUSTOMS TARIFF TO MAKE POSSIBLE MUTUAL TARIFF CONCESSIONS.

IVANOV WILL ALSO LIKELY ADDRESS THE ISSUE OF THE RUBLE'S INCONVERTIBILITY, ONE OF THE MAIN OBSTACLES TO THE SOVIET UNION'S INTEGRATION INTO THE INTERNATIONAL ECONOMIC ORDER.

-30- 2668

#90087k0092 03/28/1990 ~Japanese News Agency

TOKYO (MARCH 28) KYODO - INSTABILITY IN THE SOVIET UNION ARISING FROM SECESSIONIST MOVEMENTS IN THE THREE BALTIC STATES IS HINDERING THE PROCESS OF RESOLVING JAPAN'S TERRITORIAL DISPUTE WITH MOSCOW, TOSHIAKI MUTO, JAPANESE AMBASSADOR TO THE SOVIET UNION, SAID WEDNESDAY.

MUTO, IN AN INTERVIEW WITH KYODO NEWS SERVICE, SAID THAT HE CANNOT TELL WHEN FOREIGN MINISTER EDUARD SHEVARDNADZE WILL BE ABLE TO VISIT JAPAN UNDER THE PRESENT CONDITIONS IN THE SOVIET UNION.

MUTO NOTED THAT SHEVARDNADZE IS NOT ONLY FOREIGN MINISTER BUT ALSO A PARTY POLITBURO MEMBER IN CHARGE OF DOMESTIC ISSUES.

SHEVARDNADZE HAD ORIGINALLY BEEN EXPECTED TO COME IN MARCH. THE ENVOY SAID THE CURRENT SOVIET PREOCCUPATION WITH BREAKEWAY LITHUANIA, AND SIMILARLY MINDED ESTONIA AND LATVIA, IS DISTRACTING MOSCOW'S ATTENTION FROM THE NEED TO RESOLVE ITS DISPUTE WITH TOKYO OVER FOUR ISLANDS OFF HOKKAIDO SEIZED BY THE SOVIETS AT THE END OF WORLD WAR II.

MUTO ALSO SAID IT MIGHT BE DIFFUCULT FOR PRESIDENT MIKHAIL GORBACHEV TO PRESENT A DRASTIC NEW POLICY ON JAPAN-SOVIET RELATIONS DURING HIS PLANNED VISIT TO JAPAN NEXT YEAR.

HE SAID HE HAS A PERSONAL IMPRESSION THAT MOSCOW HAS NOT YET STARTED TO DRAW UP A NEW POLICY ON TOKYO-MOSCOW RELATIONS.

''AS LONG AS THE LITHUANIAN PROBLEM PERSISTS, IT REMAINS A MINUS FOR A RESOLUTION TO THE NORTHERN TERRITORIES (DISPUTE),'' SAID MUTO, WHO IS IN TOKYO FOR A MEETING OF AMBASSADORS TO THE SOVIET UNION AND EAST EUROPEAN COUNTRIES.

FOREIGN MINISTRY OFFICIALS EXPLAINED THAT JAPAN NEITHER FORMALLY RECOGNIZED NOR OBJECTED TO THE INCORPORATION OF THE BALTIC STATES INTO THE SOVIET UNION AFTER WORLD WAR II.

COMMENTING ON JAPAN'S RESPONSE TO SOVIET DISARMAMENT AND ARMS CONTROL INITIATIVES IN THE ASIA-PACIFIC REGION, MUTO STRESSED THAT THE STRATEGIC SITUATION HERE IS NOT A CARBON COPY OF THAT IN EUROPE.

HE SAID THAT SINCE THE SOVIETS HAD ENGAGED IN AN EXCESSIVE MILITARY BUILDUP IN THE FIRST PLACE, IT IS OUT OF PLACE FOR THEM TO CALL NOW FOR NAVAL CUTS BY JAPAN AND THE UNITED STATES.

THE SOVIETS SHOULD FIRST UNILATERALLY REDUCE THEIR FAR EASTERN FORCES TO THEIR FORMER LEVELS BEFORE ''A PATH MAY BE OPENED A BIT,'' HE SAID.

THE ENVOY'S REMARKS WERE AN APPARANT ALLUSION TO THE PROSPECT OF JAPAN'S RESPONDING MORE POSITIVELY TO REPEATED SOVIET REGIONAL CONFIDENCE-BUILDING PROPOSALS.

-30- 2527

#90087k0094 03/28/1990 ~Japanese News Agency

SEOUL (MARCH 28) KYODO - ABOUT 50 SOUTH KOREAN RELATIVES OF PEOPLE KILLED IN WORLD WAR II ON WEDNESDAY EVENING STAGED A DEMONSTRATION OUTSIDE THE JAPANESE CONSULATE GENERAL IN PUSAN DEMANDING JAPAN'S APOLOGY AND REPARATIONS FOR THE WAR VICTIMS, POLICE SAID.

THE PROTESTERS, MEMBERS OF AN ASSOCIATION OF WAR-BEREAVED, REQUESTED A MEETING WITH A JAPANESE CONSUL, BUT THEY WERE BLOCKED BY RIOT POLICE, ACCORDING TO POLICE.

THEY HELD A 90-MINUTE DEMONSTRATION AROUND THE CONSULATE BEFORE DISPERSING POLICE SAID.

-30- 702

#90087k0096 03/28/1990 ~Japanese News Agency

TOKYO (MARCH 28) KYODO - JAPAN WILL DISPATCH AN ECONOMIC COOPERATION SURVEY MISSION TO BANGLADESH FROM APRIL 1-7, FOREIGN MINISTRY OFFICIALS SAID WEDNESDAY.

THE OFFICIALS SAID THE PURPOSE OF THE MISSION IS TO DISCUSS THE BROAD FRAMEWORK FOR FUTURE JAPANESE ECONOMIC AND TECHNICAL COOPERATION WITH BANGLADESH.

THE MISSION WILL COME IN ADVANCE OF AN ANTICIPATED VISIT BY PRIME MINISTER TOSHIKI KAIFU TO SOUTH ASIA IN MAY, ALTHOUGH THE OFFICIALS SAID IT HAS YET TO BE DECIDED IF THE PREMIER WILL VISIT BANGLADESH.

BANGLADESH IS THE FIFTH LARGEST RECIPIENT OF JAPAN'S OFFICIAL DEVELOPMENT AID (ODA) AND THE LARGEST BENEFICIARY OF JAPANESE GRANT ASSISTANCE.

JAPAN HAS EXTENDED 27.5 BILLION YEN IN LOANS AND 15.8 BILLION YEN IN GRANT AID THUS FAR IN THE CURRENT FISCAL YEAR ENDING THIS MONTH, MAKING IT BANGLADESH'S LARGEST BILATERAL AID DONOR.

WHILE THE OFFICIALS STRESSED THAT THE TALKS WILL NOT DWELL ON SPECIFICS, THE BANGLADESHI SIDE IS EXPECTED TO SOLICIT JAPAN'S ASSISTANCE ON A 540 MILLION DOLLAR PROJECT TO CONSTRUCT A GIANT MULTI-PURPOSE BRIDGE ACROSS A WATERWAY TO LINK THE TWO HALVES OF THE COUNTRY.

FEASIBILITY STUDIES ON THE JAMUNA BRIDGE PROJECT HAVE ALREADY BEING UNDERTAKEN BY THE WORLD BANK AND THE ASIAN DEVELOPMENT BANK (ADB), THE OFFICIALS SAID.

THE TWO SIDES ARE ALSO LIKELY TO DISCUSS JAPAN'S PLANS TO FINANCE THE CONSTRUCTION OF A MAJOR HIGHWAY BRIDGE ON A STRETCH BETWEEN DHAKA AND CHITTAGONG. JAPAN IS ALREADY FUNDING ANOTHER BRIDGE ALONG THE SAME ROUTE.

THE OFFICIALS ACKNOWLEDGED THAT JAPANESE ASSISTANCE IN THE AREA OF FLOOD CONTROL IS EXPECTED TO BE TAKEN UP AS ANOTHER MAJOR SUBJECT FOR DISCUSSION.

#90087k0099 03/28/1990 ~Japanese News Agency

HANOI (MARCH 28) KYODO - VIETNAMESE REFORMIST TRAN XUAN BACH WAS FIRED WEDNESDAY AS A MEMBER OF THE COMMUNIST PARTY'S POLITBURO, CENTRAL SECRETARIAT, AND CENTRAL COMMITTEE AT THE END OF A GENERAL MEETING OF THE CENTRAL COMMITTEE, RELIABLE SOURCES SAID.

A RESOLUTION CALLING FOR HIS OUSTER ADOPTED SAID BACH HAD VIOLATED PARTY RULES, BRINGING ABOUT ''UNFAVORABLE CONSEQUENCES,'' THE SOURCES SAID.

BACH HAD APPARENTLY ADVOCATED POLITICAL PLURALISM (MULTIPARTY SYSTEM) OUTSIDE THE PARTY SINCE THE SEVENTH PARTY CONVENTION LAST SUMMER, THEREBY ENCOURAGING CRITICISM OF THE PARTY FROM YOUNG INTELLECTUALS, THE SOURCES SAID.

THIS INDICATES THE MARXIST-LENINIST PARTY, LED BY GENERAL SECRETARY NGUYEN VAN LINH, IS REAFFIRMING ITS STANCE OF NOT FOLLOWING A REFORMIST LINE LIKE THE SOVIET UNION BUT OF MAINTAINING POLICIES BASED ON ITS ONE-PARTY RULE, POLITICAL ANALYSTS SAID.

LINH EMPHASIZED THE NEED TO MAINTAIN POLITICAL STABILITY WHEN HE ADDRESSED THE FINAL SESSION OF THE PARTY MEETING, WHILE EXPRESSING HIS INTENTION TO PUSH AHEAD WITH ECONOMIC REFORMS, THE SOURCES SAID.

BACH'S OUSTER IS THOUGHT LIKELY TO DRAW REACTIONS FROM INSIDE AND OUTSIDE THE COMMUNIST PARTY, ESPECIALLY FROM MEMBERS OF THE HO CHI MINH COMMUNIST YOUTH GROUP AND OTHER INTELLECTUALS WHO SUPPORT THE REFORMIST LEADER, THE ANALYSTS ADDED.

SAN DIEGO (MARCH 28) PR NEWSWIRE - Jostens Learning Corp., the leading provider of integrated learning systems (ILS) to K-12 education, is building upon its success in providing Apple ILS solutions with an aggressive program of Macintosh courseware development.

Designed to take advantage of the powerful features of the Macintosh, the new ILS courseware will operate under standard Apple product and network configurations. A Macintosh-based management system will enable customers to manage both existing Apple II courseware and the new Macintosh courseware. Customers will be able to use their current Apple II computers and Jostens Learning courseware while expanding their network to include Macintosh computers and courseware.

This development effort is consistent with Jostens Learning's commitment to providing the highest quality instructional technology solutions. No release dates have been announced for the new products.

"Educators can be sure that Jostens Learning is keeping pace with Apple's Macintosh product offerings, while continuing to enhance and support our Apple II courseware," said John Kernan, CEO of Jostens Learning. "This makes our alliance with Apple even stronger."

"We are delighted that Jostens Learning sees the tremendous potential of the Macintosh for instruction," comments Bernard Gifford, vice president of education at Apple Computer. "We look forward to continuing our relationship with Jostens Learning to provide quality integrated instructional systems to schools."

CONTACT: Mary Claire Scanlon of Jostens Learning Corp., 619-587-0087 or 800-521-8538, ext. 6238.

SAN DIEGO (MARCH 28) PR NEWSWIRE - DHL Airways Inc. (DHL), and Mail Boxes Etc. (NASDAQ: MAIL) (MBE) announced today that they have entered into an agreement whereby DHL will become the preferred shipper of domestic overnight and international air express documents and packages for MBE's network of 1,100 postal and business service centers in the United States. Considering Mail Boxes Etc.'s network growth rate of one new outlet per day, the agreement could provide DHL with a drop-off location in every significant population center in the country within the next few years.

The agreement also requires DHL to notify its customers that participating MBE centers are designated drop-off points for DHL shipments. The majority of Mail Boxes Etc.'s franchised centers are expected to sign up for the new domestic program, thereby increasing the number of DHL's global drop-off points to more than 2,200 locations.

For MBE franchise owners, the agreement provides highly competitive volume pricing, as well as price incentives for shipments directed to MBE centers by DHL.

"I believe the agreement will provide both companies a significant competitive advantage in our respective industries," said MBE President and CEO Tony DeSio.

"This agreement dramatically increases our drop-off locations," said Thomas Honey, DHL's senior vice president of sales, marketing and customer service. "It will now be much easier for our customers to do business with us."

Started in 1980, San Diego-based Mail Boxes Etc. is today the nation's largest franchisor of postal, business and communication services with centers located in 43 states, Puerto Rico, Canada, Mexico and Japan. A public company since 1986, MBE has been ranked by Forbes magazine as No. 42 out of "America's 200 Best Small Companies."

DHL Worldwide Express is the world's largest and most experienced international air express network. DHL Airways Inc., the network's U.S. arm, is headquartered in Redwood City, Calif. and operates an airline and sorting hub facility in Cincinnati.

CONTACT: A.W. (Tony) DeSio, CEO of Mail Boxes Etc., 619-452-1553, or Dean Christon of DHL Airways Inc., 415-593-7474, ext. 2615

#90087p0022 03/28/1990 ~PR Newswire

LONDON (MARCH 28) PR NEWSWIRE - Hawker Siddeley Group announces that a new divisional structure is being introduced with effect from April 1990.

The profit centers in the Hawker Siddeley Group are to be re-grouped into Divisions within which there will be common products and/or markets. In this way it will be possible to develop improved strategic focus for each grouping and achieve the potential benefits of synergy as our businesses grow and become increasingly global.

There will be seven divisions - Electric Motors - Electric Power - Instruments and Controls - Batteries - Aerospace - Rail - General Engineering. These divisions will be supported by group staff executives in finance, strategic planning and human resources.

The following appointments are made with immediate effect: Philip Howard will be responsible for the Electric Motors Division which will broadly consist of the Brook Crompton and Fasco Motor businesses. Turnover of these businesses in 1989 was 264 million pounds sterling.

Bob Hampson will take responsibility for the Electric Power Division which is basically comprised of the Brush and South Wales Transformer and Switchgear businesses, Hawker Siddeley Power Engineering and Mirrlees Blackstone. Turnover of these businesses in 1989 was 448 million pounds.

Frank Mack will be responsible for Instruments and Controls which basically consists of the Fasco Sensors and Controls businesses, Hawker Instruments and other specialist components -- instruments and systems businesses. Turnover of these businesses in 1989 was 265 million pounds.

John Richardson will have responsibility for all the battery businesses including the Tungstone and Oldham lead acid batteries as well as lithium based batteries of Power Conversion and Crompton. Turnover of these businesses in 1989 was 166 million pounds.

Tim Sallitt will be responsible for the Aerospace Division which will principally consist of Hawker de Havilland, Hawker Pacific, Standard Aero and HDA Forgings. Turnover of these businesses in 1989 was 262 million pounds.

Howard Grant assumes responsibility for all our rail interests which include the Westinghouse Brake and Signal group of companies and the Brush Traction division. Turnover of these businesses in 1989 was 179 million pounds.

David Bury continues as finance director of the group. Duncan Lewis joins the group executive as director-strategic planning on April 2 from British Telecom where he has been director- procurement, strategy and network services in the U.K. division.

CONTACT: Dr. Alan Watkins, managing director, in London: 1-930-6177, or Alan Bayley, in London: 1-627-7718, both of Hawker Siddeley Group PLC.

MOUNTAIN VIEW, CA (MARCH 28) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today announced that Al Coe has joined the company as vice president of manufacturing. He will be responsible for manufacturing operations for all of the company's products world-wide.

Prior to joining Silicon Graphics, Coe, 51, was vice president of manufacturing for Convergent/Unisys. Coe joined Convergent in 1983 as manufacturing manager and was promoted to vice president of manufacturing in 1984. An active proponent of automation and product miniaturization, Coe led the industry by implementing surface mount technology in the manufacturing operation at Convergent. Coe began his career at Texas Instruments where he worked for 18 years managing manufacturing in various divisions, including two years in Singapore at TI's Integrated Circuit manufacturing facility.

Mark Perry, Silicon Graphic's executive vice president said, "Silicon Graphics has continued to grow in complexity and size. Al's demonstrated leadership and breadth of experience in widely varied areas within high technology manufacturing will make a very valuable contribution to the company's current manufacturing team."

Coe is a member of the American Electronics Association, Surface Mount Technology Association and was formerly on the board of directors for the Arthritis Foundation. He holds a bachelor of science degree in Industrial Engineering from Iowa State University and completed graduate studies at Southern Methodist University in marketing and organizational development. Silicon Graphics Inc. is the leading manufacturer of high performance workstations and computing systems for visual processing applications. These workstations are used by engineers, scientists and creative professionals in the design, analysis, manufacture and simulation of three dimensional products and services. The company's stock trades on the New York Stock Exchange under the symbol SGI.

#90087p0025 03/28/1990 ~PR Newswire

LONDON (MARCH 28) PR NEWSWIRE - Hawker Siddeley today announces a 10 percent increase in profit before tax to 202.1 million pounds sterling (1988: 183.7 million pounds) for the twelve months to Dec. 31, 1989.

Group turnover rose by 19 percent to 2,146 million pounds (1988: 1,797 million pounds), and earnings per share increased by 11 percent to 62.5p (1988: 56.2p).

A final dividend of 15.0p (1988: 14.1p) is being recommended by the board, making a total for the year of 25.0p (1988: 22.5p), an increase of 11 percent.

The figures reflect strong underlying progress in the group's manufacturing businesses, where trading profit improved by 15 percent. However, the overall results were impaired by the performance of the electrical power contracting business of the group which lost 6 million pounds compared with a profit of 3 million pounds in 1988.

Significant successes were achieved by the group during 1989 in winning major new rail traction contracts from British Rail, Eurotunnel and London Underground, additionally, new orders for the U.K. signalling business totalling around 100 million pounds were achieved. The electrical businesses have shown strong continued growth and now account for two-thirds of the group's trading profit. The aerospace sector of the group was strengthened by the acquisition of Standard Aero in Canada. This was a major step in the development of this core business area.

In 1989 the group earned 60 percent of its profits from activities based overseas compared with 50 percent in 1988. This reflects the moves over the last four years which have been made to reduce the group's dependence on the U.K. market. An encouraging feature is that trading profits earned in Continental Europe doubled in 1989 to 12 million pounds.

During the course of the year, the group made several strategic acquisitions in business segments which offer significant growth opportunity. These acquisitions, which are performing well up to initial expectations, cost a total of 157 million pounds and have been funded in part by the group's continuing program of withdrawal from peripheral activities.

In addition to the expenditure on acquisitions mentioned above, the Group had capital spending, aimed mainly at increasing production efficiencies, of 87 million pounds. Despite this, the group's financial position remains strong, with gearing representing a modest 10 percent of shareholders' funds.

The extraordinary charge of 16.9 million pounds reflects the group's decision to withdraw from the mainly defense-related activities of Hawker Siddeley Dynamics Engineering and the general foundry business of Hawker Siddeley Canada (Toronto, Montreal Stock Exchanges: HSC).

The group has opened 1990 with a strong order position. Although some

weakness is seen in the businesses serving the U.K. construction and the U.S. automotive markets, this is more than offset by the order books of companies serving the rail market. This strength, combined with a maintained order position in Aerospace, Batteries, Instruments and Controls and in companies serving the Electricity Supply Industry, gives the board confidence to expect further growth of profits in 1990.

For the longer term, the group is undertaking a program of restructuring and strategic appraisal which will exploit the opportunities which lie ahead.

NEW YORK (MARCH 28) PR NEWSWIRE - Sutton Holding Corp. announced today that it has extended the expiration date of its cash tender offer for all of the outstanding shares of common stock of DeSoto, Inc. (NYSE: DSO) (including the associated preferred share purchase rights) at $50 per share, until 12:00 midnight, New York City time, on Tuesday, April 3, 1990. The offer was previously set to expire at 12:00 midnight, New York City time, on Tuesday, March 27, 1990.

Sutton Holding Corp. was advised by the depositary for the tender offer that as of 7 p.m. New York City time, on Tuesday, March 27, 1990, 2,509,490 shares of common stock had been validly tendered and not withdrawn which, together with the shares beneficially owned by Sutton Holding Corp. and its affiliates, collectively represent approximately 76.4 percent of all outstanding DeSoto shares.

Sutton believes that these shares also represent approximately 87.3 percent of the shares of common stock not owned by either Sutton Holding Corp. and its affiliates or by the DeSoto stock ownership plan and officers and directors of DeSoto.

HONOLULU (MARCH 28) PR NEWSWIRE - Barnwell Industries, Inc. (AMEX: BRN), today announced that its wholly owned subsidiary, Arctic Papaya, Inc., has formed a Hawaii general partnership, Pacific Tropical Products, with an affiliate in which Arctic Papaya, Inc., is a two-thirds general partner. Pacific Tropical Products has acquired all the assets of Pacific Tropical

Products, Inc., a company that had been engaged in the packing and marketing of papayas. Mead Kirkpatrick will continue to manage the Pacific Tropical Products operation.

Pacific Tropical Products will use a recently installed vapor heat process to treat papaya in order to eliminate fruit fly infestation, enabling it to harvest and market higher quality and more desirable tree-ripened fruit.

Pacific Tropical Products hopes that the quality of the fruit it will be able to ship using this vapor heat process will enhance the total market demand for papayas and strengthen the local industry. Pacific Tropical Products presently sends papayas to the U.S. mainland and after receipt of the necessary government approvals, plans to export papayas to Japan.

CONTACT: Martin L. Jokl, vice president of Barnwell, 808-836-0136; or Ron Como of Ron Como & Associats, 212-227-3010, for Barnwell.

SIMSBURY, CT (MARCH 28) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) announced today the sale of a new issue of convertible preferred stock for $23.2 million to a group of investors led by Tinicum Incorporated, a company owned by the family interests of Derald H. Ruttenberg and Eric M. Ruttenberg.

James E. Swiggett, chairman and chief executive officer of Kollmorgen, said: "We are pleased to have as investors in the company such a highly regarded and successful group. We look forward to working together with them to enhance the value of Kollmorgen for its shareholders."

The convertible preferred stock issued to the Tinicum group has a dividend rate of 9.5 percent per year and is convertible into an aggregate of 1,717,591 shares of Kollmorgen common stock, representing approximately 13.8 percent of the company's outstanding shares and approximately 11.9 percent on a fully diluted basis (giving effect to the conversion of all the company's convertible securities and exercise of employee stock options).

Under the agreement between the company and the Tinicum group, two representatives of the Tinicum group have been elected to the company's 12-person board of directors.

Vernitron Corporation has initiated proceedings in the Connecticut Superior Court seeking to restrain the transaction.

Kollmorgen Corporation has continuing operations focused in two business segments: special purpose servo motors and controls and electro-optical

instruments.

MCLEAN, VA (MARCH 28) PR NEWSWIRE - JHM Mortgage Securities L.P. (NYSE: JHM) announced today that it has received a letter from the Office of Thrift Supervision (OTS) confirming that federal savings associations may invest in JHM units under existing federal regulations.

JHM Mortgage Securities L.P. is a publicly-traded limited partnership engaged in the business of acquiring, selling and investing in mortgage and derivative mortgage assets.

The OTS letter states that for regulatory purposes an investment in JHM units will be treated as an indirect investment in the partnership's underlying mortgage assets. The letter also states that for risk-based capital purposes under the new OTS capital rules an investment in the partnership's units will be calculated by proportionately risk-weighting the assets in the partnership's portfolio in a manner similar to the alternative method allowed for mutual funds. For example, if 50 percent of the total assets of the partnership are invested in FNMA certificates with a 20 percent risk-weight and the remaining 50 percent is invested in mortgage derivative assets with a 100 percent risk weight, the partnership's units would carry a blended risk-weight of 60 percent. The partnership will supply information to investors on a quarterly basis to facilitate timely recomputation of risk-weights.

According to Stephen P. Gavula, chairman of the board and chief executive officer of JHM Mortgage Securities, "many types of mortgage assets provide attractive investment returns but carry high capital burdens for thrifts. The partnership provides savings associations and other investors with a unique way to invest in a professionally managed portfolio of diverse mortgage assets, with the advantage of market liquidity and favorable capital treatment."

JHM Mortgage Securities L.P. is authorized to invest in a wide range of mortgage assets, including GNMA, FNMA and FHLMC mortgage-backed certificates, stripped mortgage securities, derivative mortgage securities and mortgage servicing rights. As of Dec. 31, 1989, the partnership's asset composition was 75 percent FNMA and FHLMC mortgage pass-through securities, 22 percent CMO residual interests and 3 percent cash and cash equivalents. These percentages and the partnership's asset composition will vary from quarter to quarter.

JHM Mortgage Securities L.P. is managed by JHM Mortgage Capital Corporation and is affiliated with the JHM Group of McLean. For further information call 703-749-8200.

CONTACT: Stephen P. Gavula, 703-749-8230, or C. Thomas Williamson III, 703-749-8220, both of JHM Mortgage Securities L.P.

LOS ANGELES (MARCH 28) PR NEWSWIRE - Advertising revenues for Times Mirror's Newspaper Publishing group for the four weeks ended March 4, 1990 decreased 1.9 percent to $128,362,000 from $130,898,000 in the prior year. For the nine weeks, Jan. 1 through March 4, 1990, total advertising revenues fell 2.8 percent to $282,028,000, compared with $290,180,000 for the period Jan. 1 through March 5, 1989.

The cumulative results for 1990 contained nine Sundays, compared to 10 Sundays in the comparable period of 1989.

"Advertising volume at our Eastern newspapers and our magazines remained at depressed levels in February, well below our earlier expectations for these segments," Robert F. Erburu, chairman and chief executive officer, said.

"At the same time, strong circulation growth at the Los Angeles Times has increased operating costs, despite lower newsprint prices."

"As a result of the deterioration in the newspaper group's operating performance, coupled with downturns in our other advertising supported business lines, we now expect first quarter operating results in 1990 to be considerably lower than the 1989 level."

SAN FRANCISCO (MARCH 28) PR NEWSWIRE - BEI Electronics Inc. (NASDAQ/NMS: BEII) today announced that it is participating in negotiations which could lead to the purchase of Systron Donner, an aerospace subsystems and components company headquartered in Concord, Calif., by a new corporation formed by BEI.

Systron Donner is currently part of the British company, THORN EMI. In the year ended March 31, 1989, the company reported sales in excess of $90 million, according to Peter Paraskos, president of Systron Donner, who --

together with other senior managers -- will participate in the acquisition.

Consummation of BEI's purchase of the assets of Systron Donner is subject to various conditions, including negotiation of a definitive purchase agreement satisfactory to THORN and BEI, approval of their respective boards of directors, determination of a final purchase price and receipt by BEI of satisfactory financing.

"Systron Donner is a significant Bay Area high technology company with a fine history, and we are delighted at the possibility of its returning to Bay Area ownership," said George Brown, BEI president and chief executive officer.

BEI, headquartered in San Francisco, designs, manufactures and markets electronics, ordnance and motion control systems and components used in military, commercial, industrial and aerospace applications. The company has major operations in California, Texas and Arkansas and is listed by Forbes among the 200 best managed small businesses in the United States.

MIAMI (MARCH 28) PR NEWSWIRE - Samsung, the Korean electronics manufacturer, has reached an agreement with ABC Cellular International to distribute its complete line of cellular telephone equipment throughout the Caribbean and Central America, it was announced today by Richard Nixon managing director of American Business Communications International.

The agreement calls for ABC Cellular International to market Samsung's popular SC-2000 Mobile, the ST-1000 Transportable Cellular, and the SH-100 Portable Cellular Telephones to the entire Caribbean Basin, Venezuela, Chile and all Central American countries with the exception of Mexico. According to Nixon, "The Samsung name has one of the strongest brand identities in Third World markets. We are very proud to bring this latest technology to the Caribbean and Central America, which will directly improve the economies of these countries through the increased scope and quality of each telecommunication network."

In an interview from Seoul, Mr. Park, Samsung's Export Manager said, "We are investing a great deal of manpower and finances to develop successive cellular products and play a great role in the development of this industry. Our selection of ABC Cellular International because of its distribution support services and network development will assist us in reaching this goal."

ABC Cellular International will be featuring the Samsung line at InterCom

'90, the largest annual telecommunications and informatics conference and exhibition for the Americas to be held at the Hyatt Regency Hotel/Miami Convention Center in downtown Miami on March 28 and 29.

ABC Cellular International is a wholly owned subsidiary of American Business Communications, one of the oldest and largest cellular telephone companies in the U.S. ABC Cellular operates three offices in South Florida with its administrative and operations center in Miami Lakes, Fla.

FAIRFIELD, CT (MARCH 28) PR NEWSWIRE - Aeroflot, the Soviet national airline, has selected GE Aircraft Engines' CF6-80C2 to power five firm and five option Airbus Industrie A310-300 aircraft in an engine order potentially worth more than 150 million U.S. dollars.

The CF6-80C2 will be the first Western-manufactured aircraft engine in Aeroflot's fleet of more than 3,000 aircraft, and GE is the only western aircraft engine manufacturer to have received engine orders from Eastern European airlines.

Aeroflot selected the -80C2 after extensive engine evaluations, which included briefings by a GE delegation in Moscow last November. In February, GE Aircraft Engines also hosted a 13-man Soviet team for five days at its Evendale, Ohio, manufacturing facility.

Delivery of the five firm A310s is scheduled to begin in late 1991 and continue through mid-1992.

Aeroflot plans to use the GE-powered aircraft to improve the standard of its service on international routes between Western Europe and Southeast Asia through Moscow.

Aeroflot will have all -80C2 engines serviced by one of the CF6 maintenance centers located in Western Europe, most likely Lufthansa German Airlines.

Although the Soviet market is new to GE Aircraft Engines, its parent company, General Electric (NYSE: GE), has enjoyed a successful working relationship with the Soviets since the 1920s in areas such as power generation, transportation, medical equipment, and other industries.

Today, there are more than 400 GE-designed industrial gas turbines in the

U.S.S.R.; GE Medical Systems has been involved with the Soviets in the areas of ultrasound and computed tomography (CT) scanners; and GE Plastics has worked with the Soviet automotive industry since the late 1970s.

General Electric, which opened its Moscow office in 1973, has earned more business and gained more experience in the U.S.S.R. than any other U.S. manufacturer over the last two decades, with sales nearly doubling in recent years.

CONTACT: George Jamison, 203-373-3044 or (home) 203-270-1439; Dwight Weber, 513-243-6136 or (home) 513-742-1645; or Richard Kennedy, 513-243-5805 or (home) 513-542-2167, all of GE.

#90087p0045 03/28/1990 ~PR Newswire

BEVERLY HILLS, CA (MARCH 28) PR NEWSWIRE - Pathe Communications Corp. (NYSE: PCC) today reported income before extraordinary items of $19.8 million, or $.33 per share, for the fourth quarter ended Dec. 30, 1989, compared with a loss before extraordinary items of $4.6 million, or $.51 per share, in the prior year period. Including the extraordinary gain in both periods, the company posted net income of $22.2 million, or $.37 per share, in the fourth quarter of 1989 compared with $25.3 million, or $2.12 per share, a year earlier. Fourth quarter revenues were $78.5 million in 1989 versus $111.3 million in the same period last year.

For the year ended Dec. 30, 1989, Pathe posted a net loss of $32.4 million or $1.13 per share, compared with net income of $21.4 million, or $1.57 per share, in the prior year. The loss before extraordinary item was $61.1 million in 1989 compared with $8.5 million in 1988. Per share results are based on a more than doubling of average shares outstanding compared with the prior year.

Total revenues for the year were $349.5 million compared with $371.1 million in the prior year. Revenue from cinema operations increased 10 percent to $166.6 million, while revenue from motion picture distribution in 1989 was $185.3 million compared with $224.7 million in 1988.

The past year's results included an extraordinary gain of $28.7 million ($29.9 million in 1988) from the company's early extinguishment of debt. Non-operating gains of $62.3 million in 1989 compared with gains of $62.1 million in the prior year, reflecting sales of certain assets in both periods.

The sale of certain European theater assets in 1989 resulted in a gain of $55.9 million recorded in the fourth quarter of 1989. However, results for the year did not include an estimated gain of $90 million resulting from the same transaction that will be recorded in 1990 when all conditions of

the sale for recording these additional revenues will be met.

As anticipated, profitability in 1989 was adversely affected by $47 million of additional amortization of the company's old film library because of a decrease in estimated future revenues and $14 million for films over five years old that were fully amortized in 1989.

Pathe Communications Corp. is one of the world's largest producers, distributors, and exhibitors of motion pictures primarily for the international theatrical market. The company also distributes motion pictures for commercial television and home video markets.

CONTACT: Craig A. Parsons or Roger S. Pondel of Rifkind Pondel & Parsons, 213-207-9300, for Pathe Communications.

ATLANTA (MARCH 28) PR NEWSWIRE - First Liberty Financial Corp. (NASDAQ: FLFC) announced today that its board of directors has determined not to pursue a sale of the company.

R. Gordon Rowell, the company's chairman and chief executive officer, said that this decision was made upon completion of the 10-month evaluation of the company's strategic alternatives by its financial advisor, Goldman, Sachs & Co., and that the advice of Goldman, Sachs, based upon the current economic and regulatory environment led to the decision. Last month, Rowell had announced that potential acquirors of First Liberty had been identified and that its board was prepared to accept an offer fairly representing the company's value.

"We have decided, in consultation with Goldman Sachs, that under existing circumstances it is not in the best interests of our stockholders to continue to pursue a sale of the company," Rowell said. "Our primary objective continues to be to maximize stockholder value, and the board believes that we can best attain that goal by continuing to operate the company as contemplated under our existing business plan."

As previously announced, First Liberty has agreed to sell its North Georgia Banking Division, comprisig 17 banking offices with deposits in excess of $200 million, to SouthTrust Corp. of Birmingham, Ala. Following completion of the SouthTrust transaction, First Liberty expects that its assets will approximate $700 million, with 18 banking offices in the Middle Georgia, South Georgia and Coastal Georgia regions and a separate mortgage company, Liberty Mortgage Corp. First Liberty's principal subsidiary, Libety Savings Bank, F.S.B., will comply with and exceed all applicable regulatory capital requirements after completion of the SouthTrust transaction.

First Liberty Financial Corp. is the holding company for Liberty Savings Bank, F.S.B. and Liberty Savings Bank of Georgia, F.S.B., operating 35 banking offices throughout Georgia. First Liberty common stock is quoted through the National Market System of the National Association of Securities Dealers (NASDAQ) under the symbol FLFC. First Liberty 8 1/4 percent Convertible Subordinated Debentures are quoted through the NASDAQ under the symbol FLFCG.

#90087p0051 03/28/1990 ~PR Newswire

OAK BROOK, IL (MARCH 28) PR NEWSWIRE - The L. E. Myers Co. Group (NYSE: MYR) (Myers) announced today that its board of directors adopted a shareholder rights plan.

The board of directors adopted the rights plan after careful consideration of concerns with respect to unsolicited takeover attempts of the company raised by its surety, which provides construction bonding for the company, and its bank, which provides the company with its operating line of credit. The rights plan is intended to protect stockholders by compelling prospective purchasers of the company to negotiate fair acquisition terms with the board of directors. A brief description of the key elements of the rights plan is set forth below.

The company further announced that it had established a surety bonding relationship with Insurance Company of North America (INA).

The company's chairman and chief executive officer, Charles M. Brennan, said "the company was very pleased to have re-established a normal underwriting relationship with INA. This is an important aspect of our business and INA is a major participant in the market place."

Myers specializes in overhead and underground outdoor electrical construction. This includes construction and maintenance of transmission lines, distribution systems, substations, outdoor lighting and signal control systems for public investor owned electrical utilities, heavy industry and government facilities.

The board of directors declared a special dividend of one purchase right for each outstanding share of Myers common stock, payable on April 16, 1990 to stockholders of record on such date. Each right entitles the holder to purchase one-sixth of a share of Series I preferred stock of Myers at an exercise price of $23.00 (subject to adjustment to prevent future dilution). The board of directors has indicated that it believes the long-term value of Myers is reflected in this exercise price and will be preserved through the adoption of this rights plan.

The rights will not be exercisable, and will be attached to and trade with the common stock until (i) ten days after the announcement of a tender offer to acquire 20 percent (40 percent if the offeror beneficially owns 20 percent or more of the company's outstanding voting stock on March 27, 1990) or more of Myers voting stock, (ii) the acquisition by a third party of 20 percent (40 percent if the party beneficially owns 20 percent or more of the company's outstanding voting stock on March 27, 1990) or more of Myers voting stock or (iii) declaration by the board of directors that any person is an adverse person as defined in the rights plan. At such time the rights will become exercisable and separate rights certificates will be issued.

#90087p0053 03/28/1990 ~PR Newswire

GUILDERLAND, NY (MARCH 28) PR NEWSWIRE - Intermagnetics General Corporation (NASDAQ: INMA) today reported net sales for the third quarter ended Feb. 25, 1990, of $12,518,000, compared to $10,715,000 in the corresponding quarter of last year. The company's net earnings decreased to $117,000, or $.02 per share, compared to $450,000, or $.07 per share last year.

For the first nine months of fiscal 1990, net sales were $31,601,000,

compared to $30,320,000 in the previous year. Net earnings were $443,000, or $.07 per share, compared to $1,270,000, or $.20 per share, in the same period last year.

In announcing the results, Carl H. Rosner, president, commented, "I am pleased with the progress that IGC made during the third quarter in implementing plans for larger scale production of our newly developed MRI magnet and resolving virtually all of the start-up problems. While costs associated with this effort continued to impact profit margins during the quarter, the way is now clear to achieve significantly higher magnet volumes and to improve profitability."

Rosner stated further, "As discussed in previous quarterly reports, superconductive wire revenues have been lower than last year. However, in the third quarter, production of MRI wire increased and work began on recently received orders for wire for the Superconducting Super Collider (SSC)." He concluded by stating, "With record order backlog levels, and meaningful improvements in profitability expected in the fourth quarter of fiscal 1990, I am increasingly optimistic about the coming year."

IGC is a leading manufacturer of superconducting wire and superconducting magnet systems, especially those used in magnetic resonance imaging (MRI) medical diagnostic imaging systems. The company also produces cryogenic equipment, permanent magnet systems and material separators.

LEXINGTON, MA (MARCH 28) PR NEWSWIRE - Despite some uncertainty because of world events, "we look for another good year for Raytheon," said the diversified technology company's Chairman and CEO Thomas L. Phillips.

In a letter to stockholders contained in Raytheon's (NYSE: RTN) annual report released today, Phillips and company President Dennis J. Picard reviewed Raytheon's fifth consecutive record year of earnings, sales and earnings per share. Pre-tax profits were up in all five of the company's business segments -- including Electronics, the largest segment, where government business remained strong. At the end of 1989, the company had a record backlog of orders totaling $9.595 billion.

The company's diversified commercial base made a significant contribution to the company's record year. Phillips said, "$37 million of the $52 million in Raytheon's total pre-tax growth in 1989 came from commercial operations outside of the Electronics segment."

Phillips noted that events in Eastern Europe and improving relations between the United States and the Soviet Union have created pressure on the stocks of companies doing business with the U.S. Defense Department. He said, "Raytheon, however, is a lot more than 'just another defense company.'"

The letter noted that Raytheon has a strong and diverse defense base; examples cited were major 1989 awards for surveillance systems, sonar, electronic countermeasures, military communications and missile systems.

In early 1990, a new model of the Beechjet was chosen by the U.S. Air Force for a specialized pilot training program. With options, the total buy would include 211 aircraft, all built by Raytheon's Beech Aircraft subsidiary. It has been called the largest government acquisition of general aviation aircraft in the industry's history and quickly spurred 32 orders for the commercial version of the light jet.

Raytheon is also strong in non-defense work for the U.S. government -- an example being its work on three major FAA air traffic control programs which have a total value, including options, of more than $1 billion.

Raytheon's funded U.S. government backlog at the end of 1989 was a record $6.974 billion.

And Raytheon has significant international business; the letter noted a new $469 million contract extension from Saudi Arabia for support of their Hawk missile system.

Raytheon enters the '90s with a strong balance sheet and a modern infrastructure. "Our extensive capital investment program has significantly modernized Raytheon's facilities," he said. "We will continue to invest in producibility and cost reduction, because quality and cost are critical success factors in every industry in which we compete."

"Throughout the company we have talented and committed people in place and rising through the ranks. We have confidence in them -- and in our company," said Phillips. "We look for another good year for Raytheon."

DALLAS (MARCH 28) PR NEWSWIRE - The board of directors of J.C. Penney Company, Inc. (NYSE: JCP) increased the regular quarterly dividend on the company's outstanding common stock by 10 cents to 66 cents per share. The 17.9 percent increase brings the indicated annual rate to $2.64 and follows a 12 percent quarterly dividend increase in 1989.

In making the announcement, William R. Howell, chairman of the board, said "This dividend increase demonstrates the board of directors' continuing confidence in our prospects for profitable growth in the years ahead."

The increased dividend will be payable on Tuesday, May 1, to stockholders of record at the close of business on Tuesday, April 10.

MIAMI (MARCH 28) PR NEWSWIRE - General Development Corporation (NYSE: GDV) announced today the appointment of Chesterfield Smith as a director to fill a vacancy created by the recent resignation of the company's two principal executive officers.

Smith, a senior partner in the Florida law firm of Holland & Knight and a former president of the American Bar Association, said: "I welcome the challenge of working with a committed and able group of individuals to attempt to turn General Development around and restore it to a position of pre-eminence in Florida's economy."

General Development also announced it had received inquiries from several groups expressing interest in a possible investment in the company, the purchase of certain of its assets or an outright acquisition of the company. A spokesman for General Development stated that its financial advisor, Donaldson, Lufkin & Jenrette Securities Corporation, was representing the company in any discussions resulting from these inquiries.

The company cannot predict whether these discussions will result in any transaction. The spokesman also reported that negotiations were continuing with the company's revolving credit banks and other credit providers a new medium-term credit facility to accommodate General Development's anticipated capital and operating requirements. As previously announced, the company is experiencing severe financial

pressures in large part as a result of the recent Grand Jury investigation of its housing marketing practices.

On March 22, 1990, General Development pleaded guilty to a single count of conspiracy to violate the Federal mail fraud statue. At the same time it agreed to enter into a Consent Decree and establish a Restitution Fund for the benefit of home buyers who were disadvantaged by the marketing practices complained of from 1983 until Dec. 31, 1989.

United Capital and Attilio Petrocelli are attempting to repudiate an agreement with the company dated March 2, 1990, in which they agreed to cease a proxy contest and withdraw proposals for stockholder action at the company's 1990 Annual Meeting.

Petrocelli and United Capital Corp., a 12.4 percent stockholder of General Development Corporation, amended a prior action pending in the Delaware Court of Chancery seeking to be allowed to present to the stockholders at the 1990 Annual Meeting a proposal to remove the company's board of directors for cause.

DEERFIELD BEACH, FL (MARCH 28) PR NEWSWIRE - Devcon International Corp. (NASDAQ:DEVC) announced today that it will begin paying quarterly cash dividends.

Donald L. Smith, Jr., chairman and president of the heavy construction and concrete and related materials company, said the Devcon board of directors today declared the first quarterly cash dividend in the history of the company. The dividend is five cents per share payable April 25, 1990, to shareholders of record on April 12, 1990.

Smith added, "Last fall at the time of our public stock offering, we announced our intent to establish a policy of paying cash dividends. This Board action puts that policy into effect and reflects the company's continued strong performance and healthy cash flow."

He said the company presently intends to continue regular quarterly cash dividends.

Approximately 4,270,000 common shares are currently outstanding.

PITMAN, NJ (MARCH 28) PR NEWSWIRE - K-Tron International Inc. (NASDAQ: KTII) announced today that it is establishing a new subsidiary, K-Tron Pte Ltd., in Singapore, which will have responsibility for the sales, service, training and technical assistance of K-Tron's feeder and blender customers throughout the Far East.

These activities are presently conducted by K-Tron International Marketing Corp. (KIMC), another subsidiary located in Pitman.

Ulrich Wiedenbeck, vice president and general manager of KIMC, will relocate to Singapore and oversee the new subsidiary's operations. KIMC's service operation in Hong Kong will be transferred to Singapore, along with other KIMC staff from New Jersey, to form the new, expanded sales, service and technical assistance center in Singapore.

Leo C. Beebe, chairman and chief executive officer, indicated, "The move to Singapore is one more step in the globalization of our business. We are expanding our presence in the Far East to improve customer service training and technical assistance throughout the region."

Beebe added that the Far East -- with burgeoning chemical, plastics and food processing industries -- is the company's fastest growing market.

K-Tron International Inc., through its subsidiaries, is a major producer of gravimetric feeders, blenders and security systems with facilities in the United States, Europe and the Far East, and customers throughout the world.

ROY, UT (MARCH 28) PR NEWSWIRE - Iomega Corp. (NASDAQ: IOMG) announced today that it has established a new operating unit with the goal towards expanding its product offerings to include tape drives. The new unit, Iomega Tape Co. (IOTAPE), will be located in San Diego, Calif.

"We see a growing need for both Bernoulli and tape technologies as businesses become increasingly dependent on their computer data," said Fred Wenninger, president and CEO of Iomega. "Our Bernoulli removable disk technology is the leader among users who need rugged, expandable, high performance disk drives. We also want to support users who prefer

tape which is a backup only solution."

IOTAPE will be responsible for the research and development of an Iomega tape drive product line. Dr. Farouk Al-Nasser, a 20-year veteran of the tape drive industry will be the president of IOTAPE reporting to Wenninger. Prior to joining Iomega, Al-Nasser held senior executive positions at Syquest Technology, Cipher Data Products and Storage Technology.

Iomega, Roy, Utah, develops, manufactures and sells high-performance removable mass storage products. Iomega's stock is listed on the NASDAQ National Market System under the symbol IOMG.

DALLAS (MARCH 28) PR NEWSWIRE - International Broadcast Systems, Ltd. (IBS) (NASDAQ: IBTVA) announced today that Fox Children's Network has purchased the rights to the IBS property, ZAZOO U(TM). Created by children's author and illustrator, Shane DeRolf, whom IBS represents for entertainment, publishing and merchandising, ZAZOO U is a series dealing with timely, humanitarian issues, featuring the AMERICANIMALS, uniquely designed animated personalities.

Earlier last week, Fox previewed ZAZOO U to advertisers as its lead-off animated television program being showcased on the network's first Saturday morning lineup for September 1990.

"We are delighted that Fox has chosen ZAZOO U as its leadoff in its premier season on Saturday mornings," said Leslie Levine, vice president of licensing, IBS. "As ZAZOO U is just one example of DeRolf's vast talent, we anticipate this as the beginning of a long-term relationship with Fox Broadcasting Corporation."

Fox, who owns the programs, will be distributing the programs internationally.

With offices in Dallas, Los Angeles, Paris, Santiago and Washington, D.C., IBS distributes television programming in more than 120 countries. Additionally, the firm secures airtime and sponsorships internationally, provides product licensing and merchandising services, as well as broadcast management and consulting services to television stations domestically and abroad.

MIAMI (MARCH 28) PR NEWSWIRE - Eastern Airlines today issued the following clarification regarding certain press accounts which inaccurately reported yesterday's announcement about forecast losses for 1990:

The $330 million projected loss is for all of calendar 1990, not for the first quarter. That expected loss is from airline operations and is $185 million more than the $145 million included in the company's original business plan for this year.
However, after capital gains of $375 million, Eastern still expects to report a net profit of approximately $45 million for 1990. This compares with an originally projected net profit after capital gains of $230 million in the original plan.

#90087p0086 03/28/1990 ~PR Newswire
DEERFIELD BEACH, FL (MARCH 28) PR NEWSWIRE - Devcon International Corp. (NASDAQ: DEVC) today reported higher revenues and net earnings for the fiscal year ended December 31, 1989, "despite the adverse effect brought about by Hurricane Hugo interrupting customer demand for our ready-mix concrete and aggregates."

Net earnings, up eight percent to $12,003,000 compared to $11,152,000 for 1988, benefited from an additional income tax exemption which offset a slight decrease in operating income. Earnings per share were $2.88, reflecting a higher number of weighted average shares outstanding following a stock offering in October, 1989, versus 1988 earnings per share of $2.69, after adjusting to reflect the 3-for-1 stock split paid in the form of a 200 percent stock dividend in August, 1989. Revenues for 1989 totaled $75.8 million, up 17 percent from 1988 revenues of $64.8 million.

For the fourth quarter, net earnings reflecting the hurricane effect amounted to $2,638,000 or $.60 per share compared to $3,098,000 or 75 cents per share a year ago after adjusting for the stock split. Revenues were $16,853,000 versus $19,250,000 for the final three months of 1988.

Donald L. Smith, Jr., Devcon chairman and president, said, "Our earnings

for the year reflect the company's continued strong performance. Earlier today, we announced that our Board of Directors initiated quarterly cash dividends in recognition of our progress."

He noted that the company entered 1990 with a $27 million construction backlog and has already added $13 million in new contracts. "Some of this additional construction work is in Florida where the market has softened and bidding is more competitive than during the past several years. Nevertheless, we expect these contracts to have satisfactory margins."

Smith said he is especially encouraged by activities in the Caribbean where the company is actively exploring opportunities including acquisitions and joint ventures in the construction materials business as well as construction contracts.

Devcon operates ready-mix concrete and aggregate plants and performs harbor dredging and other heavy construction work on St. Thomas and St. Croix in the U.S. Virgin Islands and on the independent island nation of Antigua in the West Indies. In South Florida, Devcon is mainly in the heavy construction business, preparing sites for shopping malls, residential developments, country clubs and industrial parks.

#90087p0090 03/28/1990 ~PR Newswire

ECORSE, MI (MARCH 28) PR NEWSWIRE - National Steel Corp. today announced the official start-up of the $70 million RH vacuum degasser at its Great Lakes Division near Detroit.

The new degassing facility has a capacity of 2 million tons a year and gives National Steel the capability of producing a new family of ultra-low carbon steels, primarily for use by the automotive industry.

Company officials said the degasser marks the completion of the first major project of Phase II of its 10-year, $1.8 billion corporate capital expansion and modernization program. In Phase I of the program, which was initiated in 1984, National Steel invested some $800 million in new and existing facilities. Phase II, which was announced in 1988, calls for an additional $1 billion investment by the end of 1993.

Including the cost of the new vacuum degasser, National Steel now has committed nearly $700 million in the past five years to the expansion and modernization of its Great Lakes Division near Detroit. According to company officials, the investments are designed to enable National Steel to more effectively serve the U.S. automotive industry.

In addition to enabling National Steel to offer significant benefits to customers, the new vacuum degasser provides important internal benefits. Among these are improving productivity by enabling the steelmaking operations to work more smoothly and efficiently and increasing the refractory life of the division's BOFs by reducing the need to lower the carbon content of steel in the furnaces.

National Steel's RH vacuum degasser produces ultra-low carbon steel by using vacuum pressure to force carbon and oxygen out of liquid steel.

The general contractors for the vacuum degasser were Mitsubishi International and Marubeni America Corp. They worked in conjunction with Davy McKee Corp. through its Davy Dravo Division to complete the project. The vacuum degasser was constructed on a "turnkey" basis. It is being leased to a subsidiary of National Steel.

Financing for the project was provided by Mitsubishi Corp. and Marubeni Corp.

National Steel is the nation's sixth-largest steelmaker with major production facilities in Ecorse, Mich., near Detroit; Portage, Ind., near

Chicago; and Granite City, Ill., near St. Louis. The company is headquartered in Pittsburgh and employs approximately 12,000. It operates as a joint venture corporation owned equally by National Intergroup Inc. (NYSE: NII), and NKK Corp. of Japan. In 1989, National Steel shipped 4,957,000 tons of steel and had sales in excess of $2.6 billion.

#90087p0093 03/28/1990 ~PR Newswire

PHILADELPHIA (MARCH 28) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) said today that Unit No. 2 at the Limerick Generating Station in Montgomery County was taken off line last night to repair a leaking steam condenser tube in the non-nuclear portion of the plant.

PE said that although the leaking tube posed no safety danger, it did allow river water to mix with specially purified water used to create steam inside the reactor. This raised the impurity level of the reactor water to the point that, with continued use, it could have caused corrosive effects inside the reactor.

So the decision was made to take Unit 2 off line, find the leak and fix it. The company said it could make no estimate how quickly the unit could be returned to service until the cause and the extent of the leak is diagnosed.

The plant's other unit, Unit 1, is unaffected by the problem, and will continue to operate while the Unit 2 leak is repaired.

Prior to being taken off line last night, Unit 2 had been in continuous operation since Dec. 24, 1989, a run of 93 days.

WALTHAM, MA (MARCH 28) PR NEWSWIRE - Thermo Electron Corporation (NYSE: TMO) today announced that scientific equipment produced by its Thermo Electron Technologies Corporation subsidiary has been delivered to CNES (Centre National d'Etudes Spatiales), the French national space agency, for an orbiting experiment expected to aid in studies of Antarctica's "ozone hole."

The research project, initiated by the University of Wyoming, is known as

the Polar Ozone and Aerosol Measurement experiment or POAM II. Traveling in a polar orbit approximately 500 miles above the Earth, POAM II's nine optical sensors will collect data on ozone, water vapor, nitrogen dioxide, and other constituents of the polar atmosphere and stratospheric clouds.

"More knowledge of the upper atmosphere is needed for a variety of scientific purposes, including study of ozone depletion over the polar regions," says Bruce Kernodle, Thermo Technologies POAM II project director. "The data collected by this experiment would aid research of the extent and possible causes of ozone depletion above Antarctica."

POAM II will be carried aboard the French SPOT 3 imaging satellite, with an anticipated launch date in 1992. The satellite will fly a sun-synchronous orbit over the North and South Poles. In this path, POAM II will observe a polar sunrise and sunset on each 101-minute trip around the Earth and will measure changes in the intensity of solar spectra passing through various layers of the atmosphere.

"The data will provide a vertical profile of the atmosphere's chemical composition and related properties," Kernodle says. "Similar to the way a drilled core sample provides information about what's beneath the Earth's surface, POAM II's data will provide researchers with a layered. top-to-bottom perspective of the polar atmosphere."

Sponsors of the POAM II project are the Office of Naval Research and the Air Force Space Test Program. Thermo Technologies, based in San Diego, Calif., is responsible for POAM II's space hardware, ground support equipment, and software for transmitting and processing data. Additional U.S. participants supporting Thermo Technologies' effort include SAIC, the University of Wyoming, and the Aerospace Corporation.

Thermo Electron develops, manufactures, and markets environmental and analytical instruments, custom-engineered and pre-packaged cogeneration systems, industrial process equipment, biomedical materials and products, and fabricated biomedical and aerospace components. The company also provides metallurgical heat treating, water quality engineering, and analytical laboratory services.

HICKSVILLE, NY (MARCH 28) PR NEWSWIRE - Metro Tel Corp. (NASDAQ: MTRO) today announced it had filed a patent infringement suit in the Federal Court for the Southern District of New York against AT&T (NYSE: T) claiming the latter has been manufacturing and selling a telephone test instrument based on a patented Metro Tel design. The action seeks an

injunction and damages in an amount to be determined.

Metro Tel's Lineman's Hand Set for which a patent was issued on March 18, 1980, is a tool used by telephone system craftspersons for maintenance and installation. This type of instrument, one of the most widely used in the industry, is commonly known as a "butt set."

The patent issued to Metro Tel upon its development of the product ten years ago was for the single test set's dual capability of being able to accommodate both tone or pulse signals. The customer base for this type of test set includes telephone companies and interconnect companies, burglar alarm installation and servicing companies, and a new and growing customer base -- larger companies who have installed, operate and maintain their own telephone systems.

Metro Tel Corp. is a manufacturer of telephone system test equipment and customer premise telephone equipment.

FALLS CHURCH, VA (MARCH 28) PR NEWSWIRE - At a special meeting on March 27, 1990 in Cockeysville, Baltimore County, Md., the shareholders of Clifton Trust Bank ratified an agreement for affiliation with First Virginia Banks, Inc.(NYSE: FVB).

The announcement was made jointly by John A. Farley, Jr., chairman of Clifton Trust Bank, and Robert H. Zalokar, chairman and chief executive officer of First Virginia. They noted that the transaction has been approved by the Federal Reserve Bank of Richmond and the Virginia State Corporation Commission and the Maryland Bank Commission is expected to issue an order approving the transaction on March 29. The affiliation is scheduled to take place following the close of business on March 29, 1990.

Of the total of 226,150 shares of Clifton Trust Bank common stock outstanding as of the record date, 203,404 shares or 89.9 percent of the total were represented at the meeting in person or by proxy. 201,572 shares, representing 99.1 percent of those voting and 89.1 percent of the total voted in favor of the transaction.

Under the terms ratified at the March 27 meeting, the holders of each share of Clifton Trust Bank stock will receive 1.25 shares of First Virginia Banks, Inc. common stock for a total of 291,437 shares.

Clifton Trust Bank is a $67 million commercial bank which operates five

offices in the northern and northwest suburbs of Baltimore. Clifton Trust Bank will retain its name and will continue to operate as a separate bank within the First Virginia group with its present directors under the general policies of First Virginia. James A. Plitt, Jr. will continue as president and chief executive officer of Clifton Trust.

First Virginia Banks, Inc. is the oldest multi-bank holding company headquartered in Virginia with total resources of approximately $5.1 billion and the corporation's stock is traded on the New York and Philadelphia Stock Exchanges. Following the affiliation with Clifton Trust there will be 23 member banks in the First Virginia group, 18 in Virginia which operate 257 offices throughout the Commonwealth, three in Maryland which operate 32 offices in the Baltimore and Washington suburbs, and two in East Tennessee with 16 offices. First Virginia and its lead bank also have mortgage and insurance subsidiaries, including a second trust company with 13 offices in six states from Pennsylvania to North Carolina.

The three Maryland banks, Clifton Trust, The Commercial Bank (headquartered in Bel Air serving Harford County), and United Bank & Trust Company (headquartered in Upper Marlboro serving the Maryland counties surrounding Washington) will have assets in excess of $460 million.

#90087p0098 03/28/1990 ~PR Newswire

NEWTON, IA (MARCH 28) PR NEWSWIRE - Quality, profitability, synergy and globalization are the key business goals in Maytag Corporation's (NYSE: MYG) strategic plan for the 1990s, according to the firm's annual report which was mailed to shareowners today.

In his letter to shareowners, Daniel J. Krumm, chairman and CEO, points out that Maytag acquired Hoover in order to become a participant in overseas appliance markets. Although the acquisition has increased interest expense because of a higher debt level, Krumm said, "We believe a significant portion of our future growth will come from international business, and our current interest expense is truly an investment in the future."

The report discusses a number of the corporation's significant achievements in 1989, including the introduction of the new Maytag brand refrigerator line, a new generation of washers and dryers for the corporation's Magic Chef, Admiral and Norge brands and the development of a new transmission for Maytag brand automatic washers.

Also mentioned were new product introductions by Jenn-Air and Hoover and

the growth of Dixie-Narco's vending machine sales abroad.

The year 1989 was the third best for the U.S. major appliance industry and Maytag believes industry-wide sales will be about two percent below that pace this year. However, the corporation expects their market shares to improve in major product categories and they look for continued growth in international vending machine sales.

Maytag Corporation consists of nine companies with primary emphasis in home appliances and vending equipment. The corporation has 26 manufacturing operations in eight countries and approximately 26,000 employees. Its appliance brands include Maytag, Magic Chef, Hoover, Jenn-Air, Admiral, Hardwick and Norge. The vending equipment brand is Dixie-Narco.

HARRISON, NJ (MARCH 28) PR NEWSWIRE - Lechters, Inc. (NASDAQ-NMS: LECH) announced today that net income for the 52-week period ended Jan. 27, 1990 was $9,021,000 as compared with net income of $6,997,000 for the prior year's comparable period, a 28.9 percent increase. Net income per share for this period was $1.35 as compared to $1.15 for such period during the prior year. Sales for said 52-week period were $156,833,000, as compared with sales of $120,754,000 for the prior year's comparable period, an increase of 29.9 percent. The company's comparable store sales increased 1.7 percent during the period, as compared to the prior year's period.

For the 13-week period ended Jan. 27, 1990, net income was $7,139,000, as compared with net income of $5,642,000 in the prior year's comparable period, a 26.5 percent increase. Net income per share for this period was $.99 as compared to $.90 for such period during the prior year. Sales for said 13-week period were $63,139,000, as compared with sales of $49,383,000 for the prior year's comparable period, an increase of 27.9 percent. The company's comparable store sales increased 1.4 percent during the 13-week period ended Jan. 27, 1990, as compared with the 13-week period ended Jan. 28, 1989.

On Jan. 27, 1990, the company operated 297 stores, 63 more than a year earlier.

Lechters, Inc. is a specialty retailer of primarily brand name, non-electric basic housewares, tabletop items and kitchen textiles.

Net (loss)	(17,360)	(9,996)	(19,729)
(Loss) before extraordinary item per share	$(.45)	$(.29)	$(.68)
Net (loss) per common share	(.45)	(.31)	(.76)

Cellular service revenue increased in 1989 from $46,017,000 to $72,952,000 primarily because of subscriber growth that increased the current revenue stream. In the second half of 1989, gross margins on telephone equipment revenue increased because of increases in cellular telephone service and warranty revenues from the company's sales and service centers and because of rental revenue from the company's cellular phone rental programs.

Operating expenses increased in 1989 from $9,996,000 to $15,807,000 representing 22 percent of service revenues in both years. The increased costs in absolute terms reflected the increasing level of subscriber activity, as well as the substantial investment in the technical operations department.

Selling, general and administrative expenses rose from $30,841,000 to $44,149,000 in 1989. The increase was attributable to the increase in the number of subscriber activations, costs associated with the development of the direct sales and marketing organization and additional investment in the MIS department.

During 1989, the company replaced certain of its original switch and radio equipment (book value $21,296,000) with new equipment purchased for $12,786,000. The original equipment was sold for $11,375,000, the company recorded a loss of $9,921,000 on the sale.

In January 1990, the company and all other cellular carriers in the state of Ohio received information from the Ohio Department of Taxation (Tax Department) that leads the company to believe that the Tax Department will retroactively assess personal property taxes using a new method. Management believes that its prior accruals were properly calculated based on specific oral advice from the Tax Department, and the company intends to vigorously oppose the imposition of such additional taxes. Using the

new method, the company's liability for taxes is approximately $5,400,000 in excess of the previously accrued amounts. The $5,400,000 applies to years 1986 through 1989 as follows: $400,000 for 1986; $1,600,000 for 1987; $1,700,000 for 1988 and $1,700,000 for 1989. The additional amount has been accrued in 1989. Under Ohio tax law, the company would have to pay the assessed amount before it could protest the additional tax liability.

In March 1990, CCI closed a transaction with McCaw Cellular Communications Inc. (McCaw) by which CCI exchanged the former CCI subsidiary that owns a 5.56 percent interest in the Dallas non-wireline cellular partnership for 1,601,036 shares of CCI common stock that were owned by McCaw. The gain from this transaction, which will be reflected in the first quarter of 1990, will be approximately $48,000,000.

CCI owns cellular systems in Ohio and Puerto Rico. CCI's ownership interests in these systems represent 9,357,000 "pops" (the population of a market multiplied by CCI's ownership interest in the system.)

LANSDALE, PA (MARCH 28) PR NEWSWIRE - AEL Industries Inc. (NASDAQ-NMS:

AELNA) announced today that its AEL Defense Corp. subsidiary has been awarded a $3.4 million production contract by Raytheon Electromagnetic Systems Division, Goleta, Calif.

This competitive procurement is a follow-on production contract which calls for AEL's Microwave/Hybrid Division to produce additional Limiter/Switch/Filter, Single Pole Single Throw (SPST) and Single Pole Double Throw (SPDT) components for use in Raytheon's ALQ 184 (V) ECM pod. The AN/ALQ 184 (V) ECM pod is one of the latest U.S. Air Force tactical self-protection electronic warfare pods designed for installation on F-4, F-15, F-16, A-7, A-10, F-111 and C-130 aircraft. The products which AEL supplies are used extensively throughout the pod. It is estimated that the U.S. Air Force will purchase between 100 and 200 ECM pods each year for the next five years.

AEL is a leading supplier of electronic defense systems and subsystems. The company designs and manufactures sophisticated countermeasures, simulation and radar warning receiver systems; installs and integrates electronic and avionic equipment in military aircraft, and provides state-of-the-art antenna, microwave and integrated circuit components.

The Class A common stock of AEL Industries Inc. is traded on the NASDAQ National Market System under the symbol AELNA.

NEW YORK (MARCH 28) PR NEWSWIRE - The Quick & Reilly Group, Inc. (NYSE: BQR) reported earnings of 27 cents per share for the fourth quarter versus 22 cents per share for last year. Earnings for the fiscal year ended Feb. 28, 1990 were $1.21 versus $1.05 for fiscal 1989. The effect of the after tax write off for the brokerage firms acquired in fiscal 1990 was 43 cents per share. The projected after tax write off for 1991 fiscal year is 34 cents per share including the acquisition of Drexel Burnham Specialist Inc.

Quick & Reilly, Inc. announced the opening of its 65th branch office in Palo Alto, Calif. The company also announced that it was adding a check writing service in connection with its money market account. A new commission schedule went into effect on March 26, which will raise commissions approximately eight percents or $5 per transaction. This is the first time commissions have been raised since 1983.

JJC Specialist Corp., the company's NYSE specialist, was allocated Merry Go Round Enterprises, Inc., which listed on the New York Stock Exchange yesterday from the over-the-counter market.

U.S. Clearing Corp. started clearing for a new correspondent, Nash Weiss & Co., on March 6, 1990. Nash Weiss is one of the largest market makers in over-the-counter securities. U.S. Clearing Corp. provides clearance for 80 brokerage firms across the United States.

#90087p0124 03/28/1990 ~PR Newswire

DEARBORN, MI (MARCH 28) PR NEWSWIRE - In response to a Michigan Public Service Commission (MPSC) Order issued Tuesday, CMS Energy Corporation stated its utility subsidiary, Consumers Power Company, would participate in a Commission proceeding related to the conclusion of the MPSC's Financial Stabilization Order of 1985. Consumers Power believes that it has been in full compliance and has been supported by MPSC Financial Stabilization Compliance Orders for the years 1985-1987.

In connection with this proceeding, the Commission ordered Consumers Power to post a $450 million bond to be guaranteed by CMS Energy to support any possible refund of past financial stabilization revenue. The company believes the Commission has no statutory authority to require a bond and no jurisdiction to request CMS Energy to guarantee a bond. Consumers Power voluntarily lowered its rates on March 12, 1990, by terminating collection of Financial Stabilization revenues as a result of Consumers Power's retirement of $1.9 billion of debt and preferred and preference stock -- the standard of financial recovery established by the MPSC in its

1985 order.

Finally, the Commission ordered all the CMS Energy companies not to transfer any proceeds generated from the sale of Midland assets transferred to the Midland Cogeneration Venture (MCV) until further order of the MPSC. CMS Energy will vigorously oppose the MPSC on this matter as the company strongly believes that the Commission lacks jurisdiction over nonutility operations. CMS Energy's debt and equity interests in the MCV are now held by direct subsidiaries of CMS Energy which acquired these interests in exchange for a CMS Energy debenture with an equivalent fair market value in the opinion of a nationally recognized investment banker.

CMS Energy Corporation (NYSE: CMS) is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas, interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth-largest combination utility.

ROCKVILLE, MD (MARCH 28) PR NEWSWIRE - GE Information Services (GEIS) has announced the availability of QuikNews Express, a personalized electronic news clipping service integrated with its QUIK- COMM System electronic messaging service.

QuikNews Express enables a subscriber to establish an interest profile of search keywords and standing story selections. Standing stories are news items on particular topics which are received regularly, such as leading stock market indicators. The QuikNews Express application receives news feeds throughout the day from various information providers, covering news areas such as business, financial, and the computer industry on an international scale.

As news articles are received, they are checked against subscribers' profiles. Stories which match a subscriber's profile are "packaged" as a QUIK-COMM System message and delivered to a subscriber's personal electronic mailbox immediately following receipt and processing.

Key benefits to subscribers of QuikNews Express include: -- Time Savings - It electronically scans volumes of news for specific items so the subscriber won't have to do it manually;

-- Convenience - News of interest to the subscriber is automatically delivered to the subscriber's personal electronic mailbox.

-- Competitive Advantage - It provides news on competitors, markets, and industries in order to assist subscribers in making informed, timely decisions.

-- Information Access - It provides comprehensive coverage of the latest international news.

The information provided in QuikNews Express is combined from the inputs of more than 10 internationally respected newswires, as well as the Securities and Exchange Commission and other specialized sources. Some of these wire services include: UPI, Agence France Presse (France), Deutsche Press-Agentur (West Germany) Agencia EFE (Spain), Kyodo News Service (Japan), Xinhua News Agency (China), BusinessWire, PR Newswire, and Newsbytes News Network (computer and electronics news). Some information provided from these sources through QuikNews Express is edited and made available by Comtex Scientific Corporation, Stamford, Conn.

QuikNews Express marks the introduction of GEIS' corporate QuikNews Services. QuikNews Express is the first of a series of QuikNews Service subscription options that will be targeted to meet the information needs of the corporate user. For further information about QuikNews Express, please call 1-800-433-3683 or contact your local GE Information Services sales office.

GE Information Services, a division of General Electric Company (NYSE: GE) USA, is headquartered in Rockville, Md. It offers a wide range of value-added services for network-based business applications, systems integration and software development services, and network management services. GEIS' QUIK-COMM System electronic messaging service may be accessed through PC Mailbox, the BusinessTalk System, and BusinessConnect.

NEW YORK (MARCH 28) PR NEWSWIRE - CrossLand Savings, FSB (NYSE: CRL) today announced the termination of negotiations pursuant to its letter of intent with Coast-To-Coast Financial Corporation which contemplated a capital infusion and recapitalization of CrossLand. CrossLand further announced that management will as promptly as possible present to CrossLand's board of directors an alternative recapitalization plan.

CrossLand had received considerable adverse comments regarding the proposed capital infusion and recapitalization plan from holders of each of its three classes of stock. Additionally, CrossLand had recently become concerned regarding certain regulatory aspects of the transaction. Accordingly, CrossLand several days ago had commenced discussions with its financial and legal advisers as to CrossLand's options. While these discussions were ongoing, CrossLand was advised by Coast-To-Coast earlier today that Coast-To-Coast had determined not to proceed with the transaction.

TULSA, OK (MARCH 28) PR NEWSWIRE - Hawkins Energy Corp. today reported revenues of $5.18 million for the year 1989, ended Dec. 31, compared with revenues of $5.5 million for the prior year.

A pro forma net loss of $805,000 (25 cents per share) was reported for the year compared with a pro forma net loss of $1.26 million (38 cents per share) for 1988.

Hawkins Energy, which will begin stock trading next week over- the-counter (NASDAQ: HECI), was recently formed after limited partners in 10 oil and gas drilling partnerships approved the exchange of partnership units for common stock.

Clifford S. Lewis, vice president and treasurer, said the 1989 loss includes non-recurring administrative expenses related to the exchange offer, which totalled approximately $650,000 ($403,000 after tax) or 12 cents per share after tax. In addition, the 1989 operating costs included depreciation, depletion and amortization charges of $2.6 million compared with $3.3 million in 1988.

"We have a substantial cash flow and we expect the year 1990 will show improved results," Lewis said.

Shares of Hawkins Energy common stock outstanding total approximately 3.3 million, including about 2.5 million issued to former limited partners. The pro forma results reported reflect the financial consolidation of separate business entities, each with its own restrictions and objectives.

"In the future, these combined entities will be managed with a common business strategy targeted for growth in the natural gas industry," Lewis said.

Hawkins Energy owns interests in over 200 producing wells with proven reserves of approximately 9 billion cubic feet of gas equivalent as of Dec. 31, 1989. Through its wholly owned subsidiary, Equity Compressors Inc., Hawkins Energy provides gas compression and compressor leasing services to the natural gas industry and will continue to focus on production, compression, transportation and marketing of the natural gas.

#90087p0141 03/28/1990 ~PR Newswire

FORT LAUDERDALE, FL (MARCH 28) PR NEWSWIRE - BLOCKBUSTER Video selected Grey Advertising Ltd. in London to represent its account in the United Kingdom. The company plans to open a new superstore in England every week into June, projecting 29 to be open by July of this year. BLOCKBUSTER is the largest and fastest growing video retail chain in America, opening a new superstore every day and projecting 1,400 stores by year end.

According to Thomas A. Gruber, senior vice president and chief marketing officer of BLOCKBUSTER Entertainment Corporation (NYSE: BV) the company screened 21 London area advertising agencies on paper, visited with officials of eight agencies and selected three to make final presentations for BLOCKBUSTER's growing United Kingdom account. BLOCKBUSTER's decision was made immediately after hearing presentations from three agencies on March 27. Participating in the decision-making process was H. Wayne Huizenga, BLOCKBUSTER's chairman and CEO, Gruber, BLOCKBUSTER UK franchisees and other company representatives.

"Grey Advertising was selected because we feel they best understand and are capable of handling our multi-outlet, committee-type company and franchisee retail account. Also, because they demonstrated an outstanding TV creative capability so strong that it offers potential for us to import a TV commercial or two into our USA image advertising pool of spots," Gruber stated. A comprehensive two-day BLOCKBUSTER marketing orientation for Grey Advertising executives is currently being conducted by Gruber and BLOCKBUSTER USA's Senior Director of National Marketing Brian Woods.

BLOCKBUSTER Video currently operates 1,175 video stores in 133 USA markets Guam, Canada and the UK. The company's stock is traded on the NYSE under the symbol BV.

#90087p0144 03/28/1990 ~PR Newswire

BASKING RIDGE, NJ (MARCH 28) PR NEWSWIRE - AT&T and West Interactive Corporation, an affiliate of West Telemarketing Corporation, today announced an agreement that will provide businesses innovative ways to use interactive voice technologies.

West Interactive will offer new opportunities for businesses to communicate with mass audiences and handle large volumes of calls simultaneously. The company will use AT&T 800 and 900 telephone numbers for direct sales, market research, contests, audience participation and other applications.

For example, a packaged goods company planning to introduce a new cereal might want to gauge customer reaction to its product. Using the services of AT&T and West Interactive, the company could obtain customer survey data while offering callers information about, and a free sample of, the product.

Under the agreement, Omaha-based West Interactive will develop, implement and support the interactive programs, and provide other assistance through its telemarketing representatives. AT&T will provide its MultiQuest(R) and InfoWorx(SM) interactive voice services, which use voice response technology.

AT&T InfoWorx interactive voice services allow businesses to use voice response units without having to invest large sums of money in equipment and maintenance. MultiQuest services provide businesses with high-volume 900 calling ability. MultiQuest and InfoWorx services reside in the AT&T network and provide the architecture for virtually unlimited expansion of West Interactive, which is the first company to have this type of agreement with AT&T.

"AT&T is pleased that a proven telemarketing company like West Interactive will offer these 900 service applications," said Andrea West, AT&T's national marketing manager for the MultiQuest service family. "There's enormous opportunity in these technologies and we're committed to helping our customers develop creative uses for them."

West Interactive is a nationwide provider of sophisticated audiotex information programs and related services. The companies will begin offering service in approximately 60 days.

CONTACT: Gary Morgenstern of AT&T, 201-221-6153, or home: 201-884-2110, or Troy Eaden of West Telemarketing, 800-542-1000.

#90087p0153 03/28/1990 ~PR Newswire

MORRIS PLAINS, NJ (MARCH 28) PR NEWSWIRE - Warwick Insurance Managers, Inc. (NASDAQ: WIMI) announced today its quarterly results and reported a net loss of $11,786,000 for the quarter ended Dec. 31, 1989. The net loss for the year ended Dec. 31, 1989, was $22,156,000. The company's decision to further strengthen its loss and loss adjustment expense reserves on its direct book of business accounted for $7.5 million of the net loss for the fourth quarter. The 1989 loss reserve strengthening resulted primarily from further evaluation of losses due to increased frequency, emergence and severity of claims experienced in the 1989 12-month period. Also contributing to the loss reserve strengthening was the impact of Warwick's higher net retention level of $250,000 for accident years 1987 and subsequent. For the year ended Dec. 31, 1989, the total amount of loss reserve strengthening for 1988 and prior accident years was approximately $16.4 million.

The company utilizes the services of a major independent actuarial firm to assist it in establishing its reserves for losses and loss adjustment expenses. Warwick's total carried reserves at Dec. 31, 1989, of $65.1 million, which includes the $16.4 million of reserves strengthening made during 1989, are within 3.8 percent of the reserve estimate select point of $67,7 million established by its independent actuarial firm and are within the range of reasonable reserves established by such firm.

The company provides for reserves for losses and loss adjustment expenses based on its estimates of the ultimate amounts needed in the future to pay losses and related expenses on incurred claims including claims incurred but not reported to the company. Because of the changes in the company's net retention levels, reinsurance programs, underwriting, and claims practices over the past several years, analysis of the company's reserves are subject to varying interpretations as the ultimate amounts. The company said it believes that its reserves at year end are adequate for such future claims costs.

Based on the carried loss reserves for losses and loss adjustment expenses of the company at year-end 1989, the company's independent auditors, in connection with their audit of the company's financial statements, are expected to state in their audit reports on audit that the financial statements of the company do not in their opinion present fairly, in all material respects, the financial positions of the company as of Dec. 31, 1989, and the results of operations and cash flows for the year ended 1989. In the judgment of the company's auditors it is probable that the carried reserves of the company at year-end 1989 of $65.1 million will not be sufficient to cover all ultimate claims payments and that such deficiency, aggregated with other required adjustments resulting from such

a deficiency, would result in Warwick being below the minimum capital and surplus requirements for insurance companies writing the lines of insurance currently written by Warwick. Statutory capital and surplus of Warwick at Dec. 31, 1989, is $2,744,000, which is approximately $1.1 million above minimum requirements. The auditors are also expected to state in their report that these and other matters raise substantial doubt about the company's ability to continue as a going concern. The company said that in light of the substantial loss reserve strengthening of the company during 1989 and its year-end surplus position, as well as the fact that loss reserves are estimates dependent upon numerous factors and assumptions which must be projected for future periods.

The company also stated that it is continuing with its capital infusion plans. On March 7, 1990, the company announced an agreement in principal for a proposed $12 million capital investment by G.F.A. International Ltd. G.F.A. International, which is controlled by Grant Fowler and has insurance company holdings in Great Britain, is currently in the process of performing its due diligence investigation of the company. Under the G.F.A. agreement in principal, at the closing and subject to various conditions, G.F.A. or one of its affiliated entities would contribute $12 million of new capital to the company. The company had announced in August 1989 that it had retained the investment banking firm of Donaldson, Lufkin & Jenrette to assist it in seeking to increase its capital base. The transaction is subject to various material conditions and there can be no assurance that the proposed G.F.A. transaction in fact will be consummated.

Stockholders' equity at Dec. 31, 1989, was $4,097,000, equal to $1.09 per share, as compared to $26,403,000, or $6.94 per share, at Dec. 31, 1988. Total assets at Dec. 31, 1989, were $107,702,000 as compared to $131,961,000 at Dec. 31, 1988.

During the 1989 third and fourth quarters and in the 1990 first quarter, Warwick initiated a number of price increases for particular lines, such as habitational classes of commercial multiple-peril business which were increased approximately 30 percent-40 percent over previous pricing schedules used by Warwick. Effective in November 1989, the company began utilizing an individual risk modification (IRM) factor on its commercial multiple-peril (BOP) package policies. The IRM factor allows pricing to be adjusted 40 percent upwards or downwards at the company's determination. This IRM factor replaced the company's superior risk credit that was previously in effect. These and other changes in pricing and pricing methods have effected overall increases in excess of 10 percent over Warwick's prior pricing. Underwriting guidelines have also been tightened, especially in the areas of absentee landlord, leased realty, commercial automobile, workers' compensation and on Warwick's independently filed programs for manufacturing and contractor packages. The company had previously announced its discontinuance of business in

Massachusetts, New York and Pennsylvania as part of a program to reduce expenses and improve underwriting results by concentrating on its core New Jersey business.

Direct and assumed premiums written for the three months ended Dec. 31, 1989, decreased 42.9 percent over the comparable 1988 period to 14,962,000 from $26,224,000. For the year ended Dec. 31, 1989, the company's direct and assumed premium written decreased 1.09 percent to $89,654,000 from $90,359,000 for the comparable 1988 period.

Pre-tax net investment income including capital gains/losses for the fourth quarter of 1989 was $1,810,000 compared to $1,404,000 for the 1988 period. For the year ended Dec. 31, 1989, pre-tax net investment income including capital gains/losses was $5,348,000 compared to $6,059,000 for the 1988 period. The decline in net investment income in 1989 reflects the transfer of approximately $26,586,000 of cash to the company's quota share reinsurers from Jan. 1, 1989, through Dec. 31, 1989, combined with the changes made in the investment portfolio during 1989.

Although the company continues to be on a current basis as regards all scheduled principal and interest obligations payable to its banks under its existing $12 million loan, the company previously stated that it does not expect to be able to meet the scheduled March 31, 1990, principal payment of $750,000. The company continues to be in default of certain financial covenants contained in its bank loan agreement.

The company's statutory combined ratio was 151.9 for the year ended Dec. 31, 1989, as compared to 109.7 for the 1988 period. Without the reserve strengthening of $16.4 million relating to 1988 and prior accident years, the combined ratio for the year ended Dec. 31, 1989, would have been 119.3 32.6 points lower than actually reported.

The statutory policyholders' surplus at Dec. 31, 1989, decreased to $2,744,000 from $24,044,000 at Dec. 31, 1988.

The company, through its operating insurance subsidiary Warwick Insurance, is engaged in writing commercial property and casualty insurance primarily in New Jersey.

WARWICK INSURANCE MANAGERS, INC. AND SUBSIDIARIES

Periods ended	Three Months		Year	
Dec. 31	1989	1988	1989	1988
Revenues	$13,849,959	$12,552,816	$55,376,195	$71,923,285
Loss from opers. bef. federal inc. taxes	(11,785,676)	(699,196)	(22,511,197)	(613,416)
Prov. (benefit) for fed. inc. taxes	--	(379,881)	(355,670)	(1,563,881)

Net earns./ (loss)(A)	(11,785,676)	(319,315)	(22,155,527)	950,465
Earns. per common share:				
Net earns./(loss)(A)	$(3.15)	$(0.08)	$(5.89)	$0.25
Weighted avg. common shares outst.	3,746,000	3,812,000	3,759,000	3,812,000

(A) -- Contributing to the current quarter's operating loss was the strengthening of loss reserves of $7.5 million which was caused by the increased frequency and severity on liability claims relating to accident years 1988 and prior.

WAYNE, NJ (MARCH 28) PR NEWSWIRE - Peter H. Chen has been named director of quality assurance and sanitation for the Grand Union Company, one the nation's largest retail food store companies.

In his new position, Chen will be responsible for all aspects of the company's quality control programs, including sanitation and private label supervision as well as quality control in the company's Newburgh, N.Y., food processing facility. He maintains his headquarters in the company's corporate headquarters here and reports to William A. Louttit, executive vice president and chief operating officer.

Chen joined Grand Union in May 1989 as technical group manager in the company's Newburgh food processing facility. He was previously employed by Durkee-French Foods, Inc. for more than 20 years in various capacities, including manager of quality assurance.

He graduated from the Taiwan Chung Hsing University with a bachelor of science degree in agricultural chemistry and earned a master of science degree in food technology from the University of Tennessee.

Chen and his wife, Julie, live in Kinnelon, N.J. They have two children.

PITTSBURGH (MARCH 28) PR NEWSWIRE - Equitable Resources Inc. (NYSE: EQT) announced today that its Equitrans interstate pipeline subsidiary has received regulatory approval to begin serving Columbia Gas of Pennsylvania and Virginia Electric & Power Co.

Under separate agreements signed last December, Equitrans will provide the two utilities with a total of approximately 7 billion cubic feet a year of natural gas storage and transportation service. Both agreements cover an initial period of 10 years.

The agreement with Columbia Gas of Pennsylvania entails up to 3.45 billion cubic feet of annual service, principally to meet peak winter demand. Equitrans will furnish Virginia Power with 3.5 billion cubic feet of

year-round service which the purchaser will use to fire a new 214-megawatt combined cycle unit at its Chesterfield power station.

Equitrans President John C. Gongas noted that under current rates the two agreements will generate approximately $5.5 million of annual revenue.

Equitrans, which was formed in 1988 as a wholly owned subsidiary of Equitable Resources, operates the interstate pipeline facilities in Pennsylvania and West Virginia, including a network of 15 underground natural gas storage reservoirs. It supplies services to utilities and end-use customers in nine states from New England to Virginia.

#90087p0159 03/28/1990 ~PR Newswire

ROCHESTER, NY (MARCH 28) PR NEWSWIRE - Rochester Community Savings Bank (NASDAQ: RCSB) today reported net income of $5.0 million or $.36 per share for the first quarter ended Feb. 28, 1990, an increase of 4.2 percent from net income of $4.8 million or $.35 per share in the year-ago quarter. A significant increase in other income and stable operating expenses contributed to this quarter's results.

Leonard S. Simon, RCSB chairman and CEO, commented, "First-quarter performance was as planned. Consistent with our 1989 earnings pattern, we expect results in the second half of the year to be considerably stronger; we are on course to meet our goal of increasing earnings in 1990 by 15 percent to 25 percent over 1989. The board's confidence in achieving this goal is reflected in our decision today to raise our quarterly dividend from $.11 to $.14 per share."

Due to planned reductions in asset volume during fiscal 1989, net interest income for the 1990 first quarter was $18.9 million, compared to $21.7 million for the 1989 first quarter. Net interest margin for the first quarter of fiscal 1990 was 2.07 percent, compared to 2.17 percent for the year-ago quarter.

Simon noted, "Net interest income in the 1990 first quarter was affected by our decision last year not to grow our balance sheet in anticipation of the Shadow Lawn acquisition. During the last year, we also reduced our higher-yielding leasing and corporate bond portfolios. We expect both our net interest income and margin to be at higher levels later in the year with the movement of our one-year adjustable-rate mortgage portfolio to higher rates and continued growth of our consumer loan portfolio at favorable spreads."

Other income increased by 36.4 percent to $12.9 million in the 1990 first

quarter compared to $9.4 million in the 1989 first quarter, due to significant increases in mortgage banking income, as well as income from joint ventures and unconsolidated subsidiaries and bank fees and service charges.

Simon commented, "Non-interest revenues from our diverse lines of business continue to build other income as an important source of our core operating earnings. Mortgage banking income and fees from auto loan servicing stand out as the major forces driving the increases from prior periods."

The largest portion of increased other income was attributable to mortgage banking income of $9.8 million in the first quarter of 1990, a 28.8 percent increase from the prior year's quarter.

Simon also noted that a combination of an improved rate environment and new production outlets contributed to higher first quarter mortgage origination volumes and position mortgage banking for an excellent second quarter. Total residental mortgage originations were $313.0 million for the first quarter, up from $259.8 million in the year-ago quarter.

#90087p0160 03/28/1990 ~PR Newswire

MORRIS TOWNSHIP, NJ (MARCH 28) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) announced today that its Oak Mitsui joint venture will construct a new copper foil plant in Camden, S.C. Estimated cost of the project is $60 million. It will employ approximately 100 workers after start up in 1992.

Oak Mitsui, a 50/50 joint venture between Allied-Signal's Norplex/Oak unit and Mitsui Mining and Smelting of Tokyo, is a major U.S. supplier of copper foil, used to carry current for electronic printed circuit boards in products such as computers, communications devices, automotive controls and industrial instruments, as well as military applications.

"This new plant is critical to maintaining the world leadership position of Norplex/Oak in the copper laminate field, " said Norplex/Oak President Thomas Williams. "Our future growth is dependent on increasing our copper foil output which is Norplex/Oak's key raw material.

"We were attracted to South Carolina because of the extremely competitive costs of construction here and by the cooperation and encouragement we received from state and local officials. Allied-Signal has a large number of facilities in the state and has found it an excellent place from which to serve the worldwide markets in which we compete. We look forward to

continuing and adding to that record," Williams said.

Allied-Signal has manufacturing operations in Conway, Columbia, Orangeburg Spartanburg and Sumter, S.C., with a total of about 3,500 employees in the state.

The Oak Mitsui joint venture operates an existing copper foil plant in Hoosick Falls, N.Y., where Norplex/Oak also manufactures copper clad laminates. Operations at those two facilities are not expected to be affected by the Camden project.

Norplex/Oak, with headquarters in LaCrosse, Wis., is the world's leading producer of copper clad laminates for printed wiring applications. It has manufacturing facilities in the U.S., Taiwan, Singapore, and West Germany.

Norplex/Oak is a unit of Allied-Signal Inc., a $12 billion advanced technology company with primary business in aerospace, automotive products and engineered materials.

DALLAS (MARCH 28) PR NEWSWIRE - R. Howard Stanworth, chairman and chief executive officer of Pearle, Inc. of Dallas, announced today that Pearle has acquired four Hor-Eye-Zon super stores from Pacific Horizons Investment & Development, Ltd., Scottsdale, Ariz. Three stores operate in the Sacramento, Calif., market area and one is located in Chico, Calif. This acquisition follows the recent announcements of Pearle's acquisition of 24 Richard Bartley Optical stores in Virginia and four Eyeworld super stores in Utah. According to Stanworth, these moves are in keeping with Pearle's strategy to broaden its super store presence and solidify its leadership position in the U.S. market. Terms of the acquisition were not disclosed.

Pearle is a wholly owned subsidiary of Grand Metropolitan, PLC of London, a drinks, food and retailing concern whose other U.S. interests include Pillsbury, Burger King, Haagen-Dazs and Heublein.

ST. PERTERSBURG, FL (MARCH 28) PR NEWSWIRE - Belmac Corporation (NASDAQ:

BEMCC) today announced it has received additional funding of $150,000 from a limited Partnership organized to further support the research and development of Alphanon(R), an anti-hemorrhoidal drug, and, potentially, other medicinal compounds. These funds will purchase a warrant to acquire 71,052 shares of newly issued Belmac stock.

Total closings with this partnership have resulted in an aggregate total of $1,950,000 in financing since December 1989. The partnership is continuing its offering of up to an aggregate of $3,400,000. Approximately one-third of the new capital will be placed in a special escrow account to be used in the commercialization effort of Alphanon. The remaining funds will be used as deemed necessary by Belmac's management.

This equity infusion is sufficient to satisfy the minimum capital requirements for continued NASDAQ listing and will eliminate the conditional "C" listing at the start of trading Friday, March 30, 1990.

Clinical research conducted under the direction of Belmac has supported the claim that Alphanon stops hemorrhoidal bleeding. Belmac believes this transdermal medication is the first such non-surgical treatment to stop hemorrhoidal bleeding and expects that it will reduce the need for more aggressive measures in a number of patients who suffer from this condition.

#90087p0165 03/28/1990 ~PR Newswire

TECUMSEH, MI (MARCH 28) PR NEWSWIRE - Tecumseh Products Company (NASDAQ: TECU) announced today that it expects net income for the quarter ending March 31, 1990, to be approximately 25 percent to 30 percent lower than the net income of $21.7 million or $3.97 per share reported for the quarter ended March 31, 1989. Nearly all of the expected decline in consolidated earnings relates to the company's Brazilian subsidiary (SICOM Ltda.) which is expected to incur operating losses in the 1990 first quarter as compared with substantial profits earned in the first quarter of 1989.

The company stated that its Brazilian operations have been adversely impacted in 1990 because of the growing economic crisis in Brazil. Inflation reaching annualized rates of 30,000 percent in the first 2-1/2 months of the year, coupled with restrictive currency controls and the elimination of significant export incentives, caused SICOM to incur losses on export activities which comprise a significant portion of SICOM's sales. SICOM's domestic operations were also adversely affected by the hyperinflation which had the effect of undermining cost/price

relationships as well as dampening economic activity.

On March 16, 1990, an economic stabilization program was announced by Brazil's new administration. This drastic program has had the effect of at least temporarily impairing domestic economic activity. Export activities also have been adversely affected because of anomalies in the market for hard currency.

The Brazilian economy is in a state of confusion as it tries to sort out the ramifications of the economic stabilization program. It is not possible, therefore, to accurately estimate the impact that SICOM's operations will have on Tecumseh's consolidated results for the balance of 1990.

Tecumseh Products Company is a global manufacturer of compressors for the refrigeration and air conditioning industries and gasoline engines and power train components for lawn and garden applications. Consolidated sales in the year ended Dec. 31, 1989, totaled $1.5 billion, and net income totaled $82.6 million or $15.10 per share

LOS ANGELES (MARCH 28) PR NEWSWIRE - The RTD board of directors voted 7-1 March 27 to enter into an agreement with the Los Angeles County Transportation Commission (LACTC) to contract security services for the Long Beach-to-Los Angeles light rail system to the Los Angeles County Sheriff's Department for two years.

The contract also provides for funding from the LACTC that would further build up and train RTD's Transit Police during the second year of the two-year term. At the end of the contract's term, a full complement of rail-trained Transit Police officers will be ready to assume Blue Line law enforcement duties.

The Sheriff's Department will handle security for the District when RTD begins operating the Blue Line trains in July. The estimated cost of a yearly contract with the Sheriff's Department is between $10 and $11 million.

The Long Beach-to-Los Angeles light rail line, when complete, will stretch 21 miles between L.A. County's two largest cities. The first 19 miles of the system is scheduled to open this July. The Sheriff's Department will provide on-train security services and will patrol rail yards and stations along the route.

PRYOR, OK (MARCH 28) PR NEWSWIRE - In a surprise move, American Small Business Computers purchased Origins Macintosh CAD system, developed by DeltaSoft Inc., launching DesignCAD solidly into the Mac market.

The transaction, made through American Small Business Computers' subsidiary, DesignCAD Inc., includes purchase of all DeltaSoft Inc. assets plus keeping all employees. DesignCAD President Bruce Taylor exclaimed, "This is a mutually beneficial buyout. The buyout gives DesignCAD instant access to the Macintosh market, as well as technology for further Macintosh development. It gives Origins, which will be extensively updated and remained DesignCAD Macintosh, benefit of our extensive advertising and distribution channels, both domestically and internationally." While actual purchase price has not been disclosed, value of the transaction is estimated to be $3 to $5 million.

DeltaSoft released Origins CAD system for the Macintosh early last year after more than two years development time. The system is very well received by CAD users as well as the computer press (e.g., BYTE, March, 1990). While retaining the look and feel of a native Macintosh package, DesignCAD Macintosh will have features and ease of use which made DesignCAD a leading CAD system for the MS-DOS market.

DesignCAD Macintosh is A/UX compatible and will provide 2-D and 3-D CAD capability, including floating-point accuracy, extensive geometric construction features, and complete dimension capabilities. The 3-D features of DesignCAD Macintosh include built-in shading (with smooth shading and specular reflection), real-time rotation, and unprecedented surface construction and modification. Like DesignCAD on MS-DOS, DesignCAD Macintosh will transfer drawings to and from most common file formats including DXF, IGES, HPGL, and others - plus DesignCAD MS-DOS files.

DesignCAD Macintosh, priced at $699, will be released May, 1990. As with other DesignCAD products, present users may purchase upgrades at a nominal price. DesignCAD Macintosh will be available through computer and software dealers worldwide.

NORCROSS, GA (MARCH 28) PR NEWSWIRE - Colorocs Corp. (NASDAQ: CLRX) today reported operating results for its fourth quarter and year ended Dec. 31, 1989.

Colorocs' 1989 fourth quarter total revenues increased 95 percent from its third quarter results. Fourth quarter total revenues were $8,004,000 compared to $4,115,000 in the third quarter of 1989, the company's first full quarter of sales. Net income for the three months ended Dec. 31, 1989, was $815,000, or $.05 per share. The company previously reported net income of $7,004,000, or $0.48 per share, for the 1989 third quarter, primarily from the gain on sales of Savin Corp. securities.

Total revenues for the year ended Dec. 31, 1989, were $12,754,000, as compared to $33,000 for fiscal 1988. Colorocs net income for 1989 was $8,134,000, or $.55 per share, in comparison to a 1988 net loss of $3,786,000, or $.41 loss on a per share basis.

Commenting on 1989 fourth quarter results, Charles Muench, chairman and president of Colorocs, said, "I am pleased that after only seven months of sales of the full color copier, Colorocs reported its first profit from operations in the fourth quarter of 1989."

Colorocs was formed in 1982 to develop and distribute full color copiers and electronic printers. Shipments of its first product, the full color copier, commenced in June 1989.

TORONTO (MARCH 28) PR NEWSWIRE - Cineplex Odeon Corp. (NYSE: CPX) today announced that it has entered into agreements with subsidiaries of The Rank Organisation Plc to sell its remaining 51 percent interest in Film House for $40 million U.S., and its residual interest in Universal Studios Florida for $15 million U.S.

These related transactions are expected to be completed by March 30. The agreement regarding the remaining 51 percent of Film House is subject to usual conditions in a transaction of this type.

Rank purchased 49 percent of Film House, a film laboratory and processing facility in Toronto, from Cineplex Odeon in December 1988 for $73.5 million U.S. However, pursuant to the original agreement of sale that price was subject to adjustment based on the actual 1989 operating results. Subject to final determination, an adjustment will be payable to Rank between approximately $10,750,000 U.S. and $12,300,000 U.S. The corporation substantially provided for the adjustment when the sale was recorded in December 1988.

In March 1989, Cineplex Odeon sold its joint venture interest in Universal Studios Florida, a motion picture/television/studio attraction, to a Rank subsidiary, but retained a residual interest based upon attendance at the theme park and possible future commercial development of the site.

"Cineplex Odeon is selling these assets in order to refocus on our core exhibition business in existing primary markets in North America and reduce our long-term debt. We believe that, as a result of the restructuring process now underway, the corporation will be strengthened both financially and as a force in the film exhibition industry," said

Allen Karp, president and chief operating officer of Cineplex Odeon Corp.

Cineplex Odeon is one of the largest theatre circuits in North America, with approximately 1,920 screens in 500 locations.

#90087p0193 03/28/1990 ~PR Newswire

PUERTOLLANO, SPAIN (MARCH 28) PR NEWSWIRE - Repsol Petroleo will use technologies licensed from Phillips Petroleum Company (NYSE: P) at its refinery here to produce high-octane unleaded motor fuels for sale in Europe.

The Spanish gasoline refinery will use Phillips Petroleum's hydrofluoric acid (HF) alkylation and Hydrisom process technologies under license with the Bartlesville, Okla.-based company. Plant start- up is scheduled for mid-1991.

Repsol Petroleo managers said the company will use the technologies to make motor fuels which meet Spanish limits on lead and meet European Community standards for motor octane numbers. The refinery will produce unleaded fuels and alkylate additives of better than 97 R.O.N. (research octane number) or about 95 M.O.N. (motor octane number) from MTBE Raffinate Butenes.

The Phillips Petroleum HF alkylation reactor will produce about 3,550 BPSD (barrels per stream day) of alkylate product for boosting gasoline octane ratings without adding lead. The Hydrisom unit will upgrade feedstock for use in the HF alkylation reactor.

A basic engineering package is being developed with Phillips now for use in construction of the plant.

Phillips Petroleum initially developed and commercialized the HF alkylation process in 1942 to produce high-octane gasoline to fuel U.S. aircraft during World War II.

The company now has more than 90 licenses for the improved process worldwide. Phillips Petroleum has designed or commissioned 34 HF alkylation units since 1978, 10 of which are pending start-up. Not one refinery has replaced Phillips HF alkylation technology with any other make or type of alkylation unit.

#90087p0197 03/28/1990 ~PR Newswire

RICHMOND, VA (MARCH 28) PR NEWSWIRE - Investors Financial Corporation (NASDDAQ-NMS: INVF), the parent company of Investors Savings Bank, announced today that it has entered into an agreement with the Virginia Investment Trusts (the "Trusts") to issue subordinated debentures and warrants, and to sell certain of Investors' problem real estate loans and owned properties. These transactions will assist Investors in meeting the higher regulatory capital standards which became effective in December 1989 as a result of the Financial Institutions Reform, Recovery And Enforcement Act of 1989 ("FIRREA").

If all of the transactions contemplated under the agreement are completed, Investors would (1) issue up to $10 million of 12.00 percent subordinated debentures which would be included in total regulatory capital, (2) sell approximately $77 million of nonperforming commercial real estate loans and owned properties at a discount of 10 percent from the carrying value on Investors' books, and (3) issue warrants to purchase up to 4,475,000 shares of common stock at a price of $4.50 per share. The warrants, if exercised, would provide Investors with $20.1 million of additional common equity.

At December 31, 1989, Investors met both its tangible and core capital requirements, but did not meet the new risk-based capital requirement. Investors' total regulatory capital at December 31, 1989 was $85.2 million which was approximately $41 million less than its current risk-based requirement. These transactions, it completed, would reduce this deficiency to approximately $27 million, an initial improvement of approximately $14 million. Investors anticipates that further balance sheet restructuring and improved future earnings resulting from the sale of the non-performing assets will allow Investors to achieve compliance with the new risk-based capital standards prior to the deadline established by the FIRREA legislation.

The transaction announced today would be completed in three phases between May 31, and October 1, 1990. On May 31, 1990, Investors will sell to the Trusts ,$4,000,000 of suboridinated debentures at a rate of 12.00 percent and a term of eight years. At the same time Investors will also issue to the Trusts, warrants to purchase 900,000 shares of common stock at a price of $4.50 per share. The warrants will expire in eight years.

Investors Financial Corporation is a unitary savings and loan holding company headquartered in Richmond, Virginia, whose primary subsidiary, Investors Savings Bank, operates 52 banking offices in the Richmond, Tidewater and Shenandoah Valley areas of Virginia. NEW YORK (MARCH 28) PR NEWSWIRE - Leucadia National Corporation (NYSE, PSE: LUK) announced today that it had entered into an agreement, to acquire approximately 33 percent of the outstanding ordinary shares of Molins PLC, a United Kingdom corporation (Molins), for an aggregate cash purchase price equivalent to approximately $41 million. The agreement is subject only to compliance with the Hart-Scott-Rodino Act. Upon consummation of the agreement, Leucadia will own an aggregate of approximately 34.8 percent of the outstanding ordinary shares of Molins.

Leucadia also announced that it would make an offer to acquire the balance of the Molins ordinary shares not already owned or contracted for by Leucadia. The offer will be made in accordance with the London City Code on Takeovers and Mergers and will be conditioned upon compliance with the Hart-Scott-Rodino Act and the tender of approximately 15.3 percent of the outstanding Molins ordinary shares. If all of the ordinary shares are tendered, Leucadia would pay an aggregate cash consideration of approximately $82 million for the Molins ordinary shares not presently owned or contracted for by Leucadia and its affiliates. The offer is not being made directly or indirectly in or into the United States or Canada, or by use of the United States mails or by any means or instrumentality of United States interstate or foreign commerce, or of any facilities of a United States national securities exchange.

The offer is being made by Hambros Bank Limited, Leucadia's financial advisor. on behalf of Leucadia.

TORONTO (MARCH 28) PR NEWSWIRE - Cineplex Odeon Corp. (NYSE: CPX) today announced the sale of its majority owned subsidiary Gallery Holdings Limited of the United Kingdom, which owns and operates Gallery Cinemas, to Cannon Cinemas Limited.

Gross sale proceeds to Cineplex Odeon are approximately 7,031,000 Sterling (or about $11,334,000 U.S.), while a group of U.K.-based financial institutions which owned the remainder of Gallery's equity recieve the balance of the proceeds.

Assets of Gallery Cinemas include an operating 10-screen cinema complex in Slough, and a number of other theatre sites under development. In addition, Cineplex Odeon has agreed not to operate theatres in the United Kingdom for five years.

"The sale of Cineplex Odeon's U.K. operations is consistent with the corporation's previously announced strategy of focusing on the film exhibition business in its existing primary markets, which are located within North America," said Allen Karp, president and chief operating officer of Cineplex Odeon Corp.

Cineplex Odeon Corp. is one of the largest theatre circuits in North America, with approximately 1,920 screens in 500 locations.

MONROVIA, CA (MARCH 28) PR NEWSWIRE - GC International Inc. announced today that it had filed for protection under Chapter 11 of the Federal bankruptcy laws. Also included in the filing were its subsidiaries, Apollo Masters Corp. and GCI/Aero Inc.

The company stated that the reason for the filing was the company's inability to reach an acceptable agreement with its bank to provide ongoing financing for the company. GCI/Aero Inc.'s sand casting facility, Aero Alloys, announced a layoff of approximately 60 percent of all personnel, and the company intends to down-size this operation so that it ceases to be a cash drain on the company.

The company's stock is trade in the pink sheets.

RONKONKOMA, NY (MARCH 28) PR NEWSWIRE - Digital Metcom, Inc. (NASDAQ: DMET) today announced record sales and profitability for the year ended Dec. 31, 1989. Annual sales of $11,163,065 were reported for fiscal year 1989, a 200 percent increase over sales of $3,719,196 reported for fiscal year 1988.

Net earnings were $854,579, or $.04 per share, a significant improvement over the net loss reported by the company for the prior year of $(814,114) or $(.07) per share.

The company also announced a substantial increase in its contracted backlog, which totaled $6,000,000 at Dec. 31, 1989 compared to approximately $2,200,000 at 1988 year end. The company anticipates fulfillment of this contracted backlog to be completed during 1990.

Robert Dorskind, president and CEO, stated, "We're very pleased to report our continuing growth and profitablility which reflect the positive trend the company has established while maintaining its commitment to research and product development. The acquisition of Plexar Communications Consultants Corp. coupled with solid industry conditions and record backlogs strengthens our posture as an emerging telecommunications concern."

Digital Metcom, Inc. provides proprietary data network monitoring and control products and value added support services to companies that own, or are in the process of building, their own private local area or wide area, data or voice telecommunications networks.

BOSTON (MARCH 28) PR NEWSWIRE - Home Owners Savings Bank F.S.B. (NYSE: HFS) announced today a realignment of its organizational structure designed to achieve greater strategic focus, operational efficiency and internal coordination.

The realignment divides the responsibilities for national mortgage lending and New England-based retail banking. Under the realignment, Martin H. Heck will be in charge of all mortgage subsidiary operations, concentrating on the mortgage-banking aspects of Home Owners' business nationwide. In this capacity, he will serve as chief executive officer of Home Owners' three major banking subsidiaries, Knutson Mortgage Corporation, Home Owners Funding Corporation of America and Home Owners Fed Corporation. He has relinquished his offices as director, president and chief operating officer of the bank.

Francis J. Shea, Jr. presently executive vice president of Home Owners, will become chief operating officer of the bank pending approval of the regulators.

Shea, who joined Home Owners in 1987 as president of the Union Warren division, brings 23 years of retail banking experience to the position and will be responsible for retail banking and consumer lending in New England and the Northeast.

Mitchel S. Ross, chief executive officer, will assume the title of president of Home Owners.

Home Owners also announced that Harris I. Baseman, a director of the thrift since 1987 has submitted his resignation, stating that his schedule does not permit him to continue to devote the significant amount of time necessary to serve as director.

The reorganization is designed to help Home Owners reach the goals set in the business plan it submitted in January to the Office of Thrift Supervision. The plan describes how Home Owners will return to its core businesses of raising deposits and making mortgage and consumer loans.

#90087p0208 03/28/1990 ~PR Newswire

SEATTLE (MARCH 28) PR NEWSWIRE - The red and white No. 1 Boeing 747, the aircraft that ushered in the era of giant jetliners and forever changed the commercial air transport industry, flew into retirement today, Boeing Commercial Airplane Group said.

Christened the "City of Everett", RA001, as Boeing calls it, retires following a 21-year productive life as a test airplane.

The largest aircraft ever built for commercial use, the 747 was first announced April 13, 1966, when Pan American World Airways signed for 25 of the jumbo jets for a grand total of $525 million. Today that would buy four 747s.

Rolled out of the Boeing factory near Everett, Wash., Sept. 30, 1968, the 747 first flew on Feb. 9, 1969. The last certification flight occurred on Dec. 13 and certification was obtained on Dec. 30, 1969.

Since then, RA001 served as a testbed for numerous systems improvements. Beginning in 1970 and through 1971, follow-on testing included certification to carry a fifth engine for ferry purposes, fail-operative autopilot development and certification, increased gross weight certification, brake improvement development and 747-200 aerodynamic development.

In 1972 the airplane was used to demonstrate its applicability as an Air Force tanker with the addition of the Boeing "flying boom" refueling system. During the same period, improvements were made in ride quality and comfort.

Then, for several years, the 747 was used to test the 747 Short Range development program, carbon brakes and a General Electric engine, the CF6-50D.

Throughout the remainder of the 1970s and into the 1980s, the airplane was used to develop noise technology as well as for the development of new engines from Rolls Royce, Pratt and Whitney and General Electric for the 747, 757 and 767 aircraft.

In October 1983, RA001 flew to Las Vegas, Nev., for three years in storage.

Called back to service in August 1986, the airplane was dispatched to Wichita, Kan., for use as the mock-up for the two 747-200s purchased by the U.S. Air Force to carry the President and his staff.

In March 1988, after almost 20 years of useful service to the company, the airplane was still being used for 747 crew training.

In September 1988 the airplane was feted in a 20th anniversary fly-by with its newest offspring, the 747-400, heralding the success of the company's most famous airliner.

The airplane that amazed the world with its size at rollout enters retirement leaving a current fleet of nearly 800 aircraft that touch every corner of the globe. Its legacy, now carried forward by the biggest, longest-range version ever, the 747-400, has never looked brighter. The majority of all international travelers now fly on the Boeing 747. Its progeny will carry the tradition into the next century.

PHILADELPHIA (MARCH 28) PR NEWSWIRE - Properties Inc. today announced the signing of a lease between SmithKline Beecham (NYSE: SBH) and Franklin Office Associates for 11 additional floors at One Franklin Plaza, Philadelphia.

The building, located at 16th and Race streets, was acquired by Pantzer Properties Inc. in June 1985.

The expansion encompasses more than 281,000 square feet of space. SmithKline Beecham will occupy a total of approximately 500,000 square feet in One Franklin Plaza.

"This transaction will, in one fell swoop, relet virtually all of the space coming up in the building," said Edward S. Pantzer, president of Pantzer Properties Inc. "One Franklin Plaza is presently 95 percent occupied. With this transaction, our building will remain virtually full for many years to come."

Pantzer stated that the negotiations were handled by him personally, together with his director of commercial real estate, H. Donald Harvey Jr. and William Boodger, a senior officer of Pantzer Properties.

Pantzer Properties Inc., a large regional real estate investment company, owns 23 office buildings in New Jersey, Pennsylvania and Delaware, as well as 5,000 apartments and several shopping centers in the mid-Atlantic region. The company began its activities in 1971 and has seen all of its growth via acquisition as opposed to development.

The company's affiliate, Pantzer Management Co., which is headed by Michael K. Pantzer, executive vice president, is the managing agent for One Franklin Plaza.

Jeremy E. Goldstein and Paul L. Jaffe, of Mesirov, Gelman, Jaffe, Cramer and Jamieson, represented Franklin Office Associates.

NEW YORK (MARCH 28) PR NEWSWIRE - Pfizer Inc. (NYSE: PFE) announced today that a definitive agreement has been signed for the sale of substantially all of the assets of the pigments portion of the specialty minerals group to Harcros Pigments, Inc., a subsidiary of Harrisons & Crosfield Plc. Pfizer will receive $65 million cash on closing and Harcros Pigments Inc. will assume certain liabilities of the business.

Harrisons & Crosfield Plc has announced that they will offer employment to all current employees of the pigments business except for a small number

in Easton, Pa., who will be retained by Pfizer Inc. William A. Wilkinson, currently vice president of Pfizer Pigments Inc., will be appointed president of the new company.

Harrisons & Crosfield Plc, headquartered in London, has sales of approximately $3.2 billion. The company has substantial specialty chemicals and pigments businesses.

Jean-Paul Valles, senior vice president-finance for Pfizer Inc., said the sale to Harcros will enhance the future prospects of the pigments business.

The closing is subject to obtaining required governmental approvals and to various other conditions.

Pfizer Inc. is a diversified, research-based health care company with businesses in pharmaceuticals, hospital products, animal health, consumer products, specialty chemicals and specialty minerals. The company reported sales of approximately $5.7 billion for 1989.

#90087p0225 03/28/1990 ~PR Newswire
BOULDER, CO (MARCH 28) PR NEWSWIRE - NBI Inc. (NYSE: NBI) announced today that the Department of Justice has filed an amended complaint against NBI regarding alleged overcharging of the federal government for products during 1984, 1985, and 1986.

The amended complaint significantly reduces the initial claims made by the federal government in December 1989. Based on the amended filing, the Department has removed its claims for 1985 and 1986 which were approximately $1.76 million plus triple damages.

Stephen G. Jerritts, president and CEO of NBI stated, "We are pleased with the progress we have made to date on this matter. The amended filing by the Department of Justice significantly reduces the government's claim and associated potential finanical penalties by an order of magnitude of 10 times. While the amended filing does not state claims for 1984, we believe the alleged claims for this specific time period will not exceed $188,000 plus triple damages. We will continue our dialogue and cooperation with the Department of Justice to bring about a quick and correct resolution of this matter."

The Department of Justices' initial complaint was filed on Dec. 22, 1989. The Department had taken over a lawsuit of a former NBI employee alleging that the company overcharged the government. The Department was seeking a total of $6.6 million in damages which was comprised of $2.2 million in alleged overcharging plus triple damages.

NBI designs and markets advanced word processing software packages. NBI has been a leader in the word processing industry for more than a decade and also provides customer service and support to a wide base of system users in domestic and international locations.

PHILADELPHIA (MARCH 28) PR NEWSWIRE - Consolidated Rail Corporation (NYSE: CRR) has named Richard S. Pyson as assistant vice president-engineering/maintenance and Dr. John M. Samuels as assistant vice president-engineering/design at system headquarters here. They report to Clifford W. Owens, vice president-engineering and staff.

Pyson is responsible for the maintenance of track, communication signals, and structures for Conrail. Samuels is responsible for mechanical and industrial engineering, design and construction, and Conrail's additions and improvements capital program. The new roles of Pyson and Samuels incorporate some of the responsibilities formerly held by Chief Engineering Officer Benjamin J. Gordon, a 42-year railroad veteran, who has retired.

Pyson served as chief engineer-communications and signals since May 1988. He began his railroad career in 1964 with the Pennsylvania Railroad, a Conrail predecessor. With Conrail, Pyson has served in a variety of engineering and operating capacities including chief r regional engineer, Indianapolis; division superintendent, Toledo and Pittsburgh; and regional superintendent-transportation, Pittsburgh. Pyson was graduated from Ohio State University with a bachelor of science degree in civil engineering.

Samuels had served as assistant vice president-industrial engineering since February 1980. He began his railroad career with Conrail in 1978 and has served as assistant director-shop industrial engineering and director-industrial engineering. Prior to joining Conrail, Samuels served in a teaching and research capacity with Pennsylvania State University and held manufacturing and process engineering positions with General Motors Corp. Samuels was graduated from the General Motors Institute with a bachelor of science degree in manufacturing engineering and holds master's and doctoral degrees from Penn State.

NEW YORK (MARCH 28) PR NEWSWIRE - Jerome R. McDougal Jr., chairman and chief executive officer of Apple Bancorp, Inc. (NYSE: APK), issued the following statement today in response to Stanley Stahl's unsolicited tender offer to purchase, subject to certain conditions, all of Apple Bancorp's outstanding common shares at $38 per share:

"The board of directors, with its financial and legal advisors, will carefully consider the tender offer. On or before April 10, 1990, the company will announce its recommendation with respect to whether shareholders should accept or reject the tender offer and the reasons for its recommendation.

"The board of directors strongly encourages shareholders to postpone their decision whether to accept or reject Mr. Shahl's offer until they have had the benefit of and reflected on the company's recommendation. Since the offer does not expire until April 25, 1990, shareholders will have sufficient time after receiving the company's recommendation to decide whether to accept or reject the tender offer."

McDougal added, "Shareholders can be assured that in considering the tender offer, the board will act with utmost consideration for their interests."

FORT LAUDERDALE, FL (MARCH 28) PR NEWSWIRE - Crowley Financial Services, Inc. (NASDAQ: CRLY), today announced that its wholly owned subsidiary,

Crowley Broadcasting, has signed an agreement with Walt Disney World Co.

Under the two-year agreement, Crowley Broadcasting will produce a daily "live" two-hour program from the radio broadcast facility of the Disney-MGM Studio Theme Park at the Walt Disney World Resort located in Orange County, Fla.

The national talk show, entitled "Steve Crowley's American Scene," will be hosted by Steve Crowley and will be produced each weekday, Monday through Friday, between the hours of 1 p.m. and 3 p.m. and distributed simultaneously via satellite.

The program concept which includes celebrity interviews, Walt Disney World features, live call-ins, lifestyle features and Steve's own unique money reports, was developed in association with the Beagle Group, Inc., a New York City based producer.

As producer, Crowley Broadcasting will offer this programming in syndication to radio stations across the U.S.

Walt Disney World Company will provide the use of its state-of-the-art radio facility located on the grounds of the Disney-MGM Studios, as well as the necessary broadcast and technical support to distribute the program nationally.

Steve Crowley, president and chief executive officer, said today: "Signing the agreement with Disney is a significant step in the evolution of our company as a producer and distributor in the broadcast arena. It also allows us to expand our radio programming efforts to long-form weekday shows."

Steve Crowley is president and chairman of Crowley Financial Services, Inc. and is the money editor of ABC's "Good Morning America."

PHILADELPHIA (MARCH 28) PR NEWSWIRE - Consolidated Rail Corporation (NYSE: CRR) has named Richard S. Pyson as assistant vice president-engineering/maintenance and Dr. John M. Samuels as assistant vice president-engineering/design at system headquarters here. They report to Clifford W. Owens, vice president-engineering and staff.

Pyson is responsible for the maintenance of track, communication signals, and structures for Conrail. Samuels is responsible for mechanical and industrial engineering, design and construction, and Conrail's additions

and improvements capital program. The new roles of Pyson and Samuels incorporate some of the responsibilities formerly held by Chief Engineering Officer Benjamin J. Gordon, a 42-year railroad veteran, who has retired.

Pyson served as chief engineer-communications and signals since May 1988. He began his railroad career in 1964 with the Pennsylvania Railroad, a Conrail predecessor. With Conrail, Pyson has served in a variety of engineering and operating capacities including chief r regional engineer, Indianapolis; division superintendent, Toledo and Pittsburgh; and regional superintendent-transportation, Pittsburgh. Pyson was graduated from Ohio State University with a bachelor of science degree in civil engineering.

Samuels had served as assistant vice president-industrial engineering since February 1980. He began his railroad career with Conrail in 1978 and has served as assistant director-shop industrial engineering and director-industrial engineering. Prior to joining Conrail, Samuels served in a teaching and research capacity with Pennsylvania State University and held manufacturing and process engineering positions with General Motors Corp. Samuels was graduated from the General Motors Institute with a bachelor of science degree in manufacturing engineering and holds master's and doctoral degrees from Penn State.

DALLAS (MARCH 28) PR NEWSWIRE - E-Systems (NYSE: ESY) board of directors at a monthly meeting today elected Charles A. Gabriel to the board filling a vacancy created by the death of John W. Dixon last December. Gabriel has been nominated to stand for election to a full three-year term as director at the annual stockholders' meeting on April 25.

Gabriel, 62, who retired as chief of staff of the U.S. Air Force in June 1986, serves on the board of directors of the U.S. Life Insurance Co. and Flight International Group Inc.

E. Gene Keiffer, chairman and chief executive officer of E-Systems, said, "Considering the extensive background of Gen. Gabriel in relation to our business activities, we are indeed fortunate and honored to have him join our board." Gabriel holds a master of science degree in engineering management from The George Washington University and is a graduate of the Command and Staff Course of the Naval War College and the Industrial College of the Armed Forces.

Before becoming the U.S. Air Force Chief of Staff, he served as Commander

in Chief, U.S. Air Forces in Europe and Commander of Allied Air Forces Central Europe.

E-Systems is a major worldwide developer and producer of defense electronic systems and products in the areas of intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, communications and data systems.

TORONTO (MARCH 28) PR NEWSWIRE - Cineplex Odeon Corporation (NYSE, TSE: CPX) today announced its financial results for the year ended Dec. 31, 1989, and that it has reached agreements in principle with its bank term lenders on the revision of its long-term loan agreements.

For the year ended Dec. 31, 1989, the net loss was $78,637,000 on revenues of $644,152,000. For the corresponding period in 1988, the corporation reported net income of $40,396,000 on revenues of $648,115,000. All currency amounts are in U.S. dollars.

Basic Earnings/(loss) per share were ($1.65) for the year ended Dec. 31, 1989 as compared to $0.85 per share in the corresponding period in 1988. Earnings/(loss) per share on a fully diluted basis for the year ended Dec. 31, 1989 were ($1.65) as compared to $0.83 per share for the corresponding period for 1988.

Included in the results for 1989 are a $47,478,000 gain from the sale of the corporation's 50 percent interest in Universal Studios Florida; a $19,850,000 gain from the sale of the Live Theatre Division; a $25,500,000 loss from the corporation's U.S. distribution activities (before allocation of corporate overhead); a loss on investment of $15,153,000; a charge of $3,824,000 on extinguishment of a credit facility; charges amounting to $7,157,000 related to the corporation's decision not to proceed with a proposed U.S. limited partnership transaction which involved the sale of selected theaters; advisory fees and expenses of $2,615,000 related to proposals to acquire the corporation; charges amounting to $8,676,000 relating to employee terminations; and a charge of $3,488,000 related to the expected cancellation of the corporation's aircraft lease.

In December of 1989, the corporation's management was restructured following the resignations of the former chairman and vice chairman. The board of directors appointed two new directors, elected a new chairman, appointed a new president and disbanded the special committee of directors

which had been appointed to consider proposals to acquire the corporation.

In recognition of continued high debt levels and recent negative cash flow the management has embarked on a program to reduce bank debt, concentrate on the corporation's theater exhibition business primarily in existing major markets, curtail the remaining portion of the theater expansion program, wind down U.S. distribution operations and reduce overhead.

The corporation reported a net loss of $43,418,000 on revenues of $167,188,000 for the fourth quarter ended Dec. 31, 1989. Net income for the corresponding period in 1988 was $10,589,000 on revenues of $136,970,000.

Basic earnings/(loss) per share for the fourth quarter of 1989 were $(0.91) as compared to $0.22 per share in corresponding period in 1988. Earnings/(loss) per share on a fully diluted basis were $(0.91) for the fourth quarter of 1989 as compared to $0.21 per share for the quarter ended Dec. 31, 1988.

Cineplex Odeon is one of the largest theater circuits in North America with approximately 1,920 screens in 500 locations.

ST. LOUIS (MARCH 28) PR NEWSWIRE - August A. Busch III today announced

that the board of directors had approved a realignment of management responsibilities within Anheuser-Busch Companies, and at the company's beer and food subsidiaries. This realignment will include expansion of the company's corporate office.

"These moves are the result of a long-term management development plan that we put in place in 1974," Mr. Busch III, chairman of the board and president of Anheuser-Busch Companies, said. "I am pleased that we have the quality and depth of management which permits us to fill key positions with strong, experienced executives."

Among the appointments announced today: -- Michael J. Roarty, 61, was named executive vice president- corporate marketing and communications for Anheuser-Busch Companies (the parent company), and chairman of the Busch media group, which is responsible for placing all company advertising. Roarty was previously executive vice president-marketing for Anheuser-Busch, Inc., the company's beer subsidiary, since 1977.

-- Jerry E. Ritter, 55, has been named executive vice president- chief financial and administrative officer, Anheuser-Busch Companies. He was formerly vice president and group executive, and has been a member of the corporate Office since 1983.

-- Patrick T. Stokes, 47, was appointed president of Anheuser-Busch, Inc. (the beer subsidiary). Since 1985, Stokes has been chairman of the board and chief executive officer of Campbell Taggart, Inc., and chairman and president of Eagle Snacks, Inc., the company's food subsidiaries.

-- Roarty and Stokes will join Mr. Busch III and Ritter as members of the Anheuser-Busch Companies corporate office, which serves in an advisory capacity to the chairman and president, and to other members of the management team on major decisions and in implementing corporate policy.

-- David C. Leavenworth, 52, president of Campbell Taggart, Inc., has been named chairman and chief executive officer of Campbell Taggart and Eagle Snacks. He will become a member of the Anheuser-Busch Companies' policy committee.

-- Kevin F. Bowler, 41, has been named president of Eagle Snacks. He held the position of vice president and general manager since 1981.

-- Charles B. Fruit, vice president-corporate media, James I. Hunter, vice president-sales, and John N. MacDonough, vice president- brand management, have all been appointed to the Anheuser-Busch, Inc., management committee, which reports directly to Stokes. The management committee represents all functional aspects of the beer company's operations, including brewing production, sales and marketing.

SAN DIEGO, March 28 /PRNewswire/ -- General Dynamics Commercial Launch Services Inc. (CLS) announced today that it was establishing a program office in Brussels, Belgium, to support its marketing and customer liaison efforts for Atlas Launch Vehicles.

"Our market base has broadened and we recognize that it makes good business sense to have a presence in Europe to interact with our customers " said Charles H. Lloyd, vice president and managing director of CLS. "Our relationship with European companies requires day-to-day attention in providing the necessary support for new and existing customers."

The decision to establish an office in Europe was reinforced Tuesday when NASA announced that it had selected Atlas for the solar and heliospheric observatory (SOHO) mission. The European space agency is providing the SOHO spacecraft and a major portion of the experiments.

CLS will also launch a communications satellite for the European Telecommunications Satellite Organization (EUTELSAT) later this year. It will launch two satellites built by British Aerospace for Orion, one in 1992 and the other in 1993. The company also has three launches scheduled for the International Telecommunications Satellite Organization (INTELSAT) one in 1991 and two in 1993. In the near future it will also sign an agreement with the Italian space agency to launch Italy's space astronomy X-ray satellite.

William A. Houtz has been named director of the CLS office in Brussels. Previously, he was corporate marketing manager-Europe for General Dynamics International Corporation (GDIC). Houtz, who joined the company in 1983, will be co-located at the GDIC office in Brussels.

GOLDEN, CO, SAN DIEGO (MARCH 28) PR NEWSWIRE - Western Gold Exploration and Mining Co., Limited Partnership ("WestGold") and Yuba Natural Resources Inc. (Pacific Stock Exchange: YG) ("Yuba") announced today the signing of a "Stock Exchange Agreement" whereby WestGold would acquire voting control of Yuba. WestGold and Yuba expect to close the transaction by June 29, 1990.

WestGold and Yuba are joint venture partners in a gold dredging operation

near Marysville, Calif. The joint venture produced 25,780 ounces of gold in 1989. WestGold is the managing partner and has a two-thirds interest, held by its wholly owned subsidiary, WestGold Placer Inc. Yuba has a one-third interest in the joint venture. WestGold purchased its interest in the gold operation last September from Bond Gold Corp.

The Stock Exchange Agreement provides for WestGold to contribute all of the stock of WestGold Placer Inc. to Yuba in exchange for convertible preferred stock. This preferred stock will entitle WestGold to have an 80 percent voting interest in Yuba and will be convertible into 68 percent of Yuba's common stock. Concurrently with this transaction, Yuba plans to dispose of or to spin off to the existing shareholders of Yuba, excluding WestGold, its non-gold assets and liabilities. These assets include Yuba's silica reserves, silica processing facility and various royalty agreements. These business transactions are subject to various conditions, including shareholder and regulatory approvals.

If Yuba does not obtain the required approvals for this transaction, or fails to meet other preconditions prior to Aug. 1, 1990, Yuba has agreed to sell its one-third interest in the joint venture to WestGold for $6 million in cash, less amounts which have been lent to Yuba Silica Inc. by WestGold, and less amounts lent to Yuba by the joint venture.

WestGold is a 50/50 limited partnership between Inspiration Resources Corp. (NYSE: IRC) and Minorco formed to explore for and develop gold properties in North America.

ANAHEIM, CA (MARCH 28) PR NEWSWIRE - AT&T today announced a new, economical solution for customers who want to network several voice messaging systems together on the same premises.

Audio information exchange (AUDIX) customers will now be able to connect an AT&T Merlin II(R) communications system to their non-AT&T PBX or to their Centrex system to act as an AUDIX network controller. The Merlin system is added to the list of controllers that includes System 75, System 85, and Definity(R) communication system.

"This networking solution will make our AUDIX systems more valuable than ever to customers who own other vendors' telephone systems," said Carolyn Ring, voice processing product manager for AT&T's business communications system unit.

By networking systems, subscribers can exchange voice mail messages with colleagues on other AUDIX machines.

Multiple machines serve a user group of up to 32,000 subscribers. Users can address messages by using the recipient's name or telephone extension, and can send messages to anyone in the group as though all were on a single machine. The Merlin II communication system is a digital hybrid key system with a maximum capacity of 56 central office lines, 72 stations and 64 data terminals.

The price for Merlin II communications system as an AUDIX network controller is approximately $3,500.

CONTACT: Sue Fleming, 201-658-2604, or home: 201-469-6952, or Russell Thomas, 201-658-2598, or home: 201-398-1972, both of AT&T.

#90087p0259 03/28/1990 ~PR Newswire

ANAHEIM, CA. (MARCH 28) PR NEWSWIRE - AT&T (NYSE: T) today announced a new AUDIX application that helps customers process information more efficiently and speeds customer service.

The new application, called AT&T AUDIX Form Filler, is designed for businesses that use application forms to elicit information from prospective customers.

For example, a bank could use AUDIX Form Filler to automate the loan application process. Customers calling the bank to apply for a loan would hear voice prompts stepping them through the questions on the loan application. Their voice responses would be recorded, speeding them through the application process.

AUDIX Form Filler is provided with Inbound Call Director (ICD), a PC-based voice processing system that offers sophisticated features to small businesses or branch offices.

"AT&T AUDIX Form Filler extends the capabilities of AUDIX, making it an even more powerful tool for business," said Carolyn Ring, voice processing product manager in AT&T's business communications systems group. "And it helps customers increase employee productivity."

After a call is completed, the information is forwarded to a transcriber's voice mailbox. The message waiting light is illuminated to indicate that a voice message has come in. This frees the transcriber to attend to other duties between transcriptions.

Transcription becomes as easy as listening to messages and using a keyboard to enter responses on an on-screen form. No special training is necessary, and the voice responses are quickly turned into usable data records.

In another example, a magazine's circulation department could use AUDIX Form Filler to take calls from prospective subscribers. It would also be helpful to customers who want to automate their ordering process or conduct market surveys.

AUDIX Form Filler runs on an AT&T 6386 WGS and can handle up to 28 calls simultaneously. It includes 300 pre-recorded AUDIX voice prompts, and custom scripting is available.

AUDIX Form Filler software is available now at a price of $11,000.

FAIRLAWN, OHIO (MARCH 28) PR NEWSWIRE - GenCorp (NYSE: GY) announced today the election of Robert K. Jaedicke, Endowed Professor and Dean of the Graduate School of Business, Stanford University, as a director of the corporation. The election occurred at the company's annual meeting today and is effective immediately.

Jaedicke became dean of the Stanford Graduate School of Business in 1983 and is the sixth dean in the school's 61-year history. He has served in several capacities since joining the accounting faculty in 1961. He was the director of the business school's Ph.D. program and an associate dean for academic affairs from 1970-81. He was also acting dean of the school from 1979-80 after the retirement of Dean Arjay Miller. Jaedicke taught at the University of Minnesota School of Business and the Harvard University Graduate School of Business Administration prior to joining the Stanford staff.

Jaedicke is a nationally recognized author of several accounting books. He has won several awards for his research in the accounting field, including the Lybrand Gold Medal for Distinguished Contributions to the Accounting Literature (1961), the Certificate of Merit, awarded by the National Association of Accountants (1962), and the Distinguished Contributions to Accounting Literature Award given by the American Institute of Certified Public Accountants (1966). He received the 1985 Distinguished Professor Award from the California Public Accountants Foundation for Education and Research.

He is a director of Homestake Mining Company, Boise Cascade Corporation, Wells Fargo & Company, Enron Corporation, and the California Water Services Company of San Jose. He is also a member of the board of directors of the Bay Area Council, San Francisco, and a member of the Advisory Council of SRI International in Menlo Park, Calif.

Jaedicke graduated cum laude from the University of Washington in 1950 with a bachelors degree in business administration, with a major in accounting. Jaedicke received the President's Certificate for High Scholarship from the University of Washington for 1950-51 and was elected into membership in Phi Beta Kappa. He earned his masters degree in business administration from the same school in 1953. In 1957, he earned his Ph.D. in business administration, with a minor in law, from the University of Minnesota. He was a post doctoral Ford Foundation Fellow at Harvard University's Institute of Basic Mathematics for Application to Business in 1959 and 1960.

GenCorp is a technology-based company with strong positions in aerospace, automotive and related polymer products.

#90087p0262 03/28/1990 ~PR Newswire

PITTSBURGH, March 28 /PRNewswire/ -- A top negotiator of the United Steelworkers of America (USW) accused Equitable Gas Co. of cheating gas customers and its employees by seeking another annual rate increase, while refusing to negotiate a new labor agreement.

Charles L. Black, USW Local 12050 president representing about 380 area service and maintenance workers at Equitable Gas, says, "This company seems bent on destroying their employees' standard of living. At the same time, they're improving profit margins with annual rate increases that cheat the gas customers and our members."

According to Black, the union members have been working under an extension of the old labor agreement since Feb. 21, 1990. They rejected a company proposal on March 3 by a vote of 261-28 that would require current and future gas workers to pay medical insurance premiums.

"We cannot accept the outrageous act of this company shifting the cost of health care onto our members," Black stated.

The Equitable Gas proposal rejected by the USW calls for a three-year agreement providing modest wage improvements of three percent in the second and third years, but the improvements would be wiped out by the burden of paying the insurance premiums.

"We're not making any unreasonable demands for wage or benefit improvements," the local union president declared. "We will not accept a concession agreement."

Black said the local union is going to begin a campaign among Equitable Gas customers that urges them to sign a petition and complaint to the state Public Utility Commission denying a rate increase of $29.46 million being sought by the company until a fair labor agreement is negotiated. According to Black, Equitable wants the new rate to become effective April 22, 1990, increasing gas prices charged to customers by an average of 10.8 percent.

The last rate increase by Equitable of 10.7 percent was imposed Jan. 20, 1989.

USW Local 12050 was forced into a six-month strike that began Feb. 7, 1983 when Equitable Gas took a hard line on job description changes. Although the membership returned to work under terms of the old agreement in mid-August of that year, it wasn't until Jan. 7, 1985, that a new labor contract was finally negotiated.

Black states that Equitable Gas is growing increasingly reliant on non-union contractors with low-skilled workers who threaten public safety with inferior service work. "We want to do all the service and maintenance work. Equitable Gas customers should expect us to provide the best workers dedicated to meet customer and community safety."

The local union president said it's time the consumers were told the truth about Equitable's consistent disregard for its employees and customers. He cited public records of excessive utility commission complaints.

Both sides held a negotiating session on Monday, March 26 -- the second such meeting since rejection of the company proposal -- but Equitable has refused to change its position on the insurance payment issue.

CONTACT: Charles Black, president of Local 12050, 412-781-0089, or Pat Meehan, 412-287-4005, both of the USW

#90087p0264 03/28/1990 ~PR Newswire

MONTGOMERY, PA (MARCH 28) PR NEWSWIRE - Grumman Corporation (NYSE: GQ) delivered the 50,000th mail truck to the Postal Service today during a ceremony here at Grumman Allied's Long Life Vehicle (LLV) facility.

Grumman will build almost 50,000 more of the trucks before the $1.2 billion contract with the Postal Service is completed in late 1992. The

Postal Service has the option to order an additional 60,000 vehicles.

Every six minutes an LLV rolls off the assembly line. In remarks to an audience that included Pennsylvania's Gov. Robert P. Casey, Grumman Chairman John O'Brien stressed that not only are the trucks built rapidly -- about a 100 a day -- but with superior quality.

"Each LLV, start to finish, beats the target we set for ourselves by six hours. We're beating the clock with quality," said O'Brien. "When we started, the Postal Service was inspecting every LLV we delivered. Then, as quality improved, inspection was made on three out of 25.

Today it's just three out of every 200. Soon, our customer plans to stop physical inspection altogether and monitor our processes and procedures instead."

After winning the contract in 1986, Grumman expanded, redesigned, and retooled its Montgomery plant, where it has been building trucks for 18 years. It took only nine months to get a state-of-the-art production line started.

From Washington, Postmaster General Anthony M. Frank said, "At the end of last year, Long Life Vehicles accounted for about 27 percent of our 140,000 city delivery vehicles. They are designed with the special needs of our carriers in mind. They have lower annual maintenance costs, and they get 15 percent better gas mileage than our older vehicles.

Grumman's rustproof, aluminum body is built to last 24 years. It is mated to a modified General Motors S-10 Blazer power train and chassis. The truck is designed for easy maintenance. The modular design allows the engine, transmission, drive shaft and axles to be removed without having to remove any adjacent units.

The LLV can carry 1,000 pounds of mail, the same as the Postal Service's half-ton truck (which is 800 pounds heavier) and twice the capacity of the postal jeep. The LLV will replace both these vehicles.

STAMFORD, CT (MARCH 28) PR NEWSWIRE - Xerox Corporation (NYSE: XRX) and Standish Industries have signed an agreement to explore the feasibility of manufacturing and marketing active matrix displays, which would involve use of thin film transistors (TFT) electronics from Xerox and liquid crystal displays (LCD) from Standish.

The joint development agreement initially calls for the two companies to evaluate the compatibility of the technologies and the potential market for a range of products using them, including high definition television displays.

The joint Xerox-Standish statement released today said that the companies hope to make a decision in the third quarter about forming a new company to build products at worldwide competitive prices. In addition to Xerox and Standish, other equity partners are being sought to help in setting up manufacturing operations, the statement said.

Other details of the arrangement were not announced. The joint statement said the two companies believe their experience in transferring TFT technology to manufacturing and extensive LCD manufacturing know-how offer a competitive edge and, initially, a timing advantage in the proposed venture through the use of their existing facilities.

Xerox, with headquarters in Stamford, has been developing amorphous silicon and poly-silicon thin-film transistors for nearly 10 years at its Palo Alto Research Center in California in support of the printing and scanning businesses of Xerox. The center is equipped to process on large glass surfaces and is the largest TFT prototyping facility in the United States.

Hamlin LCD, a division of Standish, is located in Lake Mills, Wis. It has been manufacturing liquid crystal displays for more than 15 years and is the largest maker of these displays in North America.

The two companies said they have been collaborating on technical issues for several months and prototype displays already have been produced.

#90087p0273 03/28/1990 ~PR Newswire

SYRACUSE, NY (MARCH 28) PR NEWSWIRE - A year-long economic study of Niagara Mohawk's (NYSE: NMK) Nine Mile One nuclear plant concludes that continued operation should produce significant savings for the company's customers.

The study also says that continued operation of the 21-year-old plant can improve the reliability of the state's entire bulk-power electric system and would not add to the acid rain and global warming problems created by coal and oil-fired plants.

The plant's availability also would provide customers with a hedge against increases in fossil fuel price and the state's current over-reliance on foreign oil supplies, the study reports.

Continued operation is warranted if the plant can achieve capacity factors of 30 to 50 percent, according to the study.

The capacity factor is the ratio of actual electricity produced in comparison to the amount a plant would have produced operating at capacity for a full year. Average is 57.2 percent.

Nine Mile One, through 1989, achieved an average capacity factor of 57.2 percent over its first 20 years of operation. Excluding the current extended outage, the plant's average capacity factor was 63.5 percent over the period.

Closing the plant permanently this year would cost NM customers heavily, because the facility would have to be maintained until it could be decommissioned in 2010 when a Federal facility for nuclear materials is scheduled to be available. The study calculates that these "abandonment" expenses -- exclusive of decommissioning costs -- could total $506 million by the year 2005 (in today's dollars) when the plant's license expires, even though no power would be produced during the period.

Niagara Mohawk Power Corp. is an electric and natural gas investor-owned utility with the largest customer service area in New York state. Electric service is provided to 1.5 million customers across 24,000 square miles, and natural gas service reaches 466,000 customers in areas totaling 4,500 square miles in central, northern and eastern New York.

#90087p0277 03/28/1990 ~PR Newswire

ANAHEIM, CA (MARCH 28) PR NEWSWIRE - AT&T today extended the benefits of its Audio Information Exchange (AUDIX) voice messaging system to a wide variety of PBX systems.

AUDIX has been certified for use as a stand-alone system with an AT&T System 25, Rolm CBX 8000, 9000, 9751, or NEC Neax 2400.

"AUDIX is a highly reliable and sophisticated voice mail and voice messaging system." said Carolyn Ring, voice messaging product manager for AT&T's business communications systems group. "Customers with a multi-vendor PBX network in place, or who have another vendor's telephone system, can now use AUDIX as a stand-alone system and take advantage of the technology."

Customers who install AUDIX in a stand-alone mode, and not as an integrated feature of their PBX, get the features and benefits of voice mail, but there are some minor differences.

First, when the number called is busy or not answering, callers must re-enter the extension number to hear the subscriber's personal greeting and leave a voice mail message.

Also, subscribers on some systems won't always receive visual notification that they have voice mail via a message waiting lamp on their telephone. AUDIX can, however, call the subscriber to alert him or her of new messages, if necessary.

As a stand-alone system, AUDIX is connected to a PBX through analog ports.

There are no switch software requirements. Because there is no data link users may want to dial a code to disconnect from AUDIX after receiving voice mail to quickly disconnect the port.

The price for AUDIX as a stand-alone system starts at approximately $45,000 for 4 ports and 14 hours of storage.

#90087p0278 03/28/1990 ~PR Newswire

ANAHEIM, CA. (MARCH 28) PR NEWSWIRE - AT&T (NYSE: T) today announced an economical solution for hotels and motels that want to offer guests advanced telephone messaging services.

The new offering -- AT&T Audix Voice Power Lodging -- enables hotels to offer each guest a private voice mailbox at check-in. It enables guests to receive complete and accurate voice messages when direct communication is not possible .

"In today's competitive hotel marketplace, first-class guest services are crucial to attracting and keeping customers," said John Leikness, voice messaging product manager for AT&T's Business Communications Systems group.

"With AT&T AUDIX Voice Power Lodging, our hospitality customers can provide guests with a valuable communications service and reduce their own operating costs at the same time."

The custom software package works with the AT&T 6386 WGS and offers voice messaging capability for up to 1,500 rooms. It offers guests complete, accurate and confidential messaging services, while freeing hotel staff from the time-consuming responsibility of taking and relaying hundreds of phone messages.

The system can be fully integrated into a hotel's System 75 or Definity(R) Generic 1; a hotel's Premises Management System, the computerized system used to keep track of information such as which rooms are occupied, reservations, etc.; or it can be used as a stand- alone unit.

Hotels assign each guest his or her personal voice mailbox. Guests simply call into the voice mail system and retrieve messages by pressing the touch-tone buttons in response to simple voice prompts.

And, since callers leave their own messages, it eliminates any problems or confusion for guests who communicate in a foreign language.

When the guest checks out, the primary mailbox is deactivated and remaining messages are sent to an alternate mailbox. The guest has 24 hours to retrieve remaining messages before they are automatically purged.

In addition, hotels can use the system's broadcast capabilities to easily inform guests of special hotel events or scheduling. For example, a hotel could invite guests to a complimentary breakfast, or disseminate information on the hours the pool will be open.

AT&T AUDIX Voice Power Lodging will be available 2Q90 at a price of $5,000. It will be demonstrated for the first time at the American Hotel and Motel Association's conference in Nashville, April 5-8.

CONTACT: Sue Fleming, 201-658-2604, or home, 201-469-6952, or Russell Thomas, 201-658-2598, or home, 201-398-1972, both of AT&T

#90087p0282 03/28/1990 ~PR Newswire

ANAHEIM, CA (MARCH 28) PR NEWSWIRE - AT&T (NYSE: T) today announced that its Audio Information Exchange (AUDIX) voice messaging system has been fully integrated with Northern Telecom (NYSE: NT) PBXs and switches.

The announcement means that customers with Northern Telecom equipment, including the SL-1, SL-100 or DMS-100, or a mix of AT&T and Northern Telecom systems, can take full advantage of the features and benefits offered by AT&T's voice messaging system.

AUDIX is a highly reliable and sophisticated voice mail system that requires little training. Subscribers' voice messages can be recorded, addressed, scheduled for delivery, and sent to one or more people by pressing the keys on a touch-tone telephone. The easy-to-use system uses detailed voice prompts to "talk" callers through each step.

When AUDIX is integrated with the PBX, a caller hears the subscriber's personal greeting if the extension called is busy or unanswered. The subscriber's message waiting lamp is illuminated to indicate that there is a voice mail message.

Without integration, callers hear a recording requesting that they re-enter the extension to leave a voice mail message, and the subscriber sees no visual indication that a message is waiting.

AUDIX is integrated with all members of the SL-1 product family running X11 Release 4 or later software. The systems are integrated using Northern Telecom's Integrated Voice Messaging Service (IVMS) a data link, an RS-232 digital signaling link which is a published open specification. AUDIX also connects to the SL-1 via up to 32 analog voice ports.

When integrated with the SL-1, AUDIX provides the same user capabilities as it does when integrated with AT&T PBXs.

AUDIX is integrated with all versions of the SL-100 and DMS-100 switches that support the Simplified Message Desk Interface (SMDI). SMDI is the open interface to voice mail systems supported by Northern Telecom that is based on AT&T's Simplified Message Set Interface (SMSI), an open interface developed to link voice messaging systems to AT&T'S 1A ESS(TM) and 5ESS(R) central office switches.

The SMDI is an RS-232 digital signaling link. AUDIX also connects to the SL-100 and DMS-100 via up to 32 two-way Centrex lines.

Prices for AUDIX integrated to an SL-1 range from $47,200 for four ports and 14 hours of storage to $157,000 for 20 ports and 32 hours of storage. Prices for AUDIX integrated to a SL-100 or DMS-100 start at $46,600 for four ports, 14 hours of storage to $155,400 for 20 ports, 32 hours of storage.

DEARBORN, MI (MARCH 28) PR NEWSWIRE - Ford Motor Company (NYSE: F) has informed employees of the Ford Thunderbird/Mercury Cougar assembly system at the Lorain (Ohio) Assembly Plant that the system will be idled the week of April 2.

The downtime is necessitated by a shortage of dealer orders. According to Joel Pitcoff, Ford's research and analysis manager, "Thunderbird and Cougar rank first and second, respectively, in sales among middle specialty cars, but the market segment has been considerably weaker this year than the car market in general."

The Thunderbird/Cougar assembly system employs approximately 2,700 hourly employees on two shifts and builds about 5,600 units per week.

OAK BROOK, IL (MARCH 28) PR NEWSWIRE - Chemical Waste Management, Inc. (NYSE: CHW) and Sirrine Environmental Consultants, Inc. announced today

that they have completed the acquisition by Chemical Waste Management of Sirrine Environmental.

The Greenville, S.C.-based Sirrine Environmental was formed in January 1987 to purchase the assets of the environmental and hazardous waste engineering and consulting business of CRS Sirrine, Inc. Sirrine Environmental presently employs 180 persons in offices in Greenville, Aiken and Charleston, South Carolina, and in Raleigh, N.C.

William L. Carpenter, president of Sirrine Environmental, said that the merger "will enable Sirrine Environmental to grow more rapidly to better serve its existing clients and to build a national environmental and consulting practice." Jerry E. Dempsey, president and chief executive officer of Chemical Waste Management, stated that "our company expects to benefit from the engineering talent Sirrine Environmental's staff will provide in support of Chem Waste's comprehensive hazardous waste management services."

Chemical Waste Management, of Oak Brook, is the largest company exclusively in the hazardous waste management industry in the United States. The company provides chemical waste transportation, treatment, reduction, recycling and resource recovery, and disposal services to industrial and commercial customers; site remediation services to industry and government; a number of small-generator services; and radioactive waste management services to utilities and medical and research institutions and to federal facilities.

A 78 percent-owned subsidiary of Waste Management, Inc., Chemical Waste Management is a publicly held corporation.

ATLANTA (MARCH 28) PR NEWSWIRE - Wilma Southeast has announced Delta Air Lines Inc. (NYSE: DAL) will occupy 15,000 square feet of office space in Phase I of Atlanta Tradeport.

Atlanta Tradeport is being developed by Atlanta Tradeport Associates, a joint venture of Dutch-owned Wilma Southeast and Japanese-owned Mitsui & Co. (U.S.A.) Inc. and Shimizu Land Corp.

"We're obviously delighted to have Delta as a tenant at Atlanta Tradeport " said Richard Buckley, senior vice president of Wilma Southeast. "The integrity of the company and the respect it has in the Atlanta business community and around the world will be a real plus for our project."

Buckley said the buildings in Phase I of Atlanta Tradeport are now more than 80 percent leased, with 165,000 square feet of total office/warehouse space occupied. The project's first phase consists of four office and warehouse buildings.

"This is a terrific way to begin our leasing efforts for 1990," said Buckley. "Despite a general slowdown in the city's commercial real estate market, Tradeport continues to attract high-caliber tenants like Delta and make headway as Southside's leading real estate development."

Atlanta Tradeport's master plan calls for 3.5 million square feet of mixed-use space. Buildout is expected to be 1994.

Wilma Southeast's other projects in Atlanta are RiverEdge Center, a 100-acre office park; Centrum at Glenridge, an eight-story office building; and Cumberland Plaza, two 10-story office buildings.

In the Southeast, Wilma's developments include Jacksonville International Tradeport, a 615-acre business park in Jacksonville, Fla.; and Bayport Colony, a 2,000-acre residential community, with office and retail space, located in Tampa, Fla.

AUSTIN, TX (MARCH 28) PR NEWSWIRE - Tracor Aerospace Inc. has received a $225,000 contract for a Phase I Industrial Modernization Incentives Program from the U.S. Air Force Avionics Systems Command, Wright-Patterson Air Force Base.

The contract involves a Phase I factory analysis study on the company's Austin, Laredo, and McAllen, Texas, facilities, as well as subsequent Phase II/III recommendations and implementation programs. The initial four-month study will involve Tracor Industrial Engineering staff under the direction of program manager, Barry Davis; Price Waterhouse Consulting and Hughes Aircraft Co.

James B. Skaggs, Tracor Aerospace acting group vice president, said the goals of the program are to increase productivity and decrease production costs by advancing technologies in production techniques of industry.

Tracor Aerospace, a subsidiary of Austin-based Tracor, is a leader in the development and production of advanced countermeasures products used on board aircraft, ships, tanks, and missiles to confuse weapons threats; Omega/VLF airborne navigation systems for commercial and military aircraft; and other defense electronics systems for both United States and foreign governments.

PHILADELPHIA (MARCH 28) PR NEWSWIRE - Comcast Corp. (NASDAQ-NMS: CMCSA, CMCSK) today reported results for the year ended Dec. 31, 1989.

The company announced that revenues and operating cash flow reached record highs. Results of operations included the effect of consolidating the results of Comcast Cable Investors L.P. and Comcast Cable of Indiana L.P., limited partnerships acquired on Sept. 19 and Aug. 9, 1989, respectively. Also reflected for the full year is the company's proportionate share of

the losses associated with its acquisition of 50 percent of Storer Communications Inc. on Nov. 2, 1988.

Revenues for 1989 were $562,284,000, an increase of 25 percent over the revenues of $449,906,000 for the same period in 1988. The company reported operating cash flow (defined as income before non-cash charges, interest and income taxes) of $223,746,000 as compared to $176,850,000 for the prior year, representing an increase of 27 percent. Comcast recorded net losses of $148,750,000, or $1.39 per share, as compared to net losses of $47,557,000 for the prior year, or $.47 per share. All per-share figures have been adjusted to reflect the 3-for-2 stock split effective Oct. 24, 1989.

Brian L. Roberts, president of Comcast, stated, "Results achieved during 1989 continued to exceed our expectations; with outstanding increases in revenues and cash flow reflecting the healthy performance of our cable business and the ongoing development of our cellular communications division." Roberts said, "Our commitment to enhance the value of the company through acquisitions and internal growth remains although we will continue to report net losses associated with those acquisitions, principally due to accounting conventions such as higher amortization and financing costs. Our financial condition remains strong with more than $270,000,000 of cash and short-term investments on our balance sheet at year end."

Comcast Corp. is principally engaged in the development and operation of cable communications systems. The company's consolidated and affiliated operations served more than 2.3 million subscribers at Dec. 31, 1989. This included 767,000 subscribers associated with systems owned by Storer Communications Inc., for which Comcast provides consulting services. In addition, the company provides cellular telephone communications and sound communications services. The Class A and Class A Special Common Stock are traded in the over-the-counter market and are reported in the National Market List under the NASDAQ symbols CMCSA and CMCSK, respectively.

MORRIS TOWNSHIP, NJ (MARCH 28) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) and Exxon Chemical Company announced today that they have signed a letter of intent to form a partnership to operate Allied- Signal's High Density Polyethylene (HDPE) business in Baton Rouge.

Under the proposed agreement, Allied-Signal's HDPE business will be operated as a partnership between the two companies, with the current Allied-Signal HDPE management and staff. Exxon Chemical, headquartered in Darien, Conn., will supply ethylene, a key raw material in HDPE production, to the facility on a long-term basis.

"This is an important strategic decision for Allied-Signal," said Fred Poses, president of Allied-Signal Engineered Materials. "Our Baton Rouge facility has always been an excellent performer. The partnership with Exxon Chemical will give us greater competitive strength in the future by providing an ongoing, high-quality raw material supply."

"We look forward to this partnership with Allied-Signal and for the mutual benefits that will result to both companies," said H. Eugene McBrayer, president of Exxon Chemical Company. "This partnership will provide

Exxon Chemical with an ownership interest in a leading U.S. high density polyethylene business known for the quality of its products."

Allied-Signal's Baton Rouge HDPE facility employs about 450 people and has sales of about $450 million. Plant capacity is in excess of 1.2 billion pounds annually. HDPE has numerous applications in the packaging, automotive, and industrial markets. Allied-Signal's A-C Performance Additives business is not affected by the transaction.

"We are very proud of our Baton Rouge plant. It has been consistently modernized and expanded over the years to meet market demand. We are looking forward to an excellent relationship with Exxon Chemical in which the strengths of both companies make a strong business even stronger," Poses said.

Allied-Signal is an advanced technology company with businesses in aerospace, automotive products and engineered materials.

LAFAYETTE HILL, PA (MARCH 28) PR NEWSWIRE - Home Unity Savings Bank PaSA (NASDAQ: HUSB) announced today that the Office of Thrift Supervision (OTS) has approved the capital plan Home Unity submitted in January.

The OTS' approval is subject to the execution of an operating agreement between Home Unity and the OTS and Home Unity's compliance with the terms of that agreement. Under the draft agreement the OTS submitted, Home Unity will need to raise $26 million by Sept. 30, 1990, and comply with the growth and business activities set forth in its capital plan. If Home Unity cannot obtain the necessary capital infusion by Sept. 30, the OTS would have the authority under the agreement, if it elected, to appoint a conservator or receiver for the bank or to negotiate a merger, transfer of assets and liabilities or similar transaction on behalf of the bank.

Michael. C. Rush, Home Unity's president and chief executive officer, stated: "We are pleased by this vote of confidence. Home Unity is one of very few thrifts in the country to have its capital plan approved. With the bank's recent return to profitability and receipt of the OTS' approval of our plan, the bank has attainedd two of its most important goals. We are all directing our efforts to attaining a third, very important goal -- a successful capital infusion."

Home Unity is insured by the FDIC, and has 15 full-service offices in Philadelphia, Bucks and Montgomery counties. Corporate headquarters are located in Lafayette Hill.

Home Unity's common stock is traded in the over-the-counter market.

#90087p0325 03/28/1990 ~PR Newswire

WASHINGTON (MARCH 28) PR NEWSWIRE - Charging that AT&T is "once again attempting to reap greater profits at the expense of its employees and customers," the Communications Workers of America (CWA) today denounced the company's claim that by eliminating 6,000 positions and closing 60 work centers AT&T will be able to improve customer service.

"By closing more offices and laying off workers, AT&T is destroying its

ability to provide high quality service and is destroying employee morale " CWA Vice President for Communications and Technology Jim Irvine said. "This is a service industry. AT&T's profits are tied to the quality of service it is able to provide to its customers. The difference between AT&T and its competitors is not in technology -- the difference is in its people. AT&T employees and customers are paying the price of these shortsighted policies -- and over the long-haul shareholders will pay too."

Negotiations between AT&T and its unions, CWA and the International Brotherhood of Electrical Workers (IBEW), broke off yesterday (Tuesday) when the two sides were unable to agree to changes in the company's pension plan. The unions called for the negotiations after AT&T instituted an enhanced early retirement program for its managers.

"We were attempting to insure some fairness -- some measure of justice in the pension system," Irvine said. "Our demand to the company was simply; do for your workers what you are doing for your managers. But they refused. Now, instead of allowing people to leave the company voluntarily, with some dignity and some security, they will disrupt and destroy the lives of thousands of working families by forcing unnecessary layoffs."

Irvine charged that AT&T has "put so many hooks in its early retirement proposals that they're making it impossible for us to reach an agreement.

"Last week AT&T raised its shareholders' dividends by 10 percent, increasing its pay out by $130 million, and this company is able to sweeten the pot for retiring managers. But workers are being asked to bite the bullet -- to give up some hard-won, negotiated gains. That's not fair," he added. "We have done more than our share to make this an extremely profitable company.

"We are waiting for AT&T management to recognize, in a concrete way, the contribution made by these dedicated, committed workers," Irvine said. "This company must not lose sight of the fact that these are hard working people who helped build and maintain the world's greatest telecommunications system and are about to be put on the unemployment line. They must be treated fairly."

CWA is the world's largest telecommunications union, representing nearly 700,000 working women and men, including 135,000 AT&T employees.

#90087p0328 03/28/1990 ~PR Newswire

NEW YORK (MARCH 28) PR NEWSWIRE - Bairnco Corporation (NYSE: BZ) today reported that due to unanticipated events during the first quarter of 1990 including a substantial increase in Keene Corporation's asbestos related bodily injury costs, the management of Keene Corporation, a wholly owned subsidiary of Bairnco Corporation, cannot determine whether or not Keene's ultimate asbestos related liability will have a material adverse effect upon Keene's financial position. Because of this material uncertainty, the report of its independent public accountants to be issued on the Dec. 31, 1989 financial statements of Keene Corporation will be modified. As a result, the auditors report on the 1989 consolidated financial statements of Bairnco Corporation will also be modified because of this material uncertainty.

Glenn W. Bailey, chairman of Keene Corporation, said that there had also been a substantial increase in the number of non-meritorious claims against all defendants in the asbestos related bodily injury litigation. He went on to say that the courts' apparent willingness to recognize these claims has made it much more difficult to estimate the number of asbestos related claims that might be brought against the corporation in the future and therefore the total liability for such claims.

Bailey, who had been chairman of Keene since its organization in 1967 through January 1990, has been reappointed chairman of Keene. Eugene R. Anderson, who had served as chairman of Keene from January 1990 through March 1990 and served as a director of Keene from 1968, will continue to serve as a director of Keene.

As previously announced, subject to final board action and the receipt of required consents including the consent of lenders to Bairnco, Keene Corporation will be spun off to the Bairnco stockholders as a stock dividend on the basis of one share of Keene common stock for each share of Bairnco common stock. It is anticipated that the dividend will be tax-free to the shareholders.

IRVINE, CA (MARCH 28) PR NEWSWIRE - Technology Marketing Incorporated (TMI), and its board of directors, announced today that Robert K. Lowry and George H. Wells have been elected interim chief executive officer (CEO) and interim chief operating officer (COO), respectively. Lowry indicated that the company is continuing to search for a president to perform both duties.

Lowry was a founder and has been a director of TMI since its formation in 1969. He was an executive officer of TMI from its formation until Dec. 1987, serving formally as the company's president and chief executive officer. Lowry was, until this appointment, a private investor and business consultant.

Wells has been a director of TMI since its formation in 1969. Wells served as an executive officer of TMI from its formation, most recently as chairman of the board, until December 1987. Wells is chairman of the board of Eldorado Bancorp and a private investor.

Technology Marketing Incorporated is a provider of high technology automatic test equipment, magnetic tape certification systems, and custom engineering services and development of computer- based systems to manufacturers and service providers in the electronic industries. TMI's corporate offices are in Irvine, Calif.

#90087p0337 03/28/1990 ~PR Newswire

IRVINE, CA (MARCH 28) PR NEWSWIRE - Technology Marketing Inc., and its board of directors, today announced that a review of the allegations made in the shareholder derivative suit recently filed against the TMI board of directors by Otto Paradzick has been found by the board to be without merit, and that the lawsuit will be vigorously defended. Robert K. Lowry acting as a spokesman for the board stated: "We are shocked and dismayed that a shareholder of TMI would make the allegations contained in

this lawsuit. Wells, and myself, together with the entire board, have sought to place the interests of the shareholders ahead of our personal interests. The allegations made in this lawsuit consist of false information, misinformation, and half-information which, in the absence of other facts, presents a distorted and erroneous charge against the TMI board. TMI wishes to assure its shareholders and customers that TMI and its board believe that full airing of this case before the court will demonstrate that Mr. Paradzick's allegations are meritless, and that the filing of this lawsuit by Mr. Paradzick is contrary to the best interest of TMI and its shareholders."

The board of TMI has retained Raymond J. Ikola, of the law firm of Hufstedler, Miller, Klaus & Beardsley to defend the suit. Ikola commented: "We intend to demonstrate in court that Mr. Paradzick's lawsuit is without merit. In light of the information I have reviewed, it is difficult to understand how Mr. Paradzick could have made certain of his allegations. Unfortunately, the legal process is, by its nature, time consuming. In the end, however, we believe that all of the allegations will be found to lack merit."

Technology Marketing Incorporated (TMI) is a provider of high technology automatic test equipment, magnetic tape certification systems, and custom engineering and development services of computer- based systems to manufacturers and service providers in the electronic industries. TMI was incorporated in 1969 and issued shares to the public in 1981. Its corporate offices are in Irvine, Calif.

#90087p0338 03/28/1990 ~PR Newswire

ERIE, PA (MARCH 28) PR NEWSWIRE - Spectrum Control, Inc. (NASDAQ: SPEC), a worldwide manufacturer of electronic components, today reported results for the fourth quarter and fiscal year ended Nov. 30, 1989.

For the fourth quarter, the company sustained a net loss of $181,000 or 4 cents per share on net sales of $8,843,000 versus a net loss of $1,443,000 or 27 cents per share on net sales of $7,201,000 for the same period last year.

For fiscal 1989, Spectrum Control had a net loss of $846,000 or 16 cents per share on net sales of $32,018,000 compared to a net loss of $2,723,000 or 51 cents per share on net sales of $29,789,000 for the prior year.

"We accomplished some significant goals last year, although returning to profitability was not one of them. The net operating loss for the year

decreased 69 percent. Operations for the year produced a profit of $122,000 compared to a loss of more than $2.4 million from operations in fiscal 1988," Thomas L. Venable, chairman of the board, commented.

"There were two year-end adjustments which reduced fourth-quarter 1989 pretax income by more than $550,000. One of the adjustments was a pretax charge of $150,000 required for a U.S. EPA study, and the other was a change in accounting which reduced capitalization of assets and resulted in an additional charge to income of $400,000 in the fourth quarter. If these adjustments had not been made, fourth-quarter pretax income would have been a positive $276,000 instead of negative $170,000, and after an allowance for taxes, the fourth quarter 1989 would have been profitable at $182,000 or 4 cents per share, rather than showing a loss of $181,000 or 4 cents per share," Venable noted.

"It was a year of intense activity, including the development of the polymer multilayer capacitor, reorganization of the marketing department, a rights offering to shareholders which raised more than $5 million, and personnel reductions that will enhance cash flow without hurting operating effectiveness," he added.

"We began fiscal 1990 with a backlog of more than $25 million, of which customers have authorized $13 million for shipment. While we realistically view 1990 as another difficult year, we also have a number of exciting opportunities to grow and return to profitability," Venable concluded.

CHICAGO (MARCH 28) PR NEWSWIRE - Amoco Oil Company and the federal environmental protection agency today announced an 18-month joint research project to study refinery pollution prevention alternatives. According to Walter R. Quanstrom, Amoco's vice president - environmental affairs and safety, "This is the first joint industry and government study focusing on refinery pollution prevention."

Quanstrom said that the study, which will be conducted at Amoco's Yorktown Va., refinery, is an opportunity to examine releases to air, water, and land; simulate and identify pollution prevention alternatives; assess potential benefits associated with each alternative; and identify any implementation barriers.

"We are working with the EPA to address how limited resources -- time, people, and capital -- can be focused to achieve desired environmental results," said Quanstrom. "We'll also identify the technical, legislative, regulatory, and economic issues which can obstruct pollution prevention."

In addition, Quanstrom said that current permitting impediments will be evaluated and that possible alternative permitting approaches which support pollution prevention activities will be developed.

"Amoco and the EPA are committed to ensuring environmentally sound operations," said Quanstrom. "By working together on this study we'll develop a cooperative working relationship that will focus on common objectives and proposed activities."

The project is divided into two phases. Quanstrom said that the first phase, which will run through the end of 1990, will focus on data acquisition. The second phase will identify alternative pollution reduction schemes, simulate their impact on the refinery and surrounding area, and rank the alternatives. The project will be completed during the third quarter of 1991.

"The objective of a pollution prevention study is to minimize any releases " said Quanstrom. "We'll look at source reduction and process modifications as possible ways to reduce emissions."

Amoco's Yorktown refinery was chosen because it produces diversified products, is small enough to conduct a thorough study, and because of its

proximity to Washington.

According to John Stanhope, Yorktown's refinery manager, the refinery produces about 47,000 barrels of refined products each day and employs more than 200 people.

"We're looking forward to participating in this study," said Stanhope. "This project is part of Amoco's ongoing effort to examine its products and processes as they relate to the environment."

LOWELL, MA (MARCH 28) PR NEWSWIRE - The board of directors of Wang Laboratories, Inc. (AMEX: WAN) announced today that, at its regularly scheduled meeting, it elected Richard W. Miller chairman of the board and chief executive officer. Miller will continue to serve as the company's president.

The board also announced that it elected Lorraine C. Wang, wife of the late chairman and chief executive officer Dr. An Wang, to the newly created position of honorary chairperson. Mrs. Wang is a founding director of the company.

Speaking on behalf of the board, Peter A. Brooke, a director, said, "The board's unanimous decision reflects the confidence which the Wang family and the other board members have in Rick Miller. The balance sheet has been strengthened and a plan is now being executed to return Wang to profitability. Rick Miller's accomplishments since becoming president in August, his experience, and his track record of success make him the individual most qualified to lead Wang Laboratories back to profitability."

Miller said, "Mrs. Wang has made an immeasurable contribution to our company. As honorary chairperson, she is the living symbol which links Wang's proud history with the strong and profitable future we are committed to achieve.

"I am both pleased and humbled by the support and confidence that the board and the Wang family have expressed in me, in the Wang management team, and in the programs we have intitiated. Dr. Wang fully supported our programs, and I am saddened that he will not see the turnaround carried through to fruition.

"Industry conditions remain extremely difficult, but we believe we have in place the programs necessary to complete the turnaround. Third quarter

losses will probably be higher than analysts' expectations due principally to shortfalls in demand and margin pressures which can be seen throughout our industry. As announced earlier, we continue to expect losses for the balance of this fiscal year.

"Our debt reduction and cost reduction plans are on schedule and we will continue the vigorous implementation of these plans in order to return the company to profitability in the near term.

"Although additional restructuring will occur, we have already made significant progress. We are on schedule to complete the sale of our international lease-financing operations to GE Capital and the sale of InteCom to Matra Communication, thus reducing our bank group debt to less than $93 million. We have reduced our operating expenses by over $300 million annually and have initiated new product strategies and organizational changes that focus our resources on the needs of our customers. "I am confident that these plans will succeed in returning Wang to profitability."

FARMINGDALE, NY (MARCH 28) PR NEWSWIRE - The board of directors of P & F Industries, Inc. (NASDAQ-NMS: PFINA) (the company) announced today that the by-laws of the company, relating to presentation of stockholder proposals at annual meetings and to stockholder nominations for directors, were amended on March 14, 1990.

The amendments conform to the rules of the Securities and Exchange Commission relating to advance notice of stockholder proposals and extend such notice requirements to stockholder nominations for directors. The board of directors, in adopting the by-laws amendments, declared that nominations for directors to be elected at the 1990 annual meeting, would be accepted until the close of business on April 13, 1990, to allow current stockholders sufficient opportunity to present nominations for directors to be elected at such meeting.

SAN DIEGO (MARCH 28) PR NEWSWIRE - DHL Airways Inc. (DHL), and Mail Boxes Etc. (NASDAQ: MAIL) (MBE) announced today that they have entered into an

agreement whereby DHL will become the preferred shipper of domestic overnight and international air express documents and packages for MBE's network of 1,100 postal and business service centers in the United States.

Considering Mail Boxes Etc.'s network growth rate of one new outlet per day, the agreement could provide DHL with a drop-off location in every significant population center in the country within the next few years.

The agreement also requires DHL to notify its customers that participating MBE centers are designated drop-off points for DHL shipments. The majority of Mail Boxes Etc.'s franchised centers are expected to sign up for the new domestic program, thereby increasing the number of DHL's global drop-off points to more than 2,200 locations.

For MBE franchise owners, the agreement provides highly competitive volume pricing, as well as price incentives for shipments directed to MBE centers by DHL.

"I believe the agreement will provide both companies a significant competitive advantage in our respective industries," said MBE President and CEO Tony DeSio.

"This agreement dramatically increases our drop-off locations," said Thomas Honey, DHL's senior vice president of sales, marketing and customer service. "It will now be much easier for our customers to do business with us."

Started in 1980, San Diego-based Mail Boxes Etc. is today the nation's largest franchisor of postal, business and communication services with centers located in 43 states, Puerto Rico, Canada, Mexico and Japan. A public company since 1986, MBE has been ranked by Forbes magazine as No. 42 out of "America's 200 Best Small Companies."

DHL Worldwide Express is the world's largest and most experienced international air express network. DHL Airways Inc., the network's U.S. arm, is headquartered in Redwood City, Calif. and operates an airline and sorting hub facility in Cincinnati.

PITTSBURGH (MARCH 28) PR NEWSWIRE - Westinghouse Electric Corp. (NYSE: WX) has acquired a minority interest in Photocomm Inc., the largest marketing and distribution company for solar electric products in the United States.

Under terms of the agreement, Westinghouse acquired 13 percent of Photocomm and provided additional financing in the form of convertible debt. Westinghouse also acquired options to purchase additional equity interest in the future.

Through its distribution network and direct marketing programs, Photocomm offers engineered products which use solar electric technology, solar electric modules and associated components. These engineered products include billboard and security lighting, water pumping and remote residential home powering. Photocomm's sales were $7.3 million in its last fiscal year ending Aug. 31, 1989.

"Westinghouse's association with Photocomm supports our strategy to become an industry leader in providing systems and components for the solar energy market," said Richard J. Slember, vice president and general manager of Westinghouse's Energy Systems Business Unit.

"One of the keys to our overall success in the solar energy business is to establish a strong domestic presence. We look forward to working with Photocomm towards that end."

Robert R. Kauffman, president and chief executive officer of Photocomm, said, "We are pleased to have been selected by Westinghouse as one of their principal partners for further developing the potential of solar energy technology. This cooperation will be invaluable in accelerating our mutual growth in the solar electric industry."

Photocomm is a publicly owned company with headquarters in Scottsdale, Ariz. The company employs 70 people and has seven regional offices: Chino Valley and Tucson, Ariz., Escondido and Grass Valley, Calif., Denver Colo., Cave Junction, Ore., and Downers Grove, Ill. Photocomm was founded in the late 1970s.

Westinghouse has been involved with solar energy for more than 20 years including systems design, hardware manufacturing and development of patented technology.

#90087p0356 03/28/1990 ~PR Newswire

PONTIAC, MI (MARCH 28) PR NEWSWIRE - The Board of Directors of First Federal Bancorp (FFB), the holding company for First Federal Savings Bank and Trust (FFSBT), has voted to suspend its efforts to sell the company.

The announcement was made by Leo D. Ottoni, president and CEO of FFB. FFB is traded on the American Stock Exchange under the symbol FFS.

FFB announced in November that it had engaged the investment banking firm of Shearson Lehman Hutton to explore strategic alternatives, including the possible sale of the company. Although Shearson Lehman Hutton conducted an extensive marketing effort, FFB has received no acquisition proposals.

FFB's subsidiaries, FFSBT and Citizen's Federal Savings Bank, have filed a consolidated capital plan with the Office of Thrift Supervision (OTS), indicating that its two thrift subsidiaries will meet all regulatory capital requirements, without a merger or capital infusion, by 1994. This capital plan has not yet been acted upon by the OTS.

FFSBT's operating strategy as detailed in the capital plan is to reduce its emphasis on commercial business and commercial real estate lending while increasing its emphasis on one- to four-family residential lending in its local markets. In connection with this strategy, the Board has decided to take a number of immediate actions before the close of the third fiscal quarter at March 31, 1990.

FFB's long-term strategy should result in the reducing and restructuring of its balance sheet in order to improve its capital position and decrease its risk-based assets.

Although FFB is not actively pursuing a merger partner, it will continue to explore strategic alternatives to maximize shareholder value, and thus will remain receptive to reasonable offers.

ATLANTA (MARCH 28) PR NEWSWIRE - Oxford Industries Inc. (NYSE: OXM), Atlanta-based apparel marketer and manufacturer, today reported results for the third fiscal quarter which ended March 2.

Sales for the third quarter this year totaled $125,020,000, a 6 percent reduction from $132,920,000 for the same quarter last year. For the nine months, sales totaled $413,880,000, down by 5 percent from the $434,611,000 recorded for the comparable period in the prior year.

Third quarter net earnings were $492,000 compared to $1,113,000 for the same quarter last year. For the nine months, net earnings were $7,505,000

compared to $7,357,000 in the prior year.

Earnings per share for the third quarter were $.06 compared to $.11 in the prior year. For the nine months, earnings per share totaled $.77 compared to $.74 in the prior year.

Commenting on the results, J. Hicks Lanier, chairman of Oxford, said: "During our third fiscal quarter the business climate was poor as many areas of the retail marketplace were in disarray. Several of our large customers were overstocked and deferred delivery of contracted merchandise. As a result of these factors, we were forced to cut back production significantly during the period. Our expenses, both in absolute dollars and as a percentage of sales, were below last year's third quarter level even after providing for expected losses of approximately $500,000 in connection with the Campeau bankruptcy. In spite of this, we were unable to fully offset the margin deterioration caused by our production curtailment."

Discussing the future outlook, Lanier said: "At this time we see no immediate relief from the ongoing conditions affecting our industry and our company. Efforts to work inventory levels down through selected production curtailment are continuing. We expect sales and earnings in our fiscal fourth quarter to be in line with our third quarter results."

#90087p0363 03/28/1990 ~PR Newswire

GAITHERSBURG, MD (MARCH 28) PR NEWSWIRE - Optelecom, Inc. (NASDAQ: OPTC) of Gaithersburg was awarded a Small Business Innovative Research contract for an amount of $493,341 by the U.S. Naval Air Development Center, Warminster, Pa., to develop and test an optical communication system for unmanned aerial vehicles (UAV).

The communication system provides a jam-proof data link for controlling the UAV and for transmission of TV and other signals from the UAV to a ground control point.

This unique system utilizes a modulatable optical retroreflector (retromodulator) mounted on the UAV, and a laser with a tracker mounted on the ground. The light beam from the laser tracks and conveys control signals to the UAV. The retromodulator, mounted on the UAV, redirects the light beam back to the laser with TV signal and other data imposed on the returned beam. The technology for this system, invented by Optelecom, was previously demonstrated under contracts with U.S. Army Missile Command and the Defense Advanced Research Projects Agency.

This retromodulator communication link complements Optelecom's business of providing fiber optic data links for missiles, UAVs, ground robotic systems and underwater remotely operated vehicles. The new link transmits through the air so it is less expensive to operate than the fiber optic link, which uses up optical fiber. Thus, the new system is suitable for a number of non-military applications, where repeated use is required.

NEW YORK (MARCH 28) PR NEWSWIRE - On March 26, 1990 Active Capital Inc. entered into a formal agreement and plan of reorganization (the plan) to acquire all the issued and outstanding common stock of Victor Import and Export, Inc. (Victor), a Pennsylvania corporation, in exchange for 40,000,000 restricted shares of registrant's common stock. Completion of this acquisition is contingent upon certain events, as detailed in the plan. Upon closing of the transaction, ACI will have a total of 50,000,000 shares issued and outstanding. The current shareholders of

the ACI will own approximately 20 percent of the outstanding shares and the current Victor shareholders will own approximately 80 percent of the outstanding shares, without giving effect to the potential exercise of outstanding warrants of registrant in future, if any.

Victor is a development stage company formed June 1989 for the purpose of conducting commercial import and export transactions with representatives of private enterprises and/or governmental authorities is various countries including Eastern Europe. Since inception, Victor projects it will generate gross sales of approximately $350,000.

BELLWOOD, IL (MARCH 28) PR NEWSWIRE - Sanford Corp. (NASDAQ: SANF) today announced that to improve efficiency and to allow for continued growth, the company will lease 210,000 square feet across the street from its present location. The new space will allow Sanford to consolidate its shipping and warehousing functions. Corporate headquarters will also move into these new facilities at 2711 Washington Blvd., Bellwood, while Sanford's manufacturing will continue to operate at its current location. The company anticipates its expansion will begin in April and be complete by July of this year.

"I'm happy to say we've outgrown our existing space," said Henry B. Pearsall, chairman and CEO for Sanford. "With this expansion, Sanford will increase its total operating space by 50 percent."

The new headquarters will give office workers an additional 10,000 square feet and new warehouse space will allow for combined shipments of both Sanford and Sterling Plastics products.

"The interior -- shipping, warehousing and office -- is being completely remodeled," continued Pearsall. "These are welcome changes that we've been considering for some time." Sanford's manufacturing, while remaining at its present location, will expand, too.

"Sanford needs more manufacturing space," added Pearsall. "We're going to expand the size of our present manufacturing areas, reconfigure machinery and convert some of the current offices into more manufacturing."

Sanford Corp. began operations in 1857 as the Sanford Manufacturing Co. in Worchester, Mass. To expand distribution, it moved to Chicago in 1866. In 1947, to accommodate continued growth, Sanford moved its headquarters to a new factory 13 miles west of Chicago in Bellwood. In addition to its operations in Bellwood, Sanford has partial ownership of two manufacturing

plants outside of the United States, Sanford de Venezuela and Sanford de Mexico.

Sanford designs, manufactures and markets under its brand names Sanford and Sterling, marking and writing instruments and other office and school supplies. The company's product lines include a wide variety of markers, porous tip pens, stamp pads, self-inking stamps, adhesives, molded plastic office accessories, file storage boxes and other school supplies, which are distributed primarily in the United States and also in numerous foreign countries.

#90087p0369 03/28/1990 ~PR Newswire

MIAMI (MARCH 28) PR NEWSWIRE - Robert J. Hall, publisher and chairman of the Detroit Free Press, today was named publisher and chairman of Philadelphia Newspapers, Inc., the company that publishes The Philadelphia Inquirer and the Philadelphia Daily News.

Hall will be succeeded in his duties as Free Press publisher by Neal Shine former senior managing editor of the Free Press. The appointments will be effective April 2.

Shine will be responsible for oversight of Free Press news and editorial operations and will represent the newspaper in the community. Executive Editor Heath Meriwether and Editor Joe Stroud will report to Shine.

In making the announcement, Tony Ridder, president of Knight-Ridder, Inc., (NYSE: KRI) said, "Bob Hall is one of the finest newspaper executives in America. Over the years, in every Knight-Ridder assignment, he has provided strong leadership and outstanding managerial skills. Bob returns to Philadelphia to assume the leadership of PNI at an exciting and challenging time. Construction has begun on a $300 million state-of-the-art production facility that will be completed in 1993. His long experience and special knowledge of Philadelphia will be powerful assets."

Commenting on Shine's appointment as Free Press publisher, Ridder said, "Neal Shine has been a fixture on the Detroit newspaper scene since 1950 when he joined the Free Press as a copy boy. Neal understands the Free Press intimately, and is beloved by the people of Detroit and Michigan. We are absolutely delighted to be able to make this appointment."

Jennie Buckner, vice president/news for Knight-Ridder, said, "Neal's whole journalistic life shows his commitment to the best in newspapering. He loves Detroit, the Free Press and its staff. And he's the right person to

lead the paper into the 1990s."

#90087p0370 03/28/1990 ~PR Newswire

MIAMI (MARCH 28) PR NEWSWIRE - Knight-Ridder, Inc. (NYSE: KRI), and The Gannett Co., Inc. (NYSE: GCI), today announced top level changes at the Detroit Newspaper Agency, which is jointly owned by the two companies.

Joseph M. Ungaro, 59, president and publisher of the Westchester Rockland (N.Y.) Newspapers and a vice president of the Metro Newspaper Division of Gannett, has been named president and chief executive officer of the Detroit Newspaper Agency, succeeding William J. Keating.

The Detroit Newspaper Agency (DNA) has the responsibility for all sales, business and production operations for The Detroit News and the Detroit Free Press under a Joint Operating Agreement approved by the Supreme Court in November 1989.

Keating, 62, who previously held the title of chairman of The Cincinatti Enquirer in addition to his role as president of the DNA, assumes the role of chairman and publisher of The Enquirer. As publisher, he succeeds John Zanotti, who resigned last week to become publisher of the Arizona Republic and Phoenix Gazette.

Making the announcements were John Curley, chairman, president and CEO of Gannett, owners of The Detroit News, and James K. Batten, chairman and CEO of Knight-Ridder, owners of the Detroit Free Press, the two newspapers that make up the Detroit Newspaper Agency.

In a joint announcement, Batten and Curley lauded Keating's efforts during the planning and early steps of implementing the Joint Operating Agreement since its approval.

Ungaro is responsible to the Detroit Newspaper Agency management committee and will report on a day-to-day basis to P. Anthony Ridder, president of Knight-Ridder, and to Brian Donnelly, president of Gannett's Metro Newspaper Division.

Keating was named to his DNA post in 1986 after having served as executive vice president and general counsel of Gannett and prior to that senior vice president and president of the Newspaper Division.

Keating served two terms as U.S. representative from Ohio's First Congressional District, was a member of the Cincinnati City Council and a judge in the Hamilton County Common Pleas Court and Cincinnati Municipal

Court. He also was an assistant attorney general for the State of Ohio.

#90087p0372 03/28/1990 ~PR Newswire

MOBILE, AL (MARCH 28) PR NEWSWIRE - The directors of Morrison Incorporated (NASDAQ-NMS: MORR) at a regular quarterly meeting announced that its total revenues for the 13 weeks ended March 3 increased 10 percent to $228 million from $207 million the prior year.

Income from continuing operations for the 13-week period was $7. 4 million as compared with $8.8 million a year earlier.

Earnings per share from continuing operations were 43 cents as compared with 50 cents last year.

For the 39 weeks ended March 3, Morrison realized revenues of $665 million as compared with $599 million last year. Income from continuing operations was $22.2 million as compared with $23 million the prior year.

Earnings per share from continuing operations for the 39-week period were $1.29 as compared with $1.30 a year earlier.

The company also announced that a reserve of $4 million was being established in connection with the reacquisition of a motel property in Tampa, Fla. The unit, part of the Admiral Benbow Inn chain disposed of several years ago, was repossessed following default of certain obligations by the purchaser.

This reserve represents $2.5 million on an after tax basis, equivalent to 15 cents per share. Earnings per share for the 13 weeks, including discontinued operations, were 28 cents per share. Earnings per share for the 39 weeks, including discontinued operations, were $1.14.

The board of directors at the same meeting declared a quarterly cash dividend of 16 cents per share on the common stock, payable on April 30 to shareholders of record at the close of business on April 13.

The company on March 3 operated 175 Family Dining units. The Specialty Restaurant Division operated 135 units, including 103 Ruby Tuesdays, 24 L&N Seafood Grills and eight Silver Spoons. Ten more Specialty Restaurant units will open in the fourth quarter.

The company reaffirmed that its board of directors authorized the repurchase of up to an additional one million shares of its common stock. The shares acquired through this repurchase would be held as treasury

stock to provide stock for general corporate purposes. The program may be discontinued at any time.

Pursuant to previously announced repurchase authorization, the entire 1,333,000 shares of the October 1987 and 1 million shares of the December 1988 authorization have been repurchased.

SAN JOSE, CA (MARCH 28) PR NEWSWIRE - CNet Technology Inc. today announced the signing of a strategic alliance with LAN Group International a leading international consortium of 16 independent wholesale distributors in 14 countries specializing in networking and connectivity products. Under the 5-year, $20 million contract agreement, each member of the consortium will supply CNet's complete line of ARCnet, Ethernet, Twisted Pair, and Token-Ring networking products.

"CNet Technology's commitment to providing advanced technology products for the connectivity market parallels that of the LAN Group's," said Eric R. Stral, LAN Group general manager. "Given that common goal, the LAN Group and CNet's strategic alliance will enable us to better serve our international customers by providing networking products which are of the highest quality."

CNet offers a complete line of LAN, WAN, data communications and microcomputer products to support various topologies and operating systems.

Headquartered in San Jose, CNet Technology Inc. designs, develops, manufactures and markets local area network (LAN), wide area network (WAN) data communications, and microcomputer products.

Based in Schaumburg, Ill., LAN Group International is an international consortium of 16 independent wholesale distributors in 14 countries, specializing in the sale, service and support of microcomputer, networking and communications products and services. LAN Group International benefits its members, manufacturer-partners and dealer-partners by providing many significant benefits.

HOLLYWOOD, FL (MARCH 28) PR NEWSWIRE - Heico Corporation (AMEX: HEI) announced today that United Technologies Corporation (NYSE: UTX) has amended its complaint in the previously reported patent infringement suit against the company and its subsidiary, Jet Avion Corporation, to add allegations of misappropriation of trade secrets and proprietary information, and unfair competition. The amended complaint alleges, without stating the method by which the figure was calculated, that United Technologies has been injured in the amount of at least $100 million and seeks, among other things, compensatory and punitive damages. These new

claims make allegations regarding events ranging as far back as 23 years ago and are currently under review by Heico's legal counsel.

Heico previously reported that its legal counsel had advised that the company should be successful in defending the patent infringement suit. Although discovery is in its early stages and sufficient facts have not yet been developed to establish a firm opinion, based on currently known facts, Heico's legal counsel have advised that they continue to believe that the company has meritorious defenses to the patent infringement claim as well as to the newly-added causes of action. In addition, Heico's counsel is also presently evaluating possible counterclaims against United Technologies.

While addressing this litigation, the company reiterated its previously announced policy of seeking positive and, if possible, amicable resolutions to litigation. In this regard, the company is continuing settlement discussions to resolve this matter.

Heico is engaged in the manufacture and sale of aviation and defense industry products through operations in Hollywood, Fla. (Jet Avion) and Fort Lauderdale, Fla. (LPI Corporation).

NORTHVALE, NJ (MARCH 28) PR NEWSWIRE - Zenith Laboratories Inc. (NYSE: ZEN) announced today that it has discontinued further litigation over Bristol-Myers Squibb's (NYSE: BMY) patent on crystalline cefadroxil monohydrate.

Zenith has agreed within the terms of the agreement to cease all manufacture and sale of cefadroxil monohydrate.

John H. Klein, Zenith's chairman and chief executive officer, reported that Zenith had received FDA approval of cefadroxil monohydrate in 1987 and has marketed the product since mid-1989. Since 1987 the product has been approved as safe and effective and Zenith has manufactured the product in compliance with all current good manufacturing practices (CGMP's).

Klein continued by stating in 1989, cefadroxil monohydrate accounted for approximately 13 percent of gross revenues.

The terms of the settlement call for payment to Bristol-Myers Squibb of $1.2 million over a three-year period to be offset with credits for

inventory and returned product.

This agreement follows rulings in Bristol-Myers Squibb's favor by the International Trade Commission and U.S. Court of Appeals for the Federal Circuit against Biocraft Laboratories Inc. (NYSE: BCL) and Kalipharma Inc.

#90087p0399 03/28/1990 ~PR Newswire

RICHMOND, VA (MARCH 28) PR NEWSWIRE - Heilig-Meyers Company (NYSE: HMY), the Richmond-based home furnishings retailer, today announced revenue and earnings for the year ended February 28, 1990. Total revenues for the year increased to $393.4 million from $351.6 million last year. Net earnings increased to $20.0 million compared to $17.1 million in the prior year. Earnings per share rose to $1.90 compared to $1.62 last year. Weighted average shares outstanding were 10,557,887 versus 10,559,262 for fiscal 1989.

Included in fiscal 1990 earnings is $1.6 million, or $.15 per share, which was the cumulative effect, for the period prior to March 1, 1989, of the change in the method of accounting for inventory to include certain warehouse and delivery costs which were previously charged to operating expense. This change, which the Company believes provides a better measurement of operations by more closely matching revenues with expenses, did not otherwise have a material effect on operations in either the current or prior fiscal year,.

Troy A. Peery, Jr., President and Chief Operating Officer, stated that fiscal 1990 revenues, earnings and earnings per share were all records for the Company. Management is particularly pleased with these results because they were achieved during a sluggish year throughout the home furnishings industry. A key component of revenue growth, comparable store sales, increased approximately 14.1 percent for the last six months of the year and 7.5 percent for the entire year. These results can be attributed to internal refinements which improved service to our customers.

William C. DeRusha, Chairman and Chief Executive Officer, stated that these refinements to advertising, distribution and training programs contributed to the Company's success in fiscal 1990 and should continue to do so in future years. In advertising, consumer preferences were emphasized by tailoring our direct mail program to specific regions. The three-year plan for modernization of our distribution network was completed during the year, resulting in improved inventory management and providing increased merchandise availability to customers. In addition, training programs were expanded at all levels. The investment in these

programs has improved service to our stores and customers, as well as provides management with a solid foundation to support future growth.

Heilig-Meyers Company, a Virginia corporation, operated 304 stores in 12 states as of February 28, 1990, net of anticipated closings from the acquisition of locations from Reliable Stores, Inc. The Company opened a store in Selma, Alabama, during March and anticipates opening four additional stores during the first quarter of fiscal 1991.

WASHINGTON (MARCH 28) PR NEWSWIRE - Chris E. Jensen has been named president and publisher of the Great Falls (Mont.) Tribune, it was announced today.

Jensen previously was president and publisher of the Muskogee (Okla.) Daily Phoenix and Times-Democrat. He will be succeeded in Muskogee by Edgar A. Major, vice president and advertising director of the Arkansas Gazette in Little Rock.

The appointments of Jensen and Major were made as Gannett Co., Inc. (NYSE: GCI) today completed acquisition of the Tribune from the Cowles Media Co. of Minneapolis for $41 million. The acquisition brings Gannett's number of daily newspapers to 83.

"We're excited about our new relationship with the Great Falls Tribune and the people of Montana," said Gary L. Watson, president of Gannett's Community Newspaper division, "and we're pleased that Chris Jensen will be leading the Tribune through the transition period and onward to continued progress in the 1990s."

The Tribune becomes part of the Gannett West Regional Group. Jensen will report to Gannett West President Sue Clark-Jackson and Vice President Larry Fuller.

Jensen, 44, began his newspaper career in 1965 as a clerk in the dispatch department of the Pensacola (Fla.) News-Journal. Over a 20- year period, he served in several staff and management roles, including credit manager,

personnel director and advertising director. He was named publisher in Muskogee in August 1986.

Jensen succeeds Steven A. Studt, who decided to remain with Cowles as a regional vice president.

Major, 52, joined the Arkansas Gazette in 1984 as retail advertising manager. A year later, he was named advertising director. He previously had held advertising management positions with the Denver Post.

"Ed Major is an experienced newspaper executive who is familiar with both the challenges and opportunities in his new assignment," Watson said. "Chris Jensen and his team have done an outstanding job at the Daily Phoenix, despite the difficult economic times in Oklahoma. We're confident that Ed will continue this progress."

Gannett is a nationwide news and information company that publishes, in addition to its daily newspapers, including USA Today, 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radios stations, Gannett News Services and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

#90087p0414 03/28/1990 ~PR Newswire

LOUISVILLE, KY (MARCH 28) PR NEWSWIRE - Six additional models of the Rockwell International (NYSE: ROK) on-highway transmission family, including the first overdrive units, are being released for production at virtually all North American original equipment manufacturers' (OEMs) facilities within the next 30 days.

The five 9-speed units, joining the two 9-speed direct-drive models introduced late last year, are available immediately, while the 13-speed overdrive model will be released on May 1.

The new family members from Rockwell's Automotive Operations, based in Troy, Mich., were announced here to North American trade press members and truck operators at the Mid-America Trucking Show.

"The A-ratio models are the first of a series of overdrive models that will allow truck operators who specify overdrives to take advantage of the many benefits the new Rockwell transmission provides," stated James R. Hardy, general manager -- Transmissions for the company's On- Highway Products organization.

"The new RM-9-115-A reflects our response to major fleets requesting a Rockwell transmission for use with the popular 10-liter engines. At 1,150-lb.ft. of torque, this model will be a popular fleet spec throughout the early '90s," he said.

"Not only does this 13-speed transmission give owner-operators and experienced company drivers the ratio flexibility they desire, but the other features they asked for -- high performance, reliability, easy serviceability and strong warranty," explained Hardy.

Customer purchases of Rockwell's first two direct-drive transmissions, the RM-9-125-A and RM-9-145-A unveiled in late 1989, have been strong, according to Dennis A. Kline, director of sales and marketing -- Transmissions.

"The market was clearly ready for a choice in transmissions. We're excited about the pent-up demand for our overdrive models and impressed by the strong support we've received on our direct-drive models," he said.

Kline also emphasized fleet operators' keen interest in the new transmission at the recent Equipment Exposition at The Maintenance Council meeting in Orlando, Fla.

Recent field reports from drivers operating Rockwell transmissions indicate that ease of shifting, particularly with the Rockwell clutch, and reduced vibration and noise have been the most appreciated improvements in the new transmission design.

#90087p0417 03/28/1990 ~PR Newswire

NEW YORK (MARCH 28) PR NEWSWIRE - The Centaur Partners Group today sent the following letter to Howard M. Love, chairman and chief executive officer, and James S. Pasman, Jr., president and chief operating officer, of National Intergroup, Inc. (NYSE: NII):

We received and read your recent letter to us. Your letter misses the real issue entirely. It also mischaracterizes the situation. Let us set the record straight.

We agreed to meet with you twice, both times at your request, because we hoped that you would present to us a specific program to maximize shareholder value for all stockholders. Unfortunately, in our meetings, you spoke only in vague terms about your restructuring program; you did not specify what it would entail; when it would be completed. Or, most important, how it would deliver value to stockholders.

Your letter continues to try to mischaracterize our intentions by describing us as "bidders." As we have made clear several times, we are not making a bid for the company. We do, however, have the single largest stake in the company -- more than 16 percent of the common stock, compared to the incumbent board's ownership of less than 1 percent. As stockholders, we will prosper -- or continue to suffer -- as all other stockholders.

You have obliquely characterized our valuation as "fantasy," but you have made no specific objections or raised any specific issues regarding that valuation. The value of $29 which you characterized as "fantasy" is $3 less than the book value of NII's common stock. If you believe that our valuation range is overstated, then you have either overpaid for businesses (as many have asserted), or have run them down without reflecting this deterioration in your public filings. The valuation was prepared by PaineWebber, Incorporated, reviewed by Jefferies & Company,

and is consistent with the conclusions of many major securities analysts. We stand by its conclusions. While it may be fantasy to imagine realizing these values under your leadership, we believe that these values can be obtained under our direction.

Finally, it is you, not us, who are experimenting with our money, and the money of all other stockholders. Based on the $450 million of losses incurred under your stewardship during the past six years, we believe it would be irresponsible to continue to trust your leadership and your promises. We find it striking that your letter and your other solicitation materials do not discuss, or even mention, your record of broken promises and mounting losses.

The real issue here is corporate governance: majority rules. We believe that the shareholders of National Intergroup deserve the right to elect a majority of the board at the annual meeting in July. This right is reinforced by the fact that under your direction the company has lost money for six years in a row. That is what this vote is all about.

#90087p0425 03/28/1990 ~PR Newswire

CLARKSBURG, WV (MARCH 28) PR NEWSWIRE - Alamco Inc. (AMEX: AXO) announced that today the company entered into an agreement with Pittsburgh National Bank ("PNB"), its primary lender, to refinance its outstanding debt with PNB.

In the first quarter of 1990, the company made debt prepayments to PNB totaling $2,800,000 and, as part of the refinancing agreement effective as of March 1, negotiated a discount of approximately $900,000 on the remaining principal debt. The prepayments and discounting of the debt reduced the principal balance on the company's debt owed to PNB to $5,250,000, or a reduction of approximately $3,700,000. The company immediately prepaid an additional $75,000 from the proceeds of a recent asset sale, further reducing the outstanding principal balance to $5,175,000. The amount now outstanding is evidenced by a single term note to be amortized in 35 equal monthly principal payments of $67,500 (compared to $107,000 per month under the prior agreement) beginning April 1, with a balloon payment of $2,812,500 (based on scheduled debt service) due and payable on March 1, 1993. Interest on the term note is based on PNB's prime rate as announced from time to time minus .75 percent and is payable monthly.

John Schwager, Alamco's president and chief executive officer, said that the debt prepayments and refinancing were made possible by using cash received as part of the company's successful contract reformation agreement with CNG Transmission Corp. which was completed in November 1989. Further, he said that the debt refinancing involved amendments to Alamco's loan agreement with PNB which, among other things, reduced monthly principal payments to PNB by 37 percent and doubled the company's annual capital investment allowance to $1 million.

Schwager stated that the company considers the refinancing to be an interim step. The company plans to seek other bank financing sources on terms more favorable than those contained in the amended agreement with PNB to allow for an increase in the percentage of operating cash flow to be applied to gas and oil reserve acquisition and development. Schwager believes that the company's present collateral base should justify such an arrangement, but he said that he cannot guarantee that any new financing will be obtained.

The company expects that the effects of the prepayments and debt refinancing will reduce debt obligations (including capitalized interest) on its balance sheet by approximately $4,375,000 and will increase the company's book value by a total of approximately $1,500,000 or about $.60 per share. The company will account for the PNB debt prepayments and the refinancing transaction in the first quarter of 1990. In accordance with applicable accounting rules, the company will reverse and record as

non-operating income approximately $600,000 in interest which was capitalized and included as part of long-term debt on its balance sheet. The approximately $900,000 in debt discounting will not be recorded as an increase to first quarter 1990 income but rather as an increase to paid-in-capital on the company's balance sheet.

Alamco, headquartered in Clarksburg, W. Va., is an independent producer of gas and oil in the Appalachian Basin with a major operating concentration in West Virginia gas fields.

#90087p0429 03/28/1990 ~PR Newswire

PHILADELPHIA, (MARCH 28) PR NEWSWIRE - Strawbridge & Clothier (NASDAQ: STRWA) reported that for the fourth quarter of the 1989 fiscal year, ended Feb. 3, 1990, which consisted of 14 weeks, sales were $350,878,000, compared to $322,650,000 during the fourth quarter of 1988 which consisted of 13 weeks, an increase of 8.7 percent.

Net earnings for the fourth quarter were $25,626,000 compared to $20,952,000 in the fourth quarter of 1988, an increase of 22.3 percent.

Earnings per share in the fourth quarter were $2.81 compared to $2.32 in 1988's fourth quarter.

Fourth quarter earnings per share include an $.11 LIFO benefit in 1989 compared with an $.18 charge in 1988. The increase in earnings for the quarter also reflects careful control of inventory levels during the year and continued emphasis on expense control.

Sales for the fiscal year ended Feb. 3, 1990, were $950,306,000 compared to $904,196,000 in fiscal 1988, an increase of 5.1 percent. The 1989 fiscal year consisted of 53 weeks, while 1988 was a normal 52-week year. Net earnings in 1989 were $31,159,000 compared to $27,270,000 in 1988, an increase of 14.3 percent. Earnings per share for fiscal 1989, after giving effect to a 7 percent stock dividend declared on March 28, 1990, were $3.41 compared to $3.02 in fiscal 1988.

The board of directors at its regular meeting today, declared a 7 percent stock dividend on both the Series A and Series B Common Stock of the company, payable May 17, 1990, to shareholders of record on April 17. This is the 28th consecutive annual stock dividend declared by Strawbridge & Clothier. The board of directors also declared a quarterly cash dividend of $.275 per share on the Series A Common Stock and $.25 per share on the Series B Common Stock payable May 1, 1990, to shareholders of record on April 9. On an annualized basis, Series A shareholders will

receive $1.10 per share and Series B shareholders will receive $1 per share.

On Nov. 15, 1989, the company opened a new Clover store at the Shore Mall on the Black Horse Pike and the Garden State Parkway in Atlantic County, N.J. The opening was the most successful in Clover's history. On April 18 1990, the company will open its 24th Clover store, the first in the state of Delaware, at the Kirkwood Plaza on the Kirkwood Highway and Route 7, southwest of Wilmington, in New Castle County, Del.

STRAWBRIDGE & CLOTHIER

NOTE: Earnings per share amounts are based on the weighted average number of shares of common stock and common stock equivalents (employee stock options) outstanding during each period, after recognition of preferred stock dividends and a 7 percent stock dividend payable on May 17, 1990.

STRAWBRIDGE & CLOTHIER APPOINTS E. SPENCER QUILL Strawbridge & Clothier announced today that the board of directors had elected E. Spencer Quill to corporate vice president and the newly created position of vice president for Administration and Distribution for the Clover Division.

Quill will report directly to Warren W. White, executive vice president and general manager of Clover, the company's discount store division.

In this position, Quill will have responsibility for Clover's complete merchandise distribution network including warehousing, traffic, transfers and marking procedures and equipment; some of its systems installation and maintenance, including telephone, point-of-sale and computer application, voice and data communications; as well as merchandise information systems. In addition, he will be responsible for the administration of the Central Office support functions as well as the purchasing of operating supplies for all locations.

Quill is a graduate of Haverford College and joined Strawbridge & Clothier in 1966 after serving in the U.S. Navy. In 1970, with the formation of the Clover Division, Quill became its office manager. In 1976, he was promoted to divisional status and in 1982 to director of Administration and Distribution.

White, in announcing the promotion, said, "Mr. Quill has demonstrated his effectiveness in developing and implementing systems and support functions for Clover's merchandise replenishment and distribution operations as well as other vital contributions. His promotion reflects this recognition as well as the importance which Clover places on future developments in this area of responsibility.

Quill and his wife Judy live in Medford, N.J.

HARRISBURG, PA (MARCH 28) PR NEWSWIRE - Environmental Resources Secretary Arthur A. Davis today announced that Altoona Enterprises Inc. has agreed to replace 24 acres of wetlands and pay a $2,500 penalty for violating the Commonwealth's wetlands protection regulations during the construction of Peterson Industrial Park in Blair County.

"We're pleased that we were able to resolve this incident in a way that balances the need for economic development in the Altoona area with protection of our natural resources," Davis said.

In 1985, Altoona Enterprises, a nonprofit economic development organization, purchased a 140-acre tract along the Little Juniata River to develop an industrial park, eventually attracting to the site the companies of C-Corr Electronics, ORX Railway Corp. Blair Sign Co., Besteel Industries and New Pig Corp.

In November 1989, the U.S. Army Corps of Engineers inspected the site and

discovered that about 24 acres of wetlands had been disturbed during construction of facilities for the companies. The corps subsequently issued a cease and desist order to Altoona Enterprises for disturbing wetlands without obtaining permits from the Department of Environmental Resources (DER).

DER concurred with the corps findings and initiated enforcement actions against Altoona Enterprises, which resulted in today's consent order and agreement.

Under the order and agreement signed by Altoona Enterprises and DER, the economic development corporation will remove all non-essential fill from the wetlands and create about 24 acres of replacement wetlands on the site to compensate the commonwealth for wetlands destroyed during the construction of the industrial park.

Altoona Enterprises must provide DER with financial assurances for the success of the replaced wetlands over a 10-year period and obtain proper permits for work on any wetlands remaining on the property.

The $2,500 civil penalty, assessed against Altoona Enterprises for violations of the Commonwealth's Clean Streams Law and Dam Safety and Encroachments Act, must be paid to DER within five days.

WHEELING, WV (MARCH 28,) PR NEWSWIRE - Wheeling Pittsburgh Steel's (NYSE: QWHX) board of directors has authorized its management to develop and file an amended plan of reorganization with the United States Bankruptcy Court.

The resolution passed by the board at its regular meeting on March 27, 1990 authorizes management, as co-proponents with the official Committee of Unsecured Creditors, to file an amended plan requiring the ratification and adoption of a labor agreement with the United Steelworkers of America which is acceptable to the board of directors and the Official Committee of Unsecured Creditors before the plan can be confirmed.

The action by Wheeling-Pittsburgh's board is in response to an order entered by Judge Warren W. Bentz on Feb. 27 in which the court directed Wheeling-Pittsburgh and certain creditor groups to take specific actions and procedures to speed up the reorganization process.

OAKLAND, CA (MARCH 28) PR NEWSWIRE - The board of directors of Kaiser Aluminum & Chemical Corp., a subsidiary of MAXXAM Inc. (AMEX:MXM), declared regular quarterly dividends on the company's preference stocks.

The dividends, payable June 1, 1990, to shareowners of record May 11, 1990 were declared as follows:

$1.03-1/8 per share on the 4-1/8 percent cumulative convertible preference stock;

$1.18-3/4 per share on the 4-3/4 percent cumulative convertible (1957 series) preference stock;

$1.18-3/4 per share on the 4-3/4 percent cumulative convertible (1959 series) preference stock;

$1.18-3/4 per share on the 4-3/4 percent cumulative convertible (1966 series) preference stock;

$1.25 per share on the cumulative (1985 Series A) preference stock as to those shares which are held outside the company's employee stock ownership plans; and

$1.25 per share on the cumulative (1985 Series B) preference stock as to those shares which are held outside the company's employee stock ownership plans.

In addition to Kaiser Aluminum, MAXXAM also has subsidiaries engaged in forest products and real estate management and development operations.

SPOKANE, WA (MARCH 28) PR NEWSWIRE - WP Energy Company, a subsidiary of Washington Water Power Company's (NYSE: WWP) Pentzer Corporation, today agreed to provide British Columbia Hydro and Power Authority with power from a wood-waste-fired generating plant to be developed under a joint venture partnership.

The power purchase agreement is the first of its kind to be negotiated within the framework of B.C. Hydro's independent power production initiative, which was announced in 1988. Under the terms of the 25-year

agreement, the partnership will supply B.C. Hydro with 55 megawatts of electricity from a $135 million (Canadian) generating plant to be constructed at Williams Lake, British Columbia.

The plant will be fueled by wood waste supplied by local sawmills, and will address a major air pollution concern in the area by bringing air quality control technology to the burning of wood waste generated by the local mills.

The partnership, doing business as NW Energy Company, is a joint venture involving WP Energy Company, Inland Pacific Energy Company (a BC Gas subsidiary), and Tondu Energy Systems Inc. of Houston.

SHERMAN OAKS, CA (MARCH 28) PR NEWSWIRE - The board of directors of House of Fabrics Inc. (NYSE: HF) has authorized management to purchase from time to time on the open market, or through negotiated purchases, up to 1,000,000 additional shares of the company's common stock. This action follows the board's reactivation of an earlier authorization to purchase up to 500,000 shares.

The company stated that it has completed the acquisition of 494,800 shares under that earlier authorization at an average price of $18.20 per share. There are currently 6,174,193 shares outstanding.

The shares acquired will become authorized, but unissued shares. The funds required for the stock purchases will be provided out of working capital and bank borrowings. No time limit was set for the completion of the program.

The board of directors also voted to declare the regular quarterly cash dividend of 12 cents per share, payable July 2, 1990, to shareholders of record June 8, 1990, but also stated that cash dividend payments will be discontinued following this dividend.

House of Fabrics Inc. is the nation's largest chain of company owned and operate retail fabric stores wih 625 currently in operation.

#90087p0466 03/28/1990 ~PR Newswire

NEW YORK (MARCH 29) PR NEWSWIRE - The Government of Mexico today exchanged approximately $44 billion of its commercial-bank debt into bonds Angel Gurria, under-secretary of the ministry of finance, and William R. Rhodes, senior executive - international, of Citibank, announced.

Rhodes said the exchange represented the largest long-term bond issue ever.

The exchange is part of Mexico's 1989-92 external-financing package with commercial banks worldwide.

The government today issued debt-principal-reduction bonds with a total face value of $11.6 billion. This represents a 35 percent discount from the face value of the exchanged debt. The bonds will bear interest at a floating rate of 13/16ths of a percentage point over the London Interbank Offered Rate (LIBOR).

The government also issued $22.5 billion of debt-service- reduction bonds in exchange for debt at par but with a fixed interest rate of 6-1/4 percent over LIBOR for U.S.-dollar bonds. Bonds denominated in other currencies carry comparable fixed rates in those currencies.

Both types of bonds mature in 30 years and are backed by collateral covering all principal and, for U.S.-dollar- denominated bonds, 18 months of interest payments. Interest collateral of comparable value is provided for bonds in other currencies.

In addition to the debt-for-bond exchange, Mexico today made the first drawdown for 1990, totaling $371 million, under the new- money facilities in the financial package. Five more new-money drawings will occur between now and 1992.

As previously reported, the financial package covers virtually all of Mexico's approximately $48.5 billion in medium and long-term debt to its approximately 470 creditor banks worldwide. Banks holding $4.5 billion of the debt will continue to hold their debt and also provide approximately $1.1 billion of new money.

(MARCH 28) EDITORIAL SAMPLER:

THE WILMINGTON (DEL.) NEWS JOURNAL

Fittingly the unseasonably warm temperatures of March took a turn for the worse at mid-week - just when 15,000 Census Bureau workers began their tally of the nation's homeless.

They counted in Wilmington and Philadelphia and Washington and Boston, to name a few of the places. They looked in shelters and on street corners and used flashlights to steal glimpses through the gutted abandon buildings.

Did they get an accurate count? Did they come anywhere near to achieving an accurate count? Well, of course not. But who could reasonably expect they would?

But last week's count was at least an acknowledgement of the problem, a

reckoning by the federal government that the homeless are indeed real people - who count. That realization reflects the hard work - publicity campaigns, lobbying, and what have you ... that have helped draw attention to the problem.

The challenge ahead? It really has nothing to do with the numbers from the Census canvas.

The homeless are with us every day - not once a decade. So the challenge has never really been counting them. It's been facing them.

THE MIAMI HERALD

... It took all of the last decade before Brazil acknowledged, grudgingly, that conservation practices in the Amazon might be preferable. Only a year ago, the country's first secretary of environment was appointed. Fernando Mesquita surprised everyone with his vigorous efforts to punish environmental law violators, achieve some preservation of forest tracts, and implement the beginnings of conservation practices.

With new President Fernando Collor de Mello elected, Mesquita's supporters feared that his work may be undone. So when Brazil's most recognized ecologist, Jose Antonio Lutzenberger, was named environmental secretary, the world ecological community applauded.

Lutzenberger apparently extracted some promises fom President Collor. For the first time, Brasilia sounds receptive to debt-for-nature swaps, where international groups retire a portion of the country's debt in return for local investment in environmental projects.

... Lutzenberger long has argued for conservation-minded economic projects to replace the short-sighted development that already has destroyed so much of the world's greatest rain forest. Now, as long as he enjoys the new government's support, Lutzenberger has the splendid opportunity to put his advocacy into practice.

THE WASHINGTON TIMES

Last week a contingent of America's filmstars arrived on Capitol Hill to lobby against extending the current congressional ban on supporting obscene art by the National Endowment for the Arts. By midweek, they apparently ahd persuaded President Bush to go along. NEA Chairman John Frohnmayer turned up at a congressional hearing to explain that ''it is our conclusion that the legislation proposed here, which contains no content restrictions, will best serve the American public.'' ...

What or who it was who managed to get Bush in the same political sandbox with the champions of Robert Mapplethorpe, Andres Serrano and other

twinkling stars in the aesthetic firmament of the arts no one knows. But it ould turn out to be one of the major political errors of the president's administration, and it's certainly one of the silliest decisions he could have made.

... Art ... necessarily expresses a point of view and articulates values. That point of view and those values may be those of the Serrano-Mapplethorpe school or of Calvin Coolidge, but there's no reason why taxpayers who are deeply offended by them should have to pay for them, any more than they should be obliged to pay for anything else they don't want to buy. ...

... Maybe the logical solution is just not to have an NEA at all, and to let artists and aesthetes, like everyone else, practice their profession in the marketplace.

THE UNION-LEADER, MANCHESTER, N.H.

We hope the anti-gun crowd took careful note of one of the first moves that Soviet President Mikhail Gorbachev made against the people of Lithuania. He demanded that everyone turn in their guns or they would be forcibly confiscated.

Sen. Howard Metzenbaum (D.-Ohio) and Mrs. James Brady and all the other wishful-thinkers want to take away our guns, because they kill people. However, Gorbachev recognizes that guns also serve to defend freedom. Without them, all personal rights are in jeopardy.

Our Founding Fathers did not create the Constitution and its Bill of Rights lightly. They, too, recognized that in a free country citizens have the right to defend themselves. As the Second Amendment notes:

''A well regulated militia, being necessary to the security of a free state, the right of the people to keep and bear arms, shall not be infringed.''

It is ironic that Mikhail Gorbachev can see so clearly how important is the private ownership of guns as a check against government power, and yet wishful-thinking Americans, who enjoy freedom, would willingly destroy this basic ability to defend that freedom.

#90087u0242 03/28/1990 ~United Press International
(MARCH 28) EDITORIAL SAMPLER:

CHICAGO SUN-TIMES

Many of the nation's roads and bridges are a mess. The crowded skies await airport and air traffic control improvements. Urban bus and train fleets need modernization. Amtrak, as always needs help. Gridlock is choking the suburbs.

The Bush administration's answer to all this? Cut mass transit subsidies. Cut Amtrak assistance. Cut Washington's role in highway programs; tell the states and municipalities to pay more. Levy new taxes for projects that already have been funded.

If this makes no sense to you, you're not alone. ...

Taxpayers have shoveled $23 billion into the federal highway and aviation trust funds for exactly these kinds of projects. But the money is sitting idle because cowardly politicians are using those balances to make the federal budget deficit appear smaller. ...

The irony of all this is that the effect of the Bush administration's transportation policy would be precisely the opposite of its stated purpose. ...

What it comes down to is this: Solving the nation's transportation problems is no different that solving other pressing, domestic problems. It'll only happen when politicians, frightened by the president's lips, stop pretending that Americans can get something for nothing.

THE MILWAUKEE JOURNAL

Japan continues to sell far more goods in the United States than the United States sells in Japan. In response to U.S. jawboning and arm-twisting designed to correct that imbalance, the Japanese this week disclosed their intention to change the way they do business at home. The changes will help. But not much. The Japanese need to do more. And Americans need to make some big changes, too.

These actions are welcome, but they are chinks in a wall that really needs to be attacked the way Germans attacked the Berlin Wall last November. A Japanese old-boy network that keeps U.S. products off store shelves in Japan needs to be dismantled. It is not just an unfair impediment to U.S. commerce; it is also an inefficient system that makes goods more expensive to Japanese buyers.

Americans need to invest more in education and in product research and development, cut the gigantic budget deficit, encourage family savings and in general to work harder to penetrate the Japanese market. Making these cultural changes won't be easy and will take time, not to mention political courage. But until they are made, trade friction will continue.

ST. PAUL (MINN.) PIONEER PRESS

When it comes to broccoli, pay no attention to your president.

Broccoli brims with vitamins and iron, fiber and flavor.

George Bush doesn't like it.

''I haven't liked it since I was a little kid and my mother made me eat it '' he said in the Great Mock Broccoli Battle. ''And I'm president of the United States and I'm not going to eat any more broccoli.''

This is the man who asks hot sauce and pork rinds of his digestive system.

Smile, but stay with the green stuff.

(MARCH 28) EDITORIAL SAMPLER:

THE ORANGE COUNTY (CALIF.) REGISTER

As T-Day (Tax Day) approaches ... millions of Americans are shuddering as they fill out the 1040 and other labyrinthine tax forms. Many citizens give up in fuming disgust and hire a tax preparer. But those who sharpen their pencils and plug in their adding machines may call the IRS's tax information line.

But last year IRS ''assistors'' answered taxpayer questions incorrectly 34 percent of the time, possibly leading to fines, seizures and other penalties. ...

This year the IRS has instituted reforms that decrease your chance of getting an incorrect response. The major change is that it's now twice as hard even to get in touch with IRS assistors. ...

The other change ... is that the 34 percent error rate has been reduced to 22 percent. That's still pretty high. ... Imagine what would happen if, when your pharmacy filled your prescription, 22 percent of the time it gave you the wrong drug. ...

Taxpayers need protection from IRS imperiousness and incompetence. ...

WICHITA (KAN.) EAGLE

Sen. Bob Dole, R-Kan., is wrong to join efforts to keep the Senate from passing clean-air legislation that actually cleans up the nation's air.

Twice last week, Dole, the Senate minority leader, helped beat back amendments aimed at crafting such a bill.

One amendment would have imposed stricter tail-pipe emission controls on automakers and encouraged broader use of clean, alternative auto fuels. It failed 52-46. The other would have assured that the federal government enforce anti-pollution standards should cites or states fail to do it. It failed 53-46.

In each case, Dole assailed the senators who proposed amendments for trying to ''bust'' the clean-air deal struck earlier this month between the Senate leadership and the White House. That deal effectively favored the industrial bottom line over strict clean-air standards. ...

Now that the Senate has beaten back the strengthening amendments, it's far less likely such a law will become reality. If it doesn't, and the White House version prevails, its backers should refrain from rhapsodizing about what a wonderful new anti-pollution law they've handed the nation. They'd be wrong.

THE SEATTLE TIMES

The Idaho Legislature's passage of a law to ban 95 percent of all abortions in Idaho is mob zealotry at work. It's all the more frightening when the zealots - paying no heed to individual rights - hold a few powerful seats in the state Capitol.

Idaho was a target of the National Right to Life Committee, which has been shopping for a political arena supportive of its anti-abortion crusade. The Idaho Legislature, commandeered by right-wing Mormon leadership, obliged with a crude attack on well-established privacy rights.

... It's unclear whether the people of Idaho want to turn doctors and women into criminals. The law isn't an expression of political consensus; it's a tool fashioned by a narrow group to force the U.S. Supreme Court to reexamine the right to a legal abortion established in the 1973 Roe v. Wade decision. ...

The strategy could backfire: Justice Sandra Day O'Connor has never stated she will vote to dismantle abortion rights. In fact, her sharp criticism of Minnesota and Ohio statutes requiring parental consent for teenagers seeking abortion showed her uneasiness with laws far less restrictive than Idaho's. Decisions on those cases have not yet been issued.

WASHINGTON (MARCH 28) UPI - The Senate has promised to act on clean air legislation next week, but before then, lawmakers face controversial amendments proposing to ease the economic impact of acid raid reduction requirements.

Senate Democratic leader George Mitchell of Maine announced Tuesday a bipartisan agreement to vote on the bill by next Tuesday night. The Senate took up the massive bill in late January.

The Senate plans to consider several amendments designed to minimize the loss of Appalachian and Midwest coal mining jobs caused by the bill's acid rain control provisions.

On Wednesday, the Senate was scheduled to consider a proposal by Sen. Arlen Specter, R-Pa., to grant federal tax credits to Midwest utilities that install smokestack ''scrubbers'' to reduce sulfur dioxide emissions linked to acid rain.

By using such pollution-control devices, utilities could continue using high-sulfur coal, thus averting massive layoffs of miners in the high-sulfur coal fields of Appalachia and Midwest states such as Ohio and Illinois.

Later this week, senators are expected to vote on a plan by Sen. Robert Byrd, D-W.Va., to provide special unemployment benefits to coal miners and workers in other industries that lose their jobs due to additional pollution controls imposed by the clean air bill.

Mitchell said he still hoped to reach a compromise with Byrd that would provide some financial aid to displaced workers while meeting Bush administration concerns about the potentially huge costs of such an assistance program.

The senate bill is the product of a delicate agreement between the Bush administration and Senate leaders.

In another key clean air battle Tuesday, the Senate rejected 50-47 an administration-backed amendment that would have given industry more potent legal weapons to fight federal cleanup orders - a move opponents said would cripple enforcement efforts.

However, the legislation was not killed outright because Senate Republican leader Robert Dole reserved the right to call up the amendment again for another vote before the Senate takes final action on the clean air bill.

In the House, clean air deliberations appeared snagged Tuesday when the Bush administration expressed ''deep concern'' about parts of the compromise legislation on urban smog adopted by the House Energy and Commerce Committee last week.

The compromise plan was viewed on Capitol Hill as a major breakthrough in the congressional drive to pass a new Clean Air Act, bringing together lawmakers allied with environmentalists and those close to industry.

However, the administration said the compromise between factions of the committee would make it ''much more difficult'' to achieve speedy enactment of a new, improved Clean Air Act.

The energy and commerce panel approved some changes to meet administration concerns, but lawmakers noted key disagreements remained.

(MARCH 28) UPI - Los Angeles Lakers Coach Pat Riley would not blame the team's worst loss of the season Tuesday night because it missed Magic Johnson, who suffered a second-quarter injury.

''No excuses,'' Riley said after the Portland Trail Blazers routed the Lakers 130-111 in Portland, Ore. Johnson sprained his right ankle at 6:20 of the second quarter and did not return. ''We were flat and they weren't.

''Yes, we lost Magic in the second quarter, but that's a convenient excuse.''

Kevin Duckworth played one of his better games of the season, hitting 10 of 12 shots for 22 points to lead Portland.

It was Portland's largest margin of victory over the Lakers since a 141-121 triumph Dec. 25, 1983.

The victory moved Portland, 50-20, within 2 games of the Lakers in the Pacific Division. Los Angeles dropped to 51-17.

The victory also marked only the third time in their 20-year history that the Blazers have won at least 50 games.

Johnson left the game in the second quarter with Portland ahead 51-39.

Lakers trainer Gary Vitti said Johnson suffered a moderate sprain and could miss a couple of games. Initially Lakers officials said the injury was only a mild sprain, and at halftime, they even speculated that he might return to the game.

''It was really disappointing,'' Johnson said. ''It was a big week - a real pivotal time in the season. I thought this was going to be my injury-free year. But it could have been worse. If I can run a little and Gary can put me back together, I will play.''

Johnson finished the game with eight points and seven assists.

Portland broke the game wide open early in the third period with a 22-8 run that gave the Blazers their biggest lead at 94-69.

Before it was over, Portland nearly earned their biggest victory ever over Los Angeles. In their championship year of 1976-77, the Blazers beat Los Angeles 145-116. But the Laker bench kept the loss from being worse than it could have been.

''That feels a lot better than the other night (when the Blazers lost to Minnesota 110-105),'' Portland Coach Rick Adelman said. ''We came out with a real purpose.

''It was a tremendous effort on our part. Tonight we jumped on it and good teams do that. Los Angeles is a very good team. But we were hitting on all cylinders. It was a game we just had to have.''

The two teams meet again Friday in Los Angeles and then on the final day of the season in Portland.

Byron Scott led the Lakers with 24.

-- AROUND THE NBA --

Elsewhere in the NBA, New York routed Washington 119-100, Indiana downed Boston 101-96, Dallas defeated Golden State 118-108, Milwuakee stopped Phoenix 133-127 and San Antonio socked Seattle 115-103.

KNICKS 119, BULLETS 100

At New York, Patrick Ewing scored 41 points, including the first 3-pointer of his career, to help New York snap a six-game losing streak. The Knicks, ahead 50-41 at halftime, expanded their lead to 85-68 after three quarters. Bernard King scored 23 points for Washington.

PACERS 101, CELTICS 96

At Indianapolis, Reggie Miller scored 22 points, Detlef Schrempf added 21 off the bench and Indiana recorded its fourth-straight victory. Boston had itsfive-game winning streak snapped. Kevin McHale scored 32 points and pulled down 11 rebounds for the Celtics.

MAVERICKS 118, WARRIORS 108

At Dallas, Sam Perkins and Bill Wennington combined for 20 points in the fourth quarter helping power Dallas to its fifth straight victory. The Warriors were led by Mitch Richmond with 32 points.

BUCKS 133, SUNS 127

At Milwaukee, Ricky Pierce scored 30 points and Paul Pressey added 10 fourth-quarter points for Milwaukee. Kevin Johnson scored a career-high 44 points for Phoenix, which failed for the second straight night to clinch a playoff spot in the Western Conference.

SPURS 115, SUPERSONICS 103

At San Antonio, Terry Cummings scored 31 points to lead San Antonio, which clinched a playoff berth for the first time in two years. The Spurs had six players score in double figures. David Robinson and Willie Anderson added 22 points each for San Antonio.

(MARCH 28) UPI - Closing arguments are scheduled for Friday in a federal courtroom in Washington, D-C, in the Iran-Contra trial of John Poindexter. The defense rested its case Tuesday without ever calling the former national security adviser to testify. When asked why NOT, Poindexter's lead attorney said- quote- ''We don't believe the government proved its case.''

A New York grand jury heard evidence for a second day Tuesday in the social club fire that killed 87 people early Sunday. The Bronx district attorney's office says it expects an indictment by week's end against Julio Gonzales, the man accused of setting the fire in a jealous rage. A spokesman says the building's owners and managers also could be charged with complicity in the tragedy. The owners include the husband of actress Kathleen Turner.

The Bush administration continued Tuesday its already cautious response to the conflict between Moscow and independence-minded Lithuania. White House spokesman Marlin Fitzwater declined to criticize the latest show of Soviet force in Lithuania... calling it ''a delicate diplomatic situation.'' Early Tuesday, Soviet soldiers dragged army deserters from a hospital and took over a communist headquarters in the capital of Vilnius.

The State Department is critical of last week's decision by the Hungarian national airline to cancel flights for Soviet Jewish emigres to Israel after terrorist threats. Spokeswoman Margaret Tutwiler says instead of cutting off the flights, the airline should've stepped up security. The Hungarian airline began flying Jews to Israel after the Soviet government, under pressure from Arab countries, refused to allow direct flights from Moscow to Tel Aviv.

The founder of communist Bulgaria may soon be going underground-literally. For 41 years, the preserved corpse of Georgi Dimitrov has been on public display in a glass-encased sarcophagus in a mausoleum in Sofia. This week, relatives of the former leader say the government has assured them that Dimitrov's body will be returned to them for burial. The decision is seen partly as an attempt by Bulgaria's Communist Party to further distance itself from its totalitarian past.

#90087u0362 03/28/1990 ~United Press International

MANAGUA, Nicaragua (MARCH 28) UPI - The Sandinista government took a major step toward peacefully handing over power next month by agreeing to ban politics in the armed forces and to transfer the military to President-elect Violeta Chamorro's command.

Control of Nicaragua's 70,000-strong Popular Sandinista Army and Interior Ministry police force has been a central negotiating point in transition talks.

Chamorro, of the U.S.-backed National Opposition Union, known by the Spanish-language acronym UNO, beat Sandinista President Daniel Ortega in Feb. 25 elections with 55 percent of the vote. She is scheduled to take office April 25.

A protocol agreement for the transfer of power was signed Tuesday by Defense Minister Humberto Ortega and UNO chief negotiator Antonio Lacayo. The signing was witnessed by Managua Archbiship Miguel Obando y Bravo and represents a breakthrough in talks aimed at ensuring a peaceful transition of power from the Sandinistas to Chamorro's opposition alliance.

Under the agreement, forces of the Popular Sandinista Army and the police will be subordinate to Chamorro, who has said she will be commander-in-chief of the armed forces when she assumes the presidency.

''The armed forces will have a professional character and will not belong to any political party,'' the agreement said. ''Its active service members will not be allowed to carry out leading roles in political parties.

''Political proselytism within the armed forces will only be allowed within the framework of the country's electoral laws. ... The defense and public security forces of the nation will come under the orders of the president of the republic, as set out in the constitution and the law,'' the agreement said.

Tuesday's signing followed Friday's acceptance by U.S.-funded Contra rebels in neighboring Honduras to demobilize by April 20 and for between 4,000 and 6,000 Contras inside Nicaragua to enter cease-fire zones under United Nations observation.

President Ortega had said the demobilization, while not a condition for handing over power, would avoid a possible outbreak of violence in Nicaragua. He also had warned that if returning Contras filled Nicaraguan army ranks, there could be a civil war.

The agreement also called for the restructuring of the armed forces ''according to the economic capacity and social needs of the country.''

The agreement does not say whether Humberto Ortega, brother of President Ortega and a Sandinista Front leader, will be removed from his post or given civilian responsibilities.

Chamorro has said she intends to remove Ortega as defense minister and she also will replace Interior Minister Tomas Borge.

The agreement says army and police ranks established before the elections will be respected and specifies the need to maintain public security.

But it states that weapons should ''only be in the hands of the country's armed institutions.''

The Sandinista government has armed thousands of Nicaraguans in the countryside, particularly in areas where Contra rebels were operating.

#90087u0380 03/28/1990 ~United Press International
SEBOKENG, South Africa (MARCH 28) UPI - Authorities said unrest in the township of Sebokeng was contained, but mobs of angry blacks stoned homes of collaborators with the white minority government.

Police reinforcements patrolled Sebokeng Tuesday to prevent revenge attacks a day after at least nine blacks were killed and hundreds more wounded during a protest of poor living conditions.

National Police Commissioner Gen. Johan van der Merwe declared ''police have the unrest in South Africa under control,'' but mobs of blacks still vented their anger, stoning the homes of collaborators with the apartheid government.

Police opened fire on a mob stoning the house of a black constable Tuesday killing at least one man identified as a local teacher, witnesses said.

Police with shotguns poured out of vehicles at the house of another black policeman only minutes after a mob attacked it with rocks, smashing the front windows. Neighbors would only say that a large crowd had fled before police arrived. A police radio crackled with word of another incident nearby.

Sebokeng, about 45 miles south of Johannesburg, is one of six black townships in the mining-industrial belt of the Vaal Triangle. With a population of 600,000, workers labor at nearby mines and the industrial centers of Vereeniging and Vanderbijlpark.

The Vaal Triangle was the flashpoint for unrest that erupted in 1983 over rent increases and the continued exclusion of blacks from national politics. It spread across South Africa, prompting the imposition of a state of emergency in June 1986 that remains in effect.

Police put Monday's death toll at five, but Sebokeng hospital Administrator Anne van der Spuy said nine people died and 447 were treated for birdshot wounds, many shot in the back evidently while fleeing. Vaal Civic Association leader Bavumile Vilakazi said 13 had died.

Official reports from police headquarters said at least nine other people died Monday in incidents elsewhere in the country and internecine strife flared again Tuesday in Natal province.

Monday's unrest in Sebokeng was among the most violent since President Frederik de Klerk decided Feb. 2 to lift a 30-year ban on the African National Congress and negotiate a power-sharing deal with the black

majority to end the country's grinding racial conflict.

Preliminary talks between de Klerk and an ANC delegation led by Nelson Mandela begin in Cape Town April 11 on obstacles to formal power-sharing negotiations. Among the issues is de Klerk's refusal to lift the emergency while the unrest continues.

Though police claimed they fired in self-defense and witnesses said the attack was unprovoked, Monday's violence was remarkably similar to the unrest of the mid-1980s.

A crowd of 50,000 gathered near the municipal offices to present a list of grievances, including high rent. Few residents have paid any rent since 1984.

At a news conference, civic association leader Vilakazi said the marchers orginally intended to go to offices of the ruling National Party in Vereeninging ''to give the Vaal committees a direct path to F.W. de Klerk.''

City officials refused permission for the march on the grounds it would be ''disruptive,'' Vilakazi said, leading to an agreement with a local black police colonel for a demonstration at the municipal offices.

After presenting the petition to the colonel, Vilakazi returned to the demonstrators. Without provocation, he said, shots rang out.

He demanded to know ''who gave the order'' to open fire and suggested the South African police had acted independently of de Klerk's reformist policies.

In their first detailed comment, police said the crowd was armed with stones, sticks, bottles and iron pipes and began attacking lawmen, forcing them to return fire ''in self-defense.''

#90087u0403 03/28/1990 ~United Press International

GENEVA (MARCH 28) UPI - The World Health Organization appealed Wednesday for a major new research and control program for tropical diseases that currently afflict about half a billion people.

Most infected people live in the poorest countries where per-capita income is less than $400 a year, WHO said.

''Governments are so poor that they spend an average of only $4 per person per year on health care,'' the Geneva-based U.N. health agency said.

WHO said there has been partial success in fighting some of the dread diseases that cause severe pain, deformities and death.

''But control of tropical diseases is nowhere near complete,'' WHO said in its appeal to governments and medical foundations and other institutions.

''Support for major new research and control initiatives is needed to curb a worsening situation,'' it said. ''These scourges cause tremendous pain and suffering ranging from ulcers, internal organ damage and disabling anemia to gross deformities of the face and limb, blindness, brain damage and death.''

An estimated 270 million people are stricken with malaria, with more than 90 percent of them in sub-Saharan Africa, WHO said.

About 200 million people suffer from schistosomiasis, which attacks internal organs and the nervous system. Some 90 million have lymphatic filariasis, which cases elephantiasis or bloated limbs. About 17 million have river blindness and 10 million to 12 million suffer from leprosy.

''Some 2.1 billion people - half the world's population - are at risk of malaria, living in areas where the disease is common,'' WHO said.

A further 1.6 billion people are exposed to the risk of leprosy, 900 million to lymphatic filariasis, 600 to schistosomiasis, 350 million to leishmaniasis, and tens of millions of others to river blindness and sleeping sickness.

''Beyond their toll of individual illness and death, these tropical diseases have insidious effects on society,'' WHO Director-General Hiroshi Nakajima said in a statement. ''They impede national and individual development, make fertile land inhospitable and exact a huge cost in treatment and control.''

Africa needs the greatest and most urgent help, WHO said, with ''the whole population of the continent, or 500 million people, at risk from at least one tropical disease.''

''Eighty percent of the African population - 400 million - live in areas where little has been done to control malaria transmission and where the problem remains virtually unchanged or is worsening,'' it said. Sleeping sickness, river blindness and schistosomiasis are also ''rampant.''

Asia is estimated to have more than 100 million annual cases of tropical disease and more than 35 million people are infected in Central and South America.

Europe and North America also have cases but to a far lesser extent, WHO

said, with about 1,000 cases of imported malaria diagnosed each year in the United States.

The global health agency said there have been some success in fighting leprosy and river blindness, which are now declining. In Uganda insect traps are controlling the tsetse flies that carry sleeping sickness.

Praziquantel is a drug that helps reduce massive swelling of the liver and spleen as well as kidney damage caused by schistosomiasis, and malaria has been eradicated from areas inhabited by 1.5 billion people.

WHO said that despite these successes, vaccines are needed to stop transmission, and the blackflies that carry the river blindness parasite are developing resistance to current insecticides.

#90087u0408 03/28/1990 ~United Press International

SYDNEY, Australia (MARCH 28) UPI - The Labor Party government under Prime Minister Bob Hawke will return for a record fourth term with a narrow parliamentary majority, analysis of the latest results in the tight Australian election indicated Wednesday.

Political observers said the most likely lineup in the new 148-seat House of Representatives were 76 seats for Labor, 71 for the main opposition Liberal-National Party coalition, and one independent, former North Sydney Mayor Ted Mack.

With 83.6 percent of the vote counted, Labor has won 73 seats, the Liberal-National coalition 68, the independents one and six seats were still undecided from Saturday's balloting.

Political observers reported that Labor had an edge of 65 percent to 35 percent in the crucial second preference votes and, if the trend continues should give it an absolute majority in the important House of Representatives.

In the previous House lineup, Labor held 85 seats, the coalition had 63 seats, with no independents.

Opposition leader Andrew Peacock said Wednesday he had not given up hope of his Liberal-National coalition scraping into power and refused to be drawn into discussion on the future leadership of his Liberal Party.

''Until the poll is won, lost or drawn we will not be concentrating on anything else except the election outcome,'' he said.

The votes of several thousand flood-bound sugar cane farmers and their

families in Tully in Queensland state remained to be counted after their delayed voting Tuesday.

It was not known when the official tally of 10.6 million voters would be declared, but an Electoral Commission spokesman said the counting under Australia's complex preferential voting could run until the end of next week.

Hawke, who began his tenure as prime minister March 11, 1983, is serving as caretaker prime minister until the official results are announced. If Labor wins, he would serve a record fourth term as prime minister.

Under the Australian voting system, the second preferences of defeated minor candidates are distributed as primary votes to the other candidates designated on their ballots until one candidate exceeds 50 percent of the vote in each seat and is declared elected.

Results in many of the close races will be determined by second preferences, accounting for the lengthy delays in counting.

#90087u0409 03/28/1990 ~United Press International

SEATTLE (MARCH 28) UPI - Nordstrom Inc. announced Tuesday it will dramatically cut back advertising in the two Seattle daily newspapers, but denied it was retaliating for what it called unfavorable press coverage of its dispute with unionized workers.

Nordstrom is one of the two largest advertisers in the Seattle Post-Intelligencer and The Seattle Times, with expenditures of about $1.5 million a year, according to retail industry sources.

''We'll be making dramatic changes,'' said Cindy Demme, vice president of Nordstrom's sales/promotion division. ''We want to make it noticeable enough so we can study it and see what our results are.''

Demme denied the decision was in reaction to the newspapers' coverage of Nordstrom's public fight with its clerks' union over working conditions.

But she said top Nordstrom officials are sensitive to what they see as negative publicity both in the local and national press.

''If you look at it from the family's perspective, they have been opening their local paper every day for six months and looking at negative press coverage,'' she said. ''That can't feel good.''

''But the reduction in our advertising in print is a business decision, based on our poor results and evaluating the expense,'' Demme said.

''Frankly, if it were only based on our emotional feelings about the negative publicity that we have been receiving it would have been my pleasure to pick up the phone four months ago and cancel every print ad we had running in the nation,'' she said. ''But I hope that after 20-some years experience, I'm more professional than that.''

Nordstrom is a public company, but its top officers are Nordstrom family members. Its reputation for service has made it one of the nation's premier specialty retailers with sales last year of $2.7 billion.

Co-chairman Jim Nordstrom was not available for comment, a company spokeswoman said.

According to the company's annual report, Nordstrom spent $41.6 million nationally in its 1989 fiscal year on advertising.

Virgil Fassio, publisher of the P-I, said the company's decision to reduce Seattle daily newspaper advertising would have an effect on the revenues of both papers, but he declined to speculate on the reason for Nordstrom's action.

Although the newspapers are separately owned, advertising for the P-I and the Times is sold by the Times' advertising department under a joint operating agreement. The news sections of the two papers are produced independently.

Nordstrom has been engaged since last summer in an increasingly bitter contract dispute with the United Food & Commercial Workers Union, which represents 1,800 workers at six Seattle and Tacoma area stores.

Union complaints prompted a state Department of Labor and Industries finding last month that Nordstrom violated state wage and hour laws by encouraging employees to work on their own time or, ''off the clock.''

Many members have stopped paying their dues, and two petitions to decertify the union have been filed by employee groups with the National Labor Relations Board. However, one of those petitions was dismissed by the NLRB Tuesday because of the unfair labor practice charges pending against the company.

On Feb. 26, Nordstrom announced a drop in its profits for the fourth quarter and the year and said it was setting aside $15 million to pay back-wage claims to employees nationwide.

Both J.D. Alexander, P-I executive director J.D. Alexander and Michael Fancher, the Times' executive editor said the decision to cut back advertising will have no effect on their newspapers' coverage of Nordstrom.

Demme said Nordstrom would concentrate more on advertising in radio, television, direct mail and smaller papers because that strategy has worked well for the company in California and Washington, D.C.

#90087u0410 03/28/1990 ~United Press International

(MARCH 28) UPI - Wintry cold air spooked fruit farmers along the Atlantic Coast who hustled to protect their budding trees Wednesday, while thunderstorms rumbled through the southern Plateau and warm blue skies prevailed in the West.

Peach and apple farmers weathered a second consecutive subfreezing night in Pennsylvania, Maryland, West Virginia and southern New Jersey, where temperatures fell into the teens and low 20s early Wednesday.

But crop damage was not expected to be overwhelming, since the cold temperatures were not accompanied by any detectable precipitation throughout most of the region, the National Weather Service said.

Clear and cold weather continued in New England, where temperatures dipped to near zero in the far north and about 20 in Boston. Some light snow was expected in northern Maine.

High pressure also kept the weather clear and chilly in the South, where temperatures ranged from 38 in Knoxville, Tenn., to 60 in Jacksonville, Fla.

Clear, cool weather prevailed in the Midwest, influenced by high pressure moving through the Great Lakes. Wisconsin had clear skies and temperatures from the upper 20s to as high as 40 in Eau Claire in the northwest. Michigan was clear with cooler temperatures, dropping to the teens and upper 20s.

In Illinois, skies were clear and temperatures were in the 30s, except for Springfield where cloudy skies accompanied a reading of 41 degrees.

An upper-level disturbance spawned scattered showers and thunderstorms over a wide area of Texas, Oklahoma, Arkansas and Louisiana early Wednesday while dense fog reduced visibility in west Texas.

Strong southerly winds pulled moist air northward through the region, bringing the threat of showers and thunderstorms, the weather service said.

Strengthening high pressure off the Washington and Oregon coasts brought sunny weather to the West Coast, where temperatures in the 60s and 70s and clear cool nights were expected into the weekend.

The high-pressure system also kept northern California clear and dry, but scattered showers and thundershowers were forecast in Utah, Nevada and Idaho.

-30- 2312

#90087u0422 03/28/1990 ~United Press International

SEATTLE (MARCH 28) UPI - The National Labor Relations Board Tuesday dismissed a petition filed by employees at Nordstrom's store in Tacoma, Wash., who wanted a special election to oust their union.

A similar petition, signed by more than 800 Nordstrom employees in five Seattle-area stores and filed Tuesday with the NLRB, faces a similar fate.

But organizers of the drives said they would continue to press for a vote to decertify Locals 367 and 1001 of the United Food & Commerical Workers Union, thus eliminating the unionized stores in the 61-store national chain.

NLRB officials cited a board policy of not allowing decertification-election petitions while there are unfair labor practice charges pending against a company as the reason for the dismissal.

The NLRB doesn't want petition drives conducted in an atmosphere where the company may be violating labor law, officials said.

Nordstrom has been ordered by the NLRB to appear before an administrative-law judge to answer four unfair labor practice charges. The NLRB has yet to determine if several other complaints brought by the union have merit.

NLRB spokesman Larry McCargar said the Tacoma petition - which was signed by 180 of 310 Nordstrom employees - might be reinstated at a later date, if Nordstrom successfully defends itself against the charges or if there is a settlement between the union and the company.

If Nordstrom loses, ''it seems pretty clear (employees) would have to file a new petition with a new showing of interest,'' he said.

Margaret Ketner, a Nordstrom Tacoma store employee who helped with the effort, said she was not dismayed by the NLRB decision, which was anticipated. The petition helped focus media attention on employees who sides with the company in its fight with the UFCW, she said.

''We did this so the press would listen to us,'' she said, adding that employees would continue the campaign to end union representation.

McCargar said the NLRB was reviewing a petition filed by Seattle-area Nordstrom employees Tuesday, and could dismiss it.

Greg Helean, an employee in the downtown Seattle Nordstrom store, said organizers would do ''whatever it takes'' to get a decertification election.

#90087u0431 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Airline deregulation has contributed to higher fares, poorer service and safety and a deterioration of labor-management relations, according to a study released Wednesday that contradicts findings of a recent government report.

The study, conducted by the non-profit Economic Policy Institute, found that air fares per mile have risen at least 2.6 percent since the airline industry was deregulated in 1978.

Prepared by University of Denver transportation law professor Paul Stephen Dempsey, the study examined the expense of flying after factoring out the effects of lower fuel prices since passage of the Airline Deregulation Act.

Air fares actually rose from 1985 to 1988 when adjusted for fuel costs, wrote Dempsey, a former Civil Aeronautics Board attorney.

In addition to higher air fares, the study found that airline deregulation has led to a greater concentration of national and regional markets, poorer service, more roundabout routes, decreased safety margins and deteriorating labor-management relations.

''If ticket prices could be adjusted for the loss of convenience and productivity resulting from increased route circuity, there would be an even greater disparity between pre- and post-deregulation pricing trends '' Dempsey wrote.

''The regulated oligopoly which existed under regulation has simply been replaced with unregulated oligopoly, free to exert its market power with impunity,'' he wrote.

Dempsey's report urges the re-regulation of airlines, calling for a new approach to combine regulation with competition.

In a government report released in February, the Department of Transportation found airline prices ''have continued their long-term historic decline'' since the industry was deregulated.

The government study found that air fares, when adjusted for inflation,

have declined by 26 percent since 1981.

The study found passenger fares in 698 travel markets dominated by a single carrier averaged 14 percent more than in competitive markets.

Single-carrier markets represent about 10 percent of all domestic passenger miles, the government study said.

-30- 2363

#90087u0457 03/28/1990 ~United Press International

BEIJING (MARCH 28) UPI - Foreign Minister Qian Qichen warned Wednesday that any move by the U.S. Congress to withdraw preferential trade status for China could lead to a major degeneration in relations with the United States.

Qian, speaking at a news conference during the ongoing session of China's nominal Parliament, was otherwise more conciliatory toward Washington than in recent months, but took a sharp tone on trade, which could cause major economic problems for Beijing.

Relations between the United States and China have been strained since the Chinese crackdown last June on the pro-democracy movement. Economic and political sanctions imposed by President Bush remain in effect despite efforts to repair the differences.

Qian was asked about reports of a move in Congress this spring to withdraw the ''most favored nation'' trade status from China. The status guarantees that tariffs placed on imports from certain communist countries do not exceed those of other U.S. trading partners.

Removal of most favored nation status would slap tariffs of up to 100 percent on many Chinese exports to the United States. U.S. officials had no firm figures, but said such tariffs would sharply reduce Chinese sales to the U.S. market - and export earnings.

''Some people in the U.S. Congress are trying to stop the granting of the most favored nation status to China,'' Qian said.

''If they succeed, this will undoubtedly greatly impair trade relations between our two countries, thus causing a major retrogression in our relations,'' he said. ''This is something the Chinese side would not like to see.''

The most favored nation status is reviewed each year by the White House and sent to Congress. Bush was expected to recertify China for preferential status, but ironically, the review deadline is June 3, the first anniversary of when Chinese troops fired on demonstrators in Beijing.

Although originally targeted at the Soviet Union to encourage freer emigration, the status review process may be altered by a bill currently in the Senate that could effectively empower Congress to overturn Bush's certification on other grounds.

''I hope the U.S. side will make a wise decision on this and not do things that will harm bilateral relations and cause retrogression,'' Qian said.

The Chinese are anxious because the United States is China's biggest export market, buying nearly 25 percent of its exports.

China's exports to the United States totaled nearly $12 billion last year, while U.S. exports to China were only $5.81 billion. The growing U.S. trade deficit with China has already raised concern in Washington.

Qian expressed the hope the United States and China could ''find where their common interest lies despite the differences,'' but made no new concessions on one major sticking point - the presence of China's best-known dissident in the U.S. Embassy in Beijing.

Astrophysicist Fang Lizhi and his wife, Li Shuxian, have been in the embassy since taking refuge there last June. They have been named in arrest warrants for allegedly instigating last year's unrest.

China is believed to be demanding that the couple leave the embassy and confess to the official allegations before being allowed to leave the country. No progress has been reported in talks between U.S. and Chinese officials on their possible release.

#90087u0486 03/28/1990 ~United Press International

BEIJING (MARCH 28) UPI - China is believed to be sending missiles to a Middle East nation but the shipment apparently does not violate its pledge to the United States not to sell medium-range missiles in the region, Western diplomats said Wednesday.

The diplomats, speaking on condition of anonymity, said the shipment was believed to be of a short-range missile known as the M1-B. They based their assessment on intelligence and analysis of China's missile sale posture.

Analysts have been expecting China to resume missile sales abroad to earn hard currency since Western nations imposed political and economic sanctions in response to the crackdown last June on the pro-democracy movement.

China's missile sales overseas became a major dispute with the United States several years ago after Chinese-made Silkworm missiles were used by Iran against shipping in the Persian Gulf during the lengthy Iran-Iraq war.

The dispute flared anew in 1988 after U.S. intelligence discovered China had sold CSS-2 medium-range ballistic missiles to Saudi Arabia, reportedly for some $2 billion. Both nations said the missiles were fitted only for conventional warheads.

The Western diplomats said that based on analysis, including a sighting of the missiles being transported on a truck convoy, they believed the new shipment was headed for a Middle East nation.

The M1-B is classified as short-range, with a range of 50-75 miles. It is a surface-to-surface missile believed to be relatively accurate.

''This is not the kind of missile they use internally,'' one diplomat said. ''It's the kind they export.''

They said, however, the shipment would apparently not violate a pledge by senior leader Deng Xiaoping during the controversy over the 1988 Saudi sale.

In September 1988, during a visit to Beijing by Defense Secretary Frank Carlucci, Deng pledged secretly that China would not sell medium-range missiles again in the Middle East.

U.S. officials had criticized the deal as destabilizing to the region.

Under guidelines of NATO, missiles with ranges up to nearly 700 miles are classified as short-range. Under the U.S.-Soviet Intermediate Nuclear Forces treaty, missiles with ranges of up to 310 miles are classified as short-range.

Western intelligence sources believe China is preparing to take advantage of the classifications to sell a new missile, the M-9, possibly to Middle East nations such as Syria and Iraq.

The M-9 is not believed to have yet reached production. Its expected range was published in 1987 as 370 miles but the Chinese military has scaled that back to below 310 miles, the diplomats said.

The adjusted range would fall within the INF treaty guidelines and hold to Deng's pledge not to sell medium-range missiles such as the CSS-2, which has a range of up to 1,800 miles.

Meanwhile, the semi-official China News Service reported Wednesday that China is manufacturing a ''new generation of cruise-type missile,'' similar to the Silkworm, but with greater range and more sophistication.

#90087u0551 03/28/1990 ~United Press International

KEY BISCAYNE, FL (MARCH 28) UPI - Former President Richard Nixon urged Soviet leader Mikhail Gorbachev to stop propping up Fidel Castro's regime in Cuba.

''Now that the people of Nicaragua have voted out (Daniel) Ortega, it is time for Gorbachev to pull the plug on Castro,'' Nixon said Tuesday night at a $250-a-plate fundraiser on Key Biscayne for the Boys Club of Miami.

Nixon called Gorbachev ''one of the greatest politicians of the century'' and ''one of the most fascinating figures in international politics,'' but

warned that Gorbachev's reforms are not simply humanitarian.

''Gorbachev knew he had to retrench and reform in order for his party and his country to survive,'' Nixon said in a speech at the Sonesta Beach Hotel.

And except for Nicaragua's Ortega, Nixon said, ''All of the Soviet Union's Third World clients are still in power.

''We must have an understanding with Gorbachev. That the sale of arms to any anti-American regimes in the Western Hemisphere is not to be tolerated.''

Nixon, 77, resigned under fire in 1974 for his role in the Watergate break-in. In his latest book, ''In the Arena,'' scheduled to be published next month, he reveals that the scandal plunged him into a black depression.

During his presidency Nixon maintained a home on Key Biscayne near that of his good friend, banker Charles ''Bebe'' Rebozo, a Boys Club board member.

Club officials expect to raise more than $100,000 from the event, which included a $1,000-per person private reception at Rebozo's home.

(MARCH 28) UPI - Around the world... around the clock... U-P-I brings you the world, next:

The Kremlin imposed tough restrictions on foreigners traveling in Lithuania, including foreign correspondents reporting in the independence-bent Baltic republic. A Soviet Foreign Ministry spokesman says foreigners... including diplomats, reporters and businessmen... will have to leave Lithuania when their permits expire.

Lawmakers in Czechoslovakia approved a seven-point-eight-BILLION-dollar budget in move viewed as a minor victory for free-market proponents. The Czech budget takes effect this weekend. It cuts subsidies to state-owned industries and slashes financial support to the Communist party in order to set the groundwork for economic reforms.

Poland's prime minister says that Warsaw's shift to a market-driven economy may fail without help from the West. In Canada yesterday, Prime Minister Mazowiecki says Poland wants its creditors to cut the amount of loans outstanding. He says Poland's 40-BILLION-dollar foreign debt threatens the nation's push toward democracy.

Greyhound is condemning the violence against its buses and is offering 100-thousand dollars for information on 23 shootings aimed at the firm since the strike began three weeks ago. The nation's largest intercity bus company expects to replace its entire workforce with non-union drivers by Easter.

Idaho's major cash crop may be threatened if Governor Cecil Andrus signs a bill giving the state the most restrictive abortion law in the nation. The bill arrived on the governor's desk yesterday. Pro-choice groups threaten a nationwide boycott of Idaho potatoes if Andrus fails to veto the measure.

-30- 1865

#90087u0595 03/28/1990 ~United Press International

VILNIUS, Lithuania, U.S.S.R. (MARCH 28) UPI - The Soviet Union has imposed stiff limits on foreigners traveling in Lithuania, including foreign correspondents reporting on the Kremlin's crackdown in the rebellious Baltic republic.

Soviet paratroopers beat and dragged Lithuanian army deserters from a psychiatric hospital Tuesday and seized the headquarters of Lithuania's independent communists. The actions were the most concrete signs of a crackdown by Soviet President Mikhail Gorbachev since the republic's new nationalist Parliament declared independence from the Soviet Union March 11.

Lithuania's government protested the Soviet actions as ''inexcusable aggression'' and demanded the return of the deserters it said were kidnapped. Lithuania also recalled Parliament deputies from Moscow and demanded immediate negotiations with Moscow in ''neutral territory.''

Later Tuesday, Foreign Ministry spokesman Gennadi Gerasimov castigated the ''ultimatum-like tone of several points in (last week's) U.S. Senate resolution'' that warned against using force in Lithuania.

He called it a ''clear interference in the internal affairs of the Soviet Union,'' and ''an act that contradicts the norms and principles of international law.''

But Lithuanian President Vytautas Landsbergis, in an interview Wednesday on NBC-TV's ''Today'' program, said he welcomed any U.S. backing for his republic's efforts to secede from the Soviet Union.

''We are waiting for more ... support,'' he said, speaking in English, ''because Washington and the United States, they are a state of the great democratic tradition and they would support democracy .. and (of) the returning of democracy to some countries earlier, in this case, annexed and suppressed.''

In Washington, State Department spokeswoman Margaret Tutwiler said, ''This is a very complex, delicate diplomatic situation. I don't intend to comment on specific conflicts.''

In Moscow, Foreign Ministry spokesman Yuri Gremitskikh said all foreigners were told they would have to leave Lithuania and would be temporarily barred from entering. He said the order applied to diplomats and businessmen as well as Moscow-accredited journalists, who must leave when their permits expire.

Witnesses said at least 30 Soviet soldiers rolled up in trucks and seized at least 12 - possibly as many as 23 - Lithuanian army deserters, beating them and taking them into custody.

At least 1,500 Lithuanians have deserted their Soviet army units, often taking refuge in churches. Only a few had sought sanctuary in the hospital.

At 7:15 a.m., more than two dozen Soviet soldiers with AK-47 automatic weapons drove up to the Communist Party's Central Committee building and occupied it, according to officials of the party that broke away from Moscow.

Lithuanian Interior Ministry forces erected barricades around the Parliament building amid fears that either Soviet troops or ethnic Russians at a nearby anti-independence rally might try to take the seat of the government.

Those inside the building readied fire hoses to repulse any attack, but the rally fizzled, lasting just over an hour and drawing at most 10,000 of the 360,000 ethnic Russians in the republic of 3.6 million people.

Gorbachev, using broad new presidential powers, decreed March 21 that federal property built by Moscow will not be given to local bodies who have declared themselves independent. On Sunday, Soviet troops took over two Communist Party buildings and handed them over to party members loyal to Moscow.

Landsbergis said the use of force to take over offices Tuesday seemed to indicate a change in Moscow's policy.

The statement by Landsbergis came after Gorbachev told visiting Sen. Edward Kennedy, D-Mass., that force would be used in Lithuania only if Soviet lives were threatened.

''In other words, force will be used, since the Soviet armed forces can easily create the image of Soviet lives being in danger,'' Landsbergis said. ''This is a definite change in Gorbachev's position on the use of

force.''

Kennedy said, however, ''I think that President Gorbachev understands ... that if force is used, that this would damage in a very important and significant way the really rather remarkable progress that has been built up over the last five years.''

''They have to take that into consideration,'' Kennedy said in an interview from Moscow on the ''Today'' show. ''I think that response in the United States would be extremely harsh.''

Gerasimov reiterated that a law of secession is being prepared in the Soviet Union and ''any attempts and declarations about secession will be viewed as illegal and invalid.''

Soviet diplomats around the world repeated that position.

Nikolai Trucuk, press attache at the Soviet Embassy in Warsaw, said secession would cost the Soviet Union up to $3.3 billion and weaken its military potential because ''there are as many as 24 armament plants in Lithuania.''

(MARCH 28) UPI - The Kremlin tightens its grip on Lithuania... Greyhound moves to end strike violence... and the Iran-Contra trial of John Poindexter enters its final phases. These stories... and more... next from the wires of United Press International.

Soviet President Gorbachev has repeatedly asserted the right of Moscow to force Lithuania to abide by the laws of the Soviet Union... but he appeared visibly shaken by the situation in the Baltic republic.

Gorbachev looked weary, speaking slowly and stumbling over words... during an address to the Soviet Union yesterday about the first session of his 15-member presidential council. He did NOT refer to Lithuania.

Soviet troops made their presence felt in Lithuania's capital yesterday by staging a pre-dawn raid at a psychiatric hospital to arrest between one-dozen and two-dozen Red Army deserters.

Lithuania protested the Soviet actions as ''inexcusable aggression''... and demanded the return of the deserters it said were ''kidnapped.''

Later, Red Army paratroopers occupied the Communist Party Central Committee building. Lithuanian Interior Ministry troops braced themselves for continued Kremlin intervention when they positioned themselves around the parliament building to prevent its takeover.

The Foreign Ministry also announced that all foreigners would have to leave Lithuania and would be temporarily barred from entering. A ministry spokesman said the order applied to diplomats and businessmen as well as journalists.

The events in Lithuania are being watched closely in Washington... but the Bush administration is reserving comment.

#90087u0685 03/28/1990 ~United Press International

(MARCH 28) UPI - The bitter and violent Greyhound walkout shows NO sign of being resolved.

The strike is in its fourth week, with Greyhound management refusing to sit down at the bargaining table- as one spokesman put it- ''while a gun is pointed at us.'' The bus line is operating using non-union drivers.

Greyhound officials at a Washington D-C news conference yesterday condemned random sniper attacks aimed at its buses and terminals. The firm is offering 100-thousand dollars for information on nearly two dozen shootings incidents since the walkout began.

A Greyhound reports also shows 71 bomb threats and 123 other incidents of violence. Company chief negotiator P. Anthony Lannie says at least five union officials were arrested or are under investigation for alleged violence.

Union officials say that Greyhound- quoting here- ''is using the violence as a subterfuge NOT to go back to the bargaining table.'' Representatives of the union and company last met 10 days ago. NO more talks are planned.

-30- 1187

#90087u0709 03/28/1990 ~United Press International

(MARCH 28) UPI - The Iran-Contra trial of John Poindexter is winding down with prosecutors and defense lawyers to meet in federal court today for jury instructions.

The ex-national secuity adviser... the highest-ranking Reagan administration official charged in the scandal... is accused of five counts of lying to Congress, destroying documents and trying to obstruct a congressional investigation.

Poindexter's lawyers yesterday rested their case without calling him to the stand. Federal judge Harold Greene set jury deliberations for Friday.

The defense has tried to refute prosecution claims that Poindexter was behind a plan to sell U-S arms to Iran and divert some of the money to Nicaragua's Contra rebels when such aid was banned by Congress.

The trial featured a star witness list. Former Marine Lieutenant Colonel Oliver North took the witness stand as a hostile witness for the prosecution. Poindexter was once North's boss at the White House.

Former President Reagan and former Attorney General Edwin Meese were defense witnesses.

#90087u0712 03/28/1990 ~United Press International

(MARCH 28) UPI - NASA officials plan to load the one-point-five-BILLION-dollar Hubble Space Telescope into the cargo section of the shuttle Discovery today.

Space agency techs were going to stow the showpiece of the shuttle era aboard Discovery yesterday... but were stymied when pesky midge bugs were detected in the cargo bay.

Today's procedure will occur after techs determine they've gotten rid of the tiny mosquito-like bugs.

The delay hasn't deterred NASA engineers from considering moving up Discovery's launch-date from its scheduled April 12th liftoff. Officials are considering the idea of firing Discovery two days early. An official date is expected to be announced Saturday after a two-day flight readiness review.

The Hubble Space Telescope is one of the most powerful optical devices ever built.

#90087u0715 03/28/1990 ~United Press International

(MARCH 28) UPI - New York officials say they expect a grand jury probing the weekend fire at a Bronx social club to hand up an indictment by the end of this week against the Cuban immigrant accused of setting the blaze.

Authorities believe 36-year-old Julio Gonzalez set the fire that killed 87 people Sunday.

Yesterday, the panel spent a second-day looking at evidence from the case against him, including a tearful videotaped confession he gave police after being taken into custody.

Meanwhile, the grim task of life without the victims continues for families and friends. The first viewings for 19 fire victims will be held today in the Bronx neighborhood of East Tremont.

Area funeral homes say many of the bodies being waked were relatives, including nine members of one family, mostly between the ages of 17 and 19.

Police say they've placed the ex-girlfriend of the suspect under protection after victims' families accosted her yesterday.

-30- 1116

#90087u0718 03/28/1990 ~United Press International

(MARCH 28) UPI - A plan to make American students tops in the world in

math and science during the next 10 years got a boost of up to 80-Million dollars.

The National Science Foundation in Washington, D-C, announced the grant program yesterday. Director Erich Bloch says the new grants are being offered on a competitive basis to states to revamp their science and mathematics programs. The only restriction is that states must make the changes statewide rather than in a patchwork fashion.

Science Foundation officials expect that four to eight states will receive five-year grants totalling five-Million to 10-Million dollars each.

Bloch says the program should help advance the Bush administration's goal of making American students first in the world in science and math achievement by the year 2000.

It's a tall order since U-S students currently score more poorly on math and science achievement tests than students in many other industrialized nations.

#90087u0784 03/28/1990 ~United Press International

(MARCH 28) UPI - Prices on the Tokyo Stock Exchange closed sharply lower in moderate trading Wednesday as investors worried about the rise of the U.S. dollar against the Japanese yen.

The blue-chip Nikkei Average of 225 selected issues, which dipped 14.53 points Tuesday, plunged 562.39 points to 31,263.57.

The broader-based Tokyo Stock Exchange Price Index of all major listed shares fell 32.23 points to 2,306.85 after gaining 25.45 points Tuesday.

Volume amounted to 600 million shares, down from 680 million shares traded Tuesday.

Declines outpaced advances 590 to 331, with 145 issues unchanged.

Analysts blamed the market's decline on the skyrocketing U.S. dollar, which gained 1.67 yen on the Tokyo Foreign Exchange, ending the day at 158.63 yen.

Elsewhere in Asia, prices ended lower in moderate trading on the Hong Kong Stock Exchange.

The key Hang Seng Index, which eased 3.17 points Tuesday, fell 20.15 points to 2,990.70. Utilities rose 2.90 points, financials fell 19.38, industrials dropped 20.01 and properties closed down 56.06 points.

Turnover amounted to 1.46 billion shares, compared with 1.66 billion shares traded Tuesday.

In Australia, stock prices closed mixed in light trading on the Sydney Sharemarket.

The blue-chip All Ordinaries Index, which fell 8.6 points Tuesday, eased 0.8 points to 1,557.9, while the Gold Index, which plummeted 93.0 points Tuesday, recouped 4.8 points to 1,628.1.

Turnover amounted to 73.7 million shares, compared with 77.5 million shares traded Tuesday.

#90087u0844 03/28/1990 ~United Press International
BALTIMORE (MARCH 28) UPI - Dr. Michel Mirowski, principal developer of an implantable automatic heart defibrillator - a major advancement in cardiology - has died of cancer at age 65.

Mirowski, who died Monday at Johns Hopkins Hospital, became director of the coronary care unit at Sinai Hospital shortly after arriving in Baltimore from Israel in 1968. He later joined the faculty of the Johns Hopkins Medical School, becoming a professor of medicine in 1984.

The defibrillator, about the size of a pack of cards, has been implanted in heart patients like a pacemaker since 1980. The device senses irregularities in the heartbeat and shocks it back to normal speed and rhythm.

Mirowski, born in Warsaw, Poland, studied at the University of Gdansk and graduated from the University of Lyon in France in 1953.

He did postgraduate work at the Eduard Herriott Hospital in Lyon, the Tel Hashomer Governmental Hospital in Tel Aviv, Israel, and the National Institute of Cardiology in Mexico City.

He then spent five years as chief of the division of cardiology at Asaf Harofe Governmental Hospital near Tel Aviv.

Mirowski, who spoke French, Hebrew, Polish, Russian, Spanish and Yiddish, wrote most of his 260 scientific papers in English.

He is survived by his wife, the former Anna Rutkowski; three daughters, Dr. Ginat Mirowski of Cambridge, Mass., Dr. Ariella Mirowski Rosengard of Owings Mills and Dr. Doris Mirowski of Philadelphia, and a granddaughter.

Services were set for Wednesday at the Sol Levinson and Bros. funeral establishment.

#90087u0869 03/28/1990 ~United Press International
WASHINGTON (MARCH 28) UPI - After-tax profits of American corporations crept up by 2.8 percent or $4.3 billion in the fourth quarter of 1989 but

fell by 4.7 percent or $8 billion for the year, the Commerce Department said Wednesday.

"I think what we've learned is a slow-growth economy is one where business profits take the hit," said Robert Dederick, chief economist for Northern Trust in Chicago. "Much of the weakness has been in the manufacturing sector."

In its final estimate of total output of goods and services for the closing three months of last year, the government also said the real gross national product increased by 1.1 percent or $11.2 billion dollars. For the year, the GNP was up three percent compared to an increase of 4.4 percent in 1988 and an increase of 3.7 percent in 1987.

Economist David Wyss, of DRI/McGraw Hill in Lexington, Mass., said, "It was a very favorable report for the economy. The economy is slowing down, but the chances of a recession are less." "We have seen very weak corporate profits," Wyss added. "We expect that to continue into 1990."

The quarterly increase in after-tax corporate profits, to $156.7 billion, follows a decrease of $8.7 billion in the third quarter. The yearly decrease, to $160.9 billion, follows an increase of nearly $27 billion in 1988. All the figures were adjusted to account for seasonal factors.

Corporate profits from current production for October, November and December were down by 3.2 percent or $9.5 billion, and off by 8.3 percent or $27.3 billion for the year, the Commerce Department said.

The dip in the annual current production figures, confirming a weakening in the profits of the nation's corporations, was the first yearly decline since a 0.1 percent fall in 1986 and the largest since minus two percent in 1982.

The GNP for the fourth quarter stood at $5.3 triilion in current dollars, or $4.2 trillion in 1982 dollars, the department's Bureau of Economic Analysis said in its report.

For the year, the GNP stood at $5.2 trillion or $4.1 trillion in 1982 dollars compared to $4.8 trillion in 1988 or $4 trillion in 1982 dollars, the department said.

The implicit price deflator, a key gauge of inflation tied to the GNP, stood at 3.2 percent for the fourth quarter of 1989, the same as in the third quarter of last year, the Commerce Department said. For all of 1989, the price deflator finished at 4.1 percent versus 3.3 percent in 1988 and 3.2 percent in 1987, the department said.

#90087u0906 03/28/1990 ~United Press International

HARTFORD, CT (MARCH 28) UPI - A four-year battle by striking Colt Firearms workers culminated in victory Wednesday as the first union employees returned to their jobs at the historic plant.

Cheered on by hundreds of their companions who will follow in the next several weeks, about 75 workers walked through the gates for the first time since Jan. 24, 1986, when picket lines were set up.

There were hugs, cheers, and some tears as the first shift entered the historic century-old plant where Samuel Colt developed his .45-caliber

revolver that became world famous.

The bitter strike came to an end Friday with the announcement of a unique buyout composed of the union, the state, and former Colt officials. The sale price by the parent Colt Industries Inc. of New York was not disclosed. However, the state invested $25 million from state pension funds to float the buyout.

United Auto Workers Union officials said about 375 workers will be back on the job in the next few weeks and it will take about two months to return all of the approximately 700 members.

When the walkout began, about 1,100 workers were involved but many eventually found other jobs. About 400 replacement workers hired by the company during the strike were given their walking papers last week.

The agreement calls for the returning workers to receive $10 million in back pay, which was ordered by the National Labor Relations Board after it ruled the company had conducted unfair labor practices before and during the strke. The workers will also receive $3 million in deferred payments and 11.5 percent share of the company through a stock ownership plan.

The strike was initially marked by arrests on the picket line, charges of union busting and unfair labor practices, and a natiownide boycott of Colt Firearms products by the AFL-CIO.

WASHINGTON (MARCH 28) UPI - Nationwide sales of new single-family homes edged up by 3.1 percent in February, with a huge gain in the South offset by a big plunge in the Northeast, the government reported Wednesday. Sales were down by 6.8 percent from December to January.

The median price for a new home climbed to $130,000 in February from $125,000 in January, a gain of $5,000 or 4 percent, the Commerce Department and Housing and Urban Development Department said in a joint report. The revised median sales price for all of 1989 was fixed at $120,000 vs. $112,500 in 1988, an increase of $7,500 or an increase of 6.7 percent.

The annual rate of new single-family home sales stood at 607,000 in February for the entire United States compared to a revised nationwide estimate of 589,000 in January, the report said. The statistics used in the report were adjusted to reflect seasonal factors such as the weather.

The Northeast took the biggest hit, an 18 percent drop in February to 82,000 new home sales from 100,000 in January, the report said. In the South, new home sales were up 21.3 percent to 256,000 in February from 211,000 in January. The West encountered a 1.6 percent drop to 181,000 homes from 184,000, and the Midwest saw sales drop 6.3 percent to 88,000 in February from 94,000 in January.

The revised nationwide sales rate for January was 589,000 single-family homes compared to 632,000 in December and 687,000 in November, the report said.

#90087u0977 03/28/1990 ~United Press International

SCHAUMBURG, IL (MARCH 28) UPI - Health officials and police pulled all Reese's candy from a K mart department store because a liquid-filled syringe was found in a bag of Reese's Peanut Butter Cups.

''All Reese's candy has been pulled from our shelves,'' store manager Gary Sibilsky said Wednesday. ''We have turned the matter over to the Schaumburg Police Department and have nothing new on the situation.''

The single bag was found Tuesday by a K mart employee re-pricing candy on a lower shelf. Police said the tainted bag of snack-size cups was hidden under a pile of peanut butter cup bags, indicating ''someone apparently took some time in getting rid of the syringe.''

''We have no idea how it got there, whether somebody was trying to taint the candy or whether somebody dumped the syringe,'' police Lt. Robert Specht said. ''It could be a prank for all we know. We just don't know.''

Specht said because K mart candy is inventoried by a price checker only once a month, the plastic disposable syringe could have been buried on the shelf for up to 30 days.

No other syringes or punctured packages were found in the store and the department has ''had no reports of anyone becoming ill in our village,'' Specht said.

The syringe was sent to the State Crime Lab in Broadview to identify the liquid, Specht said.

''It could be water, insulin, poison - at this point, I wouldn't speculate on anything,'' he said. ''It could be someone dumping a used drug syringe, someone trying to scare someone ... It could be anything.''

The store is not equipped with cameras, police said, and no suspicious people or activity had been reported.

#90087u0987 03/28/1990 ~United Press International

ABIDJAN, IVORY COAST (MARCH 28) UPI - Police fired stun grenades and tear gas Wednesday to disperse about 1,000 protesters defying a new ban on demonstrations and demanding the ouster of the nation's long-time president, witnesses said.

For the first time since protests against economic austerity measures erupted in the Ivory Coast six weeks ago, the business district of Abidjan was filled with demonstrators demanding the resignation of President Felix Houphouet-Boigny, 85.

The shouts of hundreds of protesters echoed among office buildings deserted by workers who massed on the streets to support 40 women in a sit-down demonstration. The protesters called the president ''a thief'' and demanded he step down immediately. Houphouet-Boigny has ruled the Ivory Coast since the West African nation won independence from France in 1960.

The protest came hours after the arrest Tuesday night of Assoa Adou, secretary-general of the Ivory Coast Union of Senior Health Officers. Adou was accused of organizing a strike by doctors and health workers that began as a 48-hour stoppage on Monday but has since been extended indefinitely.

An estimated 1,000 people gathered Wednesday in support of the women's sit-down protest, which stopped traffic on Abidjan's main thoroughfare, Boulevard de La Republique. The women were calling for the reversal of a government decision to cut public sector salaries by up to 40 percent.

The measure, which takes effect Sunday, is intended to reduce government spending and fill a $390 million gap in the 1990 budget.

The 40 women were arrested after 30 minutes. Police in riot gear charged to support the crowd that had gathered to support the women, then fired tear gas and stun grenades in all directions.

The protest was the second since the government imposed a nationwide ban on demonstrations on Monday. Strikes are legal in the Ivory Coast but the ban followed a decision by doctors to launch a 48-hour strike to protest a

14 percent pay cut for medical practitioners.

The arrest of Adou on Tuesday followed the arrest of another leading trade unionist, Marcel Ette, secretary-general of the Ivory Coast University Teachers Union.

Ette was arrested on Monday evening along with 120 teachers who broke the ban on demonstrations and staged a protest in Abidjan after they were refused permission to hold a meeting of the union.

The doctors have said they will return to work when those arrested have been released. The teachers have been away from work since March 3, when the government closed the university and all schools in Abidjan following student demonstrations demanding better living conditions.

LONDON (MARCH 28) UPI - Bookmakers have stopped taking bets on whether Prime Minister Margaret Thatcher will win the next election because most gamblers believe it is inevitable she will be ousted as leader of the Conservative Party, experts said Wednesday.

Leading bookmakers said the street barometer of Thatcher's sliding political fortunes showed she was bad for business and so the account had been closed.

''We were ending up with a totally one-sided book and that is not good business,'' said Graham Sharpe of William Hill. ''All we were doing was leaving ourselves open to a large liability.''

Opinion polls show Thatcher is lagging by a range of 19 to 28 points behind the opposition Labor Party in dissatisfaction attributed to high interest rates, a new tax scheme and repugnance of her leadership style, which critics call autocratic and geared to the rich.

Sharpe said books on Thatcher's survival opened last December, when a challenge to her leadership was launched by a Conservative member. She easily survived the bid but odds of her leading the party for a fourth term of office have since drastically dwindled, he said.

Bookmakers are still accepting money on the odds of alternative leaders

for the Conservative Party.

At William Hall, the highest odds were 11-8 for Michael Hesseltine, the defense secretary who resigned from the Cabinet after a showdown with Thatcher over a weapons purchase.

Next were party chairman, Sir Kenneth Baker, at 2-1, and Deputy Prime Minister Sir Geoffrey Howe at 3-1.

Chancellor of the Exchequer John Major and Foreign Secretary Sir Douglas Hurd were both at 8-1. The longest shot is 100-1 for former junior Health Minister Edwina Currie.

Thatcher is expected to call later elections to give time for the economy to rebound and anger to dissipate over the new poll tax. Sharpe said odds on a 1990 election were 66-1, 1991 11-4 and 1992 9-2.

The chances of a Labor victory are 4-6 and a Conservative return are 11-10 but people are still putting money on the incumbents because a lot can change before the next election, he said.

''In this business, doors open and doors close,'' said Sharpe, whose company takes bets on any field of activity. ''We just opened one on who will be the next archbishop of Canterbury, and just closed one on what will be the name for the new daughter of the Duchess of York.''

#90087u0999 03/28/1990 ~United Press International

MANILA, PHILIPPINES (MARCH 28) UPI - Government troops backed by helicopter gunships attacked a rebel training camp in the southern Philippines with rocket and machinegun fire, killing at least 59 communist guerrillas, the military said Wednesday.

In the capital, a clash between rebels and troops near President Corazon Aquino's palace left a soldier and a guerrilla dead and another soldier was shot in a restaurant Wednesday on the eve of the 21st anniversary of the founding of the communist New Peoples Army, raising to 101 the number killed in insurgency-related incidents in six days.

The violence prompted the government to place the military on alert and U.S. servicemen were ordered to restrict their travel from American military bases.

A Philippines armed forces spokesman, Col. Juanito Rimando, said troops and rebels fought for two days in remote Surigao del Sur province, some 550 miles south of Manila, where a platoon of soldiers chanced upon a large rebel camp in a mountain village.

''Firefight ensued with the government forces maneuvering to overrun the camp and defeat the communist terrorists,'' Rimando said.

He said troops from two battalions, firing rockets and machine guns from three Huey helicopter gunships and two ancient T-20 warplanes, drove the rebels from the camp. He said 59 guerrillas and one soldier were killed and 23 other soldiers wounded.

Police said a soldier and a guerrilla were killed Wednesday several blocks from the presidential palace in Manila when troops confronted youths who had painted ''Mabuhay (long live) the NPA'' on a wall.

In another part of the capital - the working class district of Balintawak - two youths shot and killed a soldier as he ate breakfast in a restaurant police said.

Officials placed military and police forces on red alert, the maximum state of preparedness, Tuesday following intelligence reports the NPA planned to mount terrorist strikes to mark its 21st anniversary Thursday.

U.S. Navy officials Tuesday restricted travel to Manila ''due to increased threats to U.S. military members.''

Eight Americans have been killed the past two years in slayings blamed on rebels.

In a statement released to news agencies Wednesday, the guerrillas renewed their offer of a unilateral cease-fire if Aquino declared the immediate dismantling of U.S. military bases in the Philippines.

''Such a declaration will be a good starting point so that both sides could, in earnest, sit down to arrive at a comprehensive political settlement of the people's basic problems,'' the statement said.

Aquino has repeatedly rejected the rebel offer.

On March 13, Aquino said the guerrillas' ''interests do not necessarily coincide with those of our people.''

There are five U.S. facilities in the Philippines, including the giant Clark Air Base and Subic Bay Naval station. The 1947 lease on the bases expires in September 1991 and exploratory talks on the future of the installations are to begin next month.

The NPA was formed by a handful of peasants on March 29, 1969, as the armed wing of the outlawed Communist Party of the Philippines. It has about 19,000 members.

#90087u1006 03/28/1990 ~United Press International
ANALYSIS BY HELEN THOMAS

WASHINGTON (MARCH 28) UPI - Aside from the broccoli imbroglio, the front-burner issue at the White House is still the future of Lithuania and how the United States can promote a peaceful resolution of the dilemma facing the Soviet Union.

Actually, some sympathy is being shown for Soviet President Mikhail Gorbachev as he must preside over the dissolution of his empire that President Ronald Reagan once called ''evil.''

It took a long time for President Bush to accept Gorbachev's glasnost and perestroika policies as the real McCoy. He became a true believer when Gorbachev kept the Soviet army in place while all of the Eastern European satellites called it quits with Moscow and decided to establish democratic governments.

While communism was being booted out, Gorbachev was still able to enhance his power as the leader of the land. But the issue is now coming down to mother Russia and the Republics that want to secede from the Soviet Union.

Since the United States has never recognized the annexation of Lithuania, Latvia and Estonia in 1940 through a Nazi-Soviet pact where the peoples of those countries had no say, it would seem to be a simple matter to simply say so and extend diplomatic recognition to Lithuania, which has now declared itself an independent democracy.

Moscow has escalated the pressure on Lithuania and apparently has yet to come to terms with the possibility that it will break away. The concern is that it will soon be followed by its sister states, Latvia and Estonia. Later on, perhaps Ukraine and Armenia.

Where will that leave the Soviet Union and Gorbachev. It's superpower status will undoubtedly be reduced by the political rejection. But it could become a member of the community of Europe, prosperous and respected with an open society. Such a statement might have been far-fetched as much as a year ago.

Bush has warned Gorbachev that a military response to secessionist moves will only backfire, saying that it ''inevitable.''

He has repeatedly called for a peaceful dialogue to solve the problem, saying a continued war of nerves in Lithuania ''could have adverse international repercussions and could be counterproductive for U.S.-Soviet

relations.''

There is no question that Gorbachev would lose his heroic status and popularity in the world if he cracks down on Lithuania.

As some political analysts have observed, he had a chance early on to state clearly that the three captive nations, Lithuania, Latvia and Estonia, were ruthlessly annexed in the Stalinist era and he was permitting them to become independent again.

It would not be impossible for Gorbachev to take that route, but it seems more and more unlikely.

In the vernacular, he could blow it and lose all the goodwill he has accumulated in permitting the Berlin Wall to be dismantled and former satellites to go their own way.

On the down side, the retention of secession-minded states in the Soviet Union by violent means will give new ammunition to hard-liners in America who have yet to be convinced that the Soviets are not bent on world conquest.

The hawks will also have a heyday in urging more and more funding for the Pentagon and the Soviets will again find itself in a runaway arms race.

#90087u1008 03/28/1990 ~United Press International

(MARCH 28) UPI - Lithuanian President Landsbergis says Moscow seems to have changed its stated policy of NOT using force to rein in the nationalistic fervor in the Baltic republic. Landsbergis points to the heavy-handed tactics used by Red Army troops yesterday to arrest Red Army deserters who had taken refuge in a psychiatric hospital to back up his claim.

Japanese officials are puzzled over the steady decline of the yen against the U-S dollar, which was up today for the ninth straight trading session. Market analysts and dealers link the drop in Tokyo stock prices with the skyrocketing dollar. Prime Minister Kaifu says Japan's economy remains stable despite the market fluctuation. But his administration is keeping a close eye on the Tokyo market.

Whether or NOT to enact the nation's most restrictive anti-abortion law has become a political hot potato for Idaho Democratic Governor Cecil Andrus. Pro-choice abortion activists they'll organize a national boycott against the Idaho potato unless the three-term governor vetoes the bill. Members of the Andrus administration fear the boycott threat could spread to tourism.

The head of the House Rules Committee says the panel may debate and vote tomorrow on child-care legislation. Today the committee will continue hearings and vote on rules for debate for two possible plans- one backed by House leadership and the other supported by the White House. Both plans call for tax credits for low-income families with children.

(MARCH 28) UPI - Chicagoans are taking sides following the revelation that the city's Deputy Mayor of Education has decided to enroll her daughter in a private high school in the suburbs. Lourdes Monteagudo has the support of her boss, Mayor Richard Daley, and several other politicians. But she has also been criticized by some for what they say is her insensitivity to the plight of Chicago's public schools.

The Senate is fast-approaching its self-imposed deadline of acting on clean air legislation. Before next week's cut-off point, the upper chamber has a number of controversial amendments to consider aimed at reducing acid rain requirements. Today, the Senate is slated to consider granting federal tax credits to Midwest utilities that install smokestack ''scrubbers'' to reduce sulfur dioxide emissions.

A California scientist says inhaling polluted air might speed the growth of certain types of cancers. Dr. Arnis Richters bases his conclusion on lab tests with tumorous mice which were subjected to air about the same quality as that found in Los Angeles. The polluted air breathing mice fared significantly worse than other tumorous mice that breathed clean air.

Manila authorities say three people were killed in gunbattles between government troops and suspected leftist guerrillas. Today's deaths, which fall on the eve of the 21st anniversary of the outlaw New People's Army... bring to 39 the number of insurgency-related killings during the last six days. Officials placed military and police forces on the maximum state of alert.

ST. PAUL, MN (MARCH 28) UPI - Five doctors at two Twin Cities hospitals will not be prosecuted for the morphine-induced deaths of two terminally ill patients, it was reported Wednesday.

The St. Paul Pioneer Press reported Wednesday prosecutors decided not to present the cases to a grand jury because there are no guidelines for how much morphine should be administered to the terminally ill.

Instead, the county attorney's office will issue a report describing what happened in the two deaths and writing guidelines for administering morphine and other painkillers, based on consultations with 10 specialists in the treatment of terminally ill patients.

The guidelines will help prosecutors decide whether doctors in similar situations will be held accountable for patient deaths, the source said.

The newspaper said three doctors at Fairview Southdale Hospital and two at the University of Minnesota Hospital have been under investigation for seven months by the Hennepin County attorney's office in the deaths, which were ruled morphine-induced homicides after medical examiners concluded that large doses of the painkiller were given to the patients before they died.

The two patients were Nancy Jack, 67, a retired school teacher from Edina who died April 9, 1989, at Fairview Southdale Hospital where she was admitted with pneumonia and later developed lung failure; and Brian Mahoney, 29, a St. Paul writer who died March 22, 1989, at the University of Minnesota Hospital where he was admitted with an immune system deficiency related to a bone marrow transplant.

Both patients received relatively high doses of morphine to relieve pain. Administering morphine to the terminally ill is a standard practice even though the drug itself can shorten a patient's life.

Medical examiners concluded that morphine overdoses were the immediate causes of the two deaths. One medical examiner last August described Mahoney's death as euthanasia.

Mahoney was conscious before his death and helped make the final decisions about his treatment, another source said. Jack was not competent to approve the doctors' decision but her family has supported the doctors.

David Feinwach, general counsel for the Minnesota Hospital Association, said the questions raised by the two cases have had a ''chilling effect''

on pain management in Minnesota.

Arthur Caplan, director of the Center for Biomedical Ethics at the university, said defining standards for the use of powerful drugs on the terminally ill is ''uncharted territory'' for medical science.

''In Minneota and natiowide, there are no clear-cut guidelines governing the use of pain-relieving medications and drugs like morphine,'' Caplan said. ''There are rules and practices that are set at the individual hospital level, but that's voluntary and usually doesn't get written down.''

#90087u1087 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Nationwide sales of new single-family homes edged up by 3.1 percent in February, with a huge gain in the South offsetting a big plunge in the Northeast, the government reported Wednesday. Sales were down by 6.8 percent from December to January, but analysts nonetheless expressed concern about February's results.

The median price for a new home climbed to $130,000 in February from $125,000 in January, a gain of $5,000 or four percent, the Commerce Department and Housing and Urban Development Department said in a joint report. The revised median sales price for all of 1989 was fixed at $120,000 vs. $112,500 in 1988, an increase of $7,500 or an increase of 6.7 percent.

The annual rate of new single-family home sales stood at 607,000 in February for the entire United States compared to a revised nationwide estimate of 589,000 in January, the report said. The statistics were adjusted to reflect seasonal factors.

Asked about the report, David Seiders, chief economist of the National Home Builders Association, said, "In one word I would describe it as disapppointing. ... It's really kind of a puzzle."

Seiders said there was a "problem with buyer demand, probably concern about the economy," although interest rates were lower than a year ago and February's weather was mild.

But Richard Peach, deputy chief economist of the Mortgage Bankers Association, said he believes "the housing sector is being adversely affected by the increase in mortgage rates in January and February."

Rates on 30-year fixed mortgages stood at 10.26 percent last week and adjustable-rate mortgages were hovering at 8.56 percent, according to the Federal Home Loan Mortgage Corp.

On a region-by-region basis, the Northeast took the biggest hit, an 18 percent drop in February to 82,000 new home sales from 100,000 in January, the report said.

In the South, new home sales were up 21.3 percent to 256,000 in February from 211,000 in January. The West encountered a 1.6 percent drop to 181,000 homes from 184,000, and the Midwest saw sales drop 6.3 percent to 88,000 in February from 94,000 in January.

The revised nationwide sales rate for January was 589,000 single-family homes, compared with 632,000 in December and 687,000 in November, the report said.

GENEVA (MARCH 28) UPI - The United States said the world's poorest countries must eliminate ''bloated governments'' and corruption and establish free market economies to escape poverty.

Washington rejected United Nations' proposals that rich nations double financial aid, substantially reduce or write off official debt and agree to commodity price support schemes.

''Financial transfers ... on their own cannot help least-developed country (LDC) development,'' U.S. delegate Morris B. Abram told a meeting convened by the U.N. Conference on Trade and Development.

''Why, despite the transfer of billions of dollars in development aid in the last decade, has the number of least developed countries increased?'' he said. ''Why have many stagnated or lost ground in terms of economic growth, per capita income, literacy and trade performance?

''Instead, the lead developed countries must commit themselves to comprehensive policy reforms (which) means allowing free markets and the private sector to flourish, and fiscal and monetary discipline.

''It means encouraging investment, savings and an end to bloated governments,'' Abram said. ''One-party states, military governments, corruption, intolerance of dissent ... are also obstacles to development.''

Abram, the U.S. ambassador to U.N. agencies in Geneva, was addressing an intergovernmental preparatory meeting before a full international conference on the LDCs set for Sept. 3-14 in Paris.

UNCTAD, as the Third World's main platform in the U.N. system, has called for the Paris conference to agree to a doubling of official financial aid during the 1990s.

It said 0.15 percent of advanced nations' Gross National Product was accepted as a ''target'' by the last such conference in 1981 but the amount actually averaged only 0.09 percent in the past decade.

The number of least developed countries, meanwhile, rose from 31 in 1981 to the current 42 - so designated because of per capita economic production of just $200 a year, two-thirds illiteracy, crippling debts and other such factors.

UNCTAD said aid from the advanced nations should rise to 0.2 percent of GNP by the year 2000 to give the poorest countries a chance.

At the same time, it said there must be a brake on the ''alarming'' population growth - which averaged 2.9 percent a year in the least developed countries in the 1980s against annual economic growth of 2.8 percent and an actual decline of 0.8 percent in production of agricultural goods to feed the people.

In his statement Wednesday, Abram also criticized many of the countries for spending more on the military than on basic education, with only 60 percent of children enrolled in primary schools and just 16 percent at the secondary level.

#90087u1117 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Nationwide sales of new single-family homes edged up 3.1 percent in February, with a huge gain in the South offsetting a big plunge in the Northeast, the government reported Wednesday. Sales were down by 6.8 percent from December to January, but analysts nonetheless expressed concern about February's results.

The median price for a new home climbed to $130,000 in February from $125,000 in January, a gain of $5,000, or four percent, the Commerce Department and Housing and Urban Development Department said in a joint report. The revised median sales price for all of 1989 was fixed at $120,000 as against $112,500 in 1988, an increase of $7,500, or 6.7 percent.

The annual rate of new single-family home sales stood at 607,000 in February for the entire United States, compared with a revised nationwide estimate of 589,000 in January, the report said. The statistics were adjusted to reflect seasonal factors.

Asked about the report, David Seiders, chief economist of the National Home Builders Association, said, "In one word I would describe it as disapppointing ... It's really kind of a puzzle."

Seiders said there was a "problem with buyer demand, probably concern about the economy," although interest rates were lower than a year ago and February's weather was mild.

But Richard Peach, deputy chief economist of the Mortgage Bankers Association, said he believed "the housing sector is being adversely affected by the increase in mortgage rates in January and February."

Rates on 30-year fixed mortgages stood at 10.26 percent last week and adjustable-rate mortgages were hovering at 8.56 percent, according to the Federal Home Loan Mortgage Corp.

On a region-by-region basis, the Northeast took the biggest hit, an 18 percent drop in February to 82,000 new home sales from 100,000 in January, the report said.

In the South, new home sales were up 21.3 percent to 256,000 in February from 211,000 in January. The West encountered a 1.6 percent drop to 181,000 homes from 184,000, and the Midwest saw sales drop 6.3 percent to 88,000 in February from 94,000 in January.

The revised nationwide sales rate for January was 589,000 single-family homes, compared with 632,000 in December and 687,000 in November, the report said.

ANCHORAGE, AK (MARCH 28) UPI - The head of the OPEC oil cartel says output from non-OPEC producers is on the decline and that world oil prices will steadily rise.

Organization of Petroleum Exporting Countries secretary general Subroto, said that the oil cartel, which pumps more than a third of the world's crude oil, will pick up the slack and gradually increase production to meet world demand.

The Indonesian leader of the 13-nation oil cartel made his comments late Tuesday after arriving for a five-day visit to Alaska, America's biggest oil producing state. Subroto also said he supported transforming an aging world tanker fleet to one with safer double hulls.

With the parallel decline in production from aging U.S. and Soviet oilfields, he predicted world price increases would generally keep pace with inflation and not return to the roller coaster price ride of the past decade.

"Prices will go up slowly," he said, "reflecting at least the inflation rate. If you talk about prices in real terms, I think it will be about $23 $24 per barrel in 1995."

Subroto was asked if the changing world oil picture meant that OPEC would regain the clout it wielded in the early 1970s. He indicated that OPEC would reestablish its position of prominence.

"If you mean by that, will OPEC be able to supply the oil that the world needs since non-OPEC production is stagnant and declining, then the answer is yes." Subroto's comments reflected those made by other OPEC leaders recently.

Saudi Arabian oil minister Hisham Nazer earlier this month told a New York University audience that he did not think there would be an oil crisis in the 1990s, like the one in the 1970s, but "the market will eventually, slowly but steadily ... turn into a seller's market." Saudi Arabia is OPEC's largest producer.

Subroto said, "Nobody wants to repeat the history of the '80s and see the fluctuation go up to $40 and go down again to $9 (per barrel). It's very disruptive for the producers as well as for the consumers."

During his Alaska tour, Subroto is scheduled to visit Prudhoe Bay, North America's largest oilfield, and the oil terminal in Valdez to learn what measures had been taken to prevent a repeat of last year's 11-million-gallon spill in Prince William Sound, the largest in U.S. history.

#90087u1139 03/28/1990 ~United Press International

LONDON (MARCH 28) UPI - Amnesty International called on the Argentine government Wednesday to order a special inquiry into excesses allegedly committed during its crackdown last year on an opposition group whose members were reportedly tortured and, in some cases, executed.

The human rights organization in a 21-page report carried statements from people who said they were beaten, subjected to electric shock, and threatened with death by security personnel trying to crush the All for the Fatherland Movement, known in Spanish as MTP.

The actions followed the left-wing group's January 1989 attack on a military barracks in which they killed 11 government personnel and lost 28 of their own fighters.

''There was some disturbing evidence that some MTP members listed as dead in combat may have been summarily executed after having surrendered; that three others 'disappeared' shortly after having been captured, ... and all (detainees) were held in conditions which amounted to cruel, inhuman or degrading treatment,'' Amnesty said.

Amnesty based its conclusions on visits to Buenos Aires last September and October. It appealed to Argentine President Carlos Saul Menem to call for a fresh inquiry because it said investigations so far had been delayed and did not appear impartial or effective.

''Amnesty International recognizes that MTP members involved in the armed attack committed serious offenses,'' it said. ''However, the actions of armed opposition groups can never be used by governments to justify violations of basic human rights.''

Amnesty described how security personnel had raided private homes of suspected MTP sympathizers, and in one case, tortured a couple, raped the wife and threatened to kill their 11-month-old child.

Its criticism of investigations included one of a judge who ruled that ''vexatious or severe treatment'' had been used against some defendants, but did not bring any case against the police or prison officers because he said there was insufficient evidence.

Amnesty concluded that the events ''suggest that unacceptable practices routinely used by the military and security forces in the past have not been eliminated.''

WASHINGTON (MARCH 28) UPI - The South African government has begun a quiet campaign of courting the support of U.S. churches but anti-apartheid religious leaders Wednesday called the campaign ''suspect.''

The program, called ''penduka'' - the Zulu word for repent or reform - is being operated out of the South African Embassy in Washington by the Rev. Brahm Luckhoff, a U.S.-educated pastor in the all-white Dutch Reformed Church of South Africa.

In a letter being circulated among select religious leaders and in some seminaries, Luckhoff notes his nation ''has been much in the news recently mainly because of sanctions, violence, the September '89 elections and the release of several political prisoners.''

''But there is also another South Africa, a quiet South Africa where Christians are working for reconciliation and peace, a South Africa where 79 percent of the population belong to Christian churches, where one of the biggest and most influential churches, the Dutch Reformed Church, recently declared apartheid is a sin and that the defense of apartheid would be regarded as heretical.''

Officials of the National Council of Churches, which includes the majority of mainline Protestant and orthodox churches in the United States, reacted with caution to the Luckhoff proposal and noted the cleric had not been in contact with the council.

''It is the view of the (council's) Africa Committee that this initiative is suspect because it is sponsored by the South African government,'' the council said in a statement.

''It is to be noted that this initiative does not carry the endorsement of the South African Council of Churches, the major ecumenical body in South Africa,'' the statement said.

U.S. church officials said they believe the initiative may be aimed at undermining support in the U.S. religious community for continued economic sanctions against South Africa.

The officials also said that Luckhoff is seeking detailed information from U.S. churches on membership, key meetings, meeting dates and the names of leaders.

In addition, Luckhoff is seeking to set up a meeting between some church leaders and a delegation from the Dutch Reformed Church in South Africa when the group visits the United States in June.

South African Embassy officials said Luckhoff currently is in South Africa.

The U.S. council's Africa Committee said in its view ''no assistance of any kind should be extended to Rev. Luckhoff's office and that, when he attempts contacts with our communions, he should be informed that U.S. ecumenical churches relate to the South African Council of Churches and to its member bodies, and not to the government.''

The Dutch Reformed Church in South Africa has long been one of the most ardent supporters of apartheid and was expelled from the World Alliance of Reformed Churches and the South Africn Council of Churches for its support of apartheid.

BANGKOK, THAILAND (MARCH 28) UPI - Thai police arrested one suspect and searched for six others in the killing of three Saudi Arabian diplomats in February, the national police chief said Wednesday.

''We have arrested one suspect involved in the assassination of the Saudi diplomats,'' said Gen. Sawaeng Thirasawat, director general of the police department.

Sawaeng said the suspect, a Thai national of Arab origin identified as Suchart Kaerabi, was arrested Tuesday. The killings took place Feb. 1.

''This is just only one out of seven suspects,'' said Sawaeng, who said all were Thai nationals of Arab origin.

''The motive for the murders were conflicts of interest over the supply of Thai laborers to Saudi Arabia,'' the police chief said.

Two of the assassinated diplomats were involved in the processing of visa applications for Thais going to work in Saudi Arabia. They were shot at point-blank range as they returned to their apartments in central Bangkok.

There had been speculation the killings involved an international terrorist group but police said that theory was no longer believed valid.

The killings soured relations between Thailand and Saudi Arabia and the Saudi Embassy refuses to issue further visas for Thais to work in Saudi Arabia.

Mohammed S. Khoja, Saudi charge d affairs in Bangkok, said he is satisfied with the efforts of the Thai police in making the arrest.

''I cannot do anything about lifting the ban on visas for Thai laborerss to work in Saudi Arabia. Everything is up to my government,'' he said.

#90087u1212 03/28/1990 ~United Press International

LONDON (MARCH 28) UPI - Stock prices closed slightly higher in sluggish trading Wednesday on the London International stock exchange boosted by some favorable earnings and strong buying in future options.

The blue-chip Financial Times 100-stock index, which fell 32.0 points Tuesday, closed up 8.8 points at 2,275.0. The narrower top 30 industrial average gained 6.4 points to 1,793.0. Volume amounted to around 360 million shares, compared with 386 million shares traded Tuesday.

Analysts said some strong early activity in the cash market where futures contracts are traded boosted stock prices. A large buy order for 700 Financial Times Stock Exchange 100 futures contracts for delivery in March boosted the cash index by about ten points. Stock prices traded in a narrow range in thin volume with dealers cautious following Tuesday's 32-point decline.

On the economic front, Bank of England governor Robin Leigh-Pemberton said British interest rates were high enough to take care of domestic inflationary factors, although he would not rule out the possibility that they might - under some circumstances - need to be raised.

Speaking before a Parliamentary committee reviewing Britain's fiscal 1919 budget, the governor said he foresees Britain's inflation rate peaking at nine percent sometime in early summer, before beginning to fall. Inflation was most recently measured in February at 7.5 percent. Analysts said the remarks went almost unnoticed by the market.

On the corporate front, Kingfisher PLC, which owns the Woolworth and Comet store chains in Britain, gained 16 cents to $4.56 after reporting its pretax profits climbed 31 percent to $478 million.

Hawker Siddeley, an engineering group, fell 14 cents to $10.09 after reporting its 1989 profits came in below expectations.

Bowater Industries, the paper company, climbed 32 cents to $7.60 after reporting a better-than-expected 31 percent rise in pretax profits for 1989.

On the takeover front, Laing Properties climbed 34 cents to $10.68 after P&O Shipping increased its cash offer to $11.60 a share.

Among other highlights, Carlton Communications gained 17 cents to $9.60, Grand Metropolitan climbed 22 cents to $9.69 and Midsummer Leisure gained 42 cents to $2.62.

#90087u1216 03/28/1990 ~United Press International

GENEVA (MARCH 28) UPI - Cigar authority Zino Davidoff rejected Wednesday a challenge by Cuba, whose tobacco he says has declined in quality, to take part in a tasting competition with other experts.

''I'm an old man now, and I don't have to prove my reputation all over again,'' said Davidoff, who is 84.

''All I want is for the Cubans to leave me in peace,'' he told reporters calling his Geneva home.

Davidoff is often called ''Mr. Cigar'' or ''the czar of Cigars.'' Now retired after selling his company to the Swiss tobacco-trading firm of Oettinger in Basel, Davidoff sparked a legal battle with the official ''Cubataco'' agency in Paris by saying the quality of Cuban tobacco has become poor.

Cuban tobacco was first dropped in the top ''Chateaux'' line and then for all cigars carrying the Davidoff name.

Cubataco filed suit for slander and continues to market cigars under the Davidoff name, which has led to counter-action in the courts.

On Tuesday in Paris, Cubataco director Francisco Padron said ''Mr. Cigar'' has not visited Cuba for 20 years and challenged him to ''prove'' his case and that he is still an expert.

Davidoff was born in Kiev, Russia, in 1906 but came to Geneva as a schoolboy when his parents fled pogroms against the Jews.

He established a tobacco-importing and cigar-distribution business and the still famous Davidoff luxury store in Geneva's main shopping district.

The merchant's cigars won worldwide acclaim, especially when he became friendly with Cuban leader Fidel Castro, who allowed the highest-quality

tobacco to be used for Davidoff's top ''Chateaux'' line.

''Davidoff'' cigars currently are marketed both by Cubataco and by the Oettinger company, which produces them in Costa Rica and Honduras and which says that it has to right to the brand name, an argument supported by Zino Davidoff, who remains active in promotion.

#90087u1225 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Electronics industry executives Wednesday urged a Senate panel to reform the government's conservative technology export policy with the Soviet Union and Eastern Europe.

"In light of the dramatic developments in Eastern Europe, we need to make fundamental streamlining changes in export controls," said Mark Ryan, an export licensing attorney for Hewlett-Packard Co., of Palo Alto, Calif., and spokesman for the Computer and Business Equipment Manufacturers Association.

Ryan's remarks came in testimony before a subcommittee of the Senate Banking Committee, which is holding hearings on the reauthorization of the Export Administration Act.

Ryan said the failure of the U.S. government and its allies on the Coordinating Committee for Multilateral Export Controls, to streamline the list of items on its export control list has been disappointing and could erode the competitive advantage of U.S. manufacturers. COCOM is an international trade effort to regulate the flow of technolgy transfers in Eastern Europe ad the Soviet Union.

"At best, it may just be an irrelevant relic of the Cold War," said Bill Bruck, assistant general counsel for Boston-based Data General and a spokesman for the American Electronics Association.

During the past decade, there has been a near total embargo on the transfer of micro-electronic technology to the Soviet Union and Eastern European nations from U.S. manufacturers.

Charles Hough, director of trade administration at Honeywell Inc., said about 50 percent of all U.S. manufactured exports require prior approval from the U.S. government before being cleared to leave the country.

Hough recounted a 20-month ordeal Honeywell went through trying to win approval from the Commerce Department to ship one personal computer to Czechoslovakia.

The computer was needed to operate several instruments in a building

automation system Honeywell was trying to sell. The instruments were cleared for export, but not the computer.

"In this instance, was national security advanced because we kept one personal computer out of Czechoslavakia for nearly two years?" he asked. "I would say no." "Would any competitor in any other country have to go through this kind of bureaucratic hassle when trying to do business? I would say no."

He told the panel that Honeywell's avionics equipment business may be jeopardized by a continuation of stringent U.S. export control policies toward Eastern Europe.

"If the export licenses for our avionics equipment for the (Airbus) A-320s being sold to Eastern Europe are denied or endlessly delayed, we will be opening the door for our competitors to take the whole business away from us, not just in Eastern Europe but for the rest of the world too," he said. A consortium of European avionics manufacturers already has been formed to enter the market, he added.

"We can compete against this consortium, but we are very worried that, because of the hassles over our control policies regarding Eastern Europe, we will be designed out of the Airbus," Hough said.

FEDERAL WAY, WA (MARCH 28) UPI - Prostitution isn't a crime in the new

city of Federal Way - at least for another 11 days.

When the City Council adopted its first set of laws on Feb. 28, the elected officials forgot to include an ordinance against prostitution, according to Maj. Ollie Moore, the King County Sheriff's Department precinct commander.

''Another cancer on the body politic,'' quipped Councilman Joel Marks after learning of the oversight during a meeting Tuesday.

Up until incorporation as a city, the King County community had been covered by county ordinances.

Mayor Debbie Ertel said Wednesday she expects the council to adopt an emergency ordinance outlawing prostitution its next regularly scheduled meeting Apr. 3 and the ordinace will take effect five days later.

Also scheduled to be acted upon next Tuesday are ordinances regulating adult entertainment establishments and massage parlors - both also forgotten in the rush to cityhood last month.

Moore said there are no state laws covering the issues of prostitution or adult-only centers, so police are dependent on local governments to have the appropriate ordinances on their books.

Federal Way, about 10 miles south of Seattle, has five massage parlors and one nude dancing club that have operated without restriction for past month.

WASHINGTON (MARCH 28) UPI - The Supreme Court ruled Wednesday that a state appeals court, rather than a jury, may review a condemned murderer's death sentence when the sentencing jury considered constitutionally invalid evidence.

Justice Bryon White, writing for the 5-4 majority, said that nothing in the Constitution gives a defendant the right to have a jury review his death sentence.

The case before the court emerged after condemned murderer Chandler Clemons appealed his sentence to the Mississippi Supreme Court, arguing only a jury has the authority to impose the death penalty. Therefore, he contended, when an error is made in sentencing, it's the duty of the jury, not an appellate court, to reconsider the sentence.

In Clemons' case, the jury made its decision by weighing aggravating and

mitigating circumstances, but one of those aggravating circumstances was deemed constitutionally invalid. The appellate court rejected Clemons' arguments and upheld his death sentence.

The Supreme Court, ruling on Clemons' appeal, set aside the Mississippi Supreme Court's decision and sent the case back to the lower court, finding that the appellate court may uphold the death penalty by reweighing the balance of aggravating and mitigating factors.

''We see no reason to believe that careful appellate weighing of aggravating against mitigating circumstances in cases such as this would not produce 'measured consistent application' of the death penalty or in any way be unfair to the defendant,'' White wrote.

White was joined by Chief Justice William Rehnquist and Justices Sandra Day O'Connor, Antonin scalia and Anthony Kennedy.

Justice Harry Blackmun wrote in dissent, saying the only consolation he sees in the decision ''lies in the possibility that the Supreme Court of Mississippi will decline the invitation that this court proffers today.''

''I dissent from the majority's strong and gratuitous suggestion that the Mississippi Supreme Court nevertheless may 'salvage' Clemons' death sentence by performing its own weighing of aggravating and mitigating circumstances,'' Blackmun wrote.

Blackmun, who was joined by Justices William Brennan, Thurgood Marshall and John Paul Stevens, said the appellate court effectively assumes the role of sentencer.

''The logical implication of the majority's approach is that no trial-level sentencing procedure need be conducted at all,'' Blackmun wrote. ''The record of a capital trial might as well be shipped to the appellate court, which then would determine the appropriate sentence in the first instance.''

Clemons was sentenced to death for the April 1987 robbery and killing of Arthur Shorter, a pizza deliveryman.

#90087u1264 03/28/1990 ~United Press International

ATHENS, GREECE (MARCH 28) UPI - Iran executed two men Wednesday on charges they spied for Iraq, the official Islamic Republic News Agency said.

The two men, Abbas Raisi and Ahmed Jangai Razhi, were tried and convicted in an Islamic revolutionary court, according to an IRNA dispatch monitored

in Athens. They were executed early Wednesday in Zahedan, some 700 miles southeast of Tehran.

IRNA said the two men were also convicted of collaborating with bandits and counter-revolutionaries in the Baluchistan area.

The dispatch did not indicate whether the men were hanged or shot by firing squad. Details of the trial and the charges against them were also not released.

Their execution brought to three the number of people executed in Iran this year for spying. In January, Towfiq Daneshgar, the leader of a nine-member group, was executed in Sanandaj, in northwestern Iran, on charges of spying for Iraq.

The Iranians are holding British journalist and businessman Roger Cooper in a Tehran jail on espionage charges. Authorities in Tehran said Cooper was tried in an Islamic court and found guilty of espionage and that he was serving a jail sentence.

Iran has not executed a foreign national on espionage charges in the 11 years since religious clerics seized power.

Iran is currently facing a low-key rebellion among the Baluchi tribesmen in the southeastern territories. The rebels are frequently referred to as drug traffickers, bandits and counter-revolutionaries.

RASHAYA, LEBANON (MARCH 28) UPI - Three masked gunmen stormed the home of a U.S. Christian missionary accused of planning to settle Jews in southern Lebanon and shot him dead, military and security sources said Wednesday.

The Syrian-backed Lebanese National Resistance Front claimed responsibility for William Robinson's slaying late Tuesday, saying in a statement that he had been killed because he ''was working on settling Jews on Lebanese territories.''

The LNRF is a coalition of pro-Syrian leftist and Moslem extremist groups vowing to fight Israel and its backers to liberate southern Lebanon, where Israel created a ''security zone'' to block border incursions by guerrillas.

The Israeli military denied trying to set up settlements in southern Lebanon, calling such reports ''totally baseless and without any factual foundation.''

''Israel has no intention or plans for the establishment of settlements on south Lebanese territory,'' the statement said.

Robinson, a former resident of Illinois and Massachusetts, ran a Christian center for handicapped children in the Druze-inhabited village of Rashaya, 33 miles southeast of Beirut.

Sources said three masked men carrying silencer-equipped, Soviet-made Kalashnikov rifles broke into Robinson's house in Rashaya, inside the ''security zone'' along the border with Israel.

Village residents had accused Robinson of being an ''American Jew engaged in a suspicious plan to build Jewish settlements in the security zone under the cover of humanitarian projects.'' Robinson never publicly addressed the allegations.

After storming the house, the gunmen shot Robinson, 53, three times at close range and robbed his wife of $4,000 before fleeing, the sources said.

A spokesman for the South Lebanon Army, Israel's surrogate militia in the area, said the gunmen killed four police dogs guarding the residence, smashed the door of the house, drugged Robinson's wife and children and dragged him to the bathroom, where they shot him.

''They killed him with guns armed with silencers,'' said the SLA spokesman in a statement broadcast on the SLA-operated Voice of the South radio station. ''They also cut the residence's telephone lines.''

The gunmen fled, carrying the purse of Robinson's wife and personal papers the SLA spokesman said.

Since the killing late Tuesday, Israeli forces, backed by helicopters, have launched an intensive search of the terrain around Rashaya, the spokesman said.

A spokesman for the U.S. Embassy in Tel Aviv said Robinson had been informed ''many times'' of U.S. warnings against Americans' travelling in Lebanon.

''We don't require Americans to register with us. There is no law when they touch foreign soil,'' the spokesman said. ''But for the past several years, we have regularly informed (Robinson) of U.S. policy and he had replied, 'Thank you, but I'm going to do it the way I want.'''

Robinson's brother Jimmy Robinson of Robinson, Ill., said he had not seen his missionary brother for several years and last had a letter from him in 1987. He said his brother was born in Massachusetts and later lived in

Wenona and Palatine, Ill., where he had built and operated cable television systems.

''I believe he just found the Lord and decided to dedicate his life to doing God's work, which he died doing,'' Jimmy Robinson said. ''He was just a missionary - I think with Pat Robertson's group.''

One of Robinson's two sisters, Elnora Coppolino, said from her home in Athol, Mass., ''It's been seven years since he went over there. Everybody thought that he was doing a wonderful job over there.''

Of allegations he was planning to settle Jews in the region, Coppolino said, ''That's the first I've heard of that.''

Voice of the People Radio Station, operated by the Lebanese Communist Party, said Robinson ''was executed by Lola Abboud's unit,'' referring to a female Communist activist who carried out a suicidal bomb attack against an Israeli target in southern Lebanon more than three years ago.

Timor Goksel, spokesman of the U.N. Interim Force in Lebanon, said a Norwegian force was sent to the area after Tuesday's slaying. No suspects had been arrested.

This month, the residents of Rashaya gave Robinson a month to leave the area. He has been living for three years in the ''security zone,'' established by Israel as a buffer zone against attacks in northern Israel by guerrillas.

The LNRF statement said he migrated to Israel five years ago. Israeli authorities settled him in the town of Marjeyoun, 37 miles southeast of Beirut, where he planned to establish a center for handicapped people.

The statement said Robinson then moved to Rashaya and, with the help of Israeli security service, settled in the village's high school. Upon his arrival, it said, he contacted local officials and proposed building a rehabilitation center in return for a piece of land on the village outskirts.

The officials, suspicious of his intentions, rejected his proposal and supported the residents' demand that he leave.

A committee of notables in the security zone said Rashaya inhabitants were angry at Robinson after he seized the village's school and hundreds of thousands of square yards of land allegedly to establish the first Jewish settlement in south Lebanon.

#90087u1282 03/28/1990 ~United Press International

WARSAW, POLAND (MARCH 28) UPI - Prime Minister Tadeusz Mazowiecki returned Wednesday from an eight-day visit to North America and said he was pleased with relations developing with the United States.

''It was a very useful and fruitful visit and it opened a new stage of relations between Poland and the United States,'' Mazowiecki told reporters at the Warsaw military airport of Okecie. ''Our short stay in Canada was also useful.''

Mazowiecki said he was particularly satisfied with discussions on foreign policy in the United States.

''We reached an understanding on the most important problems,'' he said, referring to talks on the unification of Germany.

The four World War II Allies - the United States, the Soviet Union, Britain and France - supported Poland's request to take part in the ''two plus four'' talks on how to unify Germany and President Bush put a final stamp on it during Mazowiecki's visit.

Bush pledged that Poland will have a voice in any decision affecting its fate and declared that Poland's present borders with Germany are ''totally assured.''

The 1945 Potsdam agreement fixed the Polish western border on the Oder and Neise rivers and a big chunk of German territories that Poland lost over six centuries was returned to it.

Mazowiecki said the economic agreement signed with the United States will ''encourage many American businessmen to come to Poland and to invest in it.''

He also said that two Canadian business delegations will come to Poland soon.

Mazowiecki told a news conference in Ottawa Tuesday that Poland's $40 billion foreign debt is a heavy burden to shoulder while trying to convert from a centrally planned economy to a Western-style decentralized one.

''The weight of foreign debt affects the prospects for success of our market-driven economy,'' he said, adding that the success or failure of the experiment would have significant consequences for the rest of Eastern Europe.

He said Poland wants its creditors to reduce the amount of loans outstanding as well as to lower interest rates. So far, Western government lenders have only agreed to reschedule the debt with no reduction in

interest rates.

Earlier Tuesday, Mazowiecki repeated calls for the creation of a pan-European council to monitor political events in Eastern Europe.

#90087u1285 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - The Senate rejected an acid rain reduction plan Wednesday that would have eased the plight of coal miners by giving utilities tax incentives if they burned high-sulfur Eastern coal.

The Senate voted 72-25 against the amendment to the clean air bill as several hundred miners from Alledonia, Ohio, rallied outside the Capitol to protest job losses that would result from the legislation.

In emotional remarks to the protesters, Sen. Robert Byrd, D-W.Va., the chairman of the Senate Appropriations Committee, vowed to use all his influence to help them.

''I grew up in a coal miner's home,'' Byrd said. ''I slept in a coal miner's bed. I married a coal miner's daughter.

''The man who used to pick the banjo with me when I played the fiddle died in a slate fall. ... I carried the heavy coffins of coal miners on the steep hills of West Virginia.''

Byrd told the miners, ''My heart has always been with you.''

Senators rejected the amendment by Sen. Arlen Specter, R-Pa., which would have granted a 20 percent investment tax credit to utilities that put smokestack ''scrubbers'' on coal burning power plants in order to reduce sulfur dioxide emissions. Sulfur dioxide has been linked to acid rain.

By using scrubbers, utilities could continue burning high-sulfur coal and avoid laying off miners in the coal fields of Appalachia and Midwestern states such as Ohio, Indiana and Illinois.

The proposal, estimated to cost $1 billion over five years, was designed to dissuade Midwestern and Appalachian utilities from switching from high-sulfur Eastern coal to low-sulfur Western coal as a low cost way of meeting the acid rain reduction provisions of the clean air bill.

The bill requires a 10 million ton reduction in sulfur dioxide emissions by the turn of the century, with virtually all the reductions coming from about 100 coal burning power plants in Appalachia and the Midwest.

Without any incentives to keep using high-sulfur coal, the Environmental

Protection Agency estimates 3,000 to 5,000 miners in the East will lose their jobs because of the diminished utility demand for high-sulfur coal.

In addition to saving coal miner jobs, the tax credits would help affected utilities hold down electricity rate increases stemming from costly acid rain control measures.

Acid rain has been blamed with the destruction of forestland and lakes.

Specter and other supporters of the tax credit plan argued that Midwestern and Appalachian states deserve financial assistance because they were being required to do more than their fair share of acid rain control.

Specter said that nine Midwestern and Appalachian states would have to achieve 90 percent of the acid rain reductions required under the clean air bill through 1995, even though they were responsible for only 51 percent of total sulfur dioxide emissions nationwide.

The disproportionate burden, they said, resulted from placing all acid rain control requirements on utilities and exempting factories from any cuts. They said states such as Texas had substantial industrial sulfur dioxide emissions that would remain untouched by the clean air bill.

But opponents said the clean air bill already subsidized acid rain cleanup in the Midwest by providing valuable pollution allowances to utilities that reduce emissions. The allowances can be sold to other utilities seeking to expand generating capacity - and subsequently emissions - after the year 2000.

#90087u1286 03/28/1990 ~United Press International

VATICAN CITY (MARCH 28) UPI - Pope John Paul II named Archbishop Angelo Acerbi Wednesday as the Holy See's first apostolic nuncio to Hungary following the re-establishment of the countries' first full diplomatic relations since 1945.

The two countries restored full relations at a ceremony in Budapest Feb. 9 attended by Vatican Secretary of State Cardinal Agostino Casaroli and Hungarian Prime Minister Miklos Nemeth.

Hungary became the second Warsaw Pact country to restore full relations with the Vatican. Tope's native Poland re-established full relations July 17, 1989.

Acerbi, 64, was formerly apostolic nuncio, or Vatican ambassador, in Colombia and also served several years in the nuncio's office in Paris. He was born in Sesta Godano, near La Spezia in northwestern Italy in 1925 and

was named titular archbishop of Zella by Pope Paul VI in 1974.

#90087u1287 03/28/1990 ~United Press International

MIAMI (MARCH 28) UPI - General Development Corp., which has pleaded guilty in a $100 million fraud scheme, said Wednesday it was considering a sale of assets or of the entire company.

General Development, one of Florida's oldest and largest real estate companies, said in a statement it had received inquiries ''from several groups expressing interest in a possible investment in the company, the purchase of certain assets or an outright acquisition.''

The firm Donaldson, Lufkin & Jenrette Securities Corp. was representing General Development as financial advisers in negotiations, the company said.

General Development's attempt to make a financial recovery began after the company, along with former president Robert F. Ehrling and former chairman David F. Brown, pleaded guilty to conspiracy in connection with a scheme to defraud home buyers out of about $100 million.

The company and the men were named in a 16-count federal indictment returned March 14, charging them with mail fraud, interstate transportation of people to commit fraud and conspiracy to commit mail fraud.

In a plea bargain, they each pleaded guilty March 22 to one conspiracy count. The company agreed to pay a $500,000 fine and make restitution to home buyers. The restitution could cost the company as much as $100 million over the next 25 years.

Brown, 49, and Ehrling, 50, each face a maximum of five years in prison and a $250,000 fine when they are sentenced May 22 in U.S. District Court in Miami.

Charles J. Simon, GDC chairman and chief executive officer, said the company is trying to regain confidence among banks and other investors.

''The practices of which the government complained are ancient history so far as this company is concerned,'' said Simon. ''We intend to offer a quality product at a fair price on terms which reflect highest standards of ethical behavior.''

The company also announced the appointment of Chesterfield Smith, a partner in the Florida law firm of Holland & Knight, as a director. Smith, a former president of the American Bar Association, was named to fill a

vacancy left by the resignation of Brown and Ehrling.

''I welcome the challenge of working ... to attempt to turn General Development around,'' Smith said.

Smith's appointment to the board came a day after General Development's principal stockholder, United Capital, announced it will ask stockholders to remove all but one of the company's directors for failing to meet their ''legal duties and moral obligations'' to stockholders.

The New York-based real estate firm, which owns 12.4 percent of the company's stock, also will challenge the recent appointment of Charles M. Andolsek, arguing that his selection to fill a vacancy on the board should have been approved by a stockholder vote.

#90087u1302 03/28/1990 ~United Press International

SOFIA, BULGARIA (MARCH 28) UPI - Bulgaria intends to sign an agreement with either a U.S. or European company in the next six months to explore for oil and natural gas in the Black Sea, an official report said Wednesday.

Simeon Simov, deputy president of the state Geology Committee, told the communist party newspaper Rabotnichesko Delo that 17 European and U.S. companies have expressed interest in exploring Bulgaria's Black Sea shelf.

The Bulgarian government hopes to sign an agreement with one of the companies by Sept. 30 for exploration in its territorial waters, Simov said. At present, only a few small oil wells are operating in Bulgaria, and the country is a heavy importer of petroleum products.

Simov said the U.S. and European oil companies responded to a Bulgarian announcement late last year that the government was accepting bids on oil exploration projects. Experts from 14 of the companies have visited Bulgaria in the past few months, he said.

"Three, four, even five (of these) companies have shown serious interest and are now conducting reconnaissance," Simov said. He said the company with the winning bid will be allowed seven years to prospect for oil and gas at its own expense.

If oil or gas is found, the company and Bulgaria would enter imto a 30-year joint venture to recover the expenses, the official said. Oil business in the former Soviet bloc is apparently picking up.

In Houston Tuesday, Soviet energy officials provided details about vast reserves of oil and natural gas available in the Soviet Union and offered

joint ventures with U.S. companies in exchange for technology and capital.

"Oil companies ... could have joint ventures operated by this time next year," said Tom Russell, chairman of Professional Geophysics Inc. The Houston-based geophysical contractor, which is already involved in joint ventures in Bulgaria and the Soviet Union, coordinated the Houston meeting with U.S. oil companies.

Representatives from 75 to 100 energy companies attended the meeting with five officials from the Soviet Ministry of Oil and Gas Industry. "This is the first meeting in which joint ventures in the Soviet Union are offered, but it is by no means the last one," said Aklim Moukhametzianov, deputy minister of Oil and Gas Industry and member of the Soviet parliament. A similar meeting has been scheduled in London April 3.

U.S. oil company executives such as Pete Silas, chairman of Phillips Petroleum Co., have complained that red tape made doing business in the Soviet Union too difficult.

But Russell said, "The time is right. The Soviets are anxious to proceed, and so are we. It took (PGI) less than six months to negotiate and form our first joint venture with the Ministry of Oil and Gas Industry and just over six months for a joint venture with another ministry."

#90087u1319 03/28/1990 ~United Press International

TORONTO (MARCH 28) UPI - Thomson Corp. reported Wednesday 1989 earnings of $895 million, or $1.66 a share, compared with $436 million, or 80 cents a share, earned in 1988.

Revenues jumped to $5.1 billion last year from $4.7 billion.

Thomson's 1989 earnings included an extraordinary gain of $475 million from the sale of oil and gas operations last March.

Thomson said operating margins at its newspaper operations in Canada and the United States declined as a result of higher spending on new launches, marketing and news coverage.

Daily and weekly newspaper circulation increased 3 percent in Canada and 2.5 percent in the U.S., but there was little growth in advertising linage the company said.

Thomson said its business information and publishing division produced ''outstanding performances'' in 1989. U.S. revenues at its medical, automotive and book and library reference groups increased.

But Thomson said its travel business was battered by a competitive environment and a market decline, attributed to rising interest rates.

Thomson, one of the world's largest publishing and information groups, holds interests in newspapers, magazines, books and directories in Canada, the United States and Britain. Since the mid-1960s, Thomson has acquired almost 150 U.S. dailies and weeklies.

On March 9, Thomson announced a revised deal with Ingersoll Publications Co. to purchase five daily newspapers in Ohio, Indiana and Wisconsin.

#90087u1340 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Makers and distributors of lawn care pesticides are making false and misleading safety claims that could harm users' health while federal agencies bring few enforcement actions, a General Accounting Office report said Wednesday.

The report is before the Senate Environment and Public Works subcommittee's hearing on lawn chemicals that was stopped abruptly when an ''unnamed Republican'' invoked an infrequently used Senate rule prohibiting committee hearings after the full Senate has been in session for two hours.

Panel chairman Sen. Harry Reid, D-Nev., said, ''Their objection is part of the Senate rules and senators have a right to do that. But everyone should know that the senator, chemical companies, no one is going to stop the gathering of the information that they are attempting to stop.''

Senate Democratic leader George Mitchell, D-Maine, said he would try to

lift a ''blanket Republican objection'' that forced the postponement of all Senate hearings while the Senate debated the clean air bill.

The GAO report found EPA and Federal Trade Commission enforcement of false and misleading claims sorely lacking.

''The pesticides industry continues to make advertising claims that its products are safe and non-toxic, while the EPA and the Federal Trade Commission are doing very little to prohibit such claims,'' GAO Associate Peter Guerrero told the subcommittee.

The EPA can act against safety claims made by manufacturers and distributors, such as garden shops, but EPA has no authority to bring claims made by professional pesticide applicators, such as companies caring for residential lawns and golf courses.

The Federal Trade Commission can act against all three groups but usually defers to the EPA, Guerrero said.

''Given the continuing uncertainty of the health risks of lawn care pesticides and EPA's particular concerns about the six pesticides in special review (because of chronic health and environmental effects), we believe it is all the more important that the public is protected from pesticide advertisements that convey the false impression of safety,'' he said.

Some ads say a product is ''completely safe for humans'' while others say the product is ''practically non-toxic to human, pets and the environment.''

Kevin Ryan, 11, of Arlington Heights, Ill., told the panel he is a ''prisoner in his home'' during the summer because lawn pesticide exposure causes him numbness, respiratory problems, nausea, loss of memory, lack of concentration and fatigue.

Thomas Prior of Maplewood, N.J., said an autopsy on his brother, George, revealed he died from effects of a fungicide sprayed on an Army-Navy golf course.

Thomas Delany of the Professional Lawn Care Association of America, said in written testimony that ''research is the key'' to his industry's future.

''We are dedicated to improving the environment and the quality of life in our communities. At the same time, we provide employment for thousands of our friends and neighbors,'' Delany said in written testimony.

EPA Deputy Assistant Administrator Victor Kimm testified his agency ''is addressing the major issues relating to lawn care pesticides in a

responsible fashion, within the context of our responsibilities for pesticide regulation ... and the priorities established by Congress.''

Reid charged EPA ''has apparently not given a very high priority to determining whether safety claims made by lawn care companies are accurate.''

Sen. Joseph Lieberman, D-Conn., said too many lawn care makers and sellers hve been ''irresponsible'' in dealing with associated risks and the government has been ''derelict'' in its duty to protect the public.

#90087u1358 03/28/1990 ~United Press International

NEW YORK (MARCH 28) UPI - Standard & Poor's Corp. Wednesday gave an A- rating to a new series of bonds issued by New York City, affirming the city's current credit rating while noting the fiscal situation "is under its worst strain" in almost a decade.

In assigning an A- rating to the city's current offering of $150 million of general obligation bonds, S&P's noted a host of fiscal problems facing the city. It concluded that its "outlook for the city is therefore negative."

S&P's, one of the nation's two major credit rating agencies, at the same time also reaffirmed the A- rating for the city's $12.7 billion worth of outstanding obligation bonds.

The agency said in a statement that although the city's overall debt burden remains moderate, the city's fiscal situation "is under its worst strain since its first year of consecutive balanced operations of the last decade" in 1981.

The statement cited a sharp economic downturn in the financial services sector that has spread to retail trade and construction, "triggering severe revenue shortfalls since last July."

"Despite the city's strong efforts in recent weeks to assure balanced year-end results, S&P believes there are strong enough risks and uncertainties to state that even at this point, balanced financial results are by no means assured," the statement said.

"The city may also need additional short-term financing before the end of the fiscal year," the statement continued. "Gap closing of $200 million for the current year from state authority financings still requires state governmental approval.

"For the next year, most of the tax package increase requires approval of the state legislature, which is not likely to act without a home-rule

message of necessity by the City Council."

On Monday, S&P's lowered the state's credit rating on long-term bonds by two steps, from AA- to A, making the state's credit rating the third lowest of all states.

#90087u1359 03/28/1990 ~United Press International

SEATTLE (MARCH 28) UPI - The original Boeing 747 that ushered in the age of the jumbo jet made its final flight Wednesday before going into retirement at the Museum of Flight in Seattle.

The red and white 747 was christened ''The City of Everett'' when it rolled off the assembly line in Everett, Wash., Sept. 30, 1968. Following certification it made its first flight Feb. 9, 1969.

Its final flight was a short round-trip between Boeing Field in Seattle and Paine Field in Everett.

The 747 was first announced by Boeing in April 1966. Pan American World Airways became the first carrier to place orders for the jet, buying 25 of the planes for $525 million. Today that amount would buy only four 747s, Boeing said.

Since its first flight the original 747 has served as a test plane for making improvements in the jumbo jet, including aerodynamic developments, improvements in its brake system, increasing gross weight certification and development of the autopilot system.

The plane was put in storage in 1983 but was called back into service in 1986 as a mockup to help engineers design the two new Air Force Ones being delivered this year to the president.

Since the first 747 rollout, the aircraft type has developed into four versions: the 747 Special Performance, which is the shortest model, and the the -200, -300, and -400 models.

There are about 800 747s operating around the world, Boeing said.

(MARCH 28) UPI - TODAY'S PEOPLE

NEW ROLE FOR JACKSON: Actress Glenda Jackson is running for Britain's Parliament and says she'll give up acting if elected. The Oscar-winning star of such films as ''A Touch of Class'' and ''Women in Love'' beat

three other contenders late Tuesday for the right to run for a Labor Party seat in an area of north London. ''Its quite wonderful that I've won and it's a humbling experience,'' said Jackson, who pledged to give up acting and devote herself to politics if she wins the parliamentary election that will be held sometime before mid-1992.

IN SKYWALKER'S IMAGE: George Lucas says the force is not with the rap group 2 Live Crew, and his Lucasfilm Ltd. company is suing because one of the singers uses the name Luke Skyywalker - with an extra Y. The $200 million suit seeks to stop Skyywalker, whose real name is Luther Campbell, from capitalizing on the image of the heroic Luke Skywalker in the ''Star Wars'' movies. The suit also says the 2 Live Crew, recently the center of an uproar in Florida over selling explicit records to minors, makes music that is ''sexually explicit, obscene, salacious and pornographic.'' Attorney Bertram Fields said Lucas is greatly upset that the Skywalker trademark is being improperly used. ''Not only that, but it's being used by a guy that's putting out records of a type that are the exact opposite of all that Luke Skywalker stands for,'' Fields said.

STONE THROWN: Director Oliver Stone, long concerned with ensuring that Vietnam veterans get a fair shake, has apologized for giving the Syracuse, N.Y., Police Department an unfair shake. Stone's movie ''Born on the Fourth of July,'' which won him an Oscar this week, includes a fictional scene in which Syracuse police beat anti-war protesters during a 1970 demonstration. ''A feature film is not a documentary,'' Stone said in a letter to the Police Benevolent Association. ''I took creative license to make my point and sometimes sacrificed smaller truths for larger ones.'' Nancy Larraine Hoffman, a state senator who was a protester at the rally, says she's not satisfied. ''I'm not sure if I was a member of the PBA if I would be comfortable with an apology that refers to sacrificing smaller truths for larger ones,'' she said. ''It's disappointing that even in an apology Mr. Stone would distort the impact of his artistic license that way. As long as the movie is shown it will continue to damage the reputation of Syracuse police officers.''

ROSS AS BAKER: Diana Ross is getting a role she's wanted for a long time. She will star as Josephine Baker, the 1920s entertainer, in a movie for Ted Turner's Turner Network Television. Ross, who played Billie Holliday in the 1973 movie ''Lady Sings the Blues,'' also will be executive producer of the Baker film. ''I've always dreamed of playing Josephine Baker,'' Ross said Tuesday at a Beverly Hills news conference with Turner. ''I've been researching and developing the project for over 10 years. I just think America and young black women should know the story.'' Turner's motives are a little different. ''I don't know much about Josephine Baker '' he said, ''but I do know about Diana Ross.'' HBO also is working on a movie about Baker, but Turner says the competition doesn't worry him. Baker, who died in 1975, was a major star in Europe starting in the 1920s after she emigrated from the United States, where she was Harlem nightclub

singer and Broadway chorus girl.

GLIMPSES: NBC Entertainment President Brandon Tartikoff marked the first anniversary of the groundbreaking inter-racial daytime drama ''Generations'' Tuesday by establishing a $10,000 ''Generations'' College Scholarship Fund. The scholarship will be administered by the United Negro College Fund and will help minority students seeking a career in the dramatic arts ...Tommy DeBarge, 32, of the singing DeBarge family has been sentenced to up to 20 years in prison for intent to sell cocaine.

CHICAGO (MARCH 28) UPI - A $50,000 lawsuit has been filed against a couple who six years ago adopted two abandoned brothers but later surrendered their parental rights to one boy and refused to allow the brothers to see each other, an attorney representing one of the brothers said Wednesday.

''The main thrust of the suit is we want to get visitation for Tony,'' said Cook County Guardian Patrick Murphy, who filed he suit. ''The monetary thing is secondary. We don't want to drive these people into the poor house.''

Murphy filed suit Tuesday in circuit court asking a judge to order the parents to allow Anthony, 11, who no longer lives with the couple, to visit Sam, his 8-year-old brother.

Murphy said the couple adopted the brothers when they were ages 5 and 3. However, last fall, they left the older boy, Anthony, at Hephzibah, an orphanage in Oak Park.

Murphy said he became involved with the case when the couple went to court on Mar. 8, and Juvenile Judge Walter Williams allowed them to surrender all parental rights to Anthony. Since then, Murphy said the brothers have not seen each other.

Murphy said the brothers have a First Amendment right to contact.

''He (Anthony) is very sad at times because of what happened and wants to see his brother,'' Murphy said. ''What the adoptive parents did was wrong.''

Murphy said the parents said Anthony needed more attention than they could give him, but cited a psychologist's report that said the boy is ''a relatively psychologically intact 11-year-old who has been reacting to an ongoing pattern of negativity and to rejection by his adoptive parents.''

The boys were originally abandoned by their natural mother in 1984 after

she felt ''overwhelmed'' by them, Murphy said. The brothers were adopted the same year.

Murphy said it was not in the best interest of Anthony to prohibit him from ever seeing his natural brother.

#90087u1427 03/28/1990 ~United Press International

ELIZABETH, NJ (MARCH 28) UPI - A letter John Emil List left for his pastor 18 years ago, saying he shot his wife and children to save them from poverty and damnation, can be used against him at his trial, a judge ruled Wednesday.

The letter was released to the public for the first time after Judge William Wertheimer set aside the Rev. Eugene Rehwinkel's claim that it was covered by the ''priest-penitent relationship.''

''At least I am certain that all have gone to Heaven,'' List said. ''If things had gone on who knows if this would have been the case.... After it was all over, I said some prayers for them all from the hymn book. That was the least that I could do.''

Wertheimer's ruling was the last before lawyers give their opening statements Monday in Union County Superior Court. List's lawyer, Elijah Miller Jr., is expected to make a final appeal Friday to the New Jersey Supreme Court to have the trial moved out of Union County and the jury sequestered.

On Tuesday, the judge said items found in the List family's 18-room Victorian home in Westfield could be shown to the jury, including the guns allegedly used in the killings and notes to relatives admitting the crime.

Wertheimer found that police entered the home legally on Dec. 7, 1971, because List had abandoned the house and its contents when he disappeared a month earlier.

The letter showed both List's religous obsession and the attention to detail that allowed him to escape and live undetected for 17 1/2 years in Denver, Colo., and Richmond, Va., where he worked as an accountant under the name Robert Clark.

''Originally, I had planned this for Nov. 1 - All Saint's Day,'' he said. ''But travel arragements were delayed. I thought it would be an appropriate day for them to get to heaven.''

List, 64, who was arrested last year at his office in Richmond, is charged with five counts of murder and faces multiple life sentences if he is

convicted. He allegedly shot his wife, Helen, three teenage children and elderly mother, Alma List, on Nov. 9, 1971.

The judge ruled that the letter could be used as evidence because List left it in the house with the bodies, where he could reasonably expect it would be found. If he had wanted to communicate confidentially with his pastor, he could have done so by mail, telephone or face-to-face, Wertheimer added.

''John Emil List was more interested in escape and anonymity than he was in absolution,'' the judge said.

Rehwinkel never asked police to give him the letter and returned it to Westfield Police Chief James Moran after reading it, the judge said. The pastor also disclosed many of the details, telling Helen List's sister, Jean Syphert, that List had originally planned the killing for All Saint's Day.

Jean Syphert and her husband, Gene, testified Wednesday morning.

In the five-page, handwritten letter, List gave four reasons for killing his wife and children and said he shot his mother because she would not have been able to bear ''the tremendous shock'' of the other deaths. He also gave instructions on funeral arrangements and suggested that the family's books be donated to a church or school library and apologized for the ''added burden'' he was imposing.

An active member of the Lutheran Church of the Redeemer, List said he feared his family was falling away from the church. His wife had asked to have her name taken off the church rolls, he said.

But he began with his financial troubles.

''Everything I tried seemed to fall to pieces,'' he told the pastor.

In his second point, he said that the children were willing to ''cut back'' but that being on welfare ''was just more than I thought they could and should endure.''

He added that his daughter Patricia's wish to get into acting made him fear that she would cease being a Christian.

List also said he shot his family from behind to spare them pain.

''Please remember me in your prayers,'' List concluded. ''I will need them whether or not the government does its duty as it sees fit. I'm only concerned with making my peace with God and of this I am assured because of Christ dying even for me.''

#90087u1441 03/28/1990 ~United Press International

BOSTON (MARCH 28) UPI - Peter Lynch, the investment wizard who has managed the biggest and probably the most successful equity mutual fund ever, will stop running Fidelity Investments' Magellan Fund by the end of May, the company said Wednesday.

Lynch, 46, said he will devote himself to charitable, religious, and educational work and to his family. A devout Catholic, Lynch recently joined the Knights of Malta, an active laymen's group.

At the Magellan Fund, he guided the investments to more than a 25-fold total return in 13 years. Magellan, which showed the greatest overall appreciation of any fund during the 1980s, now has $13 billion in assets, compared with about $100 million in 1977 when Lynch started, and about one million shareholders, the company said.

Lynch said he will stay with Fidelity in an advisory capacity. He was named recently to the board of trustees of the Fidelity Group of Funds, which oversees the privately owned company. "I wouldn't leave Fidelity to manage investments anywhere else," Lynch said. "I'm not looking for a different situation."

Morris J. Smith, 32, will succeed Lynch as portfolio manager of the Magellan Fund, the company said. Smith, with Fidelity since 1982, currently manages Fidelity OTC Portfolios, a a $696 million fund that specializes in the stocks of smaller capitalization companies traded in over-the-counter markets.

Meanwhile, George Vanderheiden, 43, manager of two other funds, will take on Lynch's role as leader of the company's growth group, which oversees managers of all the company's growth funds.

Lynch's announcement will have no immediate effect on the value of Magellan shares. The prices of mutual funds' shares, unlike those of stocks, do not fluctuate on news specific to the fund. Instead, their prices are figured daily, based on the market prices of their investments.

But some investors could be prompted to switch from the fund. Eric Kobren, publisher of Fidelity Insight, a Wellesley, Mass., newsletter that follows Fidelity's funds, said Lynch's departure may cause "some short-term redemptions out of the fund." However, he added, "Morris Smith was clearly the best choice among Fidelity employees. As for whether he'll live up to Peter Lynch's performance, only time will tell."

A. Michael Lipper, president of Lipper Analystical Services of Summit,

N.J., said, "I don't think this is an immediate problem ... We'll have to see how Smith does in the next up market. We've been in a down market now since October, I think."

"Morris Smith's numbers at OTC Portfolios have been good," added Lipper, whose company follows the mutual fund industry. "In fact, he's been down less than Peter since the beginning of the year."

During Lynch's tenure, the fund's total return, which includes both dividends and price appreciation, was 2,475 percent, compared with 508 percent for the S&P 500 stock index, Fidelity said. In other words, $1,000 invested in the fund on May 31, 1977, when Lynch took over, would have grown to $25,750 by the end of February, the company said.

Lynch said, "When I was ten years old my father died. He was 46. Now I'm 46 and this is very much on my mind. Even though I love my work at Fidelity and care a great deal about Magellan and its one million shareholders, I believe it is time to devote my energies to other pursuits. "In addition," Lynch said, "I strongly wish to increase my commitment to my family."

#90087u1444 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - The D.C. City Council's authorization of elections this year for a ''shadow'' delegation to Congress keeps the drive to make the city the 51st state on the ''front burner,'' a statehood advocate said Wednesday.

The council approved by voice vote Tuesday a plan calling for the election of two unofficial senators and a representative who would monitor the progress of statehood proposals, but who would have no legislative authority.

The city currently has no voting representation in Congress for its 630,000 residents. It is entitled to one non-voting seat in the House.

''The reason we fought so hard for the ''shadow'' senators was to advance the statehood process.'' said Frank Watkins, a spokesman for the Rev. Jesse Jackson and national coordinator of the Rainbow Coalition's statehood campaign. ''It's part of the process of educating and raising the consciousness of the people.''

Elections for the shadow congressional delegation have been postponed by the council three times since the lobbyist concept was approved in a 1980 voter initiative. The elections will be held along with the primaries in September and the general election in November.

The nation's capital will be the eighth jurisdiction to send shadow

delegates to Congress as a ''prelude'' to full statehood, said Watkins.

''It's to keep the statehood issues on the front burner in this city and on the front burners of the U.S. Congress,'' Watkins said.

#90087u1449 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - A Federal Communications Commission policy giving preference to women and minorities seeking broadcast licenses should be struck down because it discriminates against whites, lawyers told the Supreme Court Wednesday.

At issue is an FCC policy that seeks to increase minority participation in broadcasting by giving preference to women and minorities seeking licenses to operate radio and television stations. The purpose of the program is to promote diversity in programing.

The affirmative action policy was attacked before the high court Wednesday in two hours of oral arguments in two separate cases that should be decided by the end of June.

A majority of the court, lead by conservative Justice Antonin Scalia, expressed skepticism about the FCC position that granting broadcast licenses to minorities would lead to diversity in programing, considering the policy is not directed at diversity but instead at race.

Lawyers representing whites who have been fighting for licenses argued the policy is not based on any showing that discrimination has existed in the awarding of licenses, but is based instead on an improper stereotypical view that minorities are somehow different.

Harry Cole, representing a company fighting for a television licence in Hartford, Conn., said the policy specifies ''white people need not apply.''

And Gregory Guillot, representing a company seeking a television license in Orlando, Fla., said the stated purpose of the policy - to increase diversity in programing - does not work because of its own limitations.

He said the policy only reaches women, blacks, Hispanics, American Indians Alaska natives and Asians. He said it makes no provision for any diversity that might be offered by such classes of people as homosexuals or Jewish survivors of the Holocaust.

Guillot also said the policy has ''no end,'' that the rate of minority ownership has only gone up about 1 percent since the program's beginning in the late 1970s. He said at that rate there is ''600 years left of the minority and female preference'' program.

However, Margaret Polivy, representing a minority company, defended the policy and said the ''theory is that everyone benefits by a multiplicity of views.''

Daniel Armstrong, representing the FCC, said ''some race conscious steps are needed'' to meet Congress's goal of ''diversity over the airwaves.''

The affirmative action plan dates back to 1978. During the Reagan administration, which opposed affirmative action plans, the FCC sought to repeal the preferences for women and minorities, but was stopped by Congress, which must reconsider the subject by the end of fiscal 1990 and has already held hearings on the matter.

The Florida challenge to the policy stems from a 1982 decision to allow a new UHF television channel in Orlando, Fla.

The license was originally awarded to Metro Broadcasting, but the FCC Review Board reversed that decision and awarded the license to a minority-run company called Rainbow Broadcasting.

Metro challenged the reversal, which was eventually upheld by the appeals court.

The Connecticut case concerns attempts by Alan Shurberg, a longtime resident of the Hartford area, and Shurberg Broadcasting Company of Hartford Inc., to replace Faith Center Inc. as the licensee of Channel 18 in Hartford.

#90087u1454 03/28/1990 ~United Press International

PARIS (MARCH 28) UPI - The French government announced Wednesday that it will propose a total ban on cigarette advertising and impose new restrictions on publicizing alcoholic beverages.

The proposal, which political observers believe is certain to be approved by the National Assembly later this spring, is a radical departure for France, where drinking wine, cognac or beer with breakfast is not uncommon and smoke-filled cafes dot the landscape from the boulevards of Paris to the smallest village square.

The government measures announced Wednesday will ban all cigarette advertising and will prohibit tobacco companies from sponsoring sporting events as of Jan. 1, 1993.

In addition, the price of a pack of cigarettes will be increased by 15 percent next year, bringing the price of a pack of the traditional

Gauloise cigarettes from 6 francs, or $1.05, to 6.9 francs, or $1.21.

The government said new regulations will be introduced to make it more difficult for adolescents under the age of 16 to buy alcoholic beverages, and advertising for beverages with more than 1 percent alcoholic content will be restricted to magazines and newspapers.

Government officials say scientific studies indicate alcohol and tobacco abuse are responsible for more than 100,000 premature deaths every year in France.

A recent report by four well-known professors, which inspired the government to take action, concluded that if tobacco consumption is maintained at its current level, the number of annual deaths attributed to smoking will rise to 165,000 by the year 2025, compared with 60,000 today. About 35,000 deaths in France are attributed to alcohol abuse every year.

French tobacco growers reacted indifferently to the proposed measures, which they said were inefficient.

''Talking about tobacco, even when it is to ban it, leads to an increase in consumption,'' one French grower said.

The government also promised to enforce existing regulations banning the consumption of alcohol in the workplace and to increase the number of no-smoking areas in public places.

In a telling sign of increased awareness in the French public about the dangers of cigarettes, a smoking ban imposed earlier this year on all flights of the domestic airline Air Inter was well received among flyers, even smokers.

While the number of smokers has declined to 38 percent of the population from 59 percent in 1953, deaths attributed to lung cancer among adults increased by 366 percent between 1950 and 1984.

Smoking among adolescents increased sharply during the period, with more young people smoking cigarettes in France than in any other European country.

Although the consumption of alcohol has been in constant decline for the past 20 years, France remains the world's leading per-capita consumer of alcoholic beverages, with each person over 20 years old drinking 21.2 quarts of alcohol every year.

#90087u1490 03/28/1990 ~United Press International

(MARCH 28) UPI - The Commerce Department issued a final estimate of total output of goods and services, showing a one-point-one percent rise in the gross national product to 11-point-two BILLION dollars. The government also shows a two-point-eight-percent fourth-quarter jump in corporate after-tax profits to 156-point-seven BILLION dollars. For the year, the G-N-P increased three percent compared to an four-point-four-percent gain in 1988.

Lithuanian President Landsbergis told t-v interviewers he welcomes any U-S support for his republic's move to break from the Soviet Union. The remarks were made as the Soviet Union banned foreigners from traveling to Lithuania and ordered journalists, diplomats and businessmen to leave the Baltic state. Moscow officials say secession would cost the Soviet Union some three-BILLION dollars since there are as many as 24 armament plants in Lithuania.

Lebanese security sources report say an U-S missionary was killed by three masked gunmen for allegedly plotting to settle Jews in south Lebanon. The Lebanese Resistance Movement... a coalition of pro-Syrian leftist and Moslem extremist groups... claimed reponsibility for slaying 53-year-old William Robinson late yesterday. Robinson ran a Christian center for handicapped children in an area 33 miles southeast of Beirut. NO suspects have been arrested.

Arson suspect Julio Gonzalez is in a psychiatric ward today at New York's Bellevue hospital where he admitted for suicidal tendencies. 87 people died in the weekend fire Gonzalez allegedly set at a Bronx social club. A story today quotes another Belluvue inmate as saying Gonzalez was weeping and raging at his ex-girlfriend, whose rejection allegedly prompted him to set the fire.

Western diplomats say China may be sending missiles to a Middle East nation. The diplomats, who asked NOT to be identified... say the shipment apparently is NOT in violation of China's vow to Washington to avoid selling medium-range missiles in the region. Political analysts have expected China to resume arms sales abroad to get hard currency after Western nations imposed sanctions in response to Beijing's crackdown last June on the pro-democracy movement.

-30- 2379

#90087u1510 03/28/1990 ~United Press International

MOSCOW (MARCH 28) UPI - Soviet authorities and Nordic nations agreed for the first time to develop civilian transport and communications in their northern reaches, marking a devolution of central Soviet control over the militarily sensitive area, Tass reported Wednesday.

Tass said Norway, Sweden, Finland and the Soviet Union entered into an

agreement allowing for the development of closer relations between local businesses and authorities in the sparsely populated region where East and West lie side by side.

''The agreement is a step forward in the development of border cooperation between our countries,'' Murmansk communications department chief Eduard Meshcheryakov told the Soviet news agency.

Murmansk, a city of 430,000, is situated on the Kola peninsula and is the headquarters of the Soviet northern fleet.

''We discussed not separate contacts but a range of joint measures to develop communications systems and transportation. We have agreed to develop international communication lines between Murmansk and Kirkenes (Norway), Rovaniemi (Finland) and Lulea (Sweden),'' he said.

The agreement will allow direct telephone communications among the various regions as well as a new international air route from Kirkenes in northern Norway to Murmansk.

Authorities in northern Norway have long demanded closer ties with Soviet areas across the 124-mile border to develop commercial links and prevent a population exodus from the region.

Finland, the only Western country to have a Treaty of Friendship, Cooperation and Mutual Assistance with the Soviet Union, has traditionally had close contacts with the country.

Neutral Sweden has continually tried to develop its commercial interests in the Baltic states of Estonia, Latvia and Lithuania and in the Leningrad region of the Soviet Union.

But such close relations between the northwest Soviet Union and Norway and Sweden in particular, have previously been made difficult due to long lines of official communication through Moscow, and East-West security considerations.

Soviet President Mikhail Gorbachev has repeatedly called for the development of closer relations in the region but Scandinavian nations have previously been reluctant to make hasty decisions.

During an October 1989 official visit to Finland, Gorbachev repeated an earlier call to develop local and national relations in the region, calling for agreements on transport, shipping lanes in the Barents Sea and the reduction of armed forces in the area.

#90087u1516 03/28/1990 ~United Press International
(MARCH 28) UPI - A Madison, Wisconsin, doctor says an accident victim who was in a coma for seven years underwent a ''total transformation'' when he was given the drug Valium. Dr. Andres Kanner says the man emerged from a coma two weeks ago when given an intravenous injection of the drug before a dental procedure. Kanner says the accident victim began talking to doctors and ''interacting in a reasonable manner.'' Kanner had NO explanation for the phenomenon.

Legal sources in Christchurch say Dr. Elizabeth Morgan likely will be able to gain permanent residence in New Zealand. Morgan's seven-year-old daughter, Hilary, has been the focus of a custody fight in which Morgan was jailed 25 months in Washington, D-C for refusing the child's father court-ordered visits. The battle between Morgan and her ex-husband gained international attention when Hiliary was discovered living with her maternal grandparents in New Zealand.

New York police say a black teenager who once acted as peacemaker in a fight between whites youths and another black student.. was shot and wounded yesterday. Police are searching for white youths involved in the dispute he tried to settle. Authorities say the 14-year-old black student was NOT seriously injured. The shooting occurred at a school a few blocks from the scene of the 1989 slaying of 16-year-old Yusuf Hawkins, who was killed by a group of white youths carrying bats.

-30- 1586

#90087u1529 03/28/1990 ~United Press International
NEW YORK (MARCH 28) UPI - Because of stormy weather, the expected 1990 increase in oil production from Britain's North Sea oilfields may not be realized, the Royal Bank of Scotland was reported as saying Wednesday.

"Earlier hopes of a major recovery in oil output levels in 1990 are now unlikely to be realized," the bank reported in its monthly oil index. "Poor weather conditions have directly affected output at some fields and ... indirectly at others," the bank said.

A London dispatch of the OPEC oil cartel's OPECNA news service reported the bank as saying that oil production in the British sector of the North Sea fell below two million barrels daily in February to its lowest monthly level since July.

The bank predicted that oil output this year would average around 1.95 million barrels daily, slightly higher than the 1.85 million barrels a day in 1989.

It noted that production, already affected by the bad weather, would face additional disruption in the summer months as a result of prolonged rig

and platform maintenance.

The bank said its earlier projections that benchmark North Sea Brent crude would average $16 a barrel in the second quarter of this year, "now looks overly pessimistic". It forecast Brent prices would average $18.50 a barrel in 1990.

On an optimistic note, the bank said that substantial increases in oil prices, expected by the mid-1990s, would encourage more North Sea development.

#90087u1538 03/28/1990 ~United Press International

EDITOR'S NOTE: The Israeli military censor deleted portions of this story.

JERUSALEM (MARCH 28) UPI - Prime Minister Yitzhak Shamir claimed Wednesday that an Arab campaign against immigration of Soviet Jews to Israel reveals the depth of Arab opposition to Israel's survival as a nation.

Shamir, in answer to Arab complaints over the influx of Soviet Jews and immigrant settlement in the Israeli-occupied territories of the West Bank and Gaza Strip, also said the government does not tell immigrants where to live and cannot stop them from settling where they want.

''The Arabs who are waging a campaign against the wave of (immigration), they are mobilizing the support of foreign governments. They're encouraging terrorist organizations to use physical violence,'' Shamir said at a United Jewish Appeal conference on immigration.

''Let the world see the depth of the Arab rejection of Israel's existence and 'raison d'etre,''' Shamir said. ''It is time for governments and leaders in the world to take a second look at what Arabs tell them and set their words against what the Arabs are doing to us.''

Shamir, caretaker prime minister of a transitional government since a vote of no-confidence brought down his coalition government March 15, said it is not Israeli policy to direct new immigrants to the occupied territories ''but we shall not forbid any Jew from going wherever he wishes.''

''Every Jewish immigrant has complete freedom to choose where he wants to live,'' Shamir said, adding that the wave of new immigrants represents ''what Israel is all about. This is our great moment in history.''

Shamir's no-confidence defeat was triggered when he fired Labor Party leader Shimon Peres from the Cabinet. The collapse of the Likud-Labor coalition occurred over disagreement on whether to accept a U.S. plan on how to begin Israeli-Palestinan talks, which would focus in part on the

fate of the territories Israel won during the 1967 Six Day War.

Government figures show that only 0.5 percent of the Soviet Jews arriving in Israel last year settled in the occupied West Bank or Gaza Strip, but several Jewish settlements in those areas have launched aggressive campaigns to attract Soviets this year.

Israeli officials estimate as many as 100,000 Soviet Jews may come to Israel in 1990. Slightly more than 12,900 Soviet Jews arrived in Israel in 1989.

Israeli television and Army Radio staged daylong efforts Wednesday to find places for the new arrivals to attend the Passover holiday meal on April 9. By nightfall, more than 18,000 new immigrants from the Soviet Union and other countries had received invitations.

Arab opposition to Soviet Jewish immigration began growing in January, especially after Shamir told veteran members of his Likud Party that ''big immigration requires Israel to be big as well,'' apparently referring to a desire not to relinquish the occupied territories.

Last week, the Hungarian airlines Malev canceled charter flights from Moscow to Israel, via Budapest, after reported threats by the extremist Islamic Jihad group against the airline for transporting Soviet Jewish immigrants.

On a related issue, Israel's parliament, the Knesset, approved a resolution Wednesday reaffirming a unified Jerusalem - including that portion captured in the 1967 war - as the capital of Israel and encouraging Israelis, including new immigrants, to settle in all parts of the city.

Shamir also told the UJA conference the status of Jerusalem as Israel's capital was ''not open to any negotiations.''

In the Gaza Strip, Palestinians prepared for the imposition early Thursday of an indefinite curfew in advance of Friday's observance of Land Day. General strikes marking Land Day have been called in the occupied territories and in the Israeli Arab communities within Israel.

Israeli Arabs created Land Day after six demonstrators were killed March 30, 1976, during protests over the Israeli government's expropriation of thousands of acres in the northern Galilee region.

In the West Bank, dozens of masked men killed a Palestinian U.N.-employed refugee camp administrator and wounded six of his relatives Wednesday, Palestinian sources and officials for the U.N. Relief and Works Agency said.

Conflicting reports from the Nur Shams refugee camp indicated Yasser Mohammed had been killed either because he was suspected of collaboration or of embezzling $60,000 from camp residents.

UNRWA officials said the attack was unrelated to Mohammed's work for the relief agency. Since the start of the 27-month-old Palestinian uprising, more than 200 Palestinians have been killed by other Arabs who suspected them of collaboration with Israel or of improper behavior.

#90087u1539 03/28/1990 ~United Press International

LIMA, PERU (MARCH 28) UPI - Ultra-leftist guerrillas bombed banks, factories, and public buildings Wednesday in a violent 24-hour general strike called to dissuade voters from voting in April 8 presidential elections.

Fifteen persons were injured in attacks, called Tuesday night and early Wednesday in Lima and the neighboring port city of Callao by the Maoist Shining Path rebel organization, police said.

A group of suspected rebels threw explosives into a branch of the governing Aprista Party early Wednesday in the working class district of Villa el Salvador, south of Lima, wounding four people and gutting the inside of the building, police said.

Dynamite bombs damaged five banks, and car bombs created panic, injuries and damage when they exploded near a plastics factory and on public streets.

Police said a woman was injured by a bullet fired by policae when when her car failed to stop at a roadblock near an army post in downtown Lima.

Helicopters and army tanks patrolled the main avenues of the capital, and armored units guarded industrial centers in an apparent effort to maintain order and business as usual.

Some 10,000 members of the military and police forces have been in control of law and order in Peru's capital since President Alan Garcia declared a state of emergency four days ago.

The order, called in nine of 24 departments and two provinces, suspends some individual constitutional rights and puts the military and police in charge of the political and legal processes in the target areas.

Early Wednesday morning thousands of people lined up at bus stops in Lima, waiting to board the few operating buses, some of them privately owned and

others from the state-owned transportation company, Enatruperu.

A leader of the Transport Union, David Quitana, said Wednesday that his organization was letting individual members decide whether they would work or suspend their services because authorities ''have not given us sufficient guarantees to make us risk our only means of livelihood.''

Quitana said that while authorities had offered to repair buses destroyed by rebels during the strike, at least 13 vehicles burned during previous strikes had never been repaired despite similar government promises.

The president of Enatruperu, Jorge Meneses, said the company would operate 732 buses across the city to help keep transportation moving, and Labor Minister Wilfredo Chau Villanueva said Wednesday that workers had two extra hours to get to work.

But hundreds of shopkeepers and dozens of markets, especially in working-class districts, closed for the day after Shining Path rebels put out the word that those defying the strike would be killed and their property destroyed.

Many banks did business through cracked doors, fearing attacks by guerrillas.

Since Shining Path carried out its first attack in 1980, 18,000 people have been killed in political violence in Peru.

#90087u1543 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Assistant House Republican leader Newt Gingrich announced Wednesday that President Bush would veto a $27 billion child-care bill backed by the House Democratic leadership.

''It is anti-religious. It fails to meet his commitment to no federal regulations. And it is too expensive,'' Gingrich told reporters after returning from a meeting with Bush at the White House.

House Democrats had emerged from a private caucus earlier in the day saying they were hopeful the president eventually would support their plan because of mounting pressure for increasing the availability of child care.

''The president has said he is for child care,'' said Rep. Thomas Downey, D-N.Y. ''The process involves making compromises.''

The Senate passed a child-care bill in June but House action had been stalled since the fall by a turf battle between two committees and the dispute over whether federal child-care funds could go for religious

instruction.

The logjam ended late Tuesday, when the leadership issued its plan with the intention of bringing it to the floor Thursday along with a less costly bill sponsored by Rep. Charles Stenholm, D-Texas, and backed by the White House.

The House Rules Committee met Wednesday to decide when to schedule a vote amid criticism from Republicans that they needed more time to respond to the Democratic plan.

At the White House, spokesman Marlin Fitzwater said the Stenholm bill most closely resembled Bush's original child-care proposal, which only included expanded tax credits. Bush favors tax credits because they give parents choice in child care and also help mothers who do not work.

Both House bills require that states provide parents with vouchers for child care that can be used for programs providing religious instruction, a provision also in the Senate bill.

However, the leadership would allow state laws to prohibit the use of the vouchers for sectarian care, while Stenholm would not give states that right.

Democrats said privately they included the requirement for vouchers to head off opposition from the White House. Many Democrats opposed the vouchers on constitutional grounds, and a court challenge is virtually certain.

The leadership estimates its plan would cost about $27 billion for five years, but Republicans say its cost would be several billion dollars higher. Stenholm's bill would cost about $20.5 billion over five years.

Both bills provide the bulk of the money in the form of tax credits for low-income families with children, with smaller amounts for expanding Head Start and for distribution to the states.

The leadership goes further by requiring that states set standards for care and by spending more in direct aid - including a program to help schools care for ''latch-key'' children that is not in the Stenholm plan.

Gingrich, R-Ga., said Bush's intention to veto was based on the church-state language, the regulations requirement and the cost.

Some supporters of the Stenholm plan also object to the school-based program because it would slight religious day care and for-profit providers.

Rep. George Miller, D-Calif., chairman of the House Select Committee on Children, said negotiations with the White House on a compromise fell apart because the Republicans mounted ''a full attack on the public schools.''

#90087u1559 03/28/1990 ~United Press International

CHARLOTTE, NC (MARCH 28) UPI - First he forced his partners into a buyout, then Charlotte Hornets owner George Shinn fired his coach and his general manager quit. Now, Shinn is threatening to move the team if he isn't given a bigger share of profits.

''George Shinn is a greedy, selfish man,'' Ed Peacock, a member of the Charlotte Coliseum Authority which controls contracts at the arena, said Tuesday night. ''George Shinn isn't going to get another nickel.''

At issue is the threat that if the Coliseum Authority doesn't fork over a percentage of parking fees and food concession profits, Shinn will move the NBA team to nearby Fort Mill, S.C. and build his own coliseum.

''We wish the coliseum success and want it to continue,'' Spencer Stolpen, Shinn's right-hand man, told WBTV news Tuesday night. ''But we feel like the Hornets should be part of the revenues the team generates.''

Peacock said he isn't surprised Shinn is trying to get a share of parking and concession profits at the coliseum.

''We were expecting that,'' he said. ''We're also expecting him to name himself as coach of the Hornets next year and to name himself the starting center.''

Shinn, at 5 feet 3 inches tall, is not likely to become the starting center. But his hands-on approach to managing the Hornets has resulted in considerable front office turnover.

The son of a widowed textile mill worker, Shinn grew up poor in Kannapolis N.C., and made his fortune running a string of business colleges, which he sold after the Hornets' first year.

Sale of the colleges enabled Shinn to exercise a contract option to buy out his partners. Three of them took the money and left, but one - television mogul Cy Bahakis - filed suit. The matter is now before an appeals court.

Last month, Shinn fired Hornets Coach Dick Harter, complaining Harter treated him ''like a hired hand'' and failed to realize pro basketball is a player's game.

Monday, Hornets general manager Carl Scheer resigned to go to work for the Denver Nuggets. Scheer had asked Shinn for a contract but Shinn declined to give him one and said he made no last-minute offers to convince Scheer to stay. Instead, he gave Scheer a watch and a handshake.

''It's kind of like the situation with your girlfriend and she loves somebody a little bit more,'' Shinn said. ''I didn't get down on my knees to beg, just like I didn't get down on my knees to beg my wife to marry me.

''If she had decided on someone else, I'd have let her go. That's just the way I am. I don't apologize for it.''

The Hornets, the worst team in the NBA with a 14-54 record entering Wednesday night's game, currently have a dollar-a-game lease at the coliseum, which rolled up $5.3 million in profits from parking and concessions during its first 18 months.

The contract with Shinn calls for the Hornets to keep profits from game tickets and the coliseum to keep parking and concession profits. Stolpen said that isn't as good a deal as it sounds for Shinn.

''It's a large disparity with every other NBA team,'' he said, adding that building a new coliseum in Fort Mill is under consideration.

But the Hornets still have a three-year contract with the Charlotte Coliseum, and Stolpen acknowledged that other ways of generating increased revenues are under consideration.

Season tickets for all home games are completely sold out, so increased sales is not an option. But Stolpen said raising the price of tickets - which now average $17 a game - is one possibility.

Meanwhile, Charlotte Mayor Sue Myrick said she has no sympathy whatsoever for Shinn's quest for more money.

''A deal's a deal,'' the mayor said. ''For crying out loud, he's not hurting.''

#90087u1583 03/28/1990 ~United Press International

NEW YORK (MARCH 28) UPI - Weeping relatives filed into a Bronx grade school Wednesday to claim the fire-blackened possessions that the 87 victims of the Happy Land social club fire were carrying when the gasoline-fueled inferno snuffed out their lives.

One woman fainted as she approached the brick school not far from the

gutted club in the rundown East Tremont section of the Bronx.

Angel Zapato, 26, who flew in from Los Angeles, said he came to claim the possessions and body of his brother, Nicholas, 22, and had been waiting for hours.

''Sometimes you feel like the pain is stronger than your strength,'' he said, his voice choked as he unsuccessfully fought back tears. ''I try to keep the tears inside, but sometimes I just can't.''

Outside the club, two bunches of flowers lay against a tree as the curious continued to gawk at the site of the worst mass slaying in U.S. history.

Many of the family and friends later were to attend wakes at funeral homes around the city scheduled for Wednesday, Thursday and Friday as organizations, airlines and the Air Force worked to arrange flights home to Latin America for burial for many of the victims.

Julio Gonzalez, 36, the jilted lover charged with torching the Happy Land club, was being confined at Bellevue Hospital's prison psychiatric ward.

His former girlfriend, Lydia Feliciano, who worked at the club and who escaped unhurt from the blaze, was under police protection after threats from family and friends of the victims.

Reporters and cameramen were not allowed inside Public School 67, and Red Cross officials said family members gathered in its gymnasium before being called individually to counseling rooms where they were given clear plastic envelopes containing wallets, purses, jewelry and other personal effects.

Red Cross official Ken Curtain said families who wanted to take the bodies of relatives home to Central America for burial were being provided with transportation for the bodies, and two airline tickets per family.

He said it was possible additional airline tickets to made available if necessary.

The Red Cross said the Air force would be flying some of the bodies back.

The countries involved in the airlift were Honduras, the Dominican Republic, Equador, Puerto Rico, and possibly El Salvador, he said.

A grand jury was examining evidence against Gonzalez, who is charged with 174 counts of murder - two for each victim.

Bernard Segal, one of two Legal Aid attorneys assigned to Gonzalez, said the reported confession that Gonzalez gave police after the fire was

''suspect.''

He said he had notified the grand jury that Gonzalez has the right to testify in his defense.

''Any defendant has the absolute right to testify but that decision will not be made until the prosecution presents its case,'' Segal said.

Santos Maximo, 34, whose brother, Ines, 22, and nephew, Hector Alvarez, 19 died in the early Sunday blaze, waited outside the school Wednesday morning for his turn.

''There's nothing we can do right now. We've got to cry for all them,'' he said.

Maximo, who works at a fire sprinkler firm, was bitter about the illegal social club that continued operating after an order to close down.

''You gotta have some sort of protection when you go to a place like that '' he said.

The grand jury was also expected to determine whether charges would be brought against the club's landlords, who include movie star Kathleen Turner's husband, Jay Weiss.

Turner said, ''Some crazy man ... could have thrown a fire bomb into a McDonald's or something, and have the same result. It's unfortunate.''

#90087u1588 03/28/1990 ~United Press International

CHICAGO (MARCH 28) UPI - Soybeans tumbled to session lows during the final few minutes of trading Wednesday on the Chicago Board of Trade.

Beans were pressured by professional selling, sharp losses in soybean oil and the weakness in the cash market.

Rumors that country movement of soybeans is beginning to pick up in Brazil also limited buying interest, as did improving weather conditions in soybean growing regions of South America.

Soybean oil was lower, but recovered from steep early losses on active commercial buying. Limited demand at home and overseas was a factor in the weakness of the oil.

A weather system that brought rain and snow to western sections of the Grain Belt and was moving eastward kept the entire floor on the defensive.

Corn also was pressured by an increase in country movement, but had underlying support from the sale of 200,000 tons of corn to South Korea and unknown destinations.

Wheat was lower across the board in sympathy with losses in corn and the lack of export business.

At the close, corn was off 2 to 3 1/2, soybeans down 9 to 11 3/4, wheat off 2 3/4 to 5 and oats down 2 1/4 to 3.

#90087u1596 03/28/1990 ~United Press International

BOSTON (MARCH 28) UPI - A 6-year-old New Hampshire boy died Wednesday at Children's Hospital from a massive bacterial infection, eight days after he became the world's youngest lung-transplant recipient, doctors said.

Danny Beard of Wilton, N.H., died at 11:18 a.m. from ''an overwhelming bacterial infection started in the bloodstream and spread throughout Danny's body,'' said Dr. James Fackler, director of the hospital's multidisciplinary intensive care unit.

The infection was triggered by the body's natural effort to reject the transplant, Fackler said.

''With any organ transplant, the body recognizes the new organ as foreign and we had to go to extraordinary lengths to suppress Danny's reaction to his new lung. Danny's blood pressure was impossible to support,'' even with a heart-lung bypass machine, Fackler said.

The boy received a lung transplant during a 10-hour operation on Mar. 20 in an attempt to overcome a rare condition known as pulmonary fibrosis, which destroyed his lungs.

Prior to the transplant, doctors considered Danny's condition so serious that they felt he had only a few days to live without one new lung.

The Beard family's neighbors in Wilton raised about $15,000 to help pay for Danny's medical expenses.

According to the International Lung Transplant Registry in St. Louis, Danny was the youngest lung-transplant recipient in the world.

Danny was the second lung-transplant recipient in New England. Last year, the operation was performed on about 80 people worldwide.

#90087u1606 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Sen. William Cohen, R-Maine, in another sign the B-2 stealth bomber program will be curtailed, said Wednesday there is a growing Capitol Hill consensus to cut back production of the high-tech batwing plane.

Cohen, a veteran member of the influential Senate Armed Services Committee that will have a major say in what happens with the new strategic bomber, spoke at a briefing arranged by the Union of Concerned Scientists.

Both Cohen and members of the group argued the B-2 should be killed outright.

The Air Force, which is reviewing the plane's fate, wants $5.5 billion in fiscal 1991 for five more planes, which would put the number produced and on order at 20.

The Air Force has proposed eventually buying 132 operational bombers in addition to the one now flying. The plane, designed to be virtually invisible to radar, is built by the Northrop Corp.

The total estimated cost of the fleet is about $75 billion, a figure that does not include its operating expenses or the aerial tankers needed to support the fleet. Michael Brower of the scientists' group, said that total would reach $155 billion over the B-2's useful life.

''I'm not sure the votes are there to terminate the program,'' Cohen said, ''but there is emerging concern that has been expressed to me by members of the Armed Services Committee about the cost and the mission of the B-2.''

He referred to a news story that the Air Force may recommend reducing the buy to just 30 planes and said, ''If the Air Force is thinking 30, I'm sure that there is some consensus in Congress for a substantial reduction or termimation. ... I think that the consensus for capping production is there this year.'' He said it ''is too early to say'' if there are enough votes to kill the program.

Efforts in both the House and Senate last year to halt the B-2 fell far

short, but anti-stealth forces in the House said Wednesday they have at least 130 members willing to publicly back a measure to terminate the project.

At the briefing, Brower said, ''given the budget reality we have to face, the termination of the B-2 program is going to be necessary.''

Stretching out the program and building 70 planes, he said, would save very little, but killing it and equipping the B-1B and newer B-52s with stealth-type cruise missiles could save up to $67 billion - compared to the B-2's price tag - and still provide enough warheads to maintain a credible threat.

Both Cohen and physicist Brower rejected the notion the sleek B-2 could be used to hunt down movable missile targets. Brower said it would cost tens of billions of dollars to orbit satellites to track and target mobile missiles.

Cohen said, ''The notion that you have to penetrate Soviet air defense space and lay a gravity bomb on a mobile missile is no longer credible.''

Cohen and Brower also suggested that much of the argument for the B-2 would vanish if military planners, anticipating a U.S.-Soviet strategic weapons treaty, would start cutting back the nuclear target list from its current level of about 10,000 military, command and industrial sites.

#90087u1619 03/28/1990 ~United Press International

NEW DELHI, India (MARCH 28) UPI - Indian troops opened fire on slogan-chanting Pakistanis who crossed into Indian territory in the disputed Kashmir region Wednesday, killing two people, a defense ministry spokesman said.

The border crossing was the third such incident since pro-secession violence in the Kashmir Valley erupted in mid-January.

India controls most of Kashmir, a predominantly Moslem province, but many in Kashmir are demanding either complete autonomy or the right to become part of Moslem-dominated Pakistan.

A Defense Ministry spokesman said about 100 Pakistani supporters of the Moslem separatist movement in Kashmir gathered at 7:30 a.m. at the village of Rauta on the Pakistani side of the disputed border, about 55 miles west of Srinagar, and began shouting anti-Indian slogans.

The soldiers opened fire and killed two people when the Pakistanis crossed the border and ignored repeated warnings by Indian soldiers to retreat,

the spokesman said.

No further details were immediately available.

In New Delhi, India lodged a complaint with the Pakistani high commissioner, Bashir Babber, over the border incident, saying continued border crossings could have ''tragic consequences.''

On Feb. 5, at least 10 people were wounded when Indian troops opened fire on a group of Pakistani demonstrators who crossed into Indian territory.

Two Pakistani demonstrators were killed and six others were wounded Feb. 11 by Indian soldiers after they crossed the border.

The incidents have strained relations between India and Pakistan, with New Delhi repeatedly alleging that Islamabad has trained and armed pro-independence militants operating in Indian-controlled Kashmir.

Islamabad has denied the charge.

In a related incident, 12 militants of the powerful Jammu and Kashmir Liberation Front escaped early Wednesday from jail in Srinagar, the summer capital of Kashmir, sometime after 2 a.m. when an apparent power failure at the facility caused the lights to go out.

The escape was discovered about 4 a.m. when electicity was restored, authorities said.

#90087u1639 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Backstairs at the White House:

Reporters who cover the White House are beginning to pack their bags - and they won't be able to unpack for the rest of the year.

After two weeks of White House hibernating, President Bush is ready to hit the road again and it will be non-stop from now on.

He will fly to Toronto Apr. 10 to confer with Canadian Prime Minister Brian Mulroney and to take in a Bluejays baseball game.

Three days later, on Good Friday, he will travel to Bermuda to meet with British Prime Minister Margaret Thatcher. And after spending Easter Sunday in Washington, he will fly to Key Largo, Fla., to meet with French President Francois Mitterrand. Also scheduled is a trip to Birmingham, Ala., before Bush takes a short vacation at Islamorada Apr. 21-23.

The president also has a series of annual dinners to attend, including the Gridiron dinner, where he and his top aides will be lampooned in song, and the White House Correspondents Dinner.

And every spring, the president is called on to deliver a number of commencement addresses. He will deliver the commencement address at Oklahoma State University at Stllwater on May 4; the University of South Carolina at Columbia on May 12; and at the University of Texas in Austin on May 19.

And that's not all: There is a good possibility he will go to Europe in late July and South America in late September. Africa and the Far East, including Australia, also are on his agenda.

By Sept. 30, the new Air Force One, now two years overdue, should be available for Bush's first autumn trip abroad.

The plane, which cost about $300 million, is the state of the art in air travel. It will carry many more passengers, boast 85 telephones, and will probably carry the many members of the White House press corps along with the president.

President Ronald Reagan had hoped to initiate the plane but it took a lot longer than expected to work out the kinks with the latest in electronic gear and air travel.

White House press secretary Marlin Fitzwater was in a bind recently when reporters quizzed him about statements that Vice President Dan Quayle made that allegedly gave the Soviets a rationale for going after Lithuanian deserters.

Fitzwater stonewalled, and did not even attempt to tackle the prickly issue.

But later, Quayle's press secretary, David Beckwith, issued a statement declaring as false the Soviet reports attributing to Quayle a position endorsing the violent capture of Lithuanian army deserters.

The brouhaha was a setback for Quayle, who despite a gaffe over the purchase of a porno doll, did a good job on his recent trip to Latin America, where he met with several heads of government.

He will meet again with outgoing Sandinista President Daniel Ortega in Managua at the inauguration of Violeta Chamorro as president of Nicaragua.

The president has tapped his wife, Barbara, for her first diplomatic mission, sending her to the inauguration of Rafael Angel Calderon, who assumes the presidency of Costa Rica May 8.

The first lady is taking along in her delegation, her son, John ''Jeb'' Bush, and White House chief of Staff John Sununu.

In the rumor department, Sununu may make a bid to run for the Senate from new Hampshire. Having served two terms as governor of New Hampshire, Sununu has some clout in the state and he has kept up his political ties with colleagues in the state.

His wife, Nancy, also flirted with the idea of running for Congress, but that appears to be by the board now.

NEW YORK (MARCH 28) UPI - Restricted air corridors over East Germany are likely to be abolished within months, allowing for free air traffic over Eastern Europe and extended landing rights in Berlin, a Swissair executive said Wednesday.

"Restrictions on air traffic through air corridors over East Germany should be lifted in a matter of months," said Otto Loepfe, president for executive management at thge Swiss air carrier. "Lufthansa already was allowed two weeks ago to fly straight into Leipzig, in East Germany." "We certainly expect the restrictions to be lifted some time this year," Loepfe added.

Under an agreement between the four occupying powers - Britain, France, the Soviet Union, and the United States - a limited number of airlines have the right to fly into West Berlin's Tegel airport through restricted air corridors over East Germany.

The West German carrier Lufthansa has been barred since World War II from using the corridors and a number of airlines flying over Eastern Europe had to take longer routes because they could not fly straight across East Germany.

"The lifting of restrictions will improve operations over East Germany, including for airlines flying from Scandinavia to Southern Europe," Loepfe also said.

Swissair, which already flies to Moscow and to all the Eastern European capitals, is applying for landing rights at West Berlin's Tegel airport where it plans on operating one flight a day in a first stage.

"The problem is how to secure permission for new landing rights," Loepfe said. "We have to deal with the occupying powers, and with East and West Germany ... The official application will be filed very soon."

Loepfe expected other airlines to seek rights into Berlin which he predicted will become a key destination, following the rapid political developments which could lead to a unified Germany and reinstatement of Berlin as its capital. Swissair might also seek, at a later stage, to fly to more destinations inside the Soviet Union beside Moscow, he said.

Swissair, which flies to 110 cities in 68 countries, planned on expanding its operations by adding new routes and boosting its recent partnership with Delta Air Lines in the United States, and Singapore Airlines in the Far East.

The partnership aims at increasing the three airlines' revenues through joint ticketing and includes destinations served by Scandinavian Airlines which has a similar agreement with Singapore Airlines.

"One of the things we are considering is joint advertising campaigns, as we started doing to a certain extent with Delta," Loepfe said. "Our partnership is to take advantage of the respective airlines' strength in their own territory, which allows us to reach 313 destinations in about 140 countries."

The Swiss carrier reported increased revenues and profits in 1989, although higher fuel prices in the unusually cold second half of the year eroded some of the benefits.

"Flight operations posted again a profit for the year as a whole, and one that was significantly higher than 1988," Loepfe said, acknowledging that the Swiss carrier, which offers better service but higher fares than many of its competitors, sank in the red in 1984.

Europe remained Swissair's weak division in terms of profits, while traffic over the North Atlantic region increased to 40 percent of the carrier's overall operations.

Loepfe predicted further growth for Swissair in 1990, despite concerns that fuel prices will go up about ten percent this year, a factor which would erode profit margins.

#90087u1684 03/28/1990 ~United Press International
JERUSALEM (MARCH 28) UPI - Israel's Parliament approved a resolution Wednesday reaffirming a unified Jerusalem as the capital of Israel and encouraged Israelis, including new immigrants, to settle in all parts of the city.

The resolution of the Knesset came nearly a week after the U.S. Senate adopted by voice vote a resolution declaring Jerusalem - including the portions captured by Israel in the 1967 Six Day War - the capital of Israel.

The Senate resolution, which also called for protection of the rights of all ethnic groups in the city, was not binding on the Bush administration.

Few nations recognize Jerusalem as Israel's capital and most countries, including the United States, maintain their embassies in Tel Aviv, with only consulates in Jerusalem.

Prime Minister Yitzhak Shamir told a United Jewish Appeal conference on immigration Wednesday that Israel would never negotiate on Jerusalem's status.

''The status of our capital is not open to any negotiations,'' Shamir said at the conference in Jerusalem. ''The status of Jerusalem was determined by King David 3,000 years ago. Ever since then, it was, it has remained

and it shall always be the one and the only capital of the Jewish people and the Jewish state.''

The Knesset resolution urged Israelis, including new immigrants, to settle all parts of Jerusalem. Several Jewish neighborhoods in the city were created after Israel captured East Jerusalem, the West Bank and Gaza Strip during the Six Day War. They stand outside Jerusalem's pre-1967 borders.

Less than half of the Knesset's 120 members were in the chamber to vote on the resolution, which passed 45-4.

NEW YORK (MARCH 28) UPI - Consumer confidence perked up in March, the first significant improvement in five months, according to a Conference Board report released Thursday.

The Board's consumer confidence index, set in 1985 at 100, was 110.2 in March, a moderate gain of some 3.5 points for the months.

Consumers were not quite as positive about ongoing busiess conditions as they were the month before, but expectations for the future were more optimistic. Buying plans were mixed.

The monthly survey covers 5,000 U.S. households.

Some 20 percent of repsondents felt that current business conditions were ''bad,'' up about 2 percentage points from last month. Opinion was marginally more positive regarding the present availability of jobs.

In looking ahead to the next six months, however, people were signficantly more optimistic about both business conditions and the availability of jobs than they were in the first two months of this year. For the first time since last December, optimists outnumbered pessimists in assessing the question of future job availability.

''The impoved mood in March entirely reflects the consumer's marked rise in optimism for the immediate period ahead,'' said Fabian Linden, executive director of the Conference Board's consumer research center.

''The substantial increase in the number of new jobs in recent months has contributed to the increasing sense of job security. This development has also apparently made consumers feel more comfortable with the general business outlook.''

Intentions to buy a car have been edging up since last October, with 7.7 percent of all respondents expressing such plans in the March survey.

Homebuying plans retreated to 3.4 percent during the month from 4.1 percent in February, reflecting the recent rise in mortgage rates.

#90087u1785 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Jesse Owens, who punctured Adolf Hitler's theory of a superior Aryan race at the 1936 Olympics by winning four gold medals, Wednesday was posthumously presented a ''fifth gold medal'' by President Bush.

''This one ... for his humanitarian contributions to the human race,'' Bush said at a White House ceremony where he honored the legendary black track star with the Congressional Gold Medal, the nation's highest civilian award.

Bush cited the athletic prowess of the one-time ''fastest man on Earth,'' as well as his numerous programs for America's children, such as youth ''Olympic'' games and the Jesse Owens Foundation that provides college scholarships.

The president, joined by members of Owens' family, including his wife Ruth said, ''I know it is a point of pride ... that the Jesse Owens

scholarships are awarded without race, creed or color. And it's that legacy that we celebrate here today.''

Owens, who died a decade ago, sprung to fame as a young sprinter in the 1936 Olympics in Berlin, the last Olympics before the outbreak of World War II.

Said Bush, ''The Berlin games were to be the showcase of Hitler's theories on the superiority of the master race until this 23-year-old kid ... raced to victory in the 100-, 200- (dashes) and 400-meter relay.'' He also won the long jump.

''It was an unrivaled athletic triumph,'' Bush said. ''But more than that, it really was a triumph for all humanity.''

Mrs. Owens, in brief remarks, said, ''Jesse's work is now carried on'' through his foundation, the Jesse Owens Games and the International Amateur Athletic Association.

She told the president, ''On behalf of the youth he still inspires, and on behalf of my family, we thank you.''

#90087u1803 03/28/1990 ~United Press International
MANAGUA, NICARAGUA (MARCH 28) UPI - A political accord between Nicaragua's outgoing and incoming governments spotlights the fate of the army and the Contra rebels as one of the thorniest obstacles to a smooth transition of power, diplomats and politicians said Wednesday.

The official Sandinista newspaper Barricada Wednesday called the accord ''one of the most transcendental documents'' in the last decade of Nicaraguan history.

The accord, signed Tuesday by officials of President Daniel Ortega's lame-duck Sandinista government and aides to President-elect Violeta Chamorro, sets the rules for the power handover that is scheduled for April 25 and contains political concessions by both sides.

The leftist Sandinista Front, for example, made its clearest commitment to date to turn over command of the 70,000-strong Popular Sandinista Army to Chamorro and to allow her to make significant changes in the military's size and role.

''The forces of defense and Public Order will be subordinate to the civilian power of the president of the republic in accordance with the constitution and the laws of the republic,'' said Tuesday's agreement, entitled, ''A protocol of procedures for the transfer of executive power.''

In exchange, Chamorro's transition team joined in a call for the Contra rebels to disband and pledged that the incoming government would not try

to purge the army and police office corps - giving in to demands by Sandinista officials who have said they could not guarantee a peaceful handover to Chamorro otherwise.

The agreement said that fulfillment of a plan issued by the Contras last week to dismantle their army of about 10,000 anti-Sandinista rebels ''is an essential element to create the climate of peace, stability and tranquility in which the transfer of government must take place.''

''Both sides are endorsing some of the other's positions,'' said a Latin American diplomat Wednesday. ''That is an indication of progress.''

In the days after Chamorro won a surprise 55-41 percent victory over Ortega in Feb. 25 national elections, foreign and Nicaraguan observers predicted an acrimonious and possibly violent transition period, in which the outgoing Sandinistas would fight to retain control over the army and police.

The diplomat said Tuesday's agreement was a sign that the two sides may have reached a preliminary agreement on how to handle the military and police, which have been closely linked to the Sandinista Front since a 1979 revolution put the Sandinistas in power.

But he and other observers said it was unclear whether that deal would be enough to persuade the Contras to lay down their weapons quickly.

Although the U.S.-backed rebels have signed an accord with Chamorro's government recognizing the election results and promising to disband and disarm, there are indications the rebels want to hold on to their weapons as long as possible.

The Contra agreement calls for rebels inside Nicaragua to gather in yet-to-be-designated cease-fire zones under United Nations and Organization of American States supervision and then to hand in their weapons, while rebels in base camps in neighboring Honduras are supposed to disarm by April 20.

But reports from Honduras indicate thousands of Contras are slipping across the border into Nicaragua to avoid the April 20 deadline.

One source familiar with the Contras said the rebels would press their calls for a virtual dismantling of the Sandinista army in spite of Chamorro's commitment not to purge the officer corps, and that the rebel demand could hamper the effort to disarm the anti-Sandinista rebels before Chamorro takes office.

Adan Fletes, a member of Chamorro's National Opposition Union coalition, said Wednesday there would be deep changes in the military and police, but

declined to comment on whether those changes would be enough to satisfy the Contras.

The editorial in Barricada said Tuesday's political agreement ''firmly guards the preservation of the forces of the Popular Sandinista Army'' and added that ''it is indispensable for the the Contras to disarm without reservations.''

#90087u1808 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Cuba jammed the second day of test tranmissions of a U.S. propaganda television station on Wednesday, but the State Department said that the TV Marti project would continue.

Cuba also filed a complaint with the Federal Communications Commission over the broadcasts, which are beamed toward the Caribbean island from a tethered balloon in the Florida Keys.

The State Department says the broadcasts are in accordance with international laws and regulations.

Department spokeswoman Margaret Tutwiler said the second day's test of TV Marti began at 3:45 a.m. EST Wednesday and continued for three hours on channel 13. She said Cuban jamming began about two minutes after the broadcast began.

She described the broadcast as a mixture of everything from baseball to MTV, the music video cable channel, to a documentary feature on Albert Einstein.

''The test transmissions will continue,'' she said.

The Cuban government, which describes the broadcasts as an invasion of Cuban sovereign rights, said Tuesday the TV Marti project could have ''incalculable consequences'' for relations between Havana and Washington.

Under the law setting up the station - a companion to a radio project also aimed at undermining Cuban President Fidel Castro - funding for TV Marti will be approved by Congress only if it is shown the programs reach an audience large enough to warrant the cost.

Tutwiler said it is logical to assume that if the Cuban jamming is effective, the necessary audience would not be reached.

The TV Marti signal, originating in Washington, was jammed - that is, made unintelligible - by the Cubans' sending another signal on the same wavelength.

In addition to jamming TV Marti, Cuba has threatened to retaliate by interferring with other U.S. broadcasts. It recently used giant Soviet-built transmitters to override at least four Florida radio stations with a lengthy speech by Castro.

#90087u1814 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - With the April 16 deadline approaching, the Internal Revenue Service said Wednesday it received more than half of the 111 million income tax returns expected this year and approved $29.8 billion in refunds. "The filing season is going well," the agency said.

As of March 23, the IRS said it received 54.9 million income tax returns, compared to 53.1 million returns at the same time last year, and processed an estimated 46 million returns vs. 42 million as of March 24, 1989.

As of March 22, the IRS said it approved more than 35 million tax refunds, at an average of $846 per refund. That compared to 31 million refunds at the same time last year worth a total of $25.6 billion and an average of

$816.

-30- 932
#90087u1839 03/28/1990 ~United Press International
WASHINGTON (MARCH 28) UPI - Energy Secretary James Watkins told a congressional panel Wednesday that two critical nuclear weapons production plants closed for safety problems will be partly reopened by the end of the year.

But Watkins said he would need increased federal funding to ensure proper oversight of the nation's troubled plants.

''Unfortunately, there is a shortage of skilled, technically competent federal managers,'' Watkins told the House Armed Services subcommittee on nuclear facilities. ''You expect me to do a job, I've got to have the skill.''

Watkins said the Energy Department would phase in the operation of the Rocky Flats plant near Denver, closed last year, and the Savannah River plant near Aiken, S.C., which was shut down in 1988.

Both plants had poor safety precautions. Rocky Flats, which produces plutonium ''triggers'' for nuclear warheads, also is plagued by contamination problems.

The Savannah River plant produces tritium, a radioactive gas that decays rapidly and is used in nuclear warheads to boost explosive capability. The Energy Department plans to reopen one of the plant's three reactors within the year.

''By the end of this year the department expects to have the first reactor operating at Savannah River and facilities processing plutonium at Rocky Flats,'' Watkins said.

Watkins acknowledged, as he has in the past, that previous administrations failed to address safety or environmental concerns of nuclear production facilities, for which ''the United States is paying a high price.''

Members of Congress generally agreed and complimented Watkins for trying to bring the weapons faclities into line with safety considerations.

But Watkins at times appeared combative and suggested that Congress has not fully supported the Energy Department's efforts. He said Congress would have to share the blame if the department were unable to keep apace with plans to rebuild the nation's dangerously obsolete weapons plants. He said that while the Senate approved increased funding for plant modernization last year, the House refused to follow suit.

''I should not be held hostage for some other discussions going on on the overall defense budget as a whole,'' Watkins said. ''We desperately need this money to do my job.''

Watkins said he was particularly concerned that the department may not have adequate funds to accelerate the cleanup of the Hanford Nuclear Reservation facility in eastern Washington. The plutonium finishing plant may require an additional $500 million to support cleanup activities, Watkins said.

But the discussion did not entirely focus on monetary questions. Rep. Pat Schroeder, D-Colo., expressed concern about the department's plan to introduce a new processing procedure at Rocky Flats to cut waste and reduce the amount of plutonium residue stored in drums.

Schroeder said that in light of the Energy Department's plan to mothball the plant by the year 2010, it should consider ''relocating the residues'' to another facility.

But Watkins said the plan ''is essential for the phase out of Rocky Flats. There is no alternative.''

WASHINGTON (MARCH 28) UPI - A genetically engineered enzyme with the power to reduce the appetites of crop-damaging caterpillars may pave the way for development of better, non-chemical insecticides, researchers reported Wednesday.

A team from the University of California-Davis and England's NERC Institute of Virology said it has developed a laboratory method of making an enzyme called juvenile hormone esterase or JHE.

Scientists have known for years that JHE inactivates a juvenile hormone that spurs young moth caterpillars to feed at high rates. When levels of JHE rise, levels of the feeding hormone drops and the caterpillars stop eating and form pupuae, in which they gradually transform into adult moths.

Theoretically, exposing caterpillars to JHE earlier in their life cycles could reduce crop damage caused by their ravenous appetities. But because the enzyme occurs in very minute amounts and is difficult to purify from caterpillar blood, researchers had not obtained enough JHE to test that idea in the laboratory - let alone enough to use in the field.

Now, University of Calfornia's Bruce D. Hammock and his colleagues said they have found a way to artificially produce substantial quatities of JHE. The complicated technique involved inserting the moth gene that codes for JHE into a moth virus and then using that genetically-engineered virus to infect insect cells, which in turn cranks out JHE.

After suitable levels of JHE were produced, the researchers tested the action of the enzyme in caterpillars in their laboratory. They found injecting the laboratory-made enzyme clearly reduced feeding hormone activity in tomato hornworn caterpillars, an activity indicated by the blue-green caterpillars turning black. The caterpillars reverted to their normal color when the enzyme's action was blocked.

Feeding and growth of another type of moth caterpillar - treated by placing the genetically engineered virus on the caterpillars' food - ''were profoundly reduced'' compared to untreated caterpillars or those infected with a control virus, researchers said.

But there are drawbacks. Reporting in the journal Nature, researchers said their man-made enzyme currently does not act as long or work as early in the caterpillar's life cycle as would be needed to protect crops on a widescale basis.

''If these problems can be overcome ... the JHE gene offers a very attractive tool for the development of genetically engineereed insecticides,'' the researchers wrote.

WASHINGTON (MARCH 28) UPI - Jesse Jackson kicked off a national tour Wednesday to focus public attention on environmental problems afflicting poor and minority communities, which he says are more likely to be locations for hazardous industrial plants.

Jackson began his National Environmental Justice Tour at a school in the River Terrace neighborhood of Washington that is located near a power plant and an incinerator, both of which emit harmful pollution.

Jackson, noting that local activists were fighting utility plans to build two new electric generators in the area, said he wanted the nation to recognize the disproportionate environmental threat to poor communities that do not have the political clout to keep out health-damaging facilities.

Over the next week, the civil rights leader is scheduled to speak at an environmental forum in Atlanta, tour toxic waste sites affecting Hispanic and Indian communities in Albuquerque, N.M., and rally with local environmental activists fighting pollution problems in Richmond and East Los Angeles in California and Baton Rouge, La.

Also traveling with Jackson will be Denis Hayes, leader of Earth Day 1990, one of the groups planning activities for the 20th anniversary of the first Earth Day on April 22.

LOS ANGELES (MARCH 28) UPI - Times Mirror Co., citing lower advertising revenues and poorer performance of the company's newspaper sector, said Wednesday it expects first-quarter operating earnings to decline compared with the 1989 quarter.

Times Mirror, publisher of the Los Angeles Times, posted an operating profit of $129.6 million in the first quarter last year. The media and information company earned $68.8 million, or 53 cents a share, in the 1989 quarter.

Times Mirror said advertising revenues for its Newspaper Publishing group for the four weeks ended March 4 totaled $128.4 million, off 1.9 percent from the same period last year.

For the nine weeks ended March 4, total advertising revenues for the group

were $282 million, off 2.8 percent from the year-ago period. The company said the 1990 period contained nine Sundays while the 1989 period had ten Sundays.

"As a result of the deterioration in the newspaper group's operating performance, coupled with downturns in our other advertising-supported business lines, we now expect first-quarter operating results in 1990 to be considerably lower than the 1989 level," said Robert F. Erburu, chairman and chief executive officer.

"Advertising volume at our Eastern newspapers and our magazines remained at depressed levels in February, well below our earlier expectations for these segments," Erburu said.

"At the same time, strong circulation growth at the Los Angeles Times has increased operating costs, despite lower newsprint prices," he said. The Times currently has a daily circulation of 1.1 million copies and a Sunday circulation of 1.4 million.

#90087u1917 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - The top 32 political action committees connected to members of Congress raised $14.9 million from 1987-1989 but gave only $3.2 million to candidates, a Common Cause study released Wednesday showed.

However, the study by the self-styled public interest group, gave no indication of what happened to most of the money not used for campaigns.

At issue in the report were so-called member PACs - political action committees specifically associated with a member of Congress. The main use of the PACs is for lawmakers to help other candidates and accumulate political IOUs in the process.

But Common Cause said a study of finance summaries from the PACs showed only a small percentage of the money collected by many of the PACs went to candidates.

For example, it said that Campaign America, a PAC associated with Senate Republican leader Robert Dole of Kansas, collected more than $5 million but contributed only $430,511 to other candidates. Dole ran an unsuccessful race for the GOP presidential nomination in 1988.

The PAC connected to Rep. Pat Schroeder, D-Colo., raised more than $1 million, but gave no money to candidates, the group said, while the PAC associated with Sen. Edward Kennedy, D-Mass., collected $1.1 million but contributed only $149,916 to candidates.

The PAC connected to Sen. Richard Lugar, R-Ind., raised $1.48 million, but donated $193,500, it added.

Common Cause said it did not examine how the money was used. However, it used the figures to call for a ban on such PACs.

It argued the member PACs made it easier for special interests to skirt campaign finance restrictions and could make it easy for a House or Senate member to convert the money to personal use.

In addition to the 32 member PACs studied by Common Cause, the group said there were also 15 other such PACs that each raised less than $25,000 from Jan. 1, 1987, to Dec. 31, 1989.

#90087u1930 03/28/1990 ~United Press International

(MARCH 28) UPI - British authorities say a joint investigation with U-S officials has uncovered a nuclear bomb triggering device that was about to be shipped to Iraq. British customs officials seized the electronic device at London's Heathrow Airport. They arrested several people in and around London... including Iraqi citizens.

Western diplomats say China appears to be sending short-range missiles to a Middle Eastern nation. The arms sales are a way for China to earn hard currency since the West imposed political and economic sanctions against Beijing for its crackdown on pro-democracy forces. The missiles are believed to be MB's, with a range of 50 to 75 miles.

Analysts say today's Commerce Department report shows that the economy performed well enough in 1989 to cool fears of a recession. The Gross National Product was up three percent, compared to four-point-four percent last year. But after-tax profits of American corporations fell four-point-seven percent.

The government says new-home sales made a huge gain in the South last month... but that was offset by a big plunge in sales in the Northeast. Nation-wide sales of new single-family homes moved up by three-point-one percent in February, with the median price climbing five-thousand dollars, to 130-thousand dollars.

A new study released today says deregulation has been bad for the airline industry... contradicting findings of a recent government report. The study by the NON-profit Economic Policy Institute says airline deregulation has contributed to higher fares... poorer service and safety... and a deterioration of labor-management relations.

#90087u1943 03/28/1990 ~United Press International
WASHINGTON (MARCH 28) UPI - A skeptical Senate Banking Committee Wednesday challenged the credentials of Timothy Ryan, President Bush's nominee to become the nation's top savings and loan regulator, to lead the Office of Thrift Supervision.

Ryan, 44, is a former Labor Department lawyer with little experience related to the savings and loan industry.

''You have virtually no experience in any way with financial institutions. That's a remarkable statement by the administration,'' said Sen. Timothy Wirth, D-Colo.

''I want to be candid. The president has had five months to consider a nominee, but all the information I have show (Ryan) has no knowledge of the thrift industry,'' said Sen. Alan Dixon, D-Ill. ''I have serious reservations.''

Ryan told the panel he was surprised when Treasury Department officials

called him three to four weeks ago to ask if he was interested in the position.

''I did not seek the job,'' he told the panel. ''To be quite frank, I was surprised when I received the call.''

Ryan said he is not an expert on the thrift industry, but said he has studied the industry for the past four weeks and met with several thrift regulatory officials to grasp the industry's situation.

''I am a quick learner, dedicated and willing to take on an enormous challenge,'' he said.

Ryan stressed his reputation as an effective administrator and seized upon the panel's frustration at the government's slow-moving thrift rescue effort.

''I have a reputation for moving things along,'' he said. ''Quite frankly, gentlemen, I make things happen.''

The confirmation hearings are the first for a director of the beleaguered Office of Thrift Supervision, created last August by the administrations's $166 billion thrift bailout legislation to regulate the savings industry.

Savings and loan industry watchers expected the confirmation hearings to turn into a political battleground, giving Democrats an opportunity to challenge the effectiveness of the administration's thrift rescue effort.

Despite pressure to speed the healing of the savings industry, thrifts continue to bleed red ink, posting a $19.2 billion loss last year and a $6.5 billion loss in the fourth-quarter alone.

Ryan was nominated by Bush last week, just days after a U.S. district judge found that former OTS director M. Danny Wall and his temporary replacement, Salvatore Martoche, were appointed illegally.

U.S. District Judge Royce Lamberth agreed with arguments by Olympic Savings and Loan Association of Berwyn, Ill., that Wall's appointment was improper because he had never been confirmed by the Senate.

Wall, who resigned in December, served previously as chairman of the Federal Home Loan Bank Board and was named to head the OTS when it was created last August by the administration's thrft bailout legislation.

Wall said the Senate approved language in the bailout bill that allowed him to bypass the traditional confirmation hearings.

Last Friday, a federal appeals court granted the government a 30-day

emergency stay of the lower court's ruling. Government lawyers argued that Lamberth's decision threatened to throw the government's thrift rescue effort into chaos until a permanent director is confirmed by the Senate.

Before the hearing began, Charles Keating, former chairman of the failed Lincoln Savings and Loan Association, which federal regulators took over last April, told reporters the committee had refused to allow him to testify. Keating said he wanted to tell the committee that the savings industry has a ''distinct interest'' in seeing that only the most qualified regulators be in charge.

#90087u1947 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - The governor of Idaho has got hold of a hot potato.

Time is running out for Cecil Andrus to decide whether to sign a highly controversial bill into the nation's most restrictive abortion law.

The Democratic governor, on record as an abortion foe, will be damned if he does and damned if he doesn't.

If the bill banning most abortions becomes law, the National Organization of Women will boycott Idaho's $630 million potato crop.

''I would expect such a boycott to have quite a big impact,'' said Barbara Bergmann, distinguished professor of economics at Washington's American University.

Bergmann recalled that feminists fighting unsuccessfully for an Equal Rights Amendment urged firms and organizations not to hold conventions in states that failed to ratify the measure.

''This boycott would have much wider implications because a much larger proportion of the population eats potatoes than attends conventions,'' Bergmann said.

''This would be more akin to the grape boycott,'' she added, referring to the boycott Cesar Chavez used to forge the first viable farmworkers' union in California.

''I think the effects of this one would be even more severe because there are some very close substitutes for Idaho potatoes, mainly other types of potatoes. There is also pasta and rice.''

Rather than boycotting grapes to help those harvesting them, Bergmann said shoppers refusing to buy Idaho potatoes ''would consider that they were

helping themselves.''

Allan Lichtman, a history professor at American, doubted a potato boycott would have much impact on Idaho's economy ''in the short run,'' but he noted that just the threat of one ''has publicized the pro-choice position.''

Noting that the law could serve as a model for other states, Lichtman said the proposed boycott ''puts pressure on the governor and makes his decision a national one.''

''The beauty of this boycott,'' said NOW spokeswoman Patricia Ireland, ''is that single mothers who don't have time to march and lobby can simply choose rice over potatoes. It's a real easy way for a lot of people to get involved. Rice will look nice next to the broccoli on our plates.''

Ireland said her organization is ''just starting to move'' on plans for a boycott, the effects of which she acknowledged could be severe.

''Boycotts are strong medicine,'' she said, noting that MacDonalds ''buys a lot of potatoes from Idaho for its French fries.''

Ireland conceded there may be some pro-choice farmers in Idaho who would be hurt by a boycott ''but you have to weigh this against women's lives. The legislators in Idaho are just not listening.''

Andrus promises a decision in a day or two on whether to veto the no-win bill which would provide civil penalties for doctors who perform abortions.

Meantime, to help the governor make up his mind, an angry crowd of 1,000 was raising unshirted hell Wednesday afternoon in front of the Capitol.

Some of the demonstrators chanted ''Pro-life,'' while others yelled ''Freedom means choice.''

#90087u1976 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - Rep. Gus Savage, D-Ill., accused of making anti-Semitic remarks during his tough Democratic primary campaign for re-election, called a pro-Israel lobby group Wednesday ''illegally affiliated'' and ''un-American.''

In a speech to the House, Savage boasted of his March 20 primary victory in his overwhelmingly Democratic South Side Chicago district.

Savage, a 10-year veteran congressman, was recently criticized but not punished by the House ethics committee for alleged sexual misconduct with a female Peace Corps worker in Africa.

Savage said he won renomination despite efforts to beat him by the news media and the American Israel Public Affairs Committee, an American pro-Israel lobby.

''Mr. Speaker, I have just won re-election in a primary ... last week against the network of television and daily newspaper reporters and the American Israel Public Affairs Committee, an illegally affiliated political action committee and, as a consequence, have been denounced by those - some in this body - who would be intimidated by this group that pledged loyalty to a foreign government above its loyalty to America,''

Savage said.

He said that on Thursday, ''After the business of this House, I am going to lay out the facts for this nation via C-SPAN so they can find out the dangers that democracy faces from this un-American organization.''

C-SPAN, the public affairs cable television network, covers House and Senate proceedings, including the speeches of House members after legislative business is completed.

He said that on Thursday he also would show interested colleagues and invited reporters a videotape of his controversial March 17 speech at the only campaign rally of his renomination bid.

During the rally, attended by Nation of Islam leader Louis Farrakhan, with whom Savage has long been associated, Savage read the names of Jewish contributors to his main Democratic opponent, Mel Reynolds.

On the House floor, Savage said he decided to screen the tape of his rally remarks ''for which I have been charged with bigotry, for all members of this House to see and for invited members of the Washington press corps to find out who are the victimizers and who are the victims.''

''Eighty percent of all his individual contributions came from members of AIPAC,'' Savage said at the rally, suggesting Reynolds would be beholden to Israeli interests if elected. ''He who pays the piper calls the tune.''

Savage won the race 51 percent to 43 percent - the tightest race of his career - over Reynolds, a Rhodes scholar who had the backing of many of Chicago's leading black Democrats. A third candidate captured 6 percent.

Savage faces nominal Republican opposition in the fall general election.

Assistant House Democratic leader William Gray of Pennsylvania, and Rep. Charles Rangel, D-N.Y., chairman of the House Select Committee on Narcotics Abuse and Control, both attended and spoke at the Savage rally but left before Savage made his controversial comments.

Gray issued a statement this week saying he found many of Savage's remarks about the ''Jewish money'' contributed to his opponent ''unacceptable, divisive and bigoted.''

''Such language I reject and condemn,'' said Gray, whose appearance on behalf of Savage caused some grumbling in House Democratic ranks. ''This language conveys stereotypes that I reject,''

Rangel said last week that had he known what Savage was going to say at the rally, he would not have traveled to Chicago to endorse him.

Last year, a female Peace Corps worker accused Savage of making unwanted sexual advances toward her while the lawmaker was on an official trip to Zaire. The House ethics committee investigated the matter, criticized Savage's behavior and made him apologize. But the panel recommended that no action be taken against Savage.

#90087u1978 03/28/1990 ~United Press International

NEW YORK (MARCH 28) UPI - American Telephone & Telegraph Co. said Wednesday it will reduce its work force of about 281,400 employees by at least 6,000 people this year.

In Washington, the two unions negotiating an employee early-retirement package with the telecommunications company said they broke off the talks and labelled the layoffs unfair.

AT&T said the staff reductions, which the company did not describe as layoffs, reflected lower demand for manpower at AT&T's network services division, which is being fully upgraded to digital technology.

''Labor savings will result in reduction of up to 6,000 jobs in AT&T's network service division by the end of this year or early 1991,'' the company said.

''The staff reduction might include some layoffs and job cuts through attrition and early retirement, depending on the outcome of the early retirement negotiations,'' an AT&T spokeswoman said.

AT&T also intends to reduce its worldwide staff of 281,400, including 17,000 overseas, through an early-retirement incentive package that applies to about 20,000 non-management employees in the United States.

AT&T disclosed two weeks ago it was negotiating with two unions - the Communications Workers of America and the International Brotherhood of Electrical Workers - an early-retirement incentive package for non-management workers.

''AT&T is once again attempting to reap greater profits at the expense of its employees and customers,'' the CWA said.

''Negotiations between AT&T and its union, CWA and IBEW, broke off yesterday when the two sides were unable to agree to changes in the company's pension plan,'' the CWA said.

''By closing more offices and laying off workers, AT&T is destroying its ability to provide high-quality service and is destroying employee morale '' said Jim Irvine, CWA vice president for communications and technology.

''Last week AT&T raised its shareholders' dividends by 10 percent...and is able to sweeten the pot for retiring managers,'' Irvine added. ''But workers are being asked to bite the bullet. ... That's not fair.''

''Now, instead of allowing people to leave the company voluntarily...they (AT&T) will disrupt and destroy the lives of thousands of working families by forcing unnecessary layoffs,'' Irvine said.

AT&T said it will devote $2 billion in 1990 for the construction of its digital network. The company is close to completing the entire conversion of its network to the high-quality digital system, which replaces the less reliable, more labor-intensive analog system.

The staff reduction is part of a restructuring AT&T announced Dec. 11 in a bid to be more competitive against rival long-distance carriers, MCI Communications Corp. and US Sprint, a subsidiary of United Telecommunications Inc.

AT&T, which has been losing market share to its competitors since the 1984 break-up of the local Bell telephone companies, now controls an estimated 71 percent of the residential long-distance business in the United States.

James Mason McCabe, an industry analyst with Nomura Research Institute, viewed AT&T's retirement offer as fair.

''Digital technology reduces the need for manpower. The unions should have been aware of this. What AT&T is proposing is a fair package,'' McCabe said.

The restructuring includes the consolidation of some operations.

''Some 160 work centers in about 60 metropolitan areas will be replaced by some 100 centers in about 30 cities, beginning as early as May,'' AT&T said.

AT&T said in December it was targeting four of its 19 units for staff

reductions, but the job cuts announced Wednesday affect only the network services unit. Other units slated for a projected 2,500 job cuts are material management, business communications systems and general systems.

AT&T spokesman Burke Stinson said the company had submitted a new offer about early retirement to the unions Tuesday.

''We presented yesterday a proposal that was a good one. ... The difference with the unions is that AT&T wants each of its units to individually decide whether the incentives package should apply, while the unions want the offer to be made across the board for all employees,'' Stinson said.

The unions have said they did not object to the principle of offering early retirement to non-manager employees but wanted the package to be comparable to a similar one AT&T offered last year to its managers.

About 12,000 managers took advantage of the early-retirement package last year. This included 2,400 managers at the network services division.

AT&T stock ended the day higher on the New York Stock Exchange, closing up 62.50 cents at $42.875.

#90087u1989 03/28/1990 ~United Press International

WASHINGTON (MARCH 28) UPI - A House committee approved legislation Wednesday that would authorize, up to the cost of $7.5 billion, construction of the superconducting super collider in Texas.

The proposal by Rep. Robert Roe, D-N.J., chairman of the House Science, Space and Technology Committee, would place a $5 billion cap on federal spending for one of the most ambitious scientific projects ever undertaken. The plan would limit total costs to $7.5 billion.

In a contentious session that saw the defeat of several amendments aimed at terminating the project, the committee voted 32-9 for the broadest congressional support yet for the project.

''If the Congress truly believes ... that the SSC will become an unparalleled international center for science, education and technological applications, then we should provide the program with the stability and continuity that it needs to flourish,'' Roe said.

''The SSC program has matured to the point that it is now entirely appropriate that we adopt a long-term authorization bill for the project '' Roe said.

Congress has so far approved funding for the project, primarily for the research phase, on a year-to-year basis. The administration's proposal for fiscal 1991 funding is $318 million.

Roe said his bill would protect the super collider from ''nitpicking it to death through the appropriations process'' every year. But even with the broad spending authorization, the House and Senate appropriations committees would still have to approve yearly fiscal budgets for the collider.

Under the bill, Texas would contribute the $1 billion the state has already promised for the project and the remainder would come from anticipated international participants and ''any other state or industry sources.''

Scientists hope to use the super collider, an underground tunnel of supermagnets 54 miles in circumference capable of colliding protons at immense speed, to unlock the secrets of the smallest building blocks of the universe.

The committee defeated, 33-13, an amendment by Rep. Sherwood Boehlert,
